American Railroad Journal.

New York, Saturday, January 3, 1863.

Financial Review for the year 1862.

The close of the present year finds the country still laboring under the difficulties of a civil war, and the loyal States surprised and vexed at the want of a more vigorous prosecution of it on our part. With unexampled resources of money, with an army superior in numbers, and a navy of extraordinary strength, the contest drags on without decisive results, and no man is sagacious enough to foresee when it will terminate. All parties agree in condemning the manner in which it has been conducted, but neither public opinion nor discontent seem to have any effect on the parties who are responsible for inefficiency and misdirection. The great danger is that our predominance in material power, may be lost by intellectual inferiority.

Strange to say, however, that the Northern and Western sections of the Union have within their own areas suffered nothing of the actual evils of war. Our commerce has been on the increase from the last year and is very nearly what it was the year before.

In 1860 our total imports were $225,497,923, in 1861 $125,788,482, in 1862 $171,735,104.

Our produce exports were:—In 1860, $100,905,966; In 1861, $135,944,176; In 1862, $153,020,458.

The balance of trade for some months past, judging from the Custom House returns from the city of New York, has been from week to week considerably in our favor, and but for the return of our stocks sent from abroad to be sold and pressed upon the market, we do not see how the shipment of specie to this country should not have continued to have been made as heretofore. The war debt gives the greatest anxiety, and it is accumulating rapidly. It must be remembered, however, that by the issue of Treasury notes, the amount of funded debt itself is at present not larger than has been stated in the report of the Secretary of the Treasury, and whether that issue was the best or worst policy, for there are two sides of this question taken, it has certainly been efficient not only in furnishing means for carrying on the war but stimulating production and business to an extraordinary degree. Our war debt of 1816 was $127,500,000, and the population was then 8,500,000. Yet this debt was extinguished in 1835. But our population has more than doubled, and the resources of the country as ascertained by the late census are of the actual and fixed value of thirty thousand millions of dollars. It is also calculated that the use of the money issued by the Government and received by the people for their products and labor incidental to the war, is equal to a profit of ten per cent, while it is taking the shape of fixed investments, and adding to the permanent wealth and resources of the country. All that is not funded will go into railways, lands, ships, houses, factories and machinery. Never before in this country was there a more useful currency, or so much of it as at the present moment. If it is used with proper care by the skilful, the industrious and enterprising, it will do wonders, and above all enable the country to meet the war debt in future years, with comparative ease.

The Railway interest has greatly benefitted by these and other circumstances the past year. The enormous products of the west, hitherto having the option of the Mississippi for a channel to market, has been turned north and eastward. The repeated injuries done by the enemy to the line of the Baltimore and Ohio, have had a similar effect. And the consequence has been that the traffic of the Great Northern and Eastern lines has been so enormous, as to almost exceed their capacity, through the canals have at the same time been their competitors. There has been a steady rise in the value of their shares, in many instances resumption, and increase of dividends in all instances, increase of earnings, and the renewal of public confidence in their value and management. The increase of railways mileage has been limited during the past year, from the necessities of the time to about 666 miles. The most extensive work in progress is that of the Atlantic and Great Western, which we have recorded step by step, through its completed distance of 205 miles, and which will prove a first class work in all respects, honorable to the projectors and of incalcalable benefit to the States of Ohio, Pennsylvania and New York. The Pacific Railway was inaugurated by a meeting of its corporators at Chicago in September last. Its necessity and importance were there fully demonstrated. Books of subscription were subsequently opened at all the principal cities and towns in the loyal states, so that all might have an opportunity of aiding this great national work who were so inclined. The result of this effort though not yet fully known, is however that the sum of two millions required by the charter before the final organization could take place, has not been obtained, and the books are now closed everywhere except in the city of New York. The explanation is easy. There have been numbers of capitalists ready from the first to give substantial aid to the work and push it along. Offers have been actually made to construct several hundred miles of the Eastern section at a cost not to exceed the sum per mile already guaranteed by the Government. So, though their may be delay, there is a certainty of the final completion of this great work, demanded by our relations with California, the great commerce of the Pacific, and the necessity of strengthening the loyal portion of the Union, if no other, and developing the vast mineral and agricultural resources of the Country west of the Mississippi.

The condition of the Banks of the North is considered to be sound, their reserves of specie is large, and their relations with the Government friendly and patriotic. It is to be hoped that Congress by no hasty act of legislation will do anything to destroy their usefulness.

But for the war then and the inevitable discomposure that such a calamity always brings we might say that the past year has not been without a favorable reaction on many of our great leading interests, and instead of our being plunged into the personal and immediate distress which has overtaken the South, we have gathered strength, from exertion, and hope from our very reverses.

Railroads of the United States.

A tabular statement showing the length and cost of each work at the end of the financial year closing nearest 1st January, 1863.

(Not including City Passenger Railroads.)

1. Maine.

Corporate Titles of Companies.	Mileage—Total.	Mileage—Completed.	Cost of Road and Equipm't.
1. Androscoggin	36.50	36.50	$757,381
2. Androscoggin and Kennebec	55.00	55.00	2,210,947
3. Atlantic and St. Lawrence (54 miles in N. H. and 16.20 miles in Vt.)	149.00	149.00	7,217,357
4. Bangor, Oldtown and Milford	12.50	12.50	594,726

American Railroad Journal.

Saturday, January 3, 1863.

Stock and Money Market.

The year 1862 goes out more hopefully than its predecessor, notwithstanding "the clouds that lowered upon us" at intervals. We may see clearly that as it sinks into the horizon of the past, we may watch its departing light without apprehension. On the contrary, thanking Heaven for its protection, thus far we may take courage and hope for it to the end.

A brief survey of our military progress during the past year, is not without great consolations; and as the war is the great base from which all our operations in finances, industrial, agricultural and commercial, are conducted, we recommend an article in the *N. Y. Times* of Wednesday last, as conclusive that our position is far better than it was a year ago, and our advantages thus far are of the greatest magnitude. Want of space prevents us from giving it entire.

In the railway share market the activity the last week has been unprecedented, and the business done immense; State stocks are high, those of the border states are improving, and those of the Government firm and buoyant. Such a state of things during such a war as this is anomalous, and shows the courage, hopefulness and determination of the people of the North.

Among the curious movements inside this

sphere of activity is the reported one of the *entente cordiale* between the Central and the Harlem. Amalgamation has been the distinguishing characteristic of the former company, a policy recently adopted in England the last year or two with good results both in railways and Insurance Companies. It is believed that the first intention was to unite the fortunes of the Hudson River with the Central, but unexpected difficulties have intervened, and the plan appears to be changed, and some kind of a union is talked of with the Harlem, which will be comparatively easy of arrangement, as a majority of the stock can be purchased at a low figure. This connection, which will be greatly aided by the construction of the bridge at Albany, will in many respects be better than one with the Hudson, because at Port Morris there is a terminus on deep water, extension wharves, and cheap land for any desired improvements for business facilities. Harlem, which a a few months ago was at a low figure and not very saleable, is now quoted at 26¾. A large profit has thus been made by those holders whose patience has been so exemplary.

A pamphlet on the currency question has just been published by James Gallatin Esq., Pres't of the National Bank, characterised by his usual ability and well known conservative opinions. We have not room to day, to review its positions with the care they deserve, but his propositions to meet the exigencies of our financial system are made in such good faith and such real devotion to the interests of his country, we think they are eminently deserving of consideration and we shall give them in full next week.

Underneath all these modifications, details and suggestions, lie broad principles on which every superstructure of finance must rest. These we have from time to time sought to enunciate in a popular form, and we now propose to deal with another phase of the subject.

Besides the appreciation of prices under a paper money system, there is another evil, that done to Creditors, who instead of receiving their debts to the value of their origin, that is to say instead of getting paid in gold, they are paid in paper at a heavy discount as compared with gold. And this is undoubtedly true as to all contracts and debts created before the suspension of specie payments.

But what in fact is the essence of all contracts in the country? it is the payment of "lawful money of the United States."

Legally and technically therefore, a payment of a pre-existing debt in any currency declared lawful by the United States is in accordance with the letter and spirit of the contract. It is well known that both our gold and silver coins have been alloyed, and that they pass above their real and intrinsic value. Did the creditor of former years require payment in coin from their debtors of the old value at the date of their pre-existing contracts? It would have made a difference to them as to gold of about six per cent.

Is not then this fluctuation in currency a matter over which individuals can have no control. Are they not bound to foresee it, and to abide by its occurrences. And in all other transactions but in actual money do they not act in this very manner. For example. The capitalist who lends money on a bond and mortgage insists on having back his advances in gold or its equivalent. It is so nominated (if you please) in the bond. But if the same person puts the same amount in a store in the lower part of the city, he may meet with this result. He may in prosperous times receive 20 or 30 per cent. interest in the shape of rent. This has not been unfrequent of late years in this city. That very property may now stand empty, or produce not enough to pay the assessed taxes. Why does the owner submit to this enormous depression and loss, without clamor or appeals to the Government? Precisely because his individual interests go with those of the masses, and it is impossible to prevent it. Such precisely is his case now with any other property, which is affected by the condition of the whole country.

On the other hand, there are often cases where disturbances of the currency from unforeseen causes, press as hard on debtors as they ever do on creditors. Real estate supposed to be worth the sum stated in the contract of sale often depreciates with great rapidity. The creditor demands payment to the uttermost farthing in lawful money of the U. S. He may have received the full value of it in instalments, during the process of depreciation, yet he requires all, and the debtor not only loses all he has paid but the very property on which he has been paying. This state of things has been of common occurrence during the many financial panics brought about by the banks themselves, and the debtors have not only found themselves losers 20, 30, or 40 per cent., (much more than the amount of the premium on gold,) but losers of their whole capital. What benevolent statesman, what eminent banker has ever come forth to project a scheme of finance, which should save debtors from losses by depreciation? Ready enough to protect capital, they are very quiet when industry goes to the wall.

But as capital is master, we must listen to its voice. The issue of paper is going to diminish the value of their property in gold. Not so. The paper which chokes up their vaults can this day purchase stocks in the best banks of this city under par, payable in currency. They may buy in the Merchants at 98, the Bank of Commerce at 94, the American Exchange at 96, the Continental at 86, and in many others at about the same rates, all these institutions paying full dividends of 7 per cent. So in railway shares and bonds, and Government stocks there is room for investment on the most favorable terms. We come to the conclusion then that capitalists have full protection, more than any other class. This war and its expenses arise from the necessity of maintaining the existence of Government, without which capitalists would not have an hour's security for their property.

Let us then look at all our difficulties coolly and philosophically. Out of this nettle danger, by so doing, we shall pluck the flower safety.

Our readers will find our quotations this week full and interesting, and nothing in them we imagine to weaken the force of what we have with the sincere desire to disabuse the public mind, suggested from time to time to maintain the public confidence, in our cause, in ourselves, and in Heaven.

Treasury Notes.

We copy the following from *Hallett's Commercial Circular* of this week. It is a fair and intelligent view of the policy of the issue of Treasury Notes, supporting fully the expressed opinions of the JOURNAL on the same subject, that it was an unavoidable necessity, that it has worked admirably so far, and that the country has actually prospered under the timely stimulant of this currency, equivalent to gold in all domestic contracts, plentiful enough to answer all the purposes of domestic exchanges, and to sustain all domestic industries. It is not improbable that a large part of these Treasury notes may be retained in circulation after the war is over, being preferable in so many obvious respects to local currency.

Whatever may have been the opinion originally entertained in reference to the issue of Treasury notes to serve as money, there can be no doubt that they have been the most efficient means that could have been devised to supply the wants of Government, while they have, so far, performed a very useful office as currency. Through their instrumentality large amounts of bonds have been sold, and large loans negotiated. But for them, it is not probable that one dollar would have been placed where there are now nearly $100,000,000, at low rates of interest, in the Sub-Treasury to the credit of the Government. But for their issue it is difficult to see how Government could have met the immense demands upon it, while it is equally clear that it must, for some time to come, make use of the same means. Mr. Chase's report is conclusive upon this point. There is no authority for Government to accept of the circulation of the Banks. Loans, consequently, can be paid only in Government paper. This paper, remarkable as it may seem, cannot be had in sufficient abundance to pay loans to any considerable amount, if made. The result of the negotiation of the 7 3-10ths is fully in point. It is with the greatest difficulty that the Banks in this city can provide themselves, in the ordinary course of business, with an amount of demand notes sufficient for the wants of the trade. These notes have become the favorite currency, are universally sought with avidity, and are in a great measure absorbed by the public, so that but few of them find their way into the Banks. The credit attached to them will continue so long as the bonds of the Government in which they may be made convertible, are at a premium. The thing of chief concern, consequently, is the maintenance of this credit. So long as this is preserved, Treasury notes will continue to maintain their present place in the public estimation.

With the system of Finance which we trust Congress will adopt, we see no difficulty in supplying Government with all the money it wants, even upon the enormous scale estimated. Already has it raised nearly $700,000.000 without any sign of impoverishment or exhaustion on the part of the country. Capital was never more abundant, nor was there ever a period in our history when the great staples of food were cheaper or more plentiful, notwithstanding the vast amounts exported. Even with the continuance of the war for another season, we do not expect to see any great falling off in the product of food, from the rapid improvements in labor-saving machines, by means of which crops are not only planted but harvested, and which have already so far abridged manual labor, as to have increased threefold the product due to a given number of hands. In no country have these improvements been carried to such an extent as our own. In addition to such increased means, the excess of male over the female population in the United States, in 1860, was 730,000, while in Great Britain, at the last census, the excess of females in a population of about 29,000.000, was 877,000. These figures demonstrate that after deducting the males now in the army, a much larger number still remain for the prosecution of our industries than are found in the nations of the old world. So long as these industries remain undisturbed, the people can readily sustain much larger burdens than are now imposed upon them.

Enlargement of the New York Canals.

We perceive that the project is still agitated at Washington for the enlargement of the Erie and Champlain Canals, on the ground that this is necessary both for military and naval purposes. It is maintained, that it will become necessary for the defence of the Lakes, that iron-clad steamers in the emergency of war may be built in the city of New York, and passed up the canals for the defence of the Lakes. In connection with this, is another project for the enlargement of the Illinois canal, so as to connect Lake Michigan with the Mississippi river. In both cases the military and naval advantage is deemed to coincide with commercial necessities. We are always ready to advocate any improvements of this kind which are of a national character, provided the good results are demonstrable, and the end will crown the work. In either of these cases, the expense to be incurred will be about seven millions of dollars. We propose at this time to confine our objections to the New York project, as it is one of which we are best able to form an opinion, and is a subject with which we profess to be somewhat familiar.

Thus then, it is proposed that the U. S. Government should loan the necessary funds to this State in order to widen the locks and deepen the beds of the canals to permit the passage of iron-clad gunboats from this city. But this, after all, does not prevent the State from being finally saddled with the debt, increasing the load it has now to carry, and the amount of taxation under which the people already wince. But really there is no commercial necessity for this movement. The canals are already large enough for all that can be offered for shipment. Some years back, they had more capacity than business, and there were those who feared they would even cease to support themselves. So far was this fear prevalent, that a proposition was publicly discussed for their sale, to relieve the State from impending embarrassment. But the immense production of the West, and the continued demand from Europe, changed this unfavorable aspect of affairs, and the enormous business and revenue of the present year of canal transportation have established the facts that the State has no better source of wealth than its canal property. The business may be doubled and yet there will be room for more.

But should it in coming years, press beyond their capacity, we have the great lines of railway parallel to it, which can accommodate all the present and future surplus. The Erie can bring to tide water from Buffalo, as well as the Central, all the traffic which has been offered, or may be offered for years to come. There is not therefore the least necessity commercially for enlarging the canal westward, and as to the Chanplain, no one pretends that it is inadequate to all the business now done upon it, or that ever can be.

It is urged however that we shall in case of a war with England, require the construction of armed iron steamers, to defend the lakes, and they cannot be got there except by this enlargement. This is a petitio principii, and begging of the argument not susceptible of defence, if it be put forth with any sincerity. We know that by the supplementary treaty of Ghent, we can maintain but one armed vessel on the lakes, of limited tonnage, and armament, and it is said a war might break out so suddenly, that we should be exposed to the irruption of a fleet of hostile gunboats, coming up the St. Lawrence Canals, into Lake Ontario, and by the Welland Canal into Lake Erie. We doubt whether a war could arise without considerable previous negotiation, and without our Government's being able to give the notice necessary to conform to the stipulations of that treaty. But if we are even mistaken in this opinion, we are confident we are not in another, viz. that all necessary preparation may be made at once for the defence of the Lakes, without violation of that supplemental treaty. The plan is both simple and economical. We illustrate it by a single example:

It is known that the Tonawanda creek is used as a part of the canal, for at least twelve miles from the Niagara river with twelve feet water, and one lock into the Niagara river. It is very clear then, that a basin may be constructed at some interior point, equal to *four* marines leagues for the Lakes, (if the distance should ever be called in question,) on which a whole fleet of iron clad steamers could be constructed, and within a short distance from Lockport, where shops, supplies, machinery, and workmen would be always at hand and where the work of construction could go on without the least danger from the enemy. For the use of this naval basin, the U. S. Government could afford to pay a liberal rent, and the jurisdiction being with the State of New York, no conflict of authority could arise. The expense of the execution and preparation of this basin is within the means of calculation of the most ordinary Civil Engineer, and would be comparatively small, not so much probably as that of widening a single lock.

What could be thus done on the Tonawanda, could be done also at Oswego, on the Oswego river and canal. So also at White Hall, on Lake Champlain. Who does not see in this simple arrangement, provision and ample provision, too, for the defence of the lakes, if defence in this way ever becomes necessary. Why should Congress be disturbed by so unnecessary and unwise a proposition as to enlarge the whole line of our canals and their hundreds of locks for a purpose that may be met by three cheap and defensible navy basins, at these three points not requiring more than half a dozen locks if so many. Are they statesmen who overlook this plain solution of the pretended difficulty? And can they deny that if the canal was actually enlarged at an enormous expense, there is any certainty that a fleet of iron clad gunboats would ever go through safely? The bursting of an embankment, the blowing up, or falling down of an aqueduct over the Mohawk or Schoharie Creek, accidentally or by design would destroy a whole expedition, and this is precisely a risk the English gunboats will be subjected to in passing through the St. Lawrence and Welland Canals. Indeed the people of Buffalo assert with confidence that no British armed vessels shall ever pass through the Welland Canal into Lake Erie. One day's or one night's work would make its destruction complete.

That our view of this subject is a correct one, is supported by the fact, that the writer of this article having communicated similar views to the N. Y. Canal board last summer, received an official notice, that the suggestion should be followed up with a survey by competent Engineers, and it is quite probable that the subject will be discussed in the forthcoming report of the Canal Commissioners. The attention also of the Governor elect has been called to the subject, and we do not well see how he can avoid considering it, provided he thinks this means of defence of the Lakes will ever become necessary. Dismissing this view of it for the present, we frankly confess, we believe a war with England in Canada will not be waged on our part by naval forces. If that unfortunate and deplorable event should occur, an army from the North-Western States, from Ohio, Pennsylvania, and New York will take possession of Canada West in a fortnight. The very railway system of the upper province will give us a line of operation, the use of which can not be prevented except by the voluntary destruction of millions of property. We have also craft enough on Lake Erie to assist in every movement necessary by water, which may be easily armed for service in a few weeks. But we do not think we shall ever enter Canada in any other way than as friends. Our traffic with the Great West is its traffic. By the Suspension bridge at Niagara, we have united New York with a beautiful peninsula. Long may it remain a monument of the friendly union of American skill and British capital.

Nor do we think there is any danger, (unfriendly as the leading Presses of England are to our cause, and much as such men as Mr. Lindsay have urged the advantage to his country in the destruction of ours,) of any war between the two nations. If we succeed in putting down the rebellion we shall be too strong to be assailed; if the Union is destroyed, there will be no object in any further enmity. We shall be no longer the subject of fear or envy to any European power, but an unhappy collection of petty governments, all weak, disorganized and borne down by internal and never ending difficulties.

So then in reviewing the whole subject, we may say, the cheapest method of building iron clad steamers for the Lakes is to do so in the way proposed. If the public mind is to be kept in a fever about this necessity, here is the method of allaying it. Let the project then be abandoned. But if as many believe, it will be by a large army and quick movements, Upper Canada is to fall into our hands, we may dismiss the whole subject. It does not require discussion, and Congress will employ itself much better in other plans than in this of expending six or seven millions of dollars for enlarging the locks of the New York Canals.

Buffalo, New York and Erie R. R.

We have received the Fourth Annual Report of this company, for the year ending September 30, 1862. The receipts during that time were:

From passengers	$135,872 26
" freight	651,468 45
" mails	8,520 00
" express	9,954 45
" Rochester division	6,416 63
" other sources	11,193 49
	$823,425 28

And the expenses were:

Operating the road	$230,317 81	
Maintaining road	211,593 31	
Repairs of machinery	106,028 05	
		547,939 17
Leaving as net earnings		$275,486 11
Add balance Oct. 1, 1861		79,112 64
		$354,598 75
Coupons and interest paid		163,867 19
Balance Sept. 30, 1862		$190,731 56

Compared with the previous year, the gross earnings show an increase of $229,580 66
With an increase in expenses of 141,799 14
Making the increase in net earnings $87,781 52

There has been paid, and charged into the expenses of the year, $17,101.52 for taxes and damages which accrued in and belonged to the expenses of previous years.

Besides the ordinary repairs to the track, a considerable portion has been reconstructed during the year, at an expense for new rails of $48,-612.49; 2,975 tons of old rails have been repaired at an average cost of $4.39 per ton; 37,129 ties, 191,600 lbs. spike, and 28,738 chairs have been used in reconstruction and repairs of track, at a cost of $31,348.12. The repairs to roadway and track, in new superstructure, ballasting and ditching have been thorough and extensive, and in this respect the property of the company has been increased in actual value by more than the difference in the expenses of the past over those of the preceding year.

Ten bridges, of an aggregate length of 844 feet, have been constructed during the year entirely of new material, and in a substantial manner—the entire cost of which has been charged to expense account. All the other bridges have been thoroughly repaired.

The largely increased cost of materials occasioned by the existing war, and the derangement of the currency has added essentially to the expenses of the year. A still further increase in the cost of materials and labor is anticipated the ensuing year.

An analysis of the accounts for the year, show the following results:

Surplus earnings for the year	$111,618 92
Increase of funded debt	14,180 00
Decrease of cash on hand	4,535 04
Decrease of bills receivable	358 45
Decrease of amount due from War and Post office departments	2,254 40
	$132,946 81
Reduction of floating debt	$76,524 17
Increase of materials on hand	12,250 48
Increase of real estate and buildings	20,914 20
Increase of am't due from agents, etc.	23,257 96
	$132,946 81

Since the last report, the company has purchased the lot adjoining its freight depot on Buffalo Creek, thus giving a dock front on the creek of 326 feet, together with a dock front of 210 feet on the ship canal, leading to the Ohio Basin. The cost of which, together with the extension of the freight depot, rendered necessary by the increasing freight business of the company, amounting to $23,683.94, has been charged to cost of road and equipments, and appears in the foregoing statement.

The following table will show the earnings and expenses of the road from its organization to the present time:

	Total earnings.	Total expenses.	Interest payment.	Surplus earnings.
1857-'58.	$474,779	$334,192	$1,490	$141,097
1858-'59.	541,250	368,928	150,224	22,097
1859-'60.	580.000	337,046	181,416	61,538
1860-'61.	593,845	403,140	163,324	24,380
1861-'62.	823,425	547,939	163,867	111,619
	$3,013,299	$1,992,245	$660,322	$360,731

The total surplus earnings have been expended as follows:

Construction of r'd from Attica to Batavia	$128.504
New rolling stock	44,735
Real estate, buildings and new track	96,821
Extraordinary repairs to track between Buffalo and Attica upon opening through line	22,990
New Bridges over Conhocton river	13.070
Telegraph line from Attica to Corning	3,381
Legal expenses attending organization of the company and perfecting titles	5,869
Patent rights	4.293
Track scales	2,398
Excess of assets over liabilities	38,670
	$360,731

These expenditures constituted the floating debt of the Company, immediately or soon after its organization. The various items belonged and were charged to cost of road and equipment, and are represented in the capital of the Company. The debt thus created has been entirely paid out of the surplus earnings. The Company has no floating debt. What is represented in the ledger accounts as floating debt, are balances of running monthly accounts, fluctuating from month to month, the dues to the Company on similar accounts, being sufficient for their liquidation. The report says:

The experiment of using coal for fuel on the locomotive engines of the Company shows a very favorable result. The total miles run by all trains during the year was 609,076—of which 188,690 were by coal burning engines. The expenditures for fuel used on different classes of engines have been carefully kept, and present the following result:

Expense per mile run with wood	10 30-100 cents.
do do do coal,	5 33-100 "
Difference per mile in favor of coal	4 97-100

Making a saving in 188,690 miles run by coal engines of $9,371.61.

It is proper to state, however, that the engines using coal were run principally on passenger trains, and that if coal should be substituted for wood on all the engines of the Company, the per centage of saving in expense would be reduced below that above stated.

It is probable that coal burning engines will deteriorate more rapidly than those using wood fuel, owing to the occasional presence of sulphur and other impure substances in the coal used; but making due allowance for deterioration from this cause, the experience of the Company thus far indicates, that a large saving is made by the use of coal. The average quantity consumed per mile on all trains is 47 lbs.

The business of the Company requires a large addition to its engines and cars, the expense of which would be soon repaid by additional earnings.

The coal traffic for the year amounted to 58,578 tons. In 1861 it was 45,578. In 1860, 20,000. In 1859, 9,100. The quantity offered for transportation the past year exceeded 100,000 tons, but it was not deemed profitable to engage in the business any further than to load return cars not otherwise filled with Westward bound freight.

The total tonnage of freight transported by the Company since its organization, with the rate received therefor, has been as follows:

1858	143.709	tons, Average rate	$2.11	per ton.
1859	181,568	" "	2.05	"
1860	227,713	" "	1.85	"
1861	237,409	" "	1.85	"
1862	301,234	" "	2.12	"

GENERAL STATEMENT.

Cost of Road and Equipment		$3,188,461 16
First Mortgage Bonds on hand, to liquidate Buffalo, and N. Y. City R. R. Bonds		79,860 00
ASSETS, as follows:

		135,547 46
Balance of income account		190,731 56
		$3,682,852 74

The road is 142 miles in length, extending from Buffalo to Corning. The equipment of the road consists of 28 locomotives; 26 first-class, 6 second-class, 9 baggage and mail, and 393 freight cars.

Miles run by passenger trains, 241,882; by freight trains, 330,925; by working trains, 36,269—total mileage, 609,076. Through passengers, 15,516; local do., 181,978. Through freight, 173,939 tons; local do., 127,295. The expenses per mile run have been as follows: Fuel 8.76 cents; oil and waste, 3; maintaining road, 34.74; operating road, 37.81; repairs to machinery, 17.40. The expenses of the road were 66½ per cent of the earnings.

Comparative Negligence. Wilds vs. Hudson River R. R. Co.

THE LAW WILL NOT CONSIDER THE DEGREE OF NEGLIGENCE WHICH MAY BE ATTRIBUTED TO EITHER PARTY IN ORDER TO STRIKE A BALANCE BETWEEN THEM. A PARTY TO RECOVER DAMAGES MUST BE FREE FROM ANY NEGLIGENCE WITHOUT WHICH THE INJURY WOULD NOT HAVE HAPPENED.

The accident out of which this case arose occurred at the crossing of the defendant's railroad track, at Fourth street, in the lower part of the city of Troy. From the evidence it appears that the plaintin's husband attempted to cross the track of the Company in his wagon while the train of cars was approaching, and whipped up his horses for this purpose, but did not get over in time, and was therefore struck by the locomotive, and received injuries from which he died. This suit was then brought against the Company to recover damages for the injuries so received by the plaintiff; on the ground that the accident happened through a want of care on the part of the defendant. The time of the occurrence was noonday. The whistle of the locomotive was sounded and the bell rung as usual at the crossing. At the time of these warnings, and as the train was approaching this street no one was standing upon the track to be seen by the Engineer. The flagman was at his post waving his flag, and warning people of the approaching train and signaling them to stop. The railroad had been in operation there some sixteen months, and Wilds was well acquainted with the city. He came to it every Saturday to supply his customers with the produce of his farm, which was some twelve miles out, and on this day he had gone to South Troy across this same track, to a customer's house.

The trial at the Circuit resulted in a verdict and a judgment in favor of the plaintiff. From this judgment an appeal was taken to the General Term of the Supreme Court; and then a further appeal was taken to the Court of Appeals, which court now reversed the judgment of the Circuit Court, holding the right to recover damages under the statute, for *injuries to the person* depends upon two concurring facts: first, the party claimed to have done the injury must be chargeable with some degree of negligence, if a natural person, or if a corporation, with some degree of negligence on the part of its agents; second, the party injured must have been *entirely* free from any degree of negligence which contributed to the injury. That is, of any negligence without which the injury would not have happened. The question presented to the court or the jury is never one of *comparative negligence*, as between the parties; nor does very great negligence on the part of the defendant so operate to strike a *balance of negligence* as to give judgment to a plaintiff whose own negligence contributed *in any degree* to the injury. That in this case the facts proved showed that the Company were not negligent; and that the accident was the result of the plaintiff's own carelessness. The following is a part of the opinion of the Court of Appeals rendered at the decision of the case:

GOULD, J. The right to recover damages for this class of injuries to the person (whether asserted by the party injured or by his representatives under the statute) depends upon two concurring facts; 1st. The party claimed to have done the injury must be chargeable with some degree of negligence, if a natural person; if a corporation, with some degree of negligence on the part of its agents or servants. 2nd. The party injured must have been *entirely free* from any degree of negligence which contributed to the injury; i. e. of *any* negligence without which the injury would not have happened. These essential elements of such a cause of action are as absolutely distinct from and independent of each other, as are the two opposing parties, and each and both must be *by itself* in the case upon the evidence or there can be no recovery. The question presented to the court or jury is never one of *comparative* negligence as between the parties, nor does very great negligence on the part of the defendant so operate to *strike a balance of negligence* as to give a judgment to a plaintiff whose own negligence contributed in *any degree* to the injury. It is true that some of the reported cases of this kind of action use, in a very uncertain manner, the terms gross negligence, ordinary negligence, ordinary or common prudence, and similar terms. But however applicable such terms may be to the cases of bailment of *property*, and between the different well-known classes of such bailors and bailees, it is difficult to see how they have strictly and legally *any* application to cases like the one under consideration. No element of fraud (or quasi fraud) or wilfulness enters into the cause of action. The law says to the defendant, if you have by simple negligence caused the injury, so far as you are concerned, the ground of action is complete. At the same time it says to the plaintiff, although so far as the defendants' acts are concerned, the case is made out, *you* cannot prevail if you have, by *your* simple negligence, helped to bring about the injury.

Another preliminary point (to be passed upon generally before we can decide as to its being applicable to this case) is the claim that the question of negligence belongs peculiarly to the jury; and that cases involving that question should never be taken from them to be decided by the court. To this proposition it should be answered, that there is no case known to the law (even the question of fraud in certain cases, where the statute says it is to be submitted to the jury,) in which an appellate court has not and does not, on proper occasions, exercise the power of setting aside the verdict of a jury, not merely when it is entirely against evidence, but when it is clearly against the weight of evidence. And no court can be guilty of the absurdity of holding that in such a case it would not have been competent for the Judge who tried the case, either to non-suit the plaintiff or direct a verdict in his favor, as the case might have required. No legal principle compels him to allow a jury to render a merely idle verdict. * * * * * * * *

Nor is the applicability of the rule varied by saying that the evidence may consist of *circumstances* from which inferences are to be drawn as to negligence; and that as different minds may draw different inferences from the same circumstances, the jury must always be the judges of negligence where the evidence is circumstantial. No one ever supposed that the right of a tribunal of review, to reverse a verdict as against the weight of evidence, was confined to the cases of direct, positive testimony. The right covers all cases, by *whatever kind* of legal evidence any of them are sought to be proved, and it proceeds according to the weight of the evidence, whether circumstantial or not. * * * * * * * *

The entire evidence fails to show any degree of negligence on the part of the Company, and the second motion for a non-suit should have been granted. On the other hand, how stands the proof of carelessness on the part of the deceased? The plaintiff's chief witness, the only one who saw the occurrence says: "When I first heard the whistle, he was getting right on to the South railroad track with his horses. If he had stopped them he would not have been hurt. He could not stop very easily." He did whip his horses, and went across the South track and nearly across the North track; when on that track his wagon was struck. The defendant's witness show a very strong case of carelessness, if not of utter recklessness on Wild's part. * * * * * * * * *

It is quite usual in similar suits to find counsel, and sometimes judges, disposed to dwell upon the alarming power of a locomotive, and the appalling danger of running one any where but in the wilderness; and great stress is laid on the strict and untiring watchfulness and care that are required of those who use so dangerous a thing. All this is very true. But there are two sides to these facts. If a locomotive be eminently dangerous, every body knows it to be so; and it is as dangerous to run against or under it, as to have it run over you. A railroad crossing is known to be a dangerous place, and the man who, knowing it to be a railroad crossing, approaches it, is careless, unless he approaches it as if it were dangerous. To him the danger is vastly greater than it is to the locomotive. He may lose his life; and if the Company be bound to use very great care not to endanger him, why is he not bound to use equally great care not to be endangered? His care should be as much graduated by the danger as the Company's. When every one who knows that the railroad is there, is bound to know and remember that a train may be approaching: not to take the very simple precaution of looking and listening to find out whether one is coming, cannot but be want of care. To be sure the statute requires a railroad Company to give specified warnings, but it neither takes away a man's senses nor excuses him from using them. The danger may be there,—the precaution is simple. To stop to pause is certainly safe. His time to do so is before he puts himself in the "very road of casuality." And if he fails to do so, it is of no consequence in the eye of the law, whether he merely misjudges or is obstinately reckless. His act is not careful, and he is to abide the consequence, and not the Company, under or into whose train he sees fit to run—whether he hid so in inexcusable ignorance, or in the belief that he could run the gauntlet un-

harmed. Nor is the court to look about to find how he, after putting himself there, conducted; whether he then took the best means of escape, or in his confusion ran more helplessly into the jaws of death. No degree of presence of mind; and no want of presence of mind at that time, has anything to do with the case. He should not be there by want of care.

Much weight is given to the fact that the place of such collision is a highway, and that the traveler had a right to be there with his vehicle. Certainly it is a highway or he could have no right to be there at all; and he could not recover, no matter what might be the negligence of the Company. Further, it is a part of a railroad track, and the train has a right to be there. It is a place in which two easements have a common right; and it is the right of the public that both shall be so enjoyed as not unnecessarily to interfere with or abridge the right of either. A sound and reasonable view of cases of this description is of as much importance to the public as it is to the railroad Companies. Such corporations are to be treated precisely as any other party to a suit. No more stringent rule is to be applied to them than is applied to individuals, nor is any less stringent one. Every citizen of the State has a deep interest in the existance and successful operations of such Companies. The facilities of travel which they afford; the means they give of accumulating and diffusing the products of our wide land and of our vast commerce, have already produced the mightiest results in the development and unparalleled increase of the resourses of the nation. They have clothed us with the richest garments of peace, and they have multiplied our armies and wielded our weapons of war. To do this they have needed these powerful means, the use of which is necessarily accompanied with danger. But as the public have the benefit of those means, it is bound to incur its own share of that danger. A mutual duty is enjoined, and a mutual liability results from a failure to perform that duty; and a party who fails in performing his own part thereof, is in no condition to enforce the penalty of a breach on the other party. * * *

The judgment of the Supreme Court and order reversed, and a new trial granted.

Railroad Earnings--Weekly.

The earnings of the Michigan Central Railroad for the 3d week of Dec., 1862, were ... $55,703 86
Same week, 1861 ... 44,924 90

Increase ... $10,778 96

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week of Dec., 1862, were ... $15,323 49
Same week, 1861 ... 18,363 25

Decrease ... $3,039 66

The earnings of the Chicago and Northwestern Railway for the week ending December 21, 1862, were ... $20,633 20
Do., 1861 ... 12,603 01

Increase ... $8,030 19

The New National Loan.

U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

BANKERS,
AND DEALERS IN
ALL ISSUES OF GOVERNMENT
AND OTHER
FIRST CLASS SECURITIES,
38 Wall st., N. Y.

VERMILYE & CO.,
No. 44 WALL ST., NEW YORK,

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in sums of

$50, $100, $500 and $1,000.

The Registered Bonds in sums of

$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 8m45

American Railroad Journal.

New York, Saturday, January 10, 1863.

Dayton and Michigan Railroad.

The earnings of this road for the years ending March 31, 1861 and 1862 have been as follows:

	1861.	1862.
From passengers	$146,554 24	$137,203 03
" freight	201,001 03	225,618 44
" mails	27,447 32	37,346 90
Total	$375,002 59	$400,168 37
Expenses, viz:		
Repairs of road	$35,629 59	$32,758 00
" engines	13,909 32	15,827 21
" cars	13,968 20	16,144 42
Fuel	16,261 61	19,666 13
Oil and waste	5,423 05	4,483 58
Train hands	15,893 53	28,066 11
Agencies, salaries, etc	36,429 56	37,053 98
Taxes	5,946 30	8,086 30
All other expenses	9,433 97	14,131 80
Total	$162,895 12	$177,217 53
Net earnings	$212,107 47	$222,950 84

The entire operations of the road since it was completed and in full operation, are exhibited in the above statement. The aggregate gross earnings have been $775,170 96, the expenses $340,112 65, and the net earnings $435,058 31. A comparison of the business of the second year with that of the first, exhibits a decrease in passenger earnings of $9,351 21; and an increase in earnings from freight and other sources of $34,516 99—making the net increase of gross earnings, $25,165 75. The increase in expenses was $14,322 41; and in net earnings, $10,843 37.

The following statement will show the financial condition of the company March 31, 1861 and 1862:

	1861.	1862.
Construction	$4,600,535 55	$4,622,672 38
Lima shop equipm'ts	7,214 80	7,981 72
Toledo depot, real estate, etc	2,011 00	100,910 91
Telegraph line	1,247 26	1,332 55
Right of way	92,791 61	93,356 82

" P.O. depart.	5,587 50	5,587 50
" U. States	.....	1,515 33
Cash	12,798 14	5,797 53
	$5,241,812 58	$5,586,704 69
Capital stock	$2,195,562 63	$2,448,965 27
First mort. bonds	300,000 00	300,000 00
Second "	2,212,000 00	2,258,000 00
Toledo "	.....	56,000 00
Income "	9,700 00	9,700 00
Bills payable	352,824 30	221,784 94
Call loans	.....	4,392 29
Due on pay rolls	19,890 62	16,965 19
" individuals	36,804 01	43,288 75
" agents, etc	820 56	3,717 13
" for real estate at Toledo	.....	11,167 75
Surplus earnings	144,210 46	212,723 37
	$5,241,812 58	$5,586,704 69

According to the above statement, the increase in construction account has been $22,136 83; in Toledo Depot property, $98,899 91; and in rolling stock account, $14,742 80. The capital stock of the company is thus described:

New issue	$1,795,249 86
Old "	462,638 75
Estimated interest due on same, Sept. 1, 1859	172,858 00
Paid in but not issued	18,218 66
	$2,448,965 27

The bills payable should be divided into four classes as follows:

1st. Notes given for the construction of the road, without any security	$56,037 98
2d. Notes given for iron and machinery, secured by mortgage bonds	139,456 37
3d. Notes given for depot purposes, secured by real estate	9,466 63
4th. Notes given for supplies	16,823 96
	$221,784 94

A large amount of rolling stock on the line of the road is owned by A Gross & Co. Before the company can become the owner of this part of the rolling stock, these must be paid to A. Gross & Co., the sum of $146,440 58, not included in the foregoing statement of indebtedness.

The decrease in bills payable and call loans is $126,647 07. If payment of this indebtedness is made in the same ratio as last year, it will require but 16 months to relieve the company of its entire secured floating debt, and its debt for current supplies. It is believed that this part of the debt will be paid in full during the current year.

The number of Second Mortgage bonds sold during the year was 46, at an average price of more than 80 per cent on their par value, the proceeds of which, with the surplus earnings of the year, and also the proceeds of call loans and bills receivable were applied to the reduction of the notes given for iron, etc. [Since the close of the last fiscal year the full amount of these bonds, 2,700 in all, have been issued.]

An arrangement has been made with the First Mortgage bondholders whereby the payment of the interest has been deferred from July 1, 1861, to January 1, 1864, thus enabling the company to pay the construction debt, and to become the owner of the machinery and rolling stock of the road.

The equipment of the road consists of 16 locomotives; 9 passenger, 5 baggage, 141 box, 55 stock, 80 flat, 65 gravel and 31 hand cars. The number of miles run by engines during the year was 365,470; by freight cars, 1,688,452; by passenger cars, 478,296. Number of through passengers, 6,755; local do., 110,073. Tons of through freight, 46,841; local do., 58,907.

The earnings of the Dayton and Michigan Railroad for the first eight months of 1861 and 1862, were:

	1861.	1862.	Increase.
April	$29,793 40	$35,946 56	$6,153 16
May	28,112 04	38,088 98	9,976 94
June	25,374 42	44,358 54	18,984 12
July	21,672 17	43,491 81	21,819 64
August	37,428 33	71,010 63	33,582 30
September	46,862 10	80,719 87	33,857 77
October	36,953 72	69,609 90	32,656 18
November	34,731 89	57,184 81	22,452 92
Total	$260,928 07	$440,411 10	$179,483 03

A Bankrupt Act as Connected with Finance and Political Economy.

One of the sciences connected with political economy and one of never-ceasing interest is finance. It has always occupied, and necessarily, a large share of the attention of this JOURNAL, as it is the main consideration which the friends of the railway system have to enter upon, when every thing else is ready. So that we are not off the track, nor beyond the line of our duty as journalists, when we present the subject of a bankrupt law to the notice of our readers in the light suggested.

The objection to the permament adoption of the principle in our commercial and legal codes, once urged with some degree of earnestness, was that it would effect contracts, by an *ex post facto* interference. This is no longer urged. The bankrupt laws hitherto passed by Congress have been pronounced to be constitutional by the highest authority of the land, and the most learned tribunals. But even if they had not so pronounced the plain permission given to Congress by the constitution to establish a uniform system of bankruptcy is full and complete. It not only carries the requisite power of enactment, but also the obvious conclusion, that no contract made by the citizens of the United States with each other is exempt from the operation of such a law. In other words, every contract is made with the full previous knowledge that bankruptcy may impair its validity, prevent the possibility of its performance, and that the law may prescribe at some future time what shall be the new relations of debtor and creditor. This common sense view of the subject has been taken by all the States in the preparation of their local statutes. They not only limit the extent and duration of contracts, by what are called the statutes of limitation, but they prescribe the forms by which before that limitation applies, parties may be discharged from contracts. The difficulty in these enactments has been the want of uniformity, and general application, impossible to be obtained through the conflict of jurisdictions. It was wise, therefore, in the framers of that almost perfect instrument, to provide for such a contingency, and it is a serious fault in our national legislatures that they have not provided for it before, in a permanent manner. It would have added vastly to the prosperity of the country.

The humane view of the necessity of such a law, it is not necessary for us to consider. The cruelty of keeping unfortunate and honest debtors in bondage for their whole lives, as may be done by processes well known to lawyers, the injury done to themselves, their families and the public, by the enforcement of a servitude worse than African bondage, (for the slavery of debt is the worst kind of slaveries,) has been sufficiently established by all the great writers who have illustrated the subject. In our own country we have seen the demoralizing effect in the perversion of talent and skill in business, from which they are shut out by pecuniary misfortunes, to the pursuit of politics, as a constant means of livelihood, and the creation of a large class of persons, who having no other way of earning their bread, sink to the degradation of being stipendiaries of any party which will employ and pay them. This is one of the principal causes which lead to our violent political struggles, corrupting the hearts and weakening the heads of men who were once prominent for their manly pursuit of fortune in regular business. Such men have no other hold on life than politics, hate them as they may. The consequence also naturally follows, that such pursuits react upon their families. Regular employment and a common sympathy of purpose and action, leading to honorable industry and independence of conduct are lost in the hopes and fears of temporary and uncertain success, not to be relied on from one hour to another.

England with all her faults has been wise in her legislation for the debtor classes. Her commercial greatness has arisen out of the enterprise and activity of her people, and especially those engaged in trade and commerce. She will not permit an honest unfortunate debtor who seeks to recover himself, to be prevented from doing so. With fair books and frank explanations, he is set free to begin the world anew. It is not her policy to create, or increase a body of paupers, or to have their material force, or intellectual power forever destroyed. She knows what are the vicissitudes of commerce, how entirely they are beyond all individual control, how the wisest commercial plans are overturned, and how the greatest sagacity may be unavailing. She also knows how valuable dear bought experience is to a large portion of the human family, and she wisely gives them the chance of recuperation.

It has been ascertained from our own commercial statistics, that but one, out of every one hundred persons engaged in mercantile business is finally successful. The ninety-six who do not succeed, fall into pauperism, dependent for their subsistence on office, family connections, or public charities. Production ceases to be their normal condition, they add nothing to the wealth of the country, they lag superfluous on the stage of life. No nation like Great Britain or the United States can afford to have such a vast body of men continuing in this bondage. The loss of their industry and enterprise may be easily estimated in dollars and cents, and it is a loss to the country, vast, actual and ruinous. Not only the humanities suffer, but the progress of the nation is stayed by this system of enforced pauperism.

We want henceforth the labor, intellect, enterprise and industry of every man in this country, and now more than ever. We cannot afford to have any large portion of the people struck out of the productive classes. It is therefore, absolutely necessary that the rights of creditors shall have some limit. No law compels them to sell on credit, or to part with their property without security. But there is very good reason that the gigantic machinery of the law, with its enormous annual cost of maintenance shall not be used solely to break men down. Every contract supposes the possibility of non-performance in the minds of both parties. The law should terminate it, when the public interest requires it to be terminated, and the law so acts in a vast many instances already. Impossible contracts were always void in law. The contract of a bankrupt is often of this character.

It is the duty of Congress then not to adjourn without settling this vexed question definitively and forever. And it may be easily done. It is not necessary to pass a bill with a hundred sections. They will only darken knowledge and defeat the object. A bill of a few clauses, defining the classes of bankrupts, securing the early and equal distribution of their effects, and ordering a code of practice to be prepared by the Attorney-General of the United States will meet the full exigencies of the case, and be of immense service to the country.

Railroads of the United States,
January 1, 1863.

Statement showing the actual mileage and cost of the railroads in each State:

States.	Mileage—Total.	Mileage—Completed.	Cost of Road and Equipm't.
NON-SLAVE-HOLDING STATES.			
Maine	675.78	525.56	$17,501,657

Louisiana	838.00	334.75	13,630,219
Texas	2,787.00	451.50	16,509,772
Total	15,186.69	9,294.95	$257,179,452
GRAND TOTAL	49,136.48	32,470.95	$1,224,221,671

Grain Trade of Buffalo.

The following will show the imports of Flour and Grain into Buffalo for the years indicated, exclusive of the receipts by the State Line and Buffalo and Niagara Falls Railroads:

	1862.	1861.	1860.
Flour bbls....	2,739,818	2,159,591	1,122,335
Wheat, bush..	30,450,255	27,105,219	18,502,649
Corn, bush....	24,288,623	21,024,657	11,386,217
Oats, bush....	2,634,730	1,797,905	1,209,594
Barley, bush..	423,531	313,757	262,158
Rye, bush....	667,795	337,564	80,822
Total	58,464,934	50,579,302	41,441,440
Flour into wheat, bush.	23,699,090	10,797,955	5,611,675
Total grain.	72,164,024	61,377,257	47,053,115

The receipts of Flour by the State Line Railroad will probably exceed 500,000 bbls., which will make the amount about 75,000,000 bushels for the total receipts for 1862.

The following comparative statement shows the shipments of Flour and Grain by Canal, from Buffalo, for three seasons:

	1862.	1861.	1860.
Flour, bbls....	451,814	306,236	180,853
Wheat, bush..	27,751,786	23,713,713	13,951,458
Corn, bush....	22,487,185	19,112,125	10,306,048
Oats, bush....	2,164,778	1,705,395	1,282,646
Barley, bush..	201,744	134,341	130,189
Rye, bush....	653,480	337,764	80,822
Totals.....	53,258,973	45,003,338	25,751,163

The Direct Route between New York and Washington.

A special meeting of the representatives of the several companies forming the direct route between this city and Washington was held in Philadelphia on the 23d ult. The number of through trains, with close connections, to accommodate the heavy travel between New York and Washington, was increased from three to four daily, while the time of all the trains now on the line is considerably reduced, and the hours of departure and arrival so revised as to promise greatly improved facility and comfort to passengers.

The through trains leave New York at 7 and 10 o'clock A. M., and at 7½ and 11½ P. M., arriving in Washington at 5:20 and 9:40 P. M., and at 6 and 9:45 A. M.. They leave Washington at 8 and 11¼ A. M., and 3 and 6½ P. M., arriving in New York at 6:40 and 10 P. M., and 3 and 5:10 A. M.

Special agents of the route travel upon each and all of the through trains constantly, and see that the through passengers are properly assorted and accommodated in their own cars, and that their baggage, etc., is promptly and safely cared for. Three of the four trains are to be exclusively express, on which mere local travel will not be taken. By this, a much improved certainty in the schedules will be insured.

It was agreed that thirty new and splendid cars, the best that can be built, should be at once put upon the line, with such running fixtures as would enable them to pass over the whole route between New York and Washington, without any change or interruption whatever. The new time arrangements take effect on Monday, the 5th of January.

Steps were also taken, looking to an agreement between the companies composing the route, by which double tracks shall be laid down as soon as practicable, to further facilitate the movement of trains. A first class double track direct railroad will be completed between New Brunswick and Trenton, passing under the canal and most of the streets of the latter city. Work on the second track is already progressing on the Washiugton branch and the Baltimore and Ohio road.

The great railway bridge across the Susquehanna at Havre de Grace (the piers of which are begun) will be rapidly built, and substantial embankments be substituted for the present bridges on the Philadelphia and Baltimore road, over the Bush and Gunpowder rivers. The transfers at Philadelphia and Baltimore will also be improved by special arrangements already in progress. As soon as the new cars are completed, all the changes of passengers at Philadelphia will be avoided."

Troy and Greenfield Railroad.

The engineers on the Troy and Greenfield Railroad, have lately been surveying a line, running from Stillwater, on the south side of Deerfield river, and through the south meadows and Deerfield, crossing the Connecticut River Railroad, just South of the railroad bridge at Cheapside, and connecting with the Vermont and Massachusetts Railroad east of the Deerfield river.

Panama Railroad.

Annexed is the statement of this company for the year ending December 31, 1862:

Balance to credit "Income Acc'nt," after dividend, Jan. 2, 1862.....		$279,482 35
Less amount carried to credit "Undivided Earnings Account," per statement Dec. 31, 1861		248,469 29
Excess of receipts over estimates for 1861.....		$31,013 06
Receipts from Dec. 31, 1861, to Dec. 31, 1862:		
For passengers	$619,013 42	
For fr'ght, merchandise	756,897 38	
For freight, treasure ..	147,036 56	
For mail transportation	26,041 66	
For premium on gold receipts	59,915 75	
For interest, wharfage, light dues, etc.	28,376 44	
For earnings for portion of Dec., estimated ..	75,000 00	
		1,712,281 21
Gross earnings.....		$1,743,294 27
DEDUCT—		
Interest on outstanding bonds, £540,000, with exchange and commission	$211,722 54	
Interest on convertible bonds	630 00	
Working expenses, including materials, repairs, subsistence, labor, salaries, new cars, etc.	483,801 31	
Office expenses.....	23,695 90	
New-Granadian Government—Proportion of mail receipts	10,000 00	
		729,349 75
Net earnings for the year		$1,013,444 52
Dividend No. 20, paid April 5, 1862, $4,990,000 at 3 per cent....	$149,700 00	
Dividend No. 21, paid July 5, 1862, $4,990,000 at 3 per cent....	149,700 00	
Dividend No. 22, paid Oct. 5, 1862, $4,990,000 at 3 per cent:...	149,700 00	
Dividend No. 23, payable Jan. 5, 1863, $4,992,000 at 3 per cent.	149,760 00	
New-Granadian Government, 3 per cent.	17,965 80	
Paid to sinking fund ..	100,000 00	
		716,825 80
Surplus of 1862 (after dividends), to credit Undivided Earnings...		$976,618 72

GENERAL STATEMENT.

Book accounts.....		92,712 73
Trustees of sinking fund		975,369 86
Undivided earnings from road	$1,195,897 21	
Less exchange acc'nt for premium on sterling bonds, etc.	312,222 43	
		883,674 78
Undivided earnings from steamers, sailing vessels, tug and launches	$414,896 53	
Less dividends, $149,720, and loss on steamer Columbus, $28,890 87	177,610 87	
		237,285 66
		$10,763,723 03

SINKING FUND IN HANDS OF TRUSTEES.

Amount invested	$300,369 86
Company's sterling bonds redeemed, £135,000 at $5	675,000 00
Total.....	$975.369 86

Finances of Minnesota.

The Treasurer of Minnesota makes the following report of the financial affairs of that State on the 1st inst.:

Amount in the Treasury Dec. 1, 1861.	$4,729 42
Receipts from all other sources.....	216,362 33
Total for the year ending Dec. 1, 1862	$221,091 75
DISBURSEMENTS.	
Total disbursements for the year....	$184,535 88
BALANCE.	
Baiance in the Treasury Dec. 1, 1862.	36,555 87
Excess of balance over that of last year	31,826 45

The war fund of $75,000 and refugee fund of $25,000, are not included in the above statement,

as the money has been received and payments made since the 1st instant.

Massachusetts Railroad Dividends.

The following dividends are payable in January, at the dates given in the margin. The Berkshire Railroad is quarterly. The dividends are all payable in Boston—excepting Connecticut State 6s at Hartford, New Bedford and Taunton Railroad bonds at New Bedford, Agricultural Branch Railroad guarantied stock at Marlboro', and Providence and Worcester Railroad at Providence, R.I.

Formation of Insurance Companies.—Fraudulent Capital.

A NOTE GIVEN AS PART OF THE CAPITAL OF A MUTUAL INSURANCE COMPANY, WITH THE UNDERSTANDING IT WOULD BE REDUCED IN AMOUNT, HELD VALID FOR ITS FACE. SUCH AGREEMENTS ARE FRAUDS UPON THE LAW AND THE PUBLIC.

The following action was brought in the Supreme Court of New York by George S. Tuckerman, as receiver of the New York Central Insurance Company, against Morgan L. Brown, upon a note for one thousand dollars, given by the defendant to be used as a part of the $100,000 original capital stock of that company. The note was not dated, but was in fact given February 15, 1851, and an application at the same time made to the company to be organized, for insurance to the amount of the note, although a policy was not issued until May 2d, 1851, after the company had become fully incorporated. The commissioners to pass upon the capital stock were appointed by the comptroller, March 22d, 1851. They met and passed upon the capital stock notes, April 3d, 1851. The company was fully incorporated by the filing of a copy of the charter in the Otsego County Clerk's Office April 15th, 1851.

It appeared from the evidence that on the 15th day of February, 1851, (before the company was organized,) one J. C. Munson, who had been employed by Messrs. Olcott & Hammond, who were afterwards elected two of the directors, went to defendant and desired him to give his note to start the company and get organized, and Munson stated or agreed, by authority from Olcott & Hammond, that after the company was organized and a sufficient amount of subsequent or guaranty notes taken, the note should be reduced to the amount of an ordinary guaranty note, and that the note should not be assessed. The commissioners appointed by the comptroller, met April 3, 1851, and passed upon the capital stock notes, including the note in suit, which they delivered to the secretary of the company. On the 16th of January, 1852, three of the executive committee endorsed upon the note and signed this memorandum; "The within is reduced to $50 by order of the executive committee;" and May 2d, 1852, at the expiration of one year from the date of defendant's policy, the note was returned to defendant by mail; no assessment being then made upon it, and he paying nothing upon or by reason of it, or his insurance for one year, except the $350, which he paid at the time of signing the application.

On the 22d of February, 1856, the plaintiff, in an action in the Supreme Court, was appointed receiver of the effects of the company, and subsequently this suit was brought for the full amount of the note as originally made by the defendant. On the trial at the Circuit, the Court held, "That the company had no right to reduce the amount of the note, or surrender it, and that, notwithstanding the surrender and giving up of the note, in pursuance of the agreement, while the company was solvent and doing business, the receiver had a right to treat it as void, and could maintain an action upon the note." A verdict was directed in favor of the plaintiff for the amount of the note, and the case then came up and was argued before the Onondaga General Term of the Court.

On the part of the defendant it was contended that the reduction and subsequent cancelling and giving up of the note by the company, in pursuance of the agreement and condition on which the note was given and policy taken, was valid and binding as between the company and the defendant. The plaintiff, as receiver, had no greater rights than the company. Neither the company nor the receiver could repudiate an executed agreement after receiving the benefit thereof, although it may have been made and executed in violation of the statute. Neither could the company or the receiver avail itself or himself of the fraudulent or illegal acts of the company as a means of relief. The agreement being executed, must stand, and the persons injured thereby, if any, must look to the wrong-doers for redress. The parol agreement made at the time the note was executed, qualified the promise to pay in the note, and rendered it a conditional promise only.

On the part of the plaintiff it was urged that the form of the note was a sufficient compliance with the statute in regard to capital stock notes; and the note being a capital stock note was payable absolutely, and at all events. It could be collected although no loss had ever occurred. Notes like this constituted the capital stock of the corporation, and the makers were the stockholders. Stockholders have always been held liable to pay in the amount of their stock, though it be not required to pay debts. But here in a direct proceeding against the corporation, and of which defendant is a stockholder, it had been adjudicated that the corporation is insolvent. The adjudication of that fact is as binding upon the defendant as if he had been personally a party to that action. The receiver represents the company, the creditor in whose action he was appointed, and all other creditors of the company. He is not merely the representative of the company. He is the officer of the court in its behalf to collect the property and distribute it equally among the creditors. The agreement given to the defendant by Munson was no defence to the action. The company was not incorporated at the time the agreement was given and could make no agreement. But had the agreement been made by the company, it would have been invalid. Individuals cannot give their notes to the amount of $100.000; allow them to be passed upon as capital stock, and hold agreements in their pockets which render those notes worthless. The statute prescribes what the liability of the makers shall be. and such an agreement being clearly contrary to it is void. The reduction of the note and its surrender were void as against the plaintiff. An agreement that after the note was passed upon as a part of the original capital stock, it should be reduced from $1000, to $50, would be illegal. It would be a fraud upon the law, the public, and others who gave their notes to be used as capital stock, supposing defendant was in reality liable with them to the amount of $1000, and bound to contribute in that proportion.

The General Term gave judgment in favor of the plaintiff, and rendered the following opinion.

BACON, J.—It would, I think, be a reproach upon the law, if the defence in this case should be sustained by the courts. It would demonstrate that the machinery by which was originated the brood of mutual insurance companies that have overrun this State like the frogs which infested Egypt, was more of a sham than it has heretofore been supposed to be. An agent of certain persons

who contemplate the organization of such a company, solicits a party to give his note for $1000, which is to be used as a part of the $100,000 of capital notes which are to be exhibited to the commissioners, on which they are authorized to give their certificate, and this on the representation and agreement that he shall not be assessed upon the note, and that it shall be returned to him within a year. And after the company is organized, a committee first reduce it to $50, and then the board return the note, without any assessment having even been made upon it, or any portion of it whatever having been paid. Such an agreement by the authorized agent of a company formerly organized, would be totally void as a fraud upon the public and upon the law; and the act by which the company subsequently attempt to ratify and carry out this agreement, is equally invalid. The statement of such a case carries its own solution with it; and no authority carefully considered, and its facts understood, can be found which will maintain a defence such as the proof in this case exhibits.

It would be a waste of time to go over the argument, which shows the utter baselessness of the grounds on which the defendant seeks to avoid a recovery in this suit. That has already been done in the case of Tuckerman *against* Brown. The facts of that case cannot be distinguished from the one before us; and both because it is a General Term decision directly upon the point, and because we concur in the reasoning upon which it is upheld, we follow its authority. That case expressly holds that the surrender of the note, in pursuance of the agreement under which it was obtained, did not release the liability of the party who gave it to the corporation, and that the receiver of the company can maintain an action to recover upon it as a valid security for the benefit of the creditors of the insolvent corporation. Judgment must be rendered for the plaintiff on the verdict, and the motion for a new trial denied.

St. Louis, Jacksonville and Illinois R. R.

This Company has been recently organized; the result of a consolidation of the Tonica and Petersburg, and the Jacksonville, Alton and St. Louis Railroads by a vote of the stockholders in both interests. An election for Directors, held on the 10th of Dec., resulted in the appointment of the following gentlemen:

George Straut, Josiah Sawyer, Nathan W. Green, W. T. Green, Wm. T. Beckman, Alex, McDonald, Stephen Dunlap, L. E. Worcester, Geo. Wright, Joseph G. Scott and Wm. Shephard.

The new Board organized by electing George Straut, Esq., President; Wm. T. Beckman, Superintendent; Jas. E. Berdan, Treasurer, and Chas. D. Hodges, Secretary.

The road is already in operation from Petersburgh, Menard county, south 44 miles to Manchester, which is below Jacksonville. Materials are on the ground for completing it to Whitehall, in Greene county, 8 miles further. From Petersburgh to Washington, where it strikes the Logansport, Peoria and Burlington road, two-thirds of the grading is done, and it is claimed this part of the road will be running by September next. About one million dollars have been subscribed along the line, and the financial condition of the new company is represented as good. The road will pass through and develop some of the best portions of the State.

Commerce of Chicago.

The following are the imports at and exports of the leading articles from Chicago for the past three years, ending Dec. 31:

Debt of Boston.

The total funded and unfunded debt of the city of Boston at the close of business on the 24th ult., was $10,589,907 77, classified as follows viz:

City debt		$3,186,120 63
Water debt, being for the net cost to the City of the Water Works up to date		6,228,787 14
Total		9,415,907 77
Water debt—funded.....	$681,500	
" —unfunded.....	493,500	
		1,175,000 00
		$10,589,907 77

In this amount is included about $150,000, appropriated for work yet to be done by the incoming administration.

The following debts will become due, and will be paid before the close of the present financial year, which will be on the 30th day of April next:

City debt—due January 1, 1863.....	$197,500 00
Water debt—due April 1, 1863.....	20,000 00
	$217,500 00
The consolidated debt funded and unfunded, on the 24th of Dec., 1861, amounted to..	$9,624,699 77
Means then on hand to pay the same.	1,222,053 94
Net debt	$8,402,465 83

Consolidated debt on the 24th of Dec., 1862, exclusive of the war loans.....	$9,414,907 77	
Means on hand.....	1,028,027 18	
		8,386,889 59
Net reduction of debt on City account and Water Works in 1862..		$15,765 24
The war loans, funded and unfunded, amount to		$1,750,000 00

Enlargement of the Mississippi and Lake Michigan Canal.

Col. J. D. Webster has made his Report to the Secretary of War, in relation to the "practicability, cost and military and commercial advantages of opening a passage for gunboats and armed vessels from the Mississippi to the Lakes, by improving the navigation of the Illinois river, and enlarging the Illinois and Michigan Canal." The following is a brief synopsis:

"The canal will commence at Chicago, (Lake Michigan,) and follow the line of the Illinois and Michigan Canal southward to La Salle, on the Illinois river—a distance of ninety-six miles. The present canal will be widened and deepened, so as to have a width of one hundred and sixty feet on the bottom, with sloping rock walls of ten feet. The depth of the canal is to be seven feet, so as to be easily navigable by vessels drawing six feet of water. From La Salle the Illinois river is to be followed to its junction with the Mississippi river, a distance of two hundred and twenty miles, in which there is a total fall of twenty-eight feet. It is calculated that seven dams and locks on the Illinois river will afford a sufficient depth of water, the year through, to keep the communication perfect. The locks, both canal and river, it is proposed to make three hundred and fifty feet long and sixty feet broad. This is something quite unheard of in the size of locks; and their immense capacity may be understood in the explanation that twelve of our present ordinary canal boats could be put through at one lockage, in from fifteen to twenty minutes. The entire canal when completed is to be fed from Lake Michigan, which has an elevation sufficient to pour an unceasing stream of its waters toward the Mexican Gulf. And its rise and fall in the course of the year is hardly perceptible to the closest gaugers of its tides, so that the supply to the canal would be never failing.

The estimated cost of this great work is $13,-

346,824. The entire length of it (three hundred and sixteen miles) will lie in a country as rich as the valley of the Nile, and salubrious and populous with industry, as that valley never was. The Erie Canal (three hundred and fifty-four miles long,) received in tolls the present year over $5,000,000. The great Illinois Canal, to connect the Mississippi valley with the Atlantic seaboard, would be a far more imposing work in its beginning than the Erie Canal at its projection was supposed to be. In case of war with England, that power could cover the lakes with gunboats and annihilate the immense commerce of our lake States and the Northwest. It would be of inestimable advantage to the United States in such contingency to be able to turn through the ship canal an iron-clad fleet of light gunboats from the Mississippi river and transports filled with hardy Western soldiers. The ability to do so would insure the sweeping of every vestige of English power from the borders of the lakes, down the St. Lawrence to the ocean and into it."

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Dec. 26, 1862, was as follows:

Passengers	$17,988 79
Freight and live stock	30,932 69
Mails and sundries	2,739 87
Total	$51,661 35
Corresponding week of 1861	50,729 46
Increase	$931 89

The earnings of the Grand Trunk Railway for the week ending Dec. 27, 1862, were:

Passengers	$18,830 77
Mails and sundries	10,847 62
Freight and live stock	61,120 10
Total	$90,798 49
Corresponding week, 1861	86,442 50
Increase	$4,355 99

The earnings of the Galena and Chicago Union Railroad for the 4th week of December, 1862, were | $42,779 20
Same week, 1861 | 39,320 58
Increase | $3,458 62

The Prosperity of our Manufacturing Establishments.

The market continues very quiet, and merchants have little to do but look over their books, which testify to a very large season's trade, in dollars and cents. It is the universal testimony of the domestic commission houses, who have not lost any of their accounts, that the amount of their sales has seldom been exceeded in any season. Several have sold more than a usual number of packages, and the enormous semi-annual dividends declared by most of the cotton goods corporations show how profitable the season has been. Take for example the following, which have been lately declared:

	Capital	Dividends.
Naumkeag Co.	$700,000	66 per cent.
Bates Manufacturing Co	800,000	45 "
Nashua Mills, (N. H.)	1,000,000	30 "
Boston Co	450,000	20 "
Lanconia Co	1,000,000	20 "
Massachusetts Mills	1,800,000	20 "
York Manufacturing Co	1,200,000	20 "
Jackson Co	600,000	20 "
Appleton Co	600,000	10 "
Merrimac Co	2,500,000	10 "
Lowell Co	300,000	10 "
Everett Mills	700,000	10 "
Great Falls Co	1,500,000	10 "
Hamilton Co	1,200,000	10 "
Bartlett Mills		10 "
James Mills		10 "
Globe Mills		10 "

These are not a minor portion of the dividends declared, but constitute the bulk of those yet made known. The woolen goods houses report a fair trade, though not so satisfactory as that in cotton goods. The jobbers never had such a chance for making money as they enjoyed during the past season, and several of them improved it well. Several of the foreign goods houses report larger sales than usual. The Fall imports of dry goods are 80 per cent. of average for the previous eight years, and 73 per cent. of the average for the seven years preceding 1861, although they are but little more than half of the amount received in 1859 and 1860, the heaviest years of our foreign trade.—*N. Y. Cor. Prov. Jour.*

Debt of Missouri.

The whole debt of Missouri made up to the present time is as follows:

Miscellaneous debt	$602,000
Pacific Railroad bonds (main)	7,000,000
Pacific Railroad (Southwest branch)	4,500,000
Hannibal and St. Joseph	3,000,000
North Missouri	3,500,000
Iron Mountain	3,600,000
Cairo and Fulton	650,000
Platt county	700,000
Revenue bonds	431,000
State defence warrants	725,000
Arrears of interest due	1,812,000
Total	$27,370,000

A small portion of this debt bears 5½ per cent interest, and another, but inconsiderable amount 7 per cent.

Legal Decision in Kentucky.

In the Federal Court, now sitting in Covington, a case of much interest to the legal profession and to the holders of corporation bonds was recently decided.

The material facts of the case are these: In 1852 the Legislature of Kentucky passed an act, authorizing the City of Covington to indorse and guarantee the bonds of the Covington and Lexington Railroad Company to the amount of $200,000. The indorsement and guarantee was accordingly made by the city on $200,000 of the Railroad Company bonds. These bonds had twenty years to run, and bear interest, payable semi-annually. They were sold in the stock market of the country—MARCUS DENNISON, of Baltimore, became the holder of fifty of them. The Railroad Company and city having failed to pay the interest maturing on his bonds in 1857, 1858, 1859, DENNISON instituted an action in the Federal Court at Covington for its recovery, and obtained a judgment for the amount of his interest, on which an execution was returned unsatisfied.

At the last term of that Court he obtained a rule against the City to show cause why the *mandamus* should not issue, requiring the City Council to pay his judgment out of any money in the Treasury not otherwise appropriated before the emanation of the writ, and in default of money in the Treasury to make the payment, then that the Counsel make payment thereof out of the first moneys coming to the Treasury.

The City resisted the application on the ground:

1. That it had no money in the Treasury out of which to pay DENNISON's judgment.

2. That the City Charter only authorized her to levy and collect a tax of forty cents on the one hundred dollars' value of property in the City, and that this was not more than sufficient to meet the current expenses of the City Government.

3. That the Legislature did not intend that the interest on these bonds should be paid out of the ordinary revenue; or that at most the current expenses of the City Government must be first paid before any thing could be applied on the interest.

Judge BALLARD, however, held that as the Legislature had not authorized the levy of any specific tax to meet that interest, the Legislature must have intended that it should be paid out of the ordinary revenue of the city, arising from the 40 per cent. tax authorized by the charter; that the interest on these bonds was as much chargeable to this fund as any other debt, not excepting those incurred in the course of the City Government: that no lien exists in favor of any creditor of the city on this fund; that it is the duty of the city to pay her debts in the order in which they arise; that those creditors who first resort to the courts to compel payment of their debts, must first be paid; and that if the present rates of taxation are not sufficient to enable the city to discharge her debts as they accrue, the city must resort to the Legislature for additional powers. He accordingly awarded the writ as asked for above, confining it, however, to the 40 per cent. so that the School and other special funds, are not included. It will be seen that this writ requests the city to pay DENNISON's debt before she can appropriate a dollar of her revenue, (aside from the School Fund, etc.,) to any other purpose.

Railway Companies and their Parliamentary Expenses.

The Eastern Counties Railway has paid about £48,000 within the seven years, of which nearly half has gone in opposing other projects. No year is without its charge for parliamentary expenses, and a sum little short of £29,000 stands against 1861. The Great Northern has appropriated more than £50,000 to the same purpose, two fifths of which, or thereabouts, represent opposition. The lawyers' bill of the Lancashire and Yorkshire is still higher, approaching as it does a total of £90,000, above, £40,000 of which disappeared in 1861. The Lancaster and Carlisle, considering the shortness of the distance between these two cities, has been more extravagant still, for, though there is no return for the last two years, that for the five previous years considerably exceeds £20,000. The London and North-Western has not yet made up its accounts for 1861, but it figures for between £140,000 and £150,000 of costs incurred in the six preceding years. The South-Western and Midland estimate their law expenses respectively at about £60,000, the London and Brighton at less than £50,000. the South-eastern at a little more that £40,000. It will be almost a relief to the shareholders of our friend the Great Western to find that only £86,000 has been squandered in fruitless competition and improvident arrangements with other lines, but £40,000 of this was absorbed in 1861 alone, and we are candidly told that some of the bills have not yet come in. On the other hand, we were scarcely prepared to see £80,000 set down to the account of the Caledonian, and £60,000 to that of the North British. Nor must it be supposed that the most glaring examples of apparent prodigality are furnished by the great old-established companies. The "Monkland," for instance, of which we confess we had never heard before, found means to get rid of £11,000 in 1860, partly in opposition to some rival, and the Tewkesbury and Malvern actually disbursed £35,000 on law in the same year. It is but justice to say that one or two lines, such as the Exeter and Crediton, Great North of England, Clarence, and Hartlepool, are able to send up blank returns in proof that they have succeeded in keeping out of the lawyers' hands for seven years together. Whether this be due to good fortune or to good management we cannot say, but if there be a secret for escaping litigation in the possession of these companies, the sooner it can be found out by others and published to the world the better.—*London Times.*

The Russian Telegraph to China.

The *Journal de St. Petersburg* of the 4th ult., contains an important announcement with respect to telegraphic communication with China. An order of the day of the Director-General of Ways and Public Works states that the construction of the line of Siberian telegraphs, which has already reached Omask, and will in the course of 1863 be extended to Irkutsk, has, with the assistance of the post, allowed of a more rapid interchange of communication between England and China, and that in consequence of this, and through the medium of the Minister of Foreign Affairs, to open communications thereupon, arrangements

have been carried out to enable the Western Powers to correspond with China via Russia. Despatches from the interior of the Empire. destined for Kiachta and Pekin, will be received for transmission at the telegraph stations at St. Petersburg, Moscow, and Nijni-Novgored.

Income and Expenditures of New York City.

The Comptroller has submitted to the Common Council his estimates for city or corporation expenditures for the year 1863. The following are the totals:

For support of the city government	$5,191,159 00
For interests on the city debt	825,771 20
For redemption of the city debt, including war loans	1,071,657 36
Total	$7,088,587 56

The expenditures for the year 1860 were $6,413,486 22, and for 1861, $6,733,570 49. But there were of course, no calls for money for the war. The expenditures of eleven months of 1862, including $609,760 82 for war purposes (without loans), have been $6,187,659 15,

The income of the city for 1863 from the several sources of revenue, including the interest on taxes, school money from the state, and surplus revenues of the Sinking Fund, is estimated at $1,071,032 60. The account of the city will therefore stand as follows:

Expenditures	$7,088,587 56
Income of the City	1,071,032 60
Amount to be raised by taxation	$6,017,554 96

The estimate of the expenditures of the city and county of New York for 1863 have also been made. The following are the figures:

County expenditures	$5,245,777 08
City expenditures	7,088,587 56
Total for city and county	$12,334,364 64

The amount to be levied on taxable property will but slightly exceed eleven millions of dollars.

Mississippi and Missouri Railroad.

The work of extending this road is progressing as rapidly as possible. Sufficient iron has been shipped from New York to lay the track about ten miles—more than half way from Brooklyn to Grinnell, and the roadbed and bridges are about completed.

The road is doing first-rate business, better than ever before. Take, for instance, the present month; the stock trains have been heavy. For the past three weeks the average number of loaded freight cars each day, going East has been *twenty-five*, making four hundred and fifty cars during this month. The general travel, saying nothing of soldier travel, is very fair and constantly increasing. All the cars of the Company are employed, and more too. The road has eight or nine locomotives constantly employed.

At the Company's shop in this city all is bustle and activity. There are about fi ty men employed in repairing cars and locomotives, and other work appertaining to the road. There are three locomotives being repaired, and when they are completed, which will be in a few weeks, every engine on the road will be just as good as when new. Mr. Kimball, the Assistant Superintendent, informs us that the prospects of the road are encouraging. It is being run on the most economical basis, and only wants a little lengthening out every month or so to be one of the leading institutions of the Western States.—*Davenport News.*

Western Maryland R. R.

At a recent annual meeting of the directors of this Company, Captain Robert Irwin, senior partner of the firm of Irwin & Taylor, contractors and builders of the road, was elected President and General Superintendent for the ensuing year. The earnings of the road during the month of November, were, we learn, fully adequate to meet the interest on the Company's bonds and pay all other expenses. The month of December promises a still more favorable result. A *corps* of engineers is soon to be sent out to survey the route from Union Bridge towards Hagerstown with a view to continuing the work at the earliest practicable period to its destined terminus at that place.

Union (Boston) Railway Co.

From the report of the directors of this Company for the year ending Nov. 30, 1862, it appears that the total amount of earnings from all sources is $197,221 96 or $15,381 49 more than in 1861; and the expenses of all kinds, including rent, $180,143 87, or $4,369 59 more than in 1861; making a profit of the year $17,078 09; the surplus on hand from former years is $268 06; total $17,346 15; from which sum a dividend has been declared of 10 per cent. amounting to $16,000; balance to credit of profit and loss $1,346 15. Sunday cars have been run 31 Sundays, and the result is an average of 4376 passengers, per Sunday, the smallest number being 2010 and the largest 8047. The reduction of fares early in June resulted in a loss in receipts of $10,014 01. This estimate is based on the numbers actually carried, but it is probable that the number carried have in some measure made up this loss. The whole number of passengers this year is 2,764,419, or 168,957 greater than the previous year. Of these 135,655 are from Sunday business. The report states that the road has been more economically worked, especially in the last half of the year, than heretofore, but that the winter expenses have been very heavy. During the year the floating debt has been reduced $45,335 12, and the mortgage debt $1300, so that the whole amount of mortgage debt is now $22,200; the whole amount of notes payable other than mortgage notes $8000; to which add rent accrued and not due, $10,306 69. and the total is $40,506 69. The number of miles run during the year is 652,053, or 54,850 more than in 1861.

Pacific Railway.--Its Present Prospects.

The amendments to the original act of construction of this great work, now pending in Congress are understood to be, for the reduction of shares from one thousand to one hundred dollars each; for the easier procurement for the right of way, and the surrender of the sum of four thousand dollars per mile, retained by the hands of the Government as a sinking fund. It is understood these will meet with no opposition.

We have had the pleasure of seeing a map, prepared under the direction of, and at the expense of Henry Farnam Esq., of Chicago, showing on a large scale, the most approved routes of the line as ascertained by the former surveys. By this it is apparent that Bridge's pass will be preferable in all respects to the South pass, giving the easiest grades, none of them formidable, most of them less than 50 feet to the mile, and ensuring the most direct route.

We may add on the best authority, that there is no doubt the work will be pushed forward without any unnecessary delay. About four hundred thousand dollars have been subscribed in the remote western cities and territories, and there are capitalists ready to come forward with what is necessary, to secure the construction of the first sections to be opened, thus securing the charter and the final success of the work. It is even now calculated that if it be only opened at present as far as the Colorado Territory, it will be a paying investment.

Railroad from Flemington to New Jersey Central Railroad.

A railroad is in the course of construction from North Branch (a point on the New Jersey Central Railroad, about five miles beyond Somerville) to the village of Flemington, the county seat of Hunterdon county. This road will be about fourteen miles in length, and will pass through the richest agricultural region of New Jersey.

Interesting to Illinois Bondholders.

The constitution of Illinois provides for the collection of a tax of two millions of dollars for the purpose of paying off the principal of the state indebtedness, by applying the sum thus obtained *pro rata* on the bonds presented to the 1st of each January. Illinois bonds have been rising in the market for several years past, until the holders no longer present them for payment. In 1858 over $1,200,000 of state bonds were presented, on which 52 per cent. was paid; in 1859 only $25,000 were offered, all of which were redeemed; and in 1860 not a dollar came to the Auditor's office. Seeing there was no further necessity for the tax, as a state cannot compel its creditors to receive their money, the legislature passed a law suspending its collectton, and directing the amount from that source then in the treasury to be transferred to the revenue fund.

On the 2d instant, however, Messrs. Yoe and Magie presented $200,000 worth of bonds, upon which they demanded payment in whole or *pro rata*, which of course, the auditor refused to make. They will now institute suit, with the view to compel him to draw his warrant for that portion of the two mill tax transferred to the revenue fund. The question is an interesting one to the people of the state, as well as to the bondholders, since it will test the constitutionality of the act suspending the collection.

The total funded indebtedness of Illinois is $12,222,388 20. Of this amount over $2,000,000 is represented by war bonds. The unfunded inpebtedness of the state is $114,933 17.

Population of British India.

According to the latest returns, the population of British India is as follows: Under the Governor General in Council, 14,165,161; Bengal, 41,898,608; North West Provinces, 30,110,497; Punjaub, 14,794,611; Madras, 23,127,855; Bombay, 11,937,512; making a grand total of 135,634,244 human beings.

New Route to India.

The London *Times* says that the roads to India are many, and the Isthmus of Suez does not offer the best. If the canal could ever be constructed, it might be destroyed by competitition before it had been open a month. If a line run from London to Bombay it would go straight along the Euphrates, but nowhere through the Red Sea. An Euphrates valley railroad would relieve the route round the Cape.

Western (Mass.) R. R.

The Western Railroad Company have already commenced surveying the route for the proposed extension of their road from Worcester to Boston, in the event of a change in their charter during the ensuing legislative session. The work is being accomplished by Mr. Chesboro of this city, but it is not yet certain, if the road is built, which of the two or three routes will be chosen.—*Boston Journal.*

Philadelphia and Erie Railroad.

On the 31st December, the trains on the Philadelphia and Erie Railroad commenced running to a place called Grove Flat, fifty-one miles northwest of Lock Haven, and one hundred and sixteen miles from Sunbury.

Bald Eagle Valley Railroad.

The cars on the Bald Eagle Valley Railroad are now running to Unionville. The track, we understand, is all finished except about 2¼ miles.

Erie and Pittsburg R. R.

The Erie and Pittsburg railroad has been completed to West Greenville, Mercer county, Penn., and trains are now running regularly between that point and Girard.

American Railroad Journal.

Saturday, January, 10, 1863.

Stock Exchange and Money Market.

As the old year retires from us, we get a better view of it. Its form and proportions are more readily perceived at a little distance, than from their midst. It has been a wonderful year. Take it all in all, the events which have crowded it, have no parallel in history. This we think will be the opinion of posterity. One of its remarkable features is the development of the military and financial strength of the United States. It surprises even the most sanguine believers in the power of this Union. We have found money enough without borrowing a penny from unwilling capitalists abroad, to construct and maintain an enormous navy, to raise and support an army of a million of men, and pay off the National debt as it has fallen due in part, not in paper, but in specie, bearing an enormous premium. Men must be in earnest who do such things, and they must be strong men who can do it. So too the financial record of the State of New York for the past year is equally remarkable. From the annual report of the comptroller we learn, that our State taxes, notwithstanding the war, "need not and ought not to be more than one half" of the amount assessed in 1862, viz: upwards of $6,884,193.

The receipts on the canals according to the

same authority, for the fiscal year ending 30th of Sept., 1862, were $4,799,518 09, while the expenses of management and maintenance for the same period, were only $773,398 32. This shows in the most striking manner, the value of these great public works, demonstrate the sagacity and forecast of the immortal Clinton, and give stability and certainty to the future financial policy of the Empire State. The condition of the Money Market, as observable in this city, sympathises with all this. Money continues abundant, the rate of interest keeps down and the price of stocks, where they represent legitimate operations, keeps up.

Some objection has been taken to the recent paying off in gold, of that portion of the former National debt which fell due in December. Our readers may remember, that we advocated that course as a matter of justice and policy, and we are gratified that our opinions were sustained by the action of Secretary Chase. It has been contended, that the Government made an unfair distinction in this case, paying one class of creditors in specie, while others can get nothing but paper. But these objectors forget a nice distinction which exists in these cases. The loan reimbursed in December, was made when gold was at par, and the Government received gold for its stock. There was great propriety in its keeping good faith on this occasion, and paying back exactly as it received. But the loans it now makes, are received in paper, depreciated in regard to gold, from 30 to 34 per cent., and to pay it back in paper of the same value is no violation of justice or equity. If this principle is kept in view, the supposed inequality of contracts disappears.

There are some singular inconsistencies in the reasoning, which is applied to issues of paper and of credits. It is not our purpose to enter the lists as their opponent, but to notice them as subjects of study.

Thus in some condition of things, the issue of paper of a business character, founded on value received is considered legitimate, and when large in amount, is taken as the evidence of great and prosperous commercial activity. When the banks show in their statements, large amounts of discounted paper, the public judge that they are doing well, and then stockholders look on complacently in the assurance of good dividends. But when the Government issues its bonds, certificates or treasury notes to any extent, the same parties assume at once that it is on the high road to bankruptcy and ruin.

There is still another singular inconsistency worthy of notice. When a bank issues its notes, it has a precise fund for their redemption, dollar for dollar, and after paying back their capital to the stockholders may have but little more left for any purpose. Many banks under the old system failed even in their redemptions. But in the case of the United States issues, there is a very different condition of things. It is ascertained from the late census, reduced to tables, such as have been issued from the Bureau of Agriculture and have been noticed and commented upon in this JOURNAL, that the value of the real and personal property of the loyal States is upwards of thirty thousand millions of dollars. This estimate does not include the great public domain of unsold lands. This property is always within the reach of the Government by taxation, while the property of the stockholders in banks, is not at the disposal of those institutions beyond the amount of stock held by the corporators or stockholders. The Government security is the highest and best which can possibly exist, as long as the Government exists which offers it. Let us apply this fact to the Treasury notes now afloat. Mr. Chase in his late report states the amount at $222,932 11.

This being the case, this amount of treasury notes, compared with the value of the real and personal estate of the country, estimated be it remembered at the standard of gold at the time the census was made, is not one per cent of the ascertained wealth of the country. This is evident from the simplest arithmetical calculation, showing the ratio of 300 millions to 30,000. It is very evident then, that the people of this country have nothing very alarming to fear from the Treasury Currency now afloat, when it is not one per cent of the capital of the country. We do not care to pursue this idea even to its legitimate conclusion. It is suggestive, and we leave it to be followed up by those who are disposed to think and reason.

The present inflation of the currency would have had its parallel, if what now circulates in paper, were in the form of gold. In California where there is no paper, prices of fixed property have always ruled high, and commanded fabulous prices. In reasoning therefore on these subjects, we must remember there is much to be said on both sides of a question. What this JOURNAL aims at in its weekly notices of the Stock and Money Market, is to steady the public mind, to cool it down when exposed to excitement, to maintain it in a clear and philosophic state, to accustom it to look boldly and bravely at unforeseen events, to rely on its own strength and resources, and to exhibit unity of purpose, confidence in its cause, and strength in its determination.

We are happy to perceive that the Financial Circular of Samuel Hallett & Co., for the present week which we give elsewhere in our columns, takes a cheerful view of the commercial and financial condition of the country.

The following quotations are in addition to those given elsewhere in our columns:

Pittsburgh and Connellsville Railroad.

The annual meeting of the stockholders of this company was held in Pittsburg on the 1st of Dec. The following is an abstract of the report presented:

On the 31st of October, when the Company's official year terminated, the floating debt was $110,417 19, being $25,105 10 greater than on the same day the previous year. This increase is composed of balances due on purchase of locomotives and cars, interest on real estate debt, right of way Turtle creek division, special loan (in part) from city of Baltimore, and some other unpaid claims of a miscellaneous character.

The total gross revenue of the year from all sources has been $129,918.

The current expense of maintenance, working and administration during the same period has been $90,480 57, leaving $39,437 24 as the net revenue of the year.

The expenditures during the year for construction and equipment, right of way and real estate, have been $175,292 30 on the Western and $768 84 on the Eastern Division of the road.

The general expenses of the Company, embracing salaries, legal expenses, stationery, printing, office rent and miscellaneous, is $10,942: an increase of $3,143 on those of 1861, but only an increase of $1,793 on those of 1860.

The number of passengers carried was 143,510, and the revenue therefrom $56,253, against 60,968 passengers and $22,426 revenue therefrom the previous year; showing an increase of 82,542 passengers, or 135 per cent, and $33,827 of revenue, or 151 per cent.

The freight transported was 85,763 tons, and the revenue therefrom $69,992, against 56,539 tons and $43,993 revenue therefrom the preceding year; an increase of 29,224 tons, or 51¼ per cent, and $25,999 of revenue, or 59 per cent. The receipts

for carriage of the mail were $8,560, and from shop work $113. The total revenue being, as before stated, $129,918, which, compared with $70,106, the revenue of the previous year, exhibits the gratifying increase of $59,812, or 85⅓ per cent.

The report says:

The results of the last year's working show that the road as a local improvement is doing well, and after a time would sustain itself, benefit greatly the country it traverses, and the city of Pittsburg, its western terminus. But with these expectations neither the Company nor the public would rest satisfied. The road must be completed to its eastern terminus—this is the great purpose for which the board are laboring, and hope not to labor in vain.

National Finances and the Currency.

This is the title of a pamphlet from the pen of James Gallatin, Esq., President of the National Bank, and whatever comes from his pen is the fruit of great experience and ability. It is in the form of a letter to Hon. Samuel Hooper, M. C from Massachusetts, and treats of the following subjects:

Injustice of the legal tender paper money.
Present condition of financial affairs.
Cause of suspension of specie payments.
Five twenties unsaleable.
Further issues of legal tender.
Extent of the over issues of paper money.
Scarcity of legal tender notes explained.
The stock jobbing mania and its origin.
Proposed free banking system and its dangers.
Precious metals not dead capital.
Enormous inflation under the proposed Free Banking system. Specie payments for another generation.
Future rate of interest.
Secretary of Treasury deceived by false currency theories.
Dangers of delay in Congress.
Cause of the high premium on gold.
Remedies and changes.
Legal tenders tending to unlimited issues and final explosion.
Proposed system for sustaining the Government, and averting further depreciation.

Under this last head we find the propositions to that end proposed by the author, and we quote them entire:

"In my judgment, it would seem judicious to determine at an early day what maximum of currency existed at, say, the date of suspension of specie payments, and upon all over this, and upon all issued by any bank since established over a certain percentage of its capital, a tax more or less prohibitory might be laid. Provide in the same act for a tax on small notes, to go into effect within a certain time after the suppression of the rebellion; and in order to establish at once a specie currency for the convenience of the government and the people, issue receipts for gold deposited in the Treasury, in sums of $10, $20, $50, $100, $500, and $1000, payable on demand, and retaining the gold in hand, dollar for dollar, to pay these receipts. To recapitulate, these measures in favor of a purification of the banking and currency systems are:—

1. Taxation, more or less prohibitory, upon bank circulation, over a certain sum existing at a stated time, or a sum which may have been the average for a certain time, commencing six months or a year hence, or beyond the date mentioned in the act.

2. A tax of say forty per cent. per annum, on all bank notes in circulation under five dollars, to commence one year after the suppression of the insurrection.

3. A tax of say thirty per cent. per annum on all bank notes in circulation of five dollars and over, and less than ten dollars, to commence two years after the suppression of the insurrection.

4. The receipt of gold, and issue of receipts therefor, at all the sub-treasuries.

5. Require all banks to pay their creditors, in legal tender United States notes, while issued, or coin on demand, under penalties to be prescribed in the act.

These measures, it will be observed, contemplate the preservation of the currency and banking systems in their present state, as near as possible, with a view to gradual improvement. If judiciously incorporated into the legislation of Congress, it is my firm conviction that they would make our financial system the best that has yet been devised by man, and render the United States the most powerful and stable government on the face of the globe."

No financial discussions ever came to any satisfactory result, and, however well put and argued, we imagine Mr. Gallatin will find many of his propositions controvertible.

Thus his estimate that the coin circulating, and in the banks, is two hundred and ten millions, is contradicted by a statement which we publish elsewhere in this number, which shows that the amount is upwards of seven hundred millions.

Another remark that "labor is the last thing to rise with an inflation of the currency," is not correct. Labor has risen enormously the past year. Three dollars per day are paid in most cases where a dollar, or a dollar and a half was the current rate. All branches of mechanical skill are better paid than hitherto, as every one knows who has occasion to use it.

The great error of our Bullionists, which underlies all their opinions, is that gold exists in quantity enough to meet the expenditures of the present war. Why there is not only, not gold enough but even bank paper enough to answer the purpose. Shall the war stop then, and shall a theory triumph in our national necessities, to the destruction of our national existence?

We cannot get on without the use of a paper currency. The only question is of what kind shall it be.

(For the American Railroad Journal.)

The Wool Clip of Michigan.

This article is a compilation from the *Detroit Free Press*, of Dec. 31, 1862. Michigan is the fourth wool State in the Union. In 1860 the clip of

Ohio was	10,648,161	pounds
New York	9,454,773	"
Pennsylvania	4,752,523	"
Michigan	4,062,858	"

During the last ten years Michigan *increased* the wool clip more than any other State. At the present time she is increasing the wool growing business more than any other. The quantity produced in the United States in 1860 was 60,511,343 pounds—an increase of eight millions in ten years. The wool manufactured in the United States in 1860 was 80,386,572 pounds, showing an importation of over 30 per cent. The North produces only three fourths the wool she used—the South produces over five times the cotton used in the United States. Over half the capital employed in woolen manufactures is in New England. Massachusetts has nearly a third of the capital so employed. Michigan has but 20 woollen manufactories, and these on a small scale—the total capital of which is only $139,500, consuming only 223,100 pounds annually.

Michigan is particularly adapted to sheep-raising. They live and thrive well in the State. Many farmers are going into the business, and are increasing the quantity and improving the quality. The number of sheep in 1860 was 1,266,680, which averaged a trifle less than 4 pounds per fleece. The wool clips of the several counties 1860 was an follows:

Counties.	Pounds.
Allegan	26,162
Barry	60,501
Berrien	26,689
Branch	101,373
Calhoun	299,905
Cass	63,781
Clinton	50,855
Eaton	90,134
Genesee	143,643
Gratiot	1,878
Hillsdale	220,301
Ingham	89,803
Ionia	66,908
Isabella	143
Jackson	352,304
Kalamazoo	187,160
Kent	69,102
Lapeer	87,968
Leelenaw	30
Lenawee	279,193
Livingston	167,028
Macomb	177,640
Mecosta	35
Manitou	50
Monroe	66,517
Montcalm	5,875
Muskegon	40
Newaygo	358
Oakland	426,796
Ottawa	7,851
Saginaw	3,682
Sanilac	4,858
Shiawassee	46,770
St. Clair	30,788
St. Joseph	97,522
Tuscola	1,972
Van Buren	22,237
Washtenaw	551,232
Wayne	100,030
Total	4,062,858

Comparing this with the statement of previous years, we have the following result:

Total clip in 1860	4,062,858
Total clip in 1850	2,043,283
Total clip in 1840	153,375

It is remarkable what impetus the opening of the Detroit and Milwaukee Railroad gave to sheep raising in the counties through which it runs.

No sheep are now sent out of the State, and but few slaughtered. Pelts are now double the usual price. A few years ago at Battle Creek, Adrian, &c., there were manufactories for trying out tallow, at which large droves of sheep were brought for the purpose of reducing them to tallow, after the pelts were removed. Now not one of them is in operation. It is thought wool will hold up for years to come, and sheep bring four, five, and six dollars where the former price was from one and a half to two. The increase by lambs is full 33 per cent, and in some cases fifty. There are 20 per cent more sheep in the State now than in 1860, and the clip of 1863 will be as much as five and a half million pounds, and the following year six millions. The clip of 1862 was near five millions. Such is the opinion of the dealers, which can vary but little from the truth.

The figures, therefore, stand as follows:

Clip of 1860	4,062,858
Clip of 1862	5,000,000
Clip of 1863 (probably)	5,500,000

Last season the wool of the State averaged

about 46½ cents per pound, which was $2,325,000.

Prices are now quoted at fifty-five to fifty-eight cents in the Detroit market, but in Pontiac, Ann Arbor, Jackson, and other markets for our choice wool they may be a trifle higher.

The quality of Michigan wool is well established in the eastern market as inferior to none, take the entire clip through, Vermont alone excepted. The largest proportion of our wool is three-quarters blood. Spanish merinoes have thus far had the preference among our farmers. There is, however, a good sprinkle of Saxony in some of the oldest wool districts.

The foregoing facts show that the wool growing business of Michigan is one of most important productions, and will always contribute largely to the commerce and wealth of the State.

J. L.

Ventilation and Warming of Buildings. Illustrated by Fifty-four plates, exemplifying the Exhaustion Principle. To which is added a complete description and illustration of the Ventilation of Railway Carriages, for both summer and winter. By the Hon. Henry Ruttan, lately Vice President of the Board of Agriculture for Upper Canada, etc., etc.

We have received from G. P. Putnam a work by the above title, handsome in type and paper, and creditable to the publisher even as a work of art. Mr. Ruttan has spent many years in the study of his subject, and brings to its discussion a large experience and much reflection. Two important objects appear to have been contemplated by him to enforce the distinction to be drawn between ventilation in any uniformly mild climates, and such as our own; another, the application of the principle to the proper construction of buildings, the last thing generally thought of, and usually giving rise to after thoughts too often purely empirical and useless. His own great principle is that of exhaustion, and the currents he produces are by vertical movements, as he contends that the entire mass of the air in any room, must go either upward or downward, and that "there is no possibility of securing this motion of the air by any side or lateral movement."

"If we want to ventilate our room to cool it, we must let the air out at or near the top, and supply its place with cool air, which, of course, will distribute itself over the floor of the apartment; and this has been the policy in nearly all our former modes of ventilation; cold air is introduced, which, taking up heat from the occupants of the room, and from the fire, immediately escapes, through an aperture provided for the purpose, at or near the ceiling. Thus, proceeding on the erroneous notion that cold air only could be pure, they have actually been freezing the people, when they wanted to warm them.

If, on the other hand, we wish to ventilate our house, to warm it, we must take the air out at or near the bottom, thus keeping up a continual exhaustion of the cooler air; and if we wish to set the body of air in the room in motion, upward or downward, we must of course bring in the necessary amount of outside air to do it. If we want to warm the room, the air we bring in must be warm; and if to cool it, it must be cool. It depends now entirely upon where you open the aperture to let the air out whether you can set this body of air so in motion or not. If you open the aperture at the top, and the air you bring in is warm—or if you open the aperture at the bottom, and the air you bring in is cold—in either case, the body of air will not budge; your warm air will go *through* the body, straight to, and out of, the top aperture, and the cold air will do the same, through the bottom aperture. The consequence of this state of things is easily seen—you will neither warm nor cool nor ventilate your room. But if you want to ventilate your room, to warm it, and open the bottom aperture, you will succeed in both; and if you wish to ventilate your room, to cool it, and open the top aperture, you will accomplish that, because in the first case the fresh air will be the warmest, and will not stop until it comes in contact with the ceiling, where, spreading out in level strata over the whole ceiling, it will keep its relative position to the whole body, until it reaches the bottom, and passes out of the aperture; and so of the cold air, if you open the top, and let the air out at that point. In both cases every particle of air must be removed from the room; because, as air of one temperature can not, by any natural means be made to move or stop out of its level, it follows that every *particle* of every *stratum* must in its turn leave the apartment.

Nothing short of this, therefore—the movement of the whole body of air in the apartment, and that *vertically*—can be called ventilation. It matters not, so far as the mere change of air is concerned, at what point of the room you let air in, it will immediately, and without mixing with the surrounding air, seek the zone or stratum nearest its own temperature; and hence, in order to save both time and temperature, if you wish to warm an apartment, the warmed air should be introduced at once at the top."

Starting upon and maintaining this idea, the author explains in a series of chapters accompanied by explanatary designs, his method of producing the required effects of warmth and ventilation. In chapter fifth entitled the "air warmer," and the following ones, "air and water," "cellars," "woollen carpets," "cold feet," "Dry closets," "Architects and architecture," the subject is treated in an original and interesting manner. The remainder of the volume consists of elaborate explanations of the plates, and of particular instructions in the construction of building public and private rooms, furnaces, stoves, cornices, air ducts, and railway carriages, which we commend to the attention of our readers. The curious subject of winter ventilation, one would think it at first a matter of little necessity, and which took care of itself, is enlarged upon very forcibly. There is a necessity for this, even in our climate. Particularly also are the heating and ventilation of railway carriages urged by Mr. Ruttan, and he devotes a number of pages to these subjects, and what he says in relation to them is so important as to be worthy of being quoted somewhat at length in the columns of this Journal. He says:

"Notwithstanding the numberless schemes and projects and "inventions" which, within the last ten years, have been promulgated for the accomplishment of this object, and notwithstanding that the mania for the exclusion of dust from railway carriages has drawn forth the talent of this whole continent, it is strange that the simple expedient of making the carriage an entirely close, air-tight one has never been hit upon! This, surely, must exclude dust. The grand error has been the attempting of too much at once. The cooling of passengers is an entirely different thing, and has nothing to do with the first branch—the keeping the dust out. To accomplish this second branch—the cooling of the passengers—requires an altogether different mechanism; as much so as the running and warming of a carriage. It is quite true that in hot weather the passengers must be kept cool by some means; and the only means which we can command consistently, with regard to due economy, is air. "But," says the objector, "wherever air goes dust will go." Admitted, if *all* the body of air surrounding the car in a hot day is the air that is meant.

It is obv us to all that wherever the great body of air surrounding a train goes, there the dust with which it is mixed will go; all the "deflectors," "reflectors," "bow windows," "ventilators," and "aprons" in the universe will not prevent it. The dust can never be separated from the air which carries it along except by means of water. Now, we do not propose to separate the dust from *all* the air surrounding a train, because we do not require one millionth part of it for the purpose of cooling the passengers. If the air *already in the car* could be set in rapid motion, this, so far as the mere *cooling* of the passengers goes, would answer every purpose; but this, in so contracted a space as the inside of a passenger-car, is impracticable by any natural means. But if it were otherwise, the most important part—the ventilation—would be left out. A very small quantity, indeed, of air—less than two feet—properly distributed within an air-tight passenger-car, will effect the whole object of keeping a car full of passengers cool and perfectly quiet. Surely we can find means in and about a railway-carriage to purify so small a quantity of air as would flow through a pipe 1 x 2 feet in size. To this the objector may again say, and very philosophically argue: "This is an impossibility, inasmuch as you can not by its own action put a square foot, or any other quantity of air, *into* an air-tight box, unless you take exactly the same quantity and at the same instant out of that box."

When I suggested a "close carriage" to keep out the dust, I meant "close" so far as the passengers are in any way concerned. For, although there is a passage which draws off the air as fast as it comes in, yet the passengers can neither see nor feel its direct effects except as it relieves their respiration, and gives them a cooling and pleasurable sensation.

As the different mechanical fixtures and arrangements (all of which are perfectly simple and easy of construction) are fully explained in the following pages, and as their relation in detail will fully appear when the mechanism ventilates one car, I need not prolong these preliminary observations further than to state, generally, that when the combination of the several parts is completed, the air, including dust, cinders and all other foreign matter, is received at the top of the car, and is propelled by the force exerted by the motion of the carriage through the atmosphere, down flues into a large flat and light wooden pan having a barrel or two of water in it, and lying about an inch deep, and presenting a surface of from one hundred and forty to one hundred and eighty superficial feet; over the whole of which surface, by proper arrangement, the air is compelled to roll. This flat pan I call a water-tank. The air then purified is, by the same pressure which, when the car is in motion, is always exerted upon the receiving-cap upon the top of the car, forced up the duct situated exactly in front of the duct which carries it down on both sides of the car, and is from thence distributed, at a velocity of ten feet per second, just over the passengers' heads; setting in motion all the air within the car, but especially that body immediately surrounding the heads of the passengers. Thus, the passengers sit and breathe in an atmosphere but little less pure than that in a garden; the car being filled and emptied about every four minutes, and every one fanned!

Before these preliminary observations upon the rendering of railway-carriages comfortable for passengers, I will take the liberty of making a few suggestions upon improvements which may be made upon our present unventilated cars, and car-builders will be good enough, perhaps, to take a note of them.

Every railway traveller, in the winter season, must have experienced, immediately after taking his seat and the car is in motion, an unwonted coldness creeping up from his feet to his knees. This is caused by a current of air sweeping along under the whole row of seats, and which must naturally cause this disagreeable sensation. All that is required to obviate this inconvenience, is to put partitions under a few of the seats, and thus prevent a circulation of air under the whole row.

The turning foot boards at present in use, if fitted up so as to make a whole board of them, may be made to answer the purpose well. Alter their hanging if necessary, so as that when one side is pressed down to the floor, the other side will strike the under side of the seat; thus the foot-board is at once converted into the necessary partition. Another improvement would be to raise that part of the car-floor upon which the seat stands, say four inches. I have had cars constructed in this way, (with, however, another object in view,) and find these raised floors very popular, especially with the lady portion of the passengers, who, when stepping up, feel as if they are "stepping out of the dirt." Another improvement: the car-doors should be hung on the *outer* corner of the door-posts, to open *inward*, of course, as they now do; but when closed, the weather-board at the bottom should project half an inch over the outer edge of the threshold. This would prevent a large portion of cinders (which lodge in large quantities, especially in wet weather, upon the threshold) from blowing into the car at every opening of the door. I have seen such large quantities of these cinders upon car-floors, where they dry and become pulverized, under the feet of the passengers, and thus become coal-dust, as absolutely to begrime the faces of passengers, to say nothing of the lungs which they affect, and apparel which they injure or destroy. There should also always be an inch clear space left open between the platform and front sill of the car, for the cinders to blow through. Indeed, I know, from actual experience, that greater evils and injury arise from the effects of cinders within a railway-carriage, than from earth-dust, or any other cause. No lungs can withstand the effects of coal-dust with impunity. Here, too, the raised floor shows its superiority over the flush floor; for though cinders may blow under the door into the car, they can not easily rise out of this sunken aisle upon the elevated floor upon which the feet of the passengers rest; whereas, with our common flush floors, the cinders blow over the whole of it, where they are ground into dust by the constant movement and shuffling of a hundred feet."

From these extracts it will be perceived, Mr. Ruttan has given great attention to this part of his subject, and his suggestions are worthy of attentive consideration. The Railway, while one of the greatest improvements in locomotion ever contrived, is yet a source of considerable injury to the health of those who are its patrons. In the language of an intelligent manager of one of our greatest railway companies, the construction of cars, and their adaptation to the comfort of travellers, are yet in their infancy and will be vastly improved. Mr. Ruttan is therefore moving in the right direction, and we hope he will receive the support from our Railway Companies, which his philanthropic efforts deserve.

Legal Decision in Canada.

ONE MILLION DOLLARS AT ISSUE.

The London (C. W.) *Prototype* has the following notice of a recent highly important decision: "On Saturday the Judges delivered judgment in the important case of the Commercial Bank *versus* the Great Western Railway, to recover about $1,000,000, the amount of the notes held by the bank against the company. It will be remembered that the case was first tried at Hamilton, some time before Mr. Brydges ceased to be Manager of the Great Western. It attracted attention from the magnitude of the sum at stake, and from the array of legal talent employed on both sides. The money claimed had been advanced by the bank on account of the Detroit and Milwaukee Branch of the Great Western. The Great Western Company withstood payment, on the ground that the sum had not been asked for by the company, or advanced on their responsibility, but on that of Messrs Brydges and Reynolds. The court would seem to have taken the view that the money was advanced to those gentlemen as agents for the Company, and that therefore the Company, as principals were liable. Judgment was given for the bank to recover the amount claimed. The Judges were unanimous."

Specie in the United States.

The quantity of specie in the United States at the present time compared with former periods is as follows:

Amount of specie existing in the United States at the commencement of 1849		$122,000,000
Product of California mines, from 1849 to present time		1,047,000,000
Other sources of supply within the United States to present time		56,000,000
Amount imported from foreign countries during the same period		107,000,000
Amount introduced by immigrants, during the same period, (3,600,000 immigrants, at $30 per head)		108,000,000
Grand total		$1,440,000,000
Amount exported to foreign countries from 1849 to the present time	$668,000,000	
Loss, by wear and tear of coin, by consumption in the arts, and by fire and shipwreck, during the same period	56,000,000	—724,000.000
Amount of specie existing in the United States, at the present time		$716,000,000

Commercial Retrospect of 1862.

The year that has just closed has probably been the most remarkable in its commercial results of any in our national calendar. It has been a year in which has raged a civil war of the most colossal proportions that the world has yet seen —a war which has called into the field nearly 900,000 men, who are probably opposed by a very equal number—a war which has utterly sealed up the trade of nearly one-half of the area of the country and nearly one-third of its population—a population which produced the staples which composed the greater portion of our exports, and which were regarded, in times past, as absolutely essential to our commercial independence. Such an altered condition in the even tenor of our past experience, coming as it did without any preparation or warning, could not be expected to take place without consequences corresponding in magnitude and importance to the causes that produced them—consequences which could hardly fail to react, and affect most deeply every interest and class in the nation, and constitute a new era in our national life.

The result, or present condition of commercial affairs is so far, much more favorable than the most sanguine ventured to predict, or even hope. The great test of national prosperity, or soundness—an abundance of all the necessaries of life, and an active employment for our population, was never better fulfilled than during the past year. A part of this prosperity may be artificial, growing out of the vast expenditures for the war, but there can be no doubt that with a continuance of peace, the internal commerce of the country would have been vastly greater than it has been, and that the increased stimulus imparted to it by the war has, by no means, equalled what has been lost to it by the isolation of the South.

Several causes have contributed to produce the state of things that exists. The industries of the Free States have been wholly uninterrupted and undisturbed by the war. The harvests in these have been most bountiful for two years past, at the same time that those in Europe have been very bad, creating an immense demand upon this country to supply the deficit abroad. Our vast system of public works had been fully completed previous to the breaking out of the rebellion, giving a commercial value to the products of the interior most remote from markets. The enlargement of the Erie Canal, completed in 1860, was a most opportune event, as without its greatly increased capacity it would have been impossible to convey to tide-water one-half of the produce that reached it during the year. The value of this enlargement cannot be over-estimated, as the freight received through the canal was also almost the only basis upon which the nation had to rely in the payment of its imports, and to make good its foreign balances after cotton had disappeared from our exports. But for the enormous exports of grain in 1861 and 1862, a commercial revulsion would have been inevitable, prostrating, perhaps, the credit of the nation as well as that of the commercial community. Instead of such revulsion, the balance of trade was so largely in our favor in 1861, that we imported over $50,000,000 in gold over the amount exported, while the product of our mines for that year could not have been less than $60,000,000. We have exported gold, largely, in 1862, but not more than the yield of our mines, leaving in the country, at least, $100,000,000 more than when the war commenced.

We have stated so much in general terms in order to show the basis upon which our commercial prosperity rests, and as a necessary explanation of the enormous advance that has taken place in every kind of railroad property, as well as in a very long list of public securities. There are now in the Loyal States 23,140 miles of railroad, costing $966,442,219. The market value of this vast investment, in 1861, was excessively depressed, owing mainly to our political troubles which threatened, for a time, to leave us without government, or social order. Confidence gradually revived, and the immense increase in the traffic of our roads turned attention to their securities. It was not, however, till after the commencement of 1862, that any extraordinary advance took place. On the first day of January of that year, New York Central sold at 80; Erie Common at 32; Preferred at 54; Hudson River at 38; Harlem Common at 12½; Preferred at 31; Michigan Central at 49; Michigan Southern Common at 19; Preferred at 39; Galena and Chicago at 65; Cleveland and Toledo at 35; Chicago and Rock Island at 51, and Chicago, Burlington and Quincy at 58. These were among the most well known and best sustained stocks on the list. The advance in several of these have exceeded one hundred per cent. In others not named it has been vastly greater, so that in the whole list of shares dealt in at the New York Stock Exchange, the advance in their aggregate market value has considerably exceeded one hundred per cent.; in other words, has doubled—an advance due not to any considerable extent to extrinsic causes, as the prices at which they are now selling cannot be regarded as beyond their values. Their traffic during the year must have increased fully one quarter, while the condition of the roads has been greatly improved.

The market value of bonds has, in many instances, shown as great an advance as shares, so that we may safely estimate the increased value of the total investment in railways in the Loyal States at from $250,000,000 to 300,000,000 greater than it was a year ago! This is something for one short year. There has also been a very great advance in the State and Municipal Securities of all kinds. Illinois 6s sold

a year ago, at 80. California 7s at 77, Ohio 6s at 90. All this vast advance in Railway as well as Municipal Securities, has been due to a steadily increasing confidence, and to a rapid appreciation in the real value of the Securities. It shows a most healthy condition not only in the material welfare, but in the heart of the nation, whose pulsations could not be so regular and strong, if there were any radical constitutional weakness.

The foreign commerce of this port for the year is not yet fully made up. The following will approximate very nearly the result:

	1862.	*vs.*	1861.
Import of Dry G'ds.	$56,121,000		$43,637,000
Gen. Foreign Goods.	117,800,000		87,598,000
Total at New York.	$173,921,000		$131,235,000
Foreign Specie....	1,313,000		37,088,000
Together.....	$175,234,000		$168,313,000
Export of Produce.	$151,372,000		$131,235,000
Re-export Foreign Goods.....	7,894,000		7,309,000
Total from N.York.	$159,266,000		$138,544,000
American & Foreign Gold and Silver.	61,123,000		4,236,000
Together.....	$220,389,000		$142,780,000

From these figures it would appear that the Trade balances, including the receipts and shipments of specie from and to Europe were:

In 1862, in favor of New York....$45,155,000
In 1861, against New York..... 25,533,000

Difference $19,622,000

This statement of the condition of our foreign trade is most remarkable and very favorable to this country. The heavy export of specie has been caused by the vast amount of securities we have for sale. But for this, the exports of specie would have been merely nominal.—*Hallett's Financial Circular.*

The Catonsville Railroad.

The Catonsville Railway, connecting with the western extremity of the Baltimore street line of the City Passenger Railway, has proved a most acceptable enterprise to the public, and we hope a profitable one to the stockholders. Taking the bed of the Frederick turnpike it crosses the city limits, passes the Western Cemetery, the House of Refuge, Mount Olivet Cemetery, the Manual Labor School, London Park Cemetery, Mount de Sales Academy, Paradise Hotel, Maryland State Insane Asylum, and terminates at Catonsville. The country through which it passes is not surpassed in beauty by any that surrounds the city, dotted with country villas and substantial homesteads, from which a constant stream of travel flows to and from the city.—*Balt. Am.*

Gold Discoveries in Nebraska.

Nebraska Territory is rich in agricultural resources, and to these gold is to be added. Mr. E. Claighton, Superintendent of the Pacific Telegraph line, at Salt Lake City, saw some twenty persons who had just arrived from the new mining region discovered in the Northern portion of Nebraska Territory, about the 1st of September last. They brought with them about $50,000 in gold dust, which they had taken out of the mines within a few weeks. Mr. Creighton brought with him to Omaha about $5,000 worth of gold dust, purchased from returned miners, which he has forwarded to New York for assay. It is supposed the dust will assay at least $18 to the ounce.

The newly discovered mining district commences on Wind River, about 400 miles west of Fort Laramie, and embraces an area of 260 miles in length by 100 in breadth. The deposits discovered up to the present time are of gulch gold, very similar in appearance and richness to those of the Feather River mines, of California. The miners who discovered these new diggings were returning to Salt Lake from the Bitter Root Valley, via the South Pass, and they unite in the opinion that they will prove fully equal to any ever discovered on the continent. The distance from Omaha to the Wind River Mountains, at the base of which the first discoveries were made, is about 900 miles.

CAST STEEL WORKS

OF

FRIED. KRUPP,

At ESSEN, in RHENISH PRUSSIA.

Patent Railway Tires, without a weld. **Axles, Cannon, Anchor-Flukes, Propeller Blades and Shafts. Cranked Axles and Shafts up to Twenty Tons weight.**

CAST STEEL IN BARS, BEST QUALITY,

Suitable for Axles, Shafts, Rolls, Tools, Dies, Needle and Music Wire, Fine Cutlery, etc.

KRUPP'S TIRES

ARE CHEAPER AT THEIR COST THAN IRON ONES GRATIS.
THEY WILL, WITHOUT TURNING, ENTIRELY OUTWEAR THE BEST IRON ONES.
WEAR UNIFORMLY, WITHOUT FLAT PLACES, OR LAMINATION.
ARE NOT AFFECTED BY EXTREME COLD.
MORE THAN FORTY THOUSAND OF THESE TIRES HAVE BEEN SUPPLIED.

KRUPP'S AXLES

Possess similar advantages over Iron ones that the Tires do.

BOUGHT AND SOLD ON COMMISSION.

The New National Loan.

U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES." because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

BANKERS,
AND DEALERS IN
ALL ISSUES OF GOVERNMENT
AND OTHER
FIRST CLASS SECURITIES,
No. 38 Wall st., N. Y.

VERMILYE & CO.,
No. 44 WALL ST., NEW YORK.

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in sums of

$50, $100, $500 and $1,000.

The Registered Bonds in sums of

$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 3m15

New York State Banks.

The annual report of the Superintendent of the Banking Department shows that the total amount of outstanding circulation issued by that officer to banks. banking associations and individual bankers on the 30th of September last, was $42,239,836.

This circulation is secured as follows:—

By bonds and mortgages	$4,912,494 47
New York State Stocks	19,022,890 10
Stocks of other States	438,466 67
United States stocks	11,899,450 00
Held for incorporated banks under special laws	65,289 14
Cash on deposit	103,720 60
Total	$36,442,310 98
Aggregate held Sept. 30, 1861	30,279,851 96
Increase of securities in 1862	$6,062,459 02
Increase of circulation in 1862	5,633,696 00
Increase of United States stocks in 1862	6,810,150 00
Decrease in bonds and mortgages in 1862	474,308 00
Decrease in New York State stocks in 1862	100,815 82
Decrease in Illinois State stocks in 1862	36,783 33
Number of banks doing business	305
Number of banks closing and insolvent	53

Tax on Bank Circulation.

The fear of an excessive issue of bank paper is beginning to become very prevalent among thoughtful and conservative people. Thus far it is admitted by our most able financial writers, that the Government issues of 220 millions of Treasury notes are not the cause of the present depreciation in paper. and this may be a correct view of the subject. The greenbacks as they are called, have, from their peculiar character of being every where a legal tender, taken the place of gold and silver in sums above five dollars. The whole amount of specie in all the banks of *the Union* in

1859–'60 was	$83,594,537
1860–'61	87,674,597
1861–'62	102,146,215

The gold and silver in circulation on the 1st of November, 1861, was according to Secretary Chase, $210,000,000, and the bank circulation in the loyal States $167,000,000. An actual decrease in the number of banks from 1,601 in 1861, to 1492 in 1862 took place, owing to the extinction of a great many of them in the States of Illinois and Wisconsin. The paid in capital had also decreased at the same time from $429,592,713, to $418,139,741. The banks being relieved from the redemption of their notes in specie, may if they choose, unless specially restricted as in this State in the amount of their issues, put forth as many promises to pay as the public will receive. Corporations are proceeding in the same path of expansion, to an alarming extent. and one general tornado of irredeemable paper it is feared is rushing over the land. This is a little more than even the free traders in money have anticipated in their most philanthropic reveries, and therefore, we are not surprised that even the champions of that school of training are beginning to cry enough!

If this then is a fact and a feat, what shall be the remedy? We must have paper to carry on the war for we cannot get gold. Of what kind shall it be. This is the question. The benefits of the banking system are universally acknowledged when not pushed to an extreme. In this country, it has fostered our best interests, and by its very organization and spread over the vast area, which it has dotted with its commercial outposts, has been a great, watchful, conservative and usefui power. But bankers are but men, money is their trade, and they will always take risks to make it. Country Banks depend on circulation, because as every bill they put out represents something received for it, they actually reverse the idea of banking, and borrow from the people without interest, what they lend out again to them at interest. In other words, according to the old rule that for one dollar of capital a bank might safely keep out three of its notes, it may receive three times as much interest as could be obtained on the capital merely. A borrower in this way, paid in his note to a bank, and the interest in advance, called discount. The bank handed back its own notes to the borrower, and paid no interest, though not returned for redemption in six months or a year.

Thus we see what immense advantages resulted to capitalists who operate in the shape of bank associations. This system is checked in this and those other States where the circulation is confined to the amount of specific deposits of stocks of a certain description. But in many other States the old principle is still extant. The City banks, however, do not depend upon their circulation for their profits. They have none to speak of. They are made on actual loans founded on capital and enormous deposits, whose average is so constant and unvarying, that they may be and are loaned out to borrowers of a certain class without hesitation. A tax on circulating notes is one to which, as for themselves, they are indifferent.

The country bankers are of course opposed to the idea.

The whole subject after all lies in a nutshell.

If there is to be an enormous inflation of bank paper, how is it to be checked? Most decidedly by a tax on issues. All financiers who adopt the necessity, propose this remedy. Some of the Boston bankers say, the tax should be ½ per cent. per month on the circulation. Others of New York fix it much higher. It should, to be effective, be equal to the interest made by the circulation, or the notes will not be withdrawn.

As to the abstract justice of the measure, it is enough to say, that as by the present internal revenue laws, every man who issues a promise to pay has to put a stamp upon it, and to pay for its use in proportion to the sum it represents, why

should not the banks be placed on the same footing?

We therefore, contend that the issue of the two hundred and twenty millions of treasury notes *per se* has had little to do with the rise in gold, but being for all internal purposes a substitute therefor, should really have lowered its price; that the inflation of the currency must be attributed to the other numerous sources which produce but do not redeem it. If it is to be feared for its future effects on the country, the most direct and certain way of guarding against it, is to tax the excess of circulation beyond the actual capital at such a rate as to drive it in, and let the Government notes take their place. We have a great war, and great events to pass through. The republic preserved, every thing else will come right.

Cleveland and Pittsburgh Railroad.

The gross receipts of the company for the year ending November 30, 1862, were as follows:

From Passengers	$435,527 08
" Freight	930,410 12
" Mails, Express, rents, &c.	70,379 91
	$1,436,317 11

The payments were:

Expenses of operations	$662,064 88
Pittsb. F. Wayne & Chicago Lease	85,000 00
Interest on 1st Mortgage Bonds	55,720 00
Interest on 2d Mortgage Bonds	86,065 00
Interest on 3d Mortgage Bonds	81,497 50
Interest on Funded Debt Mort. B'ds.	26,235 00
General interest and Exchange	32,651 29
New Engines and Cars	30,219 81
New Bridges, Station Houses, &c.	43,581 70
	$1,109,935 18
Leaving surplus earnings	$327,281 93

The increase of receipts over those of last year is $321,375 71, while the increase of operating expenses is only $45,729 47.

The financial condition of the company is as follows:

Construction account	$7,771,062 11
Personal property	48,118 58
Telegraph	16,913 72
Balance of personal accounts	26,360 76
Assets in hands of receiver	389,191 79
Total	$8,251,646 96
Capital stock	$6,832,712 16
First mortgage bonds	800,000 00
Second mortgage bonds	1,189,000 00
Third mortgage bonds	1,166,000 00
Funded debt mortgage bonds	1,059,028 00
River Line bonds	20,000 00
Dividend bonds	75,077 53
Income bonds	15,500 00
Bills payable	94,329 27
Total	$8,251,646 96

The situation of the unsecured indebtedness is as follows: The River Line bonds fall due in 1887. The dividend bonds fall due between the years 1866 and 1870, mostly in the latter year. The amount actually due at the present time is the total of income bonds and bills payable, and the accured interest on these and on the River Line bonds and Dividend bonds, making the whole amount of outstanding indebtedness not exceeding $185,000.

To meet this indebtedness the company have on hand, remaining of the issue of funded debt mortgage bonds, $140,000, and a balance of personal accounts amounting to $26,369 76, in addition to which the receiver has in his hands assets, consisting of cash, bills receivable, United States certificates of indebtedness &c., amounting to over $300,000.

The contract with the Pittsburgh, Fort Wayne, and Chicago Railroad for the consolidation of the earnings of the two roads was ratified by the stockholders. The provisions of this contract are thus stated in the report:

The agreement provides that the gross earnings of the two companies, from whatever source derived, shall be divided between them, giving to the Pittsburgh, Fort Wayne, and Chicago Railway Company seventy-three and one-half per cent. and the Cleveland and Pittsburgh Railroad Company twenty-six and one-half per cent. The division is in accordance with the average amounts earned by the two companies during the past two years, and it is believed to be fair and equitable. Each company is to pay its own expenses of operation and make its own repairs.

Both roads are to be placed under one superintendent, to be appointed by the presidents of the two companies jointly. The other provisions of the agreement are intended to carry out the details of this plan. The agreement is to continue for twenty-five years.

The fact that this company competes for business with the Pittsburgh, Fort Wayne and Chicago Company, at every point from which that company derives its freight and passengers, indicates a common interest which points strongly to a union of the two companies such as has been made.

The advantages to be expected from this consolidation are obvious. There will be no longer a competition for business, for each company is interested ratably in the earnings of the other, and it makes no difference in the result over which road freight and passengers are carried.

The business of both roads being under the direction of one superintendent, will be so managed as to yield the most money to the common fund with the least expense, and in this way the interest of both will be promoted. It is believed too, that so powerful a combination as this will be, will draw to itself more and more remunerating business than could be gained by the two acting independently and in competition.

New York and Harlem Railroad.

The report of this company for the fiscal year ending September 30, 1862, gives the following statement of the result of the year's business. The receipts have been from

Passengers	$411,684 25
Freight	573,742 06
Miscellaneous	168,577 06
Total	$1,154,003 37
Transportation expenses	$697,305 26
Interest	415,201 83
Surplus Earnings	41,495 98
Total	$1,154,003 37

Of the miscellaneous receipts, $137,999 97 were from the New-Haven Road. The capital stock paid in is $4,217,100 common, and $1,500,000 preferred. The funded debt is $5,575,487, showing an increase of $27,823, occasioned by the conversion of Albany Extension certificates, of which about $37,500, principal and interest, have been retired during the year. The floating debt is $84,708 57, a decrease of $75,862 74 during the year. The Company holds real estate to the amount of $1,137,014 46, upon which there are mortgages to the extent of $218,573 55. This real estate is not included in the cost of road. Of the $2,000,000 Albany Extension Certificates issued, the Company holds $1,779,000. The operating expenses show a decrease this year, as compared with 1861, of some $56,000, on a larger amount of earnings.

Discounting of Notes by Banks.--Usury.

THE MAKER OF NOTES MAY PAY AN ENDORSEE FOR GETTING A NOTE DISCOUNTED AT A BANK WITHOUT TAINTING THE NOTE WITH USURY,—THE BANK DISCOUNTING IT AT A LEGAL RATE OF INTEREST.

This action was brought by the Chatham Bank against the defendants Betts and others, in the N. Y. Supreme Court, to recover the amount of a note made by the defendant Betts, in favor of the defendant Thomas, and endorsed by him and one Potter, and discounted by the plaintiff. The note was for $2,350, payable three months after date at the Mechanics Bank, and dated on the 18th of September, 1862.

There were two defences set up in the answer: one that the suit was prosecuted for the benefit of the defendant Potter, who was alleged to be the real party in interest; and the other was, that the note in suit was given solely for the benefit of Thomas, without any consideration and that it was discounted by Potter upon an usurious agreement with the defendant Thomas, by which the former reserved the sum of $150 as extra interest.

On the trial, the defendant Thomas testified that the note in suit was given to realize the amount for Betts' benefit. The defendant Potter testified that Thomas called upon him repeatedly with the note, asking him to discount it, to which the witness replied he had no money, when the former said, "you can get it discounted," and repeatedly stated he must have the money. He did not state for whose accommodation it was; the witness refused to do it. Thomas said, "you can get it done at the bank." The former finally promised to see if he could get it done at the Chatham Bank. He did call, at the bank whose president said they were short. Thomas again called, and the witness again told him he did not think he could get it discounted, but was finally prevailed on to take the paper, and he offered it for discount. He asked the cashier of the plaintiffs if he would discount a piece of paper for him, who referred him to the president, who showed some disinclination to take it. Potter again told Thomas he did not think he could get the paper discounted. Prior to Potter going to the plaintiff's on the fifth of October, he said to Thomas, "if I can get this discounted how much do you want to draw? my account is about drawn out in the bank;" and the latter said, "I must have $2,000." On the 4th of October, the president said it would be passed to Potter's credit on the morning of the fifth. It was discounted, and Potter gave Thomas a check for $2,000, and afterwards a check for $208. The eight dollars had nothing to do with this transaction. In regard to the commission Potter was to charge, there was as he testifies, "not the first syllable said about 2½ or 3 per cent., or any discount named." When the second check was given, Potter testifies not a word was said about the balance. Thomas asked for a check for the balance, and the witness gave him one for $208, and no words passed. On cross examination this witness testified that he had previous notes of Betts endorsed by Thomas, which he had discounted at the rate of 2½ per cent. per month, and gave Thomas the money.

The Court now rendered a judgment in favor of the bank, holding that as to them the note was free from usury. The following opinion was rendered at the decision of the case.

ROBERTSON, J.—Upon this testimony it is perfectly clear that Potter acted as the agent of Thomas and Betts in getting the note discounted, and that if he failed in delivering the whole proceeds received by him, whether the amount retained by him was understood to be a commission or not, for his trouble and responsibility in endorsing the note, it did not make the note usurious in the hands of the plaintiffs, who discounted it for Potter at the legal rate, as appears by the testimony of their President (Hayden). He testified that the bank discounted this note for Potter, and on his credit, placing on the 4th of October, the sum of $2,315 50 to his credit, Potter borrowed the money of the bank. Prior to that time he had only a small balance of two or three hundred dollars to his credit.

When the note was discounted and the money placed to Potter's credit, it was his money. After the note was protested, money of Potter's was left in the bank undrawn for. It was the plaintiff's custom in such case not to allow it to be drawn for. The note was not charged back to him, or check presented for it. There was an implied understanding, although no positive arrangement that the money should remain until the note was paid. The note was discounted at seven per cent.

To this is opposed the testimony of Thomas, who states that he got the note in suit, without paying anything for it, from the defendant Betts, to realize the amount for the benefit of the latter, and a day or two after took it to Potter, and asked him to discount it for him; to take it, and see what he could do for him. Nothing was then said about the rate. He said he could not do it at less than two and a half per cent. a month, and the witness left the note. This witness states he did not say anything; he left the note with Potter to get the money. He got $2,000 on the 5th of October, and the balance of $200 on the 20th, and $8 for another transaction, included in the check. Potter deducted $150 for the three months, and took the note for $2,200. Thomas deposited the money he got from Potter in the bank where he kept an account, and passed it to Mr. Betts within a day or two; the transaction was on Betts' account. On being cross examined, he stated that he asked Potter to take the note, and try what he could do with it; after receiving the $2,000 he asked for the balance of that note, and received the check for $208.

"Potter said he would not do it less than the rate of about two and a half per cent. per month, that it would not pay him to go to the bank to get the money and get it discounted." He admitted that Potter gave as a reason for not discounting the note, he had no money and could not do it, and that he told him he got the money he gave him out of the Chatham or Grocers' Bank. The witness used the money he got for a little while, and paid it in different amounts to Betts; he admitted that Potter told him the bank was not ready to discount it.

This testimony does not vary the transaction, Thomas knew Potter did not have money to buy the note; that he went to get it discounted; nay, he asked him to take it and see what he could do with it. He waited after he was informed the bank had been applied to, and delayed discounting it until it would agree to do so; did not object when Potter told him that less than two and a half per cent. would not pay him to go to the bank and procure the discount; received the check of Potter, drawn on the bank by whom it was discounted, and obtained thereby the proceeds of such discount. Potter did not pay any money except the proceeds of the discount, which was made by crediting him with the amount, for which he drew the check in favor of Thomas. There is no room for the pretence, that Potter first discounted the note at a usurious rate, and then procured it to be discounted by the bank; nor that the $150 was withheld, except to compensate him for the trouble of going there and getting it discounted, which involved the necessity of his endorsing the note.

There is not even a conflict of testimony in this case except as to the mention of the rate of compensation, which is denied by Potter, although mentioned by Thomas, and that does not affect the transaction. Even the worst possible inferences from Thomas' testimony would hardly show an intent to make the transaction usurious. The testimony of the other witnesses shows it could not have been. I do not find any error in the charge, or in the verdict of the jury. The motion for a new trial must therefore be denied.

Northern Illinois Railroad.

We have been favored with a copy of the First Report of this company, embracing the construction and operating of the road to September 30, 1862. The road is 38½ miles in length, extending from Freeport, to Savanna on the Mississippi river. Including about 1¾ mile of sidings, the total length of track laid is 40¼ miles. The entire cost of construction, including telegraph and collateral expenses, as will be seen by the annexed statement, has been only $396,257 59—a little less than $10,000 per mile. This, considering the character of the work, and the substantial manner in which it has been executed, is, we believe, the cheapest which has ever been done in the United States. The line connects with the Racine and Mississippi Railroad at Freeport, and is, in fact, a direct continuation of that railroad, and the two roads are operated under one management. The length of the two lines, extending from Lake Michigan, at Racine, to the Mississippi River, at Savanna, is 142 miles. By connection with the Milwaukee and Chicago Railroad at Racine Junction, 2 miles from Racine, a direct line to Milwaukee is formed, 165 miles in length, between Savanna and Milwaukee; the shortest line from Milwaukee to the Mississippi by 27 miles. By connection with the Chicago and North Western Railroad, at Clinton Junction, a direct line to Chicago is formed, 161 miles in length, between Savanna and Chicago. By connection with the Illinois Central Railroad, at Freeport, a direct line is formed to Dubuque, from Chicago, Racine, and Milwaukee. The report says:

On examination of the map, it will be seen how important are the connections formed by the line from Racine to Savanna. It is the only line which makes direct connection with the three lake ports—Chicago, Racine, and Milwaukee. From these ports, all the produce of Illinois, Wisconsin, Iowa, and Minnesota, is shipped, and by the Racine and Mississippi and Northern Illinois Railroads alone can shippers from Dubuque, Savanna and other points on the river, send to the three ports. Racine is 60 miles north of Chicago, has an excellent harbor, easy of access, and the facilities for transhipment, in point of cheapness and expedition, are superior to those of Chicago. The railroad depot at Racine is on the dock, and goods are taken from vessels on to the cars without the expense of cartage; the tracks also run to the warehouses of forwarders and to elevators for shipping grain. Goods brought by the propellors from the lower lakes are loaded immediately on the cars and proceed to their destination without delay, avoiding the additional 60 miles of lake navigation to Chicago, and all the delays and expenses of transhipment at that port.

The line from Racine to Savanna traverses in its whole length a country unsurpassed in richness of soil and farming advantages. The country has been long settled, and is for the most part well improved; there are numerous towns on the line where the business of the country is transacted, and manufactures have been established to some extent. Racine has large establishments for the manufacture of agricultural implements, and the businesses of tanning and milling have been extensively carried on their for some time, and it is also a large lumber market. There are numerous water powers on the line, where flour mills are in operation; also paper mills at Beloit and Rockton, on Rock River. At Savanna, there are saw mills for lumber, and flour mills. There are colleges of eminence at Racine and Beloit, and public schools of high character at Freeport, Mount Carroll and Savanna.

The construction of the Northern Illinois Railroad was commenced in May, 1861. On the 1st October, the first 20 miles of the line was opened to a point named Lanark, which was then in the middle of an unbroken prairie, with the exception of a corn field on which part of the depot was located. Lanark is now a town with numerous stores and warehouses, and is the centre of an extensive business.

Two other stations were established, named Florence and Shannon, from which considerable business has been derived.

In April, 1862, ground was broken for the extension of the line to the towns of Mount Carroll, and Savanna the terminus on the Mississippi River. The Spring was late and unfavorable, but by energy and skill the work was completed early in August.

The completion of the line to the Mississippi was celebrated on the 14th of August, by an excursion party of 600 persons in a train made up of three parts, one from Racine, one from Milwaukee, and one from Chicago, united into one train at their respective junctions with the main line.

The work has been well and substantially done, and in that respect is superior to the generality of new roads in the West. Substantial masonry has been put in all important culverts, the grades are moderate, the iron is of sufficient weight for a 1st class road, and is laid upon more than the usual number of ties of excellent quality, a large amount of ballasting has been done, partly with broken stone and partly with gravel, and the road bed is in every respect in good order, well ditched, and already fenced in over two-thirds of the way. Good and appropriate passenger and freight houses have been erected at every station; the supply of water is provided for by well built tanks at suitable distances, one of which is supplied by a caloric engine, and another by steam power, and at Savanna an engine house to hold six engines, with turn-table attached, also a repair shop with steam power, and extensive sidings are completed; a line of telegraph was built and in operation shortly after the opening of the road. Cheapness of construction has not been sought at the expense of efficiency for the business in prospect. The line commenced business regularly between the river and the lake on the 1st of September.

The Capital Stock of the company subscribed and paid upon, amounts to $257,100; on which there has been paid $65,075, as stated in account appended.

First Mortgage Bonds, bearing 8 per cent. interest, have been made on the whole road to the amount of $500,000, on which advances have been

obtained for the requirements of the work at 10 per cent. interest, with the option of purchasing the bonds at 80 per cent. The advances, with interest, amounted on 30th September to $336,678 18, as shown in account "Loans." The interest is charged to construction to 30th September, 1861, for the amount expended on the 20 miles of road then opened, and to the 1st of September, 1862, for the amount expended on the balance of the road. The interest upon the cost of the first 20 miles has been charged to "Revenue Interest and Dividend Account," for the year ending 30th September, 1862, and upon the balance of the road for the month of September.

By agreement with the trustees in possession, now operating the Racine and Mississippi Railroad, the Northern Illinois Company has to maintain its road in good running order, and in return for the entire use of the line it receives 50 per cent. of its gross earnings, estimated by allowing its mileage proportion of the full receipts of the whole line from Savanna to Racine. The arrangement is a very favorable one to the Racine and Mississippi road, as the largest amount of business is obtained from the Northern Illinois Railroad. By the completion of the Northern Illinois Railroad, the Racine and Mississippi road was raised from a 3rd class to a 2d class mail route, and the business in every department has been largely increased.

The balance of "Operating Account," after charging track repairs and other expenses, amounts to	$16,273 72
(Being for 20 miles in operation 11 months, and 38½ miles for 1 month of the year.)	
The interest on advances for the year amounts to	12,648 86
Leaving balance at credit of "Revenue Interest and Dividend."	$3,624 86

The road may, with much confidence, be estimated as capable of earning 10 per cent. on its cost. As a work it cannot be estimated as worth less than 50 per cent. in advance of its cost, according to present prices of labor and material. The entire cost is within $10,000 per mile, and it is very doubtful if any responsible contractor could now be found who would engage to perform the same amount of work for $15,000 per mile. The location of the road might be taken into account as adding more to the value, but that it is best arrived at by an estimate of earnings. The road is in a position in which it can depend upon a working arrangement as favorable, and it ought to be better than its present, looking to the amount of business emanating from the road. It would be a more equitable working arrangement if the Racine road were to pay the expenses of maintenance of track, but at present that is matter of opinion, and the interests in the two roads are so united, this question may prudently be reserved for consideration when further experience of the business will afford data for a more exact adjustment of interests.

With respect to traffic, there could not well be a more unfavorable year than the present, on account of a very poor wheat crop.

The net receipts for the year commencing 1st October, may be estimated at	$60,000 00
Road repairs and other expenses	12,000 00
	$48,000 00
Interest on $440,000 bonds	35,200 00
Surplus for stock	$12,800 00
10 per cent. on $65,075 stock	6,507 50
Surplus over interest on bonds and 10 per cent. on stock	6,292 50

The bonds are put down at $440,000, as the whole advances with interest amount to $336,678 18, and it is intended that the $440,000 bonds shall settle these advances by sale at 80 per cent., yielding $352,000, which affords a margin of $15,321 82, for contingencies and additional expenses in ballasting, fencing, &c., and track accommodations at Savanna. There will remain $60,000 of bonds on hand. With a favorable season and good crops, and the development of the business of the line, the receipts may very soon exceed their present amount by 50 to 100 per cent.

Such calculations on railroad investments are unknown of late years, but in this case, with unexampled cheapness of construction, a secured revenue, and limited expenses, there is little margin for error in estimate.

It is stated above that the actual cost has been less than $10,000 per mile. By the report of the Superintendent of construction we learn that there is ample margin within that sum to cover contingencies and additional expenditures required in finishing up fencing, ballasting and depot accomodations at the river, which must necessarily be very extensive. The work throughout has been well and substantially done, and no pains or means have been spared to finish it in a thorough and workmanlike manner, in every respect. The depot and other buildings are all of a uniform character. Two-thirds of the masonry is first class bridge and culvert works, dressed and laid in cement. The bridging and superstructure is substantially built. The weight of rail on the 1st division is 52¾ lbs. per yard; and on 2d division 54 lbs. per yard; and 2,600 ties to the mile have been put in the track, by which a better surface was at once secured than is usual upon new roads. The maximum grade is 52 feet to the mile. Over 50 miles of fencing have been made, at a cost of 60 cents per rod, and the balance of the fence is being built to the river.

BALANCE SHEET.

Construction and general expenses		$396,257 59
Supplies		7,976 26
Bills receivable		16,599 11
Real estate		9,856 50
Open accounts receivable		3,841 86
Cash		146 73
		$434,678 05
Capital stock	$65,075 00	
Loans	336,678 18	
Revenue, interest ane dividend	3,624 86	
Open accounts payable	26,385 01	
Bills payable	2,915 00	
	$434,678 05	

The office of the company is at Freeport, Illinois. The officers and directors are:

President—G. A. THOMSON.

Directors—Elijah Northey, Enoch Chamberlain, L. H. Bowen, H. A. Mills, Duncan Mackay, Thomas Long, Chancellor Martin, Edward P. Barton, Frank Smith, William Shannon, Marshall M. Strong, R. A. Knapp, G. A. Thomson.

Superintendent of Construction—R. W. SMITH.

Secretary and Treasurer—HYATT SINCLAIR.

Erie Railway.

The earnings of this road for the year ending Sept. 30, 1862, were:

From passengers	$1,096,196 60
From freight	6,642,914 68
From other sources	124,861 40
Total	$7,863,972 68
Transportation expenses	4,391,393 89
Interest	1,577,980 47
Taxes, rents, ferry, &c	479,036 73
Total	$6,448,411 09

Net earnings for the year ending Sept. 30, $1,415,561 59, which is 7 per cent on the capital stock, both Preferred and Common.

The amount of capital stock of both issues is $19,973,200. The funded debt on the 30th of September was $19,831,500; the floating debt was $480,665, which has since been paid. The cost of the road and equipments is $39,985,202 13. The equipage consists of 225 engines, 187 passenger and baggage cars, and 3,040 freight cars.

Canadian Trade for 1862.

We learn from the Canadian *News* some interesting facts in regard to the trade of the St. Lawrence during the past year. At present but a small portion of the Western trade goes to Montreal. The amount relatively to that which passed over the Erie Canal was but 11 per cent. in 100.

More light houses are wanted on the St. Lawrence river to make its navigation secure. A tendency to equalization in the rates of freight as between Montreal and New York, and Liverpool is however perceptible.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Jan. 2, 1863, was as follows:

Passengers	$17,507 73
Freight and live stock	33,091 33
Mails and sundries	1,286 97
Total	$51,886 03
Corresponding week of 1862	55,805 19
Increase	$3,919 16

The earnings of the Chicago and Rock Island Railroad for the 1st week of January, 1863, were $31,977 00
Same week, 1862 29,380 00
Increase $2,597 00

The earnings of the Chicago and Alton Railroad for the 1st week of Jan., 1863, were $17,129 18
Same week, 1862 15,552 56
Increase $1,576 62

The earnings of the Michigan Southern Railroad for the 1st week of Jan., 1863, were $47,777 00
Same week, 1862 36,119 00
Increase $11,658 00

The earnings of the Michigan Central Railroad for the 1st week of Jan., 1863, were $51,568 91
Same week, 1862 46,121 56
Increase $5,447 35

The earnings of the Galena and Chicago Union Railroad for the 1st week of January, 1863, were $27,527 42
Same week, 1862 21,957 97
Increase $5,569 45

The earnings of the Illinois Central Railroad Company for the 1st week of January, 1863, were $51,075 75
Do., 1862 43,627 74
Increase $7,448 01

The earnings of the Cleveland and Toledo Railroad for the 1st week of January, 1863, were $31,484 00
Same week, 1862 20,067 00
Increase $11,417 00

The earnings of the Grand Trunk Railway for the week ending Jan. 3, 1863, were:

Passengers	$20,769 54
Mails and sundries	8,980 00
Freight and live stock	65,397 21
Total	$95,146 75
Corresponding week, 1862	92,293 77
Increase	$2,852 98

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Stock Exchange and Money Market.

The present condition and prospects of the financial affairs of the loyal States, for of them and with them alone have we any immediate hope of the future, have at this moment an importance unfelt before. With all our power, our men, our money, our cause, and every advantage which an active and prosperous industry could add to such *materiel*, we stand shivering on the brink of a dark uncertainty. The people of the North have done everything for the administration, and the administration appears perfectly helpless, and unable to do anything for them. *Success in the field would change the whole aspect of our affairs.* But alas we do not exhibit the adequate talent for procuring it, or it has not yet discovered itself Great events, it is said, make great men, but our turn evidently has not yet come. When will our countrymen learn the truth, that men without training and without ability are not competent to be at the head of public affairs. The reverse of this idea seems to have been too much our policy and practice.

Yet while we are far from desponding, there are too many others who despond. Where are we drifting, they inquire? Where is to be the end of this paper currency inflation? Are we to have repeated the melancholy history of the

Assignats and Mandats of the French revolution? Are the frightful losses and horrors of that issue, to be witnessed here? It is to this question we propose a brief reply, for while we acknowledge the value of the reference, we protest against its presenting a parallel case. The issue of the assignats in scarcely a single particular, resembles that of our own national currency. It much more nearly corresponds with confederate money. Let the truth of history be vindicated.

The issue of assignats was one of the earliest measures of the French Constituent Assembly, and based entirely on landed security, and this security was the confiscated property of the clergy, which on the motion of the celebrated Mirabeau was placed at the service of the State. A sale was soon decreed of these and the crown lands also, to the amount of four hundred millions of francs, or about eighty millions of dollars. Various schemes of realizing on this security were projected, all having difficulties of a serious character, from the nature of the property, the stagnation of trade, and the actual scarcity of money; yet the plan was finally adopted of issuing paper money in notes of 100 francs which were called *assignats*, from being assignable, and were in the hands of any holder receivable for the purchase of the national domain. They also bore an interest by the day, in imitation of the English exchequer bills. The issues soon became large. The first issue of 400 millions, was followed by another of 800, these last bearing no interest. When in the following year 1791, the property of the emigrants was confiscated, and this was made the basis of further issues until in 1792, the amount afloat was twenty-five hundred millions. This enormous issue had its first effect on the prices of provisions; the farmers felt unwilling to bring their produce into Paris, and if they did so, asked prices proportional to the depreciating value of the currency, which was even then double what it had been. This caused the usual clamor, as the cost of bread is there very often the price of revolution. All kinds of enactments were attempted, precisely as there have been in the Confederate States to regulate sales by establishing maximum prices, by declaring penalties against extortion, undue demands, and under valuations of the paper currency. This policy has been rigidly carried out in many parts of the South, and a great many persons have been imprisoned for refusing to receive confederate notes. We have no room at this time to give even an outline of the various plans, proposals, acts, or measures resorted to by the French legislators to sustain the sinking credit of the Government paper. All buying and selling of the necessaries of life were made at fixed rates or maximums, and every scheme was resorted to to lower the prices of commodities.

In 1793 there were in circulation 3,776 millions of assignats, but by a forced loan of 1000 millions and the application of a year's taxes, this circulation was reduced to about ⅓. Successes in the field produced a great change in their favor, and at the end of the year the securities rose so much in favor that the *assignats went up to par*. Here was the turning point. Proper financial arrangements, if certain other circumstances had favored, might have saved the credit of the French Government, but its wants prevailed over its discretion, and the issues recommenced on a large scale. In 1794 they amounted to 6,536 millions; when the directory came in, they too added to the flood, not only by issues to the extent of twenty thousand millions, but by a batch of paper called *mandats*, a sort of currency which was not only receivable as a legal tender like the assignats, but was a sort of authority for the holder to enter and take possession of his landed security whenever he wished to realize. This paper went the way of the other, and finally after intense suffering by the people, the assignats and mandats were finally returned to the Government in payment of taxes and the purchase of lands, at about one seventieth of their nominal value, and after 1796 they disappeared.

This is an instructive lesson doubtless. But that it is applicable to us at this moment is very questionable. At the time the assignats were issued, the whole of France was in confusion and distress, without commerce, manufactures, or revenue, indeed without a single element of actual prosperity. All property as well as life was insecure, and the former when confiscated and added to the security of the assignats was by no means of a certain character. The return of the Bourbons was not unexpected even by the Republicans, and this increased the feeling of insecurity.

There was not one single element of financial strength which the Government could reach, and the whole world was against it.

On the contrary as regards ourselves, there are more gold and silver in the Wall street banks to-day than there were in the coffers of the French Republic during the whole of its career, more business is done in cash in one day in this city than there was in a whole year in Paris. France had no foreign trade, no gold mines, not a railway, only one or two indifferent canals, and the main body of the people were either small farmers or soldiers in the field.

There was nothing whatever to base a currency upon. It is absurd then to run any parallel between France and this country in relation to the two currencies. There is no resemblance, in the issue itself, its character, securities, intention, amount, or value. There was then no class of people able to buy up the landed securities, covering one-fourth of the whole country, no immigration, no money.

The cases are unlike in all particulars.

Our disheartened friends must therefore look somewhere else for their illustrations and arguments.

The result of Mr. Chase's visit to New York is nothing at all. At the various meetings of bankers and merchants no satisfactory conclusion was arrived at. There are those who insist on a resort to loans even if they do not produce 50 cents on the dollar. Others desire that the legal tender notes may be received at the Custom House, thinking this will equalize gold and paper. We should advise an attempt on the market to a moderate extent of Government securities, and the holding back of any large amounts of currency until this attempt was made. Military successes would, however, be the best cure for our financial troubles.

Many rumors are afloat as to the views of eminent bankers at this moment, which in the explanation would be more curious than instructive. The impression is, that they will keep aloof from any original proposition to the Government, expecting as matters stand, to meet a loss on the stocks they hold, instead of a profit, and inclined not to come forward until they can buy in at such a figure as to make the average profit nearly certain.

They all admit, however, that if the war was successfully closed, American stocks would be in greater demand here and abroad than ever. In the rebel dispatches captured off Charleston, is one remarkable expression worth noticing. "Aid us, or we perish."

We imagine that if a new national loan was authorized by Congress in Scrips as low as even $10, and an appeal made to the people of all classes and conditions to subscribe to it in proportion to their means, hundreds of millions might be at once obtained. A similar appeal was made to the French by Louis Napoleon and the effect was extraordinary. He was offered more than he wanted. If capitalists are shy, the people have courage. There is plenty of money for some kinds of stocks; it will not be wanting for other kinds, when the existence of the nation is at stake.

A well written review of Secretary Chase's report has made its appearance from the pen of R. J. Walker, Esq. We may allude to it when we have more room.

The following quotations of sales are in addition to those given elsewhere in our columns:

Rensselaer Polytechnic Institute, Troy, N.Y.

The attention of our readers is particularly directed to the advertisement of this long-established and excellent Institution, which appears in our advertising columns of this week. We understand that the Institute is now occupying very commodious temporary quarters where all the exercises are being carried on precisely as heretofore, and that the new and elegant buildings which are being erected, will be completely finished and ready for occupancy before the opening of the Winter session in September, 1863. This Institution now enjoys a very high and well-earned reputation for its thorough course of instruction in Engineering and the Natural Sciences, and its graduates are holding responsible and honorable positions as Civil, Military and Naval Engineers both in this country and in South America.

Naval Defences of the Lakes.

We are indebted to the Hon. F. A. Conkling, M. C., for a copy of his report on the naval defences of the Lakes.

It shows that any future naval combats on the lakes should they occur, cannot be carried on by such vessels as could pass either the St. Lawrence or Erie and Champlain Canals, from their limited size; that the former could be easily destroyed from the American side; that vessels which might pass the canals would not be suitable or available on the rough waters of Lakes Erie and Ontario, and that the expense of reconstruction of our canals would be nearly three times greater than the estimates before Congress. Certificates of competent Engineers, connected with the Canals are given, showing the disadvantages of the proposed enlargement, and the fact that even now, there is not water enough at all times to fill them even with their present size. We consider the positions taken by the report, to be impregnable, and this is no time to go into a needless operation, requiring millions that the country cannot spare, particularly when for years to come these canals will be large enough, with railways alongside of them, and when for war purposes, there is no probability they would really answer the purpose. Above all, the present state of our relations with England forbids the idea of entering at this time upon an aggressive policy. And if we should be compelled to act offensively, we have already large fleets of steamers on the lakes which could be rapidly armed, and be more than a match for any gun boats which could pass up into Lakes Ontario or Erie by the St. Lawrence and Welland Canals.

Philadelphia and Reading Railroad.

The business of the Philadelphia and Reading Railroad Company for the month of November, 1861 and 1862, has been as follows:

	1862.	1861.
Received from coal.	$356,406 54	$224,158 52
Do. merchandise.	46,644 60	38,581 85
Do. travel, etc. ..	63,505 85	29,022 50
	$466,556 90	$291,762 87
Transport'tion, roadway, dumpage, renewal fund, and all charges	182,931 31	166,168 72
Net profit for the m'th	$283,625 68	$125,594 15
Do. previous 11 mos.	1,812,149 13	1,287,311 31
Total net profit for 12 months.	$2,095,774 81	$1,412,905 46

Chicago, Burlington and Quincy Railroad.

The earnings of the Chicago, Burlington and Quincy Railroad Line, for December, 1861 and 1862, have been as follows:

Between Chicago, Burlington and Peoria, 264 miles.

	1861.	1862.
Freight	$122,788 31	$158.833 23
Passengers	26,113 20	39,141 43
Mails and miscellaneous	6,079 32	2,338 33
Total	$154,980 83	$200,312 99
Increase		$45,332 16

Between Galesburg and Quincy, 100 miles.

	1861.	1862.
Freight	$16,708 55	$19,008 62
Passengers	6,156 96	9,582 88
Mails and miscellaneous	1,778 54	884 34
Total	$24,644 05	$29,475 84
Increase		$4,831 79
Aggregate for 364 miles.	$179,624 88	$229,788 83
Increase		$50,163 95

United States Mint.

We have the report of the Superintendent of the United States Mint for the year 1862.

The amount of foreign coin and bullion deposited was only $11,268,710 11.

The amount of bullion received at the mint and branches during the year was—

Gold	$67,118,544 56
Silver	4,098,673 14
Total	$71,217,217 70
Deduct for redeposits and the actual amount will be	$45,423,231 01

The coinage during the same period was

Gold coin	$45,532 386 50
Fine gold bars	16,144,190 05
Silver coins.	2,812,401 50
Silver bars.	418,680 01
Total coinage	$65,023,658 06
Total number of pieces	$28,296,999

The mines of the United States continue to yield large amounts of the precious metals. Most of the gold and silver received at the mint was of this sort. The receipts from Oregon the last year were $888,205 against $3,181 of the preceding year.

The number of old copper cents is diminishing to give place to the nickel.

It is proposed to introduce a motto on our coins of a religious character, as a just recognition of the Sovereignty of the Divine Ruler of Nations. It is proposed to adopt the words "God our trust."

The annual yield of gold and silver is now estimated at $175,000,000 per annum, seven times the amount produced annually for some years previous to 1815. There appears to be a sufficient quantity of the precious metals to support bills of credit. The annual loss of value in coins by abrasion, is ascertained to be but one part in 2,400, on the average annually.

Forty five millions of dollars in small silver change exist in the country. It is proposed to reduce the weight and preserve the fineness. Rare and valuable coins and medals have been added to the national collection.

Brown's Top Lamp Chimney.

We have examined this invention of a lamp chimney, which is said to have rare merit, and to be fast coming into use. That part of it which is glass is short, easily cleaned, and not liable to be easily thrown off. On the top, is placed a metal cap, the principle of which is, that being from its material a good conductor and radiator of heat, the glass chimney below is kept comparatively cool. This is a desideratum and appears to have been obtained by the inventor. A company has been formed for its manufacture, which is going on extensively to meet the public demand.

Engineers' Report on Railway Surveys across the Sierra Nevada.

We have received the very interesting report of Messrs. Wm. J. Lewis and Francis A. Bishop, Civil Engineers made to George Blanchard, F. A. Bee, John Kirk and C. W. Brewster, Esqrs., of Placerville California, containing an account of the results of an Exploration, made for railway purposes, across the Sierra Nevada.

This document which we publish entire, is well timed and throws great light on the question, how shall the Sierra Nevada be passed by our Railway Engineers, when they come to the construction of the great line which is to unite the Atlantic and Pacific.

This exploration was made of that portion of the Sierra, between Slippery Ford, on the South Fork of the American River and Carson Valley in Nevada Territory, having in view however, the connection of the cities of Sacramento and San Francisco with Nevada Territory by rails, by the way of Placerville and along the South Fork of the American River; forming in fact a link of the Pacific Railroad.

The gratifying fact has been established, that it is practicable to pass the Sierra with moderate grades, by the shortest possible routes, and by a line almost free from snow, freer in fact, than most of our own lines in the Northern States. Our readers will perceive then, the value of this interinteresting Report:

Gentlemen:—The rise and progress of the State of California has already become a matter of history. Her mineral products have fixed her status among commercial nations; but further advancement should be secured by the fuller development of her vast mineral and agricultural resources, and the opening of superior inland communications, which are the vanguards of enlightenment and prosperity. Therefore, all projects, the solution of which tend to that end, merit the attention of her citizens.

California is not alone concerned in these desired improvements. Adjacent States and Territories will be immeasurably benefited by any system of communications which reaches their borders.

Nevada Territory, which lies in the Great Basin, and on the eastern boundary of California, separated from her by the Sierra Nevada Mountains,

though scarcely known abroad, and but slightly explored by her own citizens, has proved to be exceedingiy rich in minerals, and is already pouring a stream of the precious metals through the defiles of the Sierra. This country is practically shut out from the world except through California, being almost devoid of soil suitable for agriculture, pasture for herds and timber for fuel and mechanical purposes. It is dependent on the inexhaustible valleys of California for food, upon her workshops for machinery, and on her ports for the many luxuries and necessaries which her people require.

The rapid development of the mineral resources of Nevada; its increasing population and requirements for food, clothing and machinery, are causing much speculation as to the mode of supplying these wants. The demand is already so great that the present method of transportation by teams is quite inadequate. The experience of the present season shows that the very excellent roads leading through the most practicable pass in the Sierra Nevada are crowded to their utmost capacity.

The enormous amount of freight and increasing travel between California and Nevada Territory, together with the high cost of transportation, demand serious attention. The practical solution of the difficulty is the early construction of a railroad.

Called upon by you to make an examination for railroad purposes of that portion of the Sierra Nevada between Slippery Ford, on the South Fork of the American River, and Carson Valley, in Nevada Territory, the following is offered as the result of our labors. It is to be understood that these examinations have in view the connection of the cities of Sacramento and San Francisco with Nevada Territory by railroad, by the way of the city of Placerville, and along the South Fork of the American River, to form, in fact, a link of the great Pacific Railroad.

The topographical features of the mountainous portion of the proposed route are such as to admit of the construction of that important work through the Sierra Nevada, with moderate gradients, by the shortest possible distance. and by a line almost free from snow.

The South Fork of the American River rises in the Sierra Nevada Mountains, latitude thirty-eight degrees, fifty minutes north, and pursues a general westerly direction until its waters unite with those of the Sacramento River at Sacramento.

The source of the most easterly branch of the South Fork is in the vicinity of Johnson's Pass, which has an altitude of six thousand, seven hundred and fifty-two feet above the sea. Through this Pass runs the main wagon road of the Sierra.

The Slippery Ford branch of this stream enters it about six miles west of Johnson's Pass, at Slippery Ford. Taking its head in the Sierra, about six or eight miles north-westerly from its confluence, it runs nearly parallel with the axis of the range, and splitting it, and running through a deep and narrow gorge, for part of the distance, it leaves the higher peaks to the west; while on the east, between it and Lake Bigler, is the main divide, much lower and broken.

On the east side of the divide, four or five miles in a northerly direction from Slippery Ford, a stream rises which flows into Fallen Leaf Lake, and from thence into Lake Bigler, at its south-western extremity.

This stream, flowing through a gorge similar to the Slippery Ford branch of the American, cuts the eastern base of the mountain very deeply and at right angles with it, making the main ridge very narrow between the two streams.

Bigler Lake Valley, which lies east of the sources of the South Fork, is enclosed by a short range of mountains, which runs between it and Carson Valley. This range diverges from the main chain in the vicinity of the old Carson Pass, bearing to the east and north until it resches the Truckee River. The stream, being the outlet of Lake Bigler, flows from the west side, about two-thirds of the length of the Lake from the south end, breaks its way through a chain of mountains, in a north-westerly and northerly direction, for about fifteen miles, then running north-easterly for about the same distance; it finally changes its course to the east and enters the Great Basin.

The general altitude of the range between Carson and Lake Valley seems to be as high as the main range. Its crest, however, is pierced by several low gaps, the lowest of which is called the Walton Pass—having an altitude of six thousand four hundred and nineteen feet.

A line of railroad connecting Placerville with the Sacramento Valley has been carefully surveyed and found practicable, a detailed estimate made of the cost of construction, and a Company organized under the General Railroad law of the State for the prosecution of the work.

It is proposed to carry the line from Placerville, which is situated about two and one half miles south of the South Fork of the American River, along the left bank of that stream for a distance of about twenty-six miles, and then across the river to the right bank, and continue up along the same and into the gorge of the Slippery Ford branch, until it reaches an altitude of five thousand nine hundred and sixty-six feet.

The distance of this point from Placerville is fifty-three miles. The elevation of Placeville being eighteen hundred and fifty feet, the grades between the two places need not exceed eighty feet to the mile.

From this point in the gorge it is proposed to perforate the mountain with a tunnel in the north-easterly direction to the gorge on the east side, a distance of three and three-fourth miles in a direct line. From the head of the tunnel on the east side the line will run along the spur on the south side of Fallen Leaf Lake, descending to Bigler Lake Valley, crossing it by a distance of about six miles, on a grade of fifty-six feet to the mile, then heading the south end of Lake Bigler and pursuing a general north-easterly direction for sixteen miles along the range lying on the east side of the Lake until it reaches Walton's Pass by an ascending grade of forty feet to the mile.

It is deemed advisable to penetrate this ridge to the East Fork of Clear Creek with a tunnel, which will be about four hundred yards in length, saving in altitude one hundred and fifty feet.

From Walton's Summit the line will descend into the Great Basin, along the north side of Clear Creek, bearing a little north of east, until it turns the dividing ridge between that stream and King's Canon (a creek flowing in a north-easterly direction and through Carson City.) It will then cross this stream near its head waters, and taking its left bank, until it turns a ridge between it and another canon, which it will cross and take the left bank as before, until it reaches the ridge between Washoe and Eagle Valley, at a distance of eighteen miles from Walton's Summit, and at an altitude of four thousand five hundred and ten feet. The gradients for the last division will be the heaviest on the whole line, being about ninety-seven feet to the mile. The examinations were carried no further than this point, it being a commanding position. The descent into the plains to Carson River being but a few hundred feet, distance can be obtained to make the gradients easterly very light, or the line can be carried to Virginia City with nearly equal facility.

From Placerville to the crossing of the South Fork of the American River, the proposed line will run for a considerable distance along the northern slope of a smooth ridge dividing the waters of Weber Creek and the South Fork.

After leaving the town the road will not cross any very deep ravines until it reaches the river.

The overlying formation for the first sixteen miles is slate, under which lies granite, the slate disappearing as the line approaches the river. From the crossing of the river to the Great Basin, the formation adjacent to the line is granite of various degrees of hardness. Between the crossing of the South Fork and the west end of the main tunnel several large ravines are encountered, the principal of which will be crossed at their mouths but little below grade. The country from twelve miles above Placerville to Bigler Lake Valley is heavily covered with Pitch-Pine, Spruce, Sugar-Pine and Cedar, of the best quality; and in crossing the deep ravines, timber structures can be temporarily substituted. Outside of the saving of cost in the construction of the road, the fine timber mentioned will furnish a large amount of lumber for the Sacramento Valley, and the revenue derived from its transportation will form a very important item in the receipts of the road.

The construction of the Western Tuunel which will be the principal difficulty on this great work, can be prosecuted with facility and economy. The granite is solid, of medium hardness, and at each head is an unfailing stream of water which can be applied to furnish power for ventilating purposes, drilling rock and removing material, no shafting being required. Appliances of this general description are now successfully employed to accomplish these objects in the Mount Cenis Tunnel (seven and six-tenths miles in length) on the line of the Lyons and Turin railway, in Europe.

From the east head of the Tunnel to Bigler Lake Valley, the ground is quite smooth and unbroken by ravines; but for one-third of the distance, the side slopes are steep.

Between Lake Valley and Walton's Summit, the ground is considerably broken by small gulches, but the side slopes for most of the distance are very gentle, and the rock soft and friable. The tunnel through the ridge to the east fork of Clear Creek will penetrate granite of softer quality than the large tunnel, but not soft enough to require lining.

On the east side of the ridge, for the remaining distance, the ground is very rough and broken; there are numerous gulches and two large ravines to cross, and the side slopes are very steep. The material to be removed is disintegrated granite, not difficult to work. There will necessarily be considerable curvature on this division, but curves of moderate radii can easily be obtained.

By the construction of the tunnel between Slippery Ford and Bigler Lake Valley, the deep snow which accumulates in all of the passes of the middle and northern section of the Sierra is avoided, and also an elevation and depression of seven hundred and eighty-six feet, which would otherwise have to be overcome by high gradients. At Slippery Ford, near the west end of the main tunnel, the depth of snow at no time during last season (which was an extraordinarily severe one) was more than six feet. In Bigler Lake Valley, the depth did not exceed four or five feet, and at the pass east of Lake Valley and at Carson City, there was much less snow during the winter than in Lake Valley.

The report on the Pacific Railroad Surveys of Captain G. B. McClellan, (now General McClellan) to the Hon. (?) Jefferson Davis, Secretary of War, presents a concise statement of the amount of obstructions occasioned by snow storms. He says:—

SNOW.

"The roads of Massachusetts, with rare exceptions, find but little difficulty in clearing the track from snow in the course of one day. They only fail to do so when the snow drifts badly, and packs hard. To open the road, from two to five engines are attached to each train, with a snow-plough in front. The train pushes through until stopped, when it backs off and again advances.

Snow to the depth of five or six feet as a maximum, can be cleared in this manner. With higher ploughs and additional power, it is possible that slightly greater depths of light snow may be worked through.

Snow a foot deep does not present a very great obstacle—that is to say, the train makes regular progress at reduced speed.

Embankments are far less obstructed than cuts.

Cuts of twenty feet deep, and upwards, are less obstructed than those of from five to ten feet.

Along side of cuts like the latter *snow fences* are used. These are board fences, about eight feet high, placed some twelve feet back from the edge of the excavation.

Drifting snow obstructs a train far more than a settled fall; for when the engine is brought to a state of rest, and finds it necessary to "back" in order to obtain a new impetus, the snow blows in

under the wheels, and sometimes "blocks" the train so that it cannot move either way. In such cases, a large manual force is necessary to clear all the wheels at once.

Men and shovels are always carried on the train when the fall of show is great, in order partially to open heavy drifts, and to provide for the contingency of the train being blocked.

Freight trains should be discontinued until the road is opened: the work being done by passenger trains. Light dry snow is by no means so serious an obstacle as wet heavy snow, except in regard to its liability to drift.

In opening a road over heavy gradients, commence working from the summit.

When the snow opposes a considerable resistance, the engines use about double the usual quantity of fuel and water.

Snow-ploughs are generally of two sizes; the larger sizes are from nine to ten feet high, and about seven feet broad; the smaller are about four feet high by seven broad, and are sometimes of iron."

It is evident from the above extract, that on the proposed line the railroad can be kept in operation through the winter season with but little expense on account of snow.

It may be well to remark that the wagon road route by Placerville, Slippery Ford and Johnson's Pass, is the only one which has been kept open throughout the entire season. Indeed, it is notorious that all the travel and freight between Sacramento Valley and Nevada Territory passes, during not less than four months in each year, over the route designated. The enormous profits realized by the proprietors of portions of the road between Placerville and Nevada Territory, would have induced rival lines through other passes connecting Sacramento Valley with the Territory to have kept their roads open, if it had been at all practicable.

The crossing of the spur of the Sierra Nevada lying east of Lake Bigler presents no serious difficulty, a tunnel of only four hundred yards in length being required.

The construction of the tunnel of three and three-fourth miles in length through the main Sierra will occupy some years. But in the mean time a temporary road can be constructed over the mountain through Johnson's Pass, connecting with the main line near the termini of the tunnel.

The following is the estimated cost of a single track railroad with necessary turnouts, side tracks, buildings and equipment, from the city of Placerville to a point on the dividing ridge between Washoe Lake and Carson River, north of Carson City, in the Territory of Nevada. Total length of road in round numbers is ninety-seven miles.

ESTIMATE.

From Placerville to Slippery Ford, 59 miles, at $80,000 per mile	$4,240,000
From Slippery Ford to Lake Valley, tunnel 19,800 feet, at $80 per foot lineal	1,584,000
Across Lake Valley to west end of tunnel through eastern spur, 22 miles, at $60,000 per mile	1,320,000
Tunnel through eastern spur, 1,200 feet, at $50 per foot lineal	60,000
Thence to termination of survey, 18 miles, at $100,000 per mile	1,800,000
Equipment, depot buildings, ect	800,000
Total cost	$9,804,000

From the best information we can obtain, we believe the amount and cost of transportation of freight and passengers per annum between Sacramento Valley and Nevada Territory, is approximately as follows:—

30,000 tons freight at $100 per ton	$3,000,000
36,500 passengers at $30	1,095,000
Mails and express	125,000
	$4,220,000

The business of Nevada Territory is merely in its infancy, less than four years having elapsed since the discovery of the first silver mines; and the operation of working the ores has scarcely been commenced.

There is already, however, a population of not less than 30,000 in the Territory, and the probability is that this number will be trebled before a railroad can be constructed.

The above statement shows the immense amount of travel and freight now crossing the mountains; indeed, we doubt whether any such amount has ever before passed in the same time over any wagon road in any country.

It would be futile for us to give an estimate of the prospective business of the road, as the data on which any estimate could be based must be a business increasing in an uncertain but unexampled proportion. It is evident that a railroad must be built without delay across the Sierra Nevada, and we believe that the Placerville route is by far the best which can be obtained; that it should form a link of the great Continental Railroad, and receive the aid which Congress intended to bestow on that road through the mountainous section of California.

Respectfully submitted,
WM. J. LEWIS,
FRANCIS A. BISHOP, } *Civil Engineers.*

Hudson River Railroad.

The receipts of this road for the year ending September 30, 1862, were:

From passengers	$1,202,684 45	
From freight	1,469,118 93	
From other sources	58,579 68	
		$2,730,383 06
Transp'tion expenses	$1,367,575 55	
Interest	657,015 64	
		2,024,591 19
Surplus		$705,791 87

The financial condition of the company on the 30th of September was as follows:

Capital stock by charter	$4,000,000 00
Amount paid in	3,758,466 59
Funded debt	9,137,000 00
Floating debt	298,424 33
Cost of road and equipment	12,113,794 31
Number of pass. carried in cars	1,456,402
Number of tons of freight carried	217,740

Since the above, the floating debt has been paid off, and a dividend of 3 per cent in cash declared.

Retrospect of 1862.

We stated in our last, the generally favorable commercial condition of the country, at the close of the past year, resulting from abundant crops and an active demand for them abroad, and the undisturbed industries of our people, stimulated, undoubtedly, by the enormous expenditures made forthe prosecution of the war. The substitution of the notes of Government to serve as money has increased somewhat the earnings of our railroads, but such increase is hardly, if at all, in excess of the increased amount of merchandise transported. The business of the roads has been of a most substantial character, only a small per centage of the additional amount received being from passenger transportation. The traffic upon our railroads is the best possible index of the general condition of the country, as nearly all its products are borne over them. To get at one is to fully understand the other.

During the past year the nation has been put upon trial in reference to the matter of its resources. No recent one has put its strength to the test. The even tenor of our experience has called for no extraordinary effort for nearly 50 years, if we except our marvelous material progress, for whose extent and cost no standard of measurement exists. Of the magnitude of the efforts and means involved in this progress, we ourselves had but a faint idea. Within the last ten years the United States has kept pace with all the world in the construction of railroads. We transferred more than 4,000,000 of people to new and distant homes —a population whose industry is much more productive than that of those they left behind —have built up within the same period numerous cities which will vie with those in the East, in the elegance of their structures, in commerce, wealth, and population. When we take into account the peaceful achievements of the last ten years, they have been vastly greater than the efforts which have been put forth in the colossal struggle with the rebellion. Fortunately, the works necessary to the full development of the resources of the country, not only public highways, but every contrivance calculated to abridge labor and facilitate the movements of commerce, had been completed before the rebellion broke out, so that when the crisis came, the whole strength of the nation was available to meet it.

Of the extent of these resources the vast sums raised and expended for the past year are full proof. The increased means of the country are by nothing more strikingly illustrated than by the ease with which loans to an enormous amount are raised. At the close of Mr. Buchanan's administration fully 12 per cent. was paid for a loan of a few millions, which was with the greatest difficulty obtained. During the past year, loans have been made to the government, in the form of deposits at the Sub-Treasuries to the amount of $100,000,000, without exciting attention or remark. The amount of those that have been made in one form or another, will equal $1,500,000 daily, in addition to the Treasury notes which constitute another loan to the amount of $250,000,000. Certificates of indebtedness make up another $100,000,000. All these loans have been made without any embarrassment whatever, and may be increased to any limit, while faith in the Government is maintained. The people have still an abundance of all that is required for the prosecution of the war—food, munitions of all kinds, clothing and men. All can still be had in the greatest abundance for money, or for the faith of the Government so long as this is unshaken.

We have thus gone through two years of the greatest war of modern times, and still have an abundance of all that is necessary to the highest degree of physical comfort. Such a state of things represents our highest ideal of the condition of the people, as it realizes all the advantages that Government or social order can secure. It is unquestionably in a great measure due to the natural wealth of the country, especially in the cheapness and abundance with which food can be raised. The State of Illinois raised probably 200,000,000 bushels of corn, at a cost not exceeding 10 cents per bushel. This State stands as a type for the whole, though probably the best adapted to the production of food. In no part of Europe, as in the West, can crops be raised for a succession of years with little other culture but dropping the seed. It is the natural wealth of the soil that we are now drawing upon. We may for a long time to come treble the draft without exhausting the source.

After food the next great source of wealth is minerals, especially iron and coal. These exist in abundance, with an accessibility, which no nation or continent can show. Our coal is not only more widely and abundantly distributed than elsewhere, but it lies so near the surface that the mining of it is the simplest, easiest process imaginable. We have thus in the greatest profusion, the two great agencies of modern civilization and power, because with them we render natural laws our servants, and step at once to a plain whose horizon is

as broad as nature itself. But this is not all. We rival all other countries in the production of all the more valuable metals—gold, silver and copper. On the Pacific slope we have only broken the crust that covers the vast beds underlayed with silver and gold, and which appear to extend over the whole Western portion of the continent, while in the East and upon the shores of Lake Superior the deposits of copper that have been opened have rendered us a leading nation in the production of this article.

There is consequently a perfect harmony between the resources and the actual condition of the country. In a week or two more we shall be able to commence the publication of the returns, the actual results for the year as shown in our foreign commerce, and in the earnings and traffic of our public works, which will fully verify the correctness of the general survey we have taken of the financial condition of the country.—*Hallett's Financial Circular.*

Interest and Dividends.

The Philadelphia and Reading Railroad Company have declared a dividend of seven per cent. on the preferred stock, payable in cash on the 15th instant, and a dividend of seven per cent. on the common stock, payable in stock on the 16th of February, free of State tax.

The dividend on the preferred stock will be paid to holders in New York at the office of the Farmers' Loan and Trust Company, and in Boston, at the office of Messrs. J. E. Thayer & Bro.

The Central Railroad Company of New Jersey has declared a quarterly dividend of two and a-half per cent., free of tax, payable on and after the 14th inst., at the office of the company.

The Hudson River Railroad Company has declared a dividend of three per cent., payable February 11th.

The Connecticut River Railroad Company has declared a semi-annual dividend of three per cent. free of the Government tax, payable Feb. 2, at the Globe Bank, Boston.

The interest coupons of the Minnesota eight per cent. State loan, due on the 1st inst., will be paid at the office of Messrs. P. M. Myers & Co., No. 6 Broad street, in this city.

The coupons of the Jackson County (Ohio) bonds, due January 1, 1863, will be paid at the Ocean Bank in this city.

The interest upon Iowa State Stocks, due January 1, 1863, will be paid at the Banking-House of Gilman Son & Co., No. 47 Exchange-place, New York.

Interest coupons due January 1st on the Bonds of Muskingum County and City of Zanesville, Ohio, will be paid at the Nassau Bank.

Coupons $5, $15 and $17, of the City of San Francisco, due Jan. 1, will be paid in gold coin, by Wm. T. Coleman & Co., No. 70 Wall st.

Holders of Coupons, due January 1, 1863, of the City of New-Orleans, are requested to present them for payment at the Bank of America.

The Buffalo and State Line Railroad Company, will pay its stock-holders on the 2d day of February a Semi-annual Dividend of Five per Cent., free of Government tax, at the office of the Treasurer in Buffalo.

The Galena and Chicago railroad company have declared a dividend of 3 per cent free of government tax, payable January 10, in Chicago, in exchange on New York at par.

Little Miami Railroad.

The following is a comparative statement of the operations of the road for the years 1861 and 1862:

	1861.	1862.
Gross earnings....	$1,330,050 57	$1,574,069 11
Total expenses....	800,069 49	942,838 32
Net earnings.....	$529,981 08	$631,230 79

An Invention of Rare Merit.
LONG WANTED, AND FOUND AT LAST!
A Kerosene Lamp Chimney, Easily Cleaned
AND WHICH
WILL NOT CRACK OR BREAK
FROM SUDDEN CHANGES OF
TEMPERATURE.

THE CHIMNEY in common use breaks from unequal expansion and contraction, caused by the upper portion becoming much more highly heated than the lower portion. This constant liability of the Chimney to be broken by being suddenly cooled or "over-heated," is entirely removed by a unique and beautiful invention, BROWN'S METAL TOP LAMP CHIMNEY, which, being made in accordance with the simple law of expansion and contraction, is found to be almost "fire-proof," as far as heating by the flame of the lamp is concerned.

The clear, positive superiorities of the NEW LAMP CHIMNEY over the old style, are—

1. It will not crack or break from sudden changes of temperature, or "over-heating."

2. The top can be instantly removed, and the glass wiped perfectly clean in a moment WITHOUT WETTING.

3. It is shorter than the common chimney, therefore less liable to accidents and more convenient for carrying about the house; it is of elegant proportions and a decided ornament to the lamp, which will be found to burn with a clear, steady and beautiful light.

It is really the ideal of perfection in a lamp chimney, and after using one for an evening you will wonder that you could tolerate the old expensive style.

A "BROWN'S METAL TOP LAMP CHIMNEY," **IS WARRANTED, with ordinary care, to last just as long as the lamp on which it is used.**

Price (with a small SHADE for common size,) Zinc-top, 25 cents; Brass, 31 cents; Silver-Plated, 50 cents.

Dealers will be furnished, per Express, with a SAMPLE BOX containing one-half dozen Chimneys, assorted styles and sizes, with circulars, colored show cards, Price list, etc., on receipt of $1.25.

BROWN'S
Metal Top Lamp Chimneys
ARE MANUFACTURED ONLY BY THE
NEW LAMP CHIMNEY MANUFACTURING COMPANY.

BOUGHT AND SOLD ON COMMISSION.

The New National Loan.

U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued b the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

BANKERS,
AND DEALERS IN
ALL ISSUES OF GOVERNMENT
AND OTHER
FIRST CLASS SECURITIES,
38 Wall st., N. Y.

VERMILYE & CO.,
No. 44 WALL ST., NEW YORK,

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in ums of

$50, $100, $500 and $1,000.

The Registered Bonds in sums of

$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 3m45

Principles of Taxation.—Stamps.—Royer.

The general principles on which taxation should be founded, have been so clearly laid down by Adam Smith, that almost universal assent is given o them by the statesmen of modern times. They are thus stated:

1. The people of every State ought to contribute towards the support of the Government as nearly as possible, in proportion to their respective abilities; that is, in proportion to the revenue which they respectively enjoy under the protection of the State.

2. The tax which each individual is bound to pay ought to be certain and not arbitrary. The time of payment, the manner of payment, the quantity to be paid, ought all to be clear and plain to the contributor and to every other person.

3. Every tax ought to be levied at the time, or in the manner most likely to be convenient for the contributor to pay it.

4. Every tax ought to be so contrived, as both to take out and keep out of the pockets of the people as little as possible over and above what it brings the public Treasury of the State.

It is not our intention to discuss these maxims. Volumes have been written in defence of their correctness. But it is not beyond the line which we have marked for ourselves, as Journalists of Finance to advise their application to ourselves. We have hitherto known nothing of taxation so to speak, but a large experience is close at hand. It is understood that our present system of Internal revenue is likely to bring larger returns than the most sanguine contemplated. It is even said, that its appropriate department anticipates the amount will be more than half a million of dollars per day, while from the customs, an advance of 150 per cent. on the revenue of last year is asserted to have taken place. If this be so, we may look our war debt boldly in the face, assured that we shall not only pay the interest, but in a few years retire the principal. One species of our taxation proves to possess great power in itself and great economy and facility of collection. We mean the stamp duties. A prejudice against it was inherited from the Revolution, but there is a vast difference between a tax levied by a foreign master, and one we voluntarily impose upon ourselves. It is likely to produce us much more than it does in other countries comparatively, from the peculiar characteristics of our countrymen. We are men of business, with great versatility and aptness, and constantly engaged in contracts and transactions, which would never enter the mind of similar classes of people either in France or England. It is our daily experience, that almost every American carries about with him a hat full or pocket full of papers, of some value in hand, or in prospective. All relate to the payment of money in the end. A stamp on these papers is a tax sure to hit everybody, and it is of such moderate dimensions, and so well proportioned to amounts, as to be paid cheerfully, and to create little inconvenience. We presume that it will be found best to continue it long after other measures of taxation shall have been repealed. The stamp duties of Great Britain produce forty millions of dollars per annum. Considering the activity and habits of our countrymen we should expect ours to produce twice as much.

We observe in a late Foreign Exchange, that the Government of the Canton of Vaud in Switzerland has been turning its attention to this subject of taxation, and in 1860 offered prizes for the best treatises on the subject. Strange to say one of the successful competitors proved to be a lady of Paris, Mad'elle CLEMENCE AUGUSTE ROYER, and her work, *Theorie de l'Impot, ou La Dime Sociale*, (Theory of Taxation, or the Social Tithe,) has been published. Not only this, but it receives great approbation from the foreign critics, and the *London Economist* says of it, that it treats the subject with "fullness, learning, acuteness and originality." We quote from that journal the following notice:

"The work is divided into three parts. In the first, entitled "Taxation in General," the author treats of the origin of taxes, of the general principles of taxation, of equal, proportional, and progressive imposts, and of the manner of distributing and levying taxes. The conclusions arrived at are:—1. That taxation ought to be in proportion to the means of the citizens, and that 'in cases where the present has to repair an inheritance of injustice left by the past,'—it ought to be more or less progressive; 2. That the taxes raised ought to suffice with economy to the present wants of the State and permit it to progress; 3. That they ought not to impose any charge on the people which does not profit the public treasury; 4. That taxation ought not to be contrary to morality, nor (by affecting the means of living) injurious to the public health, nor repressive of civil liberty; 5. That the payment of taxes ought to be an act of free adhesion to the social contract, and consequently personal and direct. In the second part of the work, Mdlle Royer examines the different sorts of taxes imposed, and weighs the value of the arguments in favor of and against each, producing not a few of her own. In this part of her task she does not adopt the ordinary classification of direct and indirect taxes; but she makes one of personal, and real taxes. 'In reality,' she says, 'there are only two sorts of imposts: personal, and impersonal or real—the latter falling on property rather than on its owners.' In the former category she places military conscriptions, *corvees*, capitations, licenses, fines, confiscations, &c.; in the second, taxes in kind, and on consumption, on land, capital, revenue, luxury, customs, duties, &c., &c. The conclusion she comes to is that set forth in the first part, namely, that taxation ought to be both personal and direct, or real—'imposed directly both on the person and his property in proportion to his capacities and faculties internal and external.' In the third part of the work the author calculates that the government of a country is justified in taking about a tenth of the total revenue in taxation, and she shows how the levying of such a sum can be practically effected in the Canton of Vaud."

The results to which she arrives among other

things is that a poll tax is expedient, because she argues every man is a capitalist of some sort, and this capital may consist not merely of actual property, but of the money it has cost to educate and train him, in whatever position of life he occupies. She estimates every ordinary workman as therefore possessed of capital of from one hundred to three hundred dollars, and that he ought to pay for his acquirements, from 60 cents to $1.40, per caput, that a student of eighteen years is worth in the same way about $900, and should pay from $4 to $5, that a lawyer or physician at the age of 25 years, represents an outlay of $2,100, and should pay a tax of $10.50. Men of all classes of life she asserts can thus be equitably reached.

This poll tax though ingeniously devised, would not suit the followers of Adam Smith, and the plan has been abandoned in England and other countries.

She thinks that land taxes should be adjusted to valuations assessed by juries, and that luxury in dress and living should be encouraged, not only for their contributions to the revenue in various ways, but because "they raise the moral character of a nation!"

Our system of assessing would meet the views of Madamoiselle Royer exactly, and our experience is, that it generally errs, if at all, on the safe side. Real estate in this city is in reality assessed much below its value.

As to the other idea, we should say the plan no doubt would add to the sources of taxation, but as to its moral effect we have very great doubts. Refinement of manners resulting from education and easy circumstances, is a great polisher of society, but luxury *per se* is the bane of a free people, and has been the downfall of many a republic.

British American Continental Railway.

It is announced in the Quebec *Mercury* of Saturday last, that an English Company has offered to construct a railway and telegraphic line *via* Lake Superior to the Pacific, the Imperial and Canadian Government guaranteeing 4 per cent. on the capital.

Safety, Coupling Bar for Locomotives.

M. Charles Victor Fournier de Berville, of Pasis, has been granted letters patent for the invention of "an improved safety coupling bar, for locomotives, and other railway carriages." Tliis invention has for its object the prevention of accidents to railway passengers and carriages, by a self-acting means of severing locomotives from trains in case of accidental deviations of locomotives from the rail. The means used are the fixing of two strong iron bars with braces for strengthening the same, one on each carriage, which bars are connected by strong iron conical sockets, fitting one into the other at the extremity of each bar, there to be united by a strong iron plug, of a form to fit the sockets. The plug is locked in the sockets by a strong iron bolt, which, by a deviation of the locomotive from the rail, will lose its influence over the plug. The plug, by means of a powerful spring attached thereto, will be instantaneously withdrawn from the sockets, when a separation must inevitably and immediately take place. The separation taking place upon a deviation (that being impossible upon a direct line) the train cannot be carried away by the engine, either over an embankment or on to the sides of a cutting. These advantages are claimed for this invention, which is one of great simplicity, and not involving more expense than the couplings now in use.

Philadelphia and Reading Railroad.

The managers submit the following report of the receipts and expenditures for the year ending November 30, 1862, with the Treasurer's general balance sheet exhibiting the financial condition of the Company at that date. (Here follows the usual detailed statement of receipts and expenses which we condense as follows:—)

RECEIPTS

From travel, 396,466, equal to 150,970 through passengers		$403,563 77
From freight on m'd'se, 451,782 tons.	523,416 16	
" " " coal, 2,310,990 tons.	2,879,419 55	
From United States mail		19,618 00
From other sources		85,812 74
		$3,911,830 22

EXPENSES.

Transportation	$977,741 58	
Roadway	256,934 62	
Dumpage, rents, taxes, profit and loss, damages, &c.	301,906 94	
		1,536,583 14
Net profit		$2,375,247 08
Interest on bonded debt	$706,969 00	
Interest on bonds and mortgages	35,412 00	
Renewal Fund: 5 cents per 100 tons on 558,944,544 t'ns transported one mile during the year	279,472 27	
		1,021,853 27
Dividend fund		$1,353,393 81

Which has been disposed of as follows:

Sinking funds	$386,580 90	
State tax on capital for 1862	28,374 71	
Dividend on preferred stock	108,626 00	
Accrued interest for 1862 on reserved dividends, preferred stock	17,826 56	
		$541,408 17
Balance of dividend fund, 1862		$811,985 64
Add " " " 1861		178,970 57
Total reserved fund		$990,956 21

The winter of 1861–'62 will be long remembered by the miners and producers of coal as a period of great discouragement and depression. From this cause, much less than the average amount of preparation was made for the business of the past season.

Upon the opening of navigation in the spring, coal was offered in the principal markets of the country at prices so much below any heretofore known, that it was felt that the interests of the Company, as well as its duty to those who relied upon it for means of access to market, required of it an unusual reduction in the rates of transportation.

They were accordingly established until the 1st of July, sufficiently low to enable Schuylkill coal to maintain its previous position.

On the 4th of June a freshet occurred, the most disastrous ever known in the coal district. The road escaped with trifling damage, its traffic being interrupted from this cause only two days.

Since the 1st of July a largely increased business has been done, at satisfactory prices.

The following tabular statement in detail for each branch of traffic shows the comparative results of the year:

	1861—Passengers.		1862—Passengers.		Increase.	
	140,451	$398,905	150,970	$403,564	$04,659—	19.1
	Tons.		Tons.		Increase.	
Merchandise	824,958	406,321	451,782	523,416	117,095—	28.8
Coal	1,639,535	2,111,023	2,310,990	2,879,419	768,396—	36.4
Mail		19,618		19,618		
Miscellaneous		29,971		85,813	59,842—	199.6
Gross receipts		$2,905,838		$3,911,830	1,005,992—	4.6
Gross expenses		1,492,933		1,816,055	323,122—	21.6
Net profits		$1,412,905		$2,095,775	682,870—	48.8
Gross expenses including renewal fund, in the year 1861, were 51.38 of gross receipts.						
" " " in the year 1862, " 46.42 " "						
Decrease						4.96

The receipts and expenses per passenger and per ton, have been as follows, viz:

	1861. Cost.	1861. Received.	1862. Cost.	1862. Received.
Per passenger	$1 34.5	$2 41.3	$1 10.4	$2 67.3
Merchandise, per ton	70.2	1 25.4	53	1 15.8
Coal	41	1 28.7	35.8	1 24.6

The result of the year's business, as condensed from transportation and income account, may be stated thus:—

Gross receipts			$3,911,830 22
Deduct working expenses, including renewal fund			1,816,055 41
Profits or receipts over cost of working the road			$2,095,774 81
From which deduct the interest on Bonded debt	$706,969 00		
Bonds and mortgages	35,412 00		742,381 00
Leaving for net profit or div. fund			$1,353,393 81
This has been credited as follows:			
Sinking funds	$386.580 90		
State tax on capital	28,374 71		
Dividend on preferred stock	108,626 00		
Accrued interest for 1862, on preferred stock div. not paid	17,826 56		541,408 17
Balance carried to reserve fund '-62.			811,985 64
Amount to credit of reserved fund, 1861, per report of November 30, 1862		$780,742 40	
From which is deducted for sundry drawbacks on traffic for 1861, paid	$18,451 58		
Credit due to sinking funds out of income of 1861	27,373 31		
Difference between the par and estimated value of stocks and bonds held by the Company, and debts, considered doubtful	555,946 94	601,771 83	178,970 57
Total reserved fund			$990,956 21

After deducting all expenses, including renewal fund and interest on the bonds, the net profits are $1,353,393 81, which is equal to 11.72 per cent. on all the outstanding stock, common and preferred. The chief items of expenditure to which this sum has been applied, are as follows:

On account of the payment of the $450,642 72 scrip issued for the arrears of dividends on the preferred stock		$358,702 18
Bonds of the Company for the sinking fund		373,500 00
New cars and engines		284,323 35
Construction of the Mahanoy and Broad Mt. Railroad, for which the bonds and stock of that Company are held		347,990 00

The amount of stock purchased for the sinking fund having accumulated to a sum sufficient to form a basis of a dividend in stock to the common stockholders, one of 7 per cent. has been declared payable on the 16th of February next.

The charges to construction or capital account during the year have been:

For real estate in St. Clair (Schuylkill county), Conshooken and Port Richmond		$2,241 00
For locomotive engines and cars—		
507 eight-wheeled coal cars.		
158 four-wheeled coal cars.		
54 merchandise cars.		
2 eight-wheeled mail cars.		
1 eight-wheeled passenger car.		
722		
Total cost	$264,028 50	
1 eight-wheeled tender	1,267 36	
New engines	19,027 49	
		284,323 35
For Lebanon Valley Branch—		
Final settlement of contract on account of construction		37,772 74
For propeller and coal barges		13,940 00
For Shamokin Valley and Pottsville Railroad purchase		50.000 00
For Schuylkill and Susquehanna Railroad stock		13,447 50
For Philadelphia, Reading and Pottsville Telegraph stock		50 00
		$401,774 59

Fifty-three of the merchandise cars above referred to as purchased during the year, were received on the settlement of the last of the car loans.

The net profits of the Lebanon Valley Branch during the year have been 9½ per cent., after paying the interest on the outstanding bonds issued for its construction.

The reports of the General Superintendent and of the Chief Engineer, together with the tabular statements which accompany them, exhibit in detail the operations of the transportation and roadway department.

At the present time coal intended for consumption in the city of Philadelphia, as well as that destined for points on the Pennsylvania, West Chester and the Baltimore Railroads, is brought to the terminus of the road near Callowhill street, and excepting that which is sent down Willow street, is all hauled through Broad street to the coal yards, or to the several railroad stations, where it is again taken by a locomotive to its point of destination. During the past winter the capacity of the railroad in Broad street proved totally inadequate to pass the quantity of coal offering, although the hauling was continued day and night. With a view to withdraw this traffic from the streets of the city, to increase the business of the road, and to relieve the coal from an unnecessary charge, a joint agreement has been entered into with the Pennsylvania Railroad Company, and the Philadelphia, Wilmington and Baltimore Railroad Company, to construct the Junction Railroad from Belmont, near the foot of the old inclined plane on the Columbia Railroad, along the west bank of the Schuylkill river to the Baltimore Railroad, near Gray's Ferry, with suitable connections with the Pennsylvania and West Chester Railroads. The total length of the road will be 4⅝ miles. It is intended to be finished by the month of June next. To provide for the cost of the road, the bonds of the Junction Railroad Company have been authorized to be issued to the amount of $500,000, bearing 6 per cent. interest, guaranteed by each of the companies who are parties to the agreement, in which it is also provided that the charge for the use of the road shall be adequate to pay the cost of repairing and working it, the interest on the bonds, and $15,000 per year to a sinking fund, which is sufficient to redeem all the bonds before their maturity. For this reason the contingent liability of the company under its guarantee has not been included in the general account of its debts and assets.

The shipment of coal at Richmond in the winter season has always been more or less interrupted through the fear of ice in the Delaware river. With a view to avoid this impediment an agreement has been made with the Philadelphia, Wilmington and Baltimore Railroad Company to construct a large pier in the river Delaware at New Castle, thirty miles below Philadelphia, where it is navigable at all seasons. The coal trains will leave the line at Belmont, passing over the Junction Railroad and through to New Castle without stopping. The pier is expected to be finished and ready for use next winter.

Piers Nos. 3, 5 and 8, at Port Richmond, have been extended during the past year, and several miles of additional sidings have been laid. These improvements have added greatly to the convenience and shipping capacity of the Company's wharves.

At the last sessson of the Legislature the Company was authorized to own vessels, to be employed in the transportation of coal from Port Richmond.

During the past season a propeller and two barges have been built, as an experiment, of an aggregate capacity of 700 tons. Their performance thus far indicates that they will equal the expectations that were entertained of them. It is believed that this mode of transportation will materially reduce both the time and cost of delivering coal at all points accessible to boats of their class.

A dividend of 7 per cent. out of the earnings of the year has been declared on the preferred stock, payable on the 15th inst.

The scrip issued for the arrears of dividends due on this stock, amounting with interest to $450,642 72, fell due on the 31st of December. In accordance with the suggestion made in the last annual report, $358,702 08 were purchased during the year, and the remainder, $91,940 64, was paid at maturity.

$373,500 of the bonds of the Company have been purchased for the sinking funds during the year.

Owing to the high rates which the bonds of the Company command, a portion of these are held provisionally in accordance with the terms of the sinking funds, as a security for the ultimate redemption of the loans to which they may be assigned. In view of the probable continuation of the present inflation of prices, it is suggested that authority be conferred on the managers to purchase the bonds of the Company at current market rates, if they should deem it expedient to do so.

During the past year the Board has had to regret the loss of the valuable services of Mr. W. H. McIlhenny, who so long and faithfully performed the duties of Secretary of the Company. Owing, it is believed, to excessive application, his sight became so seriously impaired as to compel him to relinquish his position. It is to be hoped that his affliction may prove to be only temporary. Mr. William H. Webb has been appointed in his stead.

By order of the Board of Managers.
(Signed) CHARLES E. SMITH, President.
Philadelphia, January 12, 1863.

Finances of Illinois.

The following is an abstract of the recent Annual Message of the Governor of Illinois:

The total debt of the State is $12,337,381 37. The revenue for two years ending November 30, 1862, was $1,775,239 87. Ordinary and contingent expenses in same period, $864,007 04. Special appropriations, $531,271 83. Total including $5,263 81 for redemption of warrants, $1,400,542 68, leaving in the Treasury, Dec. 1, 1862, $374,697 19. Dec. 1, 1860, the Treasury was empty. The interest funds received during the two years covered by the reports of the Auditor and Treasurer is $1,153,419 36. Add $259,424 90 on hand Dec. 1. and $286,292 15 transferred from the Revenue fund for payment of interest on the public debt, and the aggregate is $1,699,136 41. The interest accruing on the funded debt of the State has been paid, and amounts to $1,338,153 41, and $360,983 remains in the Treasury. Of this, $334,911 97 will be wanted for interest due January 1, 1863, and a further sum of $410,164 92 will be required for interest due July 1, 1863. Receipts, at present rates of taxation, will fall short of the required amount, and since prompt payment by the Illinois Central cannot be depended on, the Governer recommends a higher rate of taxation, and is of opinion that not less than 3 mills on the dollar of valuation will be sufficient. The State has assumed and paid its quota of the direct tax, and by this means has saved to the State $171,983, as well as expenses of special session and salaries of a host of new officers.

The Legislature at its special session appropriated $3,550,000 as a war fund. Bonds to the amount of $2,000,000 have been issued, and sold for $1,767,395. The total receipts, including $1,841,129 08 reimbursed by the United States on war account, have been $3,610.796 59
Auditor's warrants on this fund 3,595,695 26

Leaving now in the Treasury..... $15,131 33

Amount of warrants yet outstanding $313,616 52, to meet which $779,998 are due from the United States. Although the Legislature undoubtedly intended to increase the State debt to the amount of its war appropriation, yet from the bonds sold a State debt to the United States of $1,146,551 has been liquidated, and the whole cost of the war to the State, outside of the general tax, up to this time is less than half a million dollars.

The total real and personal wealth of the State is estimated at a thousand million of dollars—the census of 1860 having placed it at $871,860,282. In population Illinois has increased from the rank of seventh State in 1850, to fourth in 1860, being then 1,711,951. In railroads it is really the first though nominally the second State in the Union, having now 3000 miles, against 95 miles ten years since. The cost of these roads was $104,944,561. They delivered in 1862 at Chicago 70,000,000 bushels of grain, more than 900,000 hogs and over 170,000 head of beef cattle. The opening of the Mississippi is considered and urged with the earnestness that characterizes every Western expression on this most important subject. The manufacturing facilities of the State are extraordinary—the value of the coal bed underlying the county of Perry alone is geologically estimated, at the price of $1.50 per ton, to be $3,259,000,000. Lead, iron, and other mineral treasures are so abundant that Illinois can never be merely an agricultural State.

The manufacturing product of Chicago alone for 1861, was $17,000,000 employing 11,000 persons. Illinois is now the seventh State in this respect ic the Union.

Petroleum and its Products.

For nearly one hundred and fifty years the petroleum or oil wells have been known and their products used for medicinal purposes. When the French ascended the Alleghany in canoes in 1715 the Indians showed them an oil spring at the place now known as Oil Creek, in Venango county, Penn. The natives used the petroleum as a liniment for inflammatory rheumatism, and it was long known by the name of "Seneca Oil," and prescribed for rheumatic diseases. According to Wachtiar the Indian had used this natural oil for many hundred years. Their oil wells, sunk in the gravel and clay of the bottom lands on the Alleghany and its branches are visible by hundreds to this day. But it is only within the last eight or nine years that anything was extensively done to realize the great value of these oleaginous deposits. The Cincinnati *Gazette* gives the following history of the rise and progress of the petroleum trade:

"In 1854 Mr. Drake of Titusville, at the Forks of Oil Creek, conceived the plan of getting a better yield from the springs. He bored an artesian well, and at the depth of 70 feet had the good luck to strike a fissure or vein that sent up a large flow of oil. Professor Silliman examined some of it and concluded that it could be distilled and a good illuminating oil extracted from it.

Artificial coal tar had been already produced from bituminous coal, from which burning oil is easily made. But natural petroleum, or *stone* oil, is generally richer in the inflammable materials, and more easily distilled.

Thus the 'coal oil' excitement commenced. From 1860 to this time it has taken the lead of all other excitements in America. Mr. Drake put in a tube and a pump, as the salt makers do, and obtained an average of eight and ten barrels per day. Some days he had twenty barrels, which yielded 75 to 82 per cent, of refined oil, then worth $1 50 per gallon. McClintock's well, at the old spring, yielded eight barrels of forty gallons a day for a month together, for which he received 75 cents per gallon. At the close of 1861, the narrow valley of Oil Creek, less than half a mile wide, presented the appearance of a continuous 'slab city,' from its mouth to Titusville, a distance of eighteen miles by the stream. The limited space between the hills was crowded with board shanties, derricks, sheds for steam engines, blacksmith shops, and stables for horses. In the year 1860 there were produced 25,000 barrels on Oil Creek; there were then 346 wells producing 435 barrels per day, but only 29 of them were profitable. On the Alleghany river there were seventeen wells, which yielded 314 barrels a day. There were also 567 wells that did not pump, on account of the great fall in price, and a falling off in the yield of oil.

In 1861, by extending the depth of the wells to 400 and 450 feet, still greater wonders were brought to light. Seventy-five wells flowed spontaneously, some of them at a rate that could not be controlled.

As soon as the first paroxysm was past, tubing was introduced, with stop-cocks, and vats provided to receive the oil. In one instance a well discharged three thousand barrels in twenty-four hours. Another discharged twenty-five hundred, and others ranged from one to seven hundred barrels a day. This copious flow put a stop to the working of the pumping wells, of which there are reported to be in Venango and Crawford counties two thousand. At a shilling a gallon, a pumping well does not pay unless it yields five barrels per day.

For several months the daily yield of the flowing wells was five thousand seven hundred and seventeen barrels. Sixty-two of the flowing wells were not discharged at the same time with the seventy-five wells above spoken of. At the present time the daily discharge is about 5000 barrels. The price of crude oil four months since was as low as one dollar per barrel. It is now $6 to $6 50, not including the package. This stimulates the pumping wells into operation again, and they can add to the product 2500 barrels a day. It is next to impossible to state the total yield of the Oil Creek region. At the close of 1861 it is given by the *Oil City Register* as amounting to 1,092,000 barrels. In January, 1862, 80,000 barrels were carried away by the several Northern routes; and in October 1862, 30,000 barrels; 9000 remaining in store. For the week ending Nov. 27, 1862, the *Register* gives the regular shipments by the Alleghany river south as 9351 barrels, and during a recent rise, 75,000.

In 1861 there were twenty-five refineries in Venango county. There are now fifty-three, and in the oil region probably eighty, with a capacity of 8000 barrels per week, refined oil. Several of these works are owned in Europe, where products are carried."

Cleveland, Columbus and Cincinnati R. R.

The annual meeting of this company was held at Cleveland on the 14th inst. The business of the road for the year 1862 is thus stated:

From passengers (11 months)		$407,956 69
" freight "		1,005,004 69
" express "		19,368 82
" mails "		28,550 12
" rents "		75,899 90
" other sources "		533 11
" interest on deposits		2,732 78
" do., uncollected (estimate)		4,470 00
" December earnings—subject to corrections		179,553 38
Total for the year		$1,724,069 49
Expenses (11 months)	$567,462 98	
Expenses December, estimated	80,000 00	
Duties and taxes	33,108 76	
Interest	26,346 88	
Exchange	19 26	
		706,937 88
Net earnings for the year		$1,017,131 61
Cash dividend paid August 1, 1862	$227,310 00	
Cash dividend declared, payable Feb. 2, 1863, 5 per cent., and 5 per cent extra	500,000 00	
		737,310 00
Surplus for the year 1862		$279,821 61
Surplus earnings Jan. 1, 1862	$416,825 79	
Less amounts charged this account in settlement of old claims, and for worthless notes and accounts	32,016 61	
	$384,809 18	
Less stock dividend, Aug. 1, 1862, 5 per cent	237,310 00	
		147,499 18
Surplus Jan. 1, 1863		$427,320 79
Expended during the year for new equipment and for permanent improvement		$125,428 00
Earnings, exclud'g int. on deposits		1,537,313 33 / 179,553 38
Total		$1,716,866 71
Expenses, exclud'g interest, duties and taxes		$567,462 00 / 80,000 00
Total		$647,462 93

Operating expenses 37¾ per cent. of earnings.

Railroad Building.—Payment of Damages to Individual Owners of the Land.

PAYMENT OF LAND DAMAGES IS A CONDITION PRECEDENT TO THE ACQUIRING OF TITLE BY THE COMPANY. BUT WHERE AN OWNER ACQUIESCES IN THE USE OF HIS LAND, UPON A CONTRACT FOR FUTURE PAYMENT, HE CANNOT, ON FAILURE TO OBTAIN PAYMENT, MAINTAIN EJECTMENT.

The following action was brought in the Supreme Court of Vermont, by William McAulay against the Western Vermont Railroad Company, and Myron Clark the plaintiff was owner of certain lands in the State of Vermont taken by the company for the use of their road, and instituted this action, to eject the company, on the ground that he had never been paid the appraised value of the land; the payment of his land damage being a condition precedent to the acquiring of title by the company.

It appears that the land was taken by the company in the summer of 1850, and that their road was completed in 1851. The defendants procured the damages to be appraised by commissioners, in the manner provided by law, on the 4th of Sept. 1851, after the construction of the road on the premises had been commenced. The plaintiff appealed from the award of the commissioners, and on the 24th of May 1853 a re-appraisal took place, by commissioners appointed by the county court as required by law, and the sum of $2,050 was awarded to the plaintiff for his damages. All the preliminary proceedings in the survey, location and recording of the road, and in the appraisal of damages were regular and in conformity with the requirements of the statute.

At the trial the plaintiff introduced evidence tending to show that he had never been paid the damages awarded to him. The defendant thereupon, gave in evidence the following contract in writing, having proved that the same was executed by the plaintiff and accepted by the Railroad Company before the land was taken by them: "We, the undersigned, do hereby agree to and with the Western Vermont Railroad Company, to receive in payment for each of our damages, in consequence of the building of the road of said company through each of our lands, the stock of said company at its par value. January 1, 1850."

The plaintiff claimed that this agreement was obtained by fraudulent representations and concealment in regard to the location of the road, made by Martin C. Deming, who during the survey and construction of the road was a director of the company. At the time of the trial Deming was deceased, and testimony was introduced as to conversations had with Mr. Deming by one Lathrop relating to the location of the road and its effect upon the interests of the plaintiff.

Judgment at the trial was rendered in favor of the plaintiff, and the case now came up before a Special Term of the Court; the defendants contending *inter alia*, that whether the contract was obtained by fraud or not, the action of ejectment could not be maintained against the railroad. As the land was regularly taken, the damages legally assessed and judgment rendered therefor, the road meanwhile having been constructed over the land, with the plaintiff's acquiescence, the license thereby acquired was irrevocable; the remedy of the plaintiff being for the damages, not the land. The Special Term now delivered the following opinion, and reversed the judgment.

REDFIELD CH. J.—The commencement of the construction of the defendant's road was before damages were appraised, which was on the 4th of Sept. 1851. The location and survey of the road was of course before work began, and so is the date of the writing signed by the plaintiff. But it was not, in fact, signed by the plaintiff until about the time of the first appraisal. The construction of the road was completed in 1851, and it immediately went into operation and has so continued until the present time.

The first question which arose in the trial of the action was in relation to the declarations of Martin C. Deming, a director of the Company, as to his knowledge of the claim of the plaintiff, that the road should be located in a particular place, or else he would not take stock for his land damages, and that it had not been so located, and his consequent expectation that he would not accept the stock, the declarations being before the alleged fraud and deception practiced by said Deming, in inducing the plaintiff, as he claims to sign the agreement to accept stock. We do not regard these declarations as mere admissions of the agent of the company. They are facts in themselves, that is knowledge of the location of the road, and that it was in a place where the plaintiff did not desire it, and that if its location there was known to him, he would not accept the stock of the company for damages. If, instead of these admissions or declarations, it had been shown that some person gave Deming notice of these facts near the time of his alleged fraud practised upon the plaintiff, there could be no question of the importance and competency of the evidence. But the real enquiry is whether the fact that at the time he induced the plaintiff to sign the agreement he knew that the road was located where the plaintiff did not desire it, and represented to the plaintiff that it was laid in another place, and where he did desire it, in order to obtain the plaintiff's signature to the agreement, is competent to go to the jury. The most satisfactory evidence of such knowledge is his own declaration to that effect. Some one might have informed Deming of this fact, and he not understand them, or he might possibly understand them precisely contrary to the fact. But there is no possibility that he would state a fact of which he had no knowledge.

II. It being admitted, as it seems to be, that the plaintiff had full knowledge of the proceedings of the company to locate and construct their road upon his land, before and during all the time of the construction, and that he did not interfere in any way to prevent the occupation of the land for the purposes of the road, otherwise than by forbidding the hands working on the road until his damages were paid, and that on a single occasion, it becomes an important inquiry, whether he can now maintain ejectment for the land, by reason of the non-payment of his damages. This is certainly a question of some practical importance, but does not appear to have been distinctly submitted in any form to the jury, although the requests of the defendant's counsel sufficiently point towards the question.

There can be no doubt upon the facts detailed in the case, that the jury must have come to the conclusion that the plaintiff made no objection to having the road constructed, where it was located, except to the workmen upon a single occasion. This is not sufficient objection, for two reasons. First it was not made in the proper quarter to the proper agents of the company. These workmen were in no sense either the agents or the servants of the company; they were the mere servants of the contractor. And in addition to this, being upon a single occasion, it is quite susceptible of the construction, that upon all other occasions the plaintiff not only made no remonstrance, but that he virtually assented to the construction and operation of the road. The fact that no effectual steps were taken either to stop the proceedings of the company, or enforce the payment of land damages, for a great number of years, and even for a considerable period after the final assessment, confirms this view. Under this state of facts the question arises, can the plaintiff maintain ejectment until his land damages are paid, or the company have acquired title by the statute of limitations? This seems to have been the view of the plaintiff in bringing the action and it seems to have been viewed much in the same light at the trial. But we are unable to adopt this conclusion.

It is undoubtedly true that according to our general railroad statutes and the special charters in this state, the payment or deposit of the amount of the land damages, assessed or agreed, is a condition precedent to the vesting of the title, or of any right in the company to construct their road, and that if they proceed in such construction without this, they are trespassers, and this has been repeatedly so held by this court. This may have led to the misapprehension in the present case. But it is certainly a very serious misapprehension. In these great public works the shortest period of clear acquiesence, so as fairly to lead the company to infer that the party intends to waive his claim for present payment, will be held to conclude the right to assert the claim in any such form as to stop the company in the progress of their work and especially to stop the running of the road after it has been put in operation, whereby the public acquire important interests in its continuance. The party of course does not lose his claim or the right to enforce it in all proper modes. He may possibly have some rights analogous to the vender's lien in England, and here, until the legislature cut it off. But it is certain according to English decisions that he cannot stop the works and especially the trains upon the road, if he has in any sense, for the shortest period clearly given the company, either by his express assent or by his silence to understand that he did not intend to object to their proceeding with their construction and operation. And laying the written agreement wholly out of the case, there is a good deal in the case which looks as if the company were fairly justified in supposing the plaintiff did not object, and was therefore willing that they should go forward in the construction of their road, if they would only *agree* to pay him the money for his land damages. He does not seem to have insisted that the first appraisal should be deposited during the pendency of the appeal, and before the work proceeded further. His great desire seems to have been that the damage should be agreed upon and that he should be released from all claim under the written agreement to accept stock. To this extent his remonstrances were loud and sufficiently intelligible. And if it should appear that he also made himself well understood by the company or their proper agents acting on their behalf in these matters, at the time, in regard to insisting upon the payment or deposit of his land damages, according to the statute and before the work proceeded, and that the company understood at the time that they were proceeding in defiance of his remonstrances, and upon their own responsibility merely, from first to last, it is certainly not necessary to assert here that they are not liable now in trespass and ejectment. The English courts, certainly those of equity, do not give much countenance to the idea of stopping the operation of a railway, for any mere informality in the organization of the company, or in the construction of their road, or in taking land. Lord Cottenham, Chancellor, says in Duke of Leeds *vs.* Earl of Amherst. "If a party having a right stands by and sees another dealing with the property in a manner inconsistent with that right, and makes no objection while the act is in progress, he cannot afterwards complain."

In the present case it is not precisely a parol license under which the company claim to have built the road. Their record title to the land would be complete with the addition of the fact of payment, or the deposit of the amount of the appraisal. This is a fact resting always *in pais*. And being so, although a condition precedent, it may be waived by the party in whose favor it exists, and this by parol merely. The waiver may be by parol as well as the performance. And the waiver may be partial as well as total. If there was then a waiver in fact, either express or implied by acquiesence in the proceedings of the company to the extent of not insisting upon pre-payment as a condition precedent, but consenting to let the damages be and remain a mere debt, with or without a lien upon the road bed, as the law may turn out to be, then it is impossible to regard the defendants, in any sense, in the light of trespassers, or liable in ejectment. One might as well expect to assert a mechanic's lien upon railway structures, which cannot be done. In Dunn *vs.* North Missouri Railway Company, it is decided that such lien cannot exist both on account of the nature of the works, and the public interest in them.

Judgment reversed, and case remanded.

AMERICAN AND EUROPEAN RAILWAY PRACTICE in the Economical Generation of Steam, including the Materials and Construction of Coal-Burning Boilers, Combustion, the Variable Blast, Vaporization Circulation, Superheating, Supplying and Heating Feed-water &c., and the Adaptation of Wood and Coke Burning Engines to Coal-Burning, and in Permanent Way, including Road-bed, Sleepers, Rails, Joint Fastenings, Street Railways, etc.—By ALEXANDER L. HOLLEY, with 77 plates. New York, D. VAN NOSTRAND, publisher, 192 Broadway

This is the formidable title of a quarto from the pen of an eminent Engineer, and the prolific press of Van Nostrand. It is a most valuable contribution to the science of Railway engineering, and as immediately practicable to construction, superior to the celebrated work of Dr. Lardner. It is therefore admirably adapted to this country, where our lines of railways are so much more extensive than in any other part of the world, where the numbers of Engineers are so great, where the natural turn of men's minds is so generally towards machinery, invention, and mechanical power.

To give some idea of its character we give from

the introductory chapter, the following five remarks on the material for boilers, which are the heart of the locomotive, and from which all its vitality and powers are derived. It is therefore desirable, says the author:

First.—To decrease the cost of maintenance of boilers. The substitution of coal for wood, as fuel, is materially increasing the wear of fire-boxes, flues, and grates.

Second.—To reduce the weight of locomotives. Without broadly discussing this policy, it is sufficient to mention that the professional opinion and the more enlightened practice of both Europe and America, are unmistakably in this direction. For very high speeds, light-rolling stock is simply indispensable: and for common traffic, whatever weight for adhesion may be demanded, the policy of employing tank-engines, and dispensing with tenders—the locomotive proper being proportionately lightened—will hardly be questioned.

Third.—To meet the demand on the present class of machinery, for more power without a positive increase of weight, since sudden deviation from the standard patterns of locomotives, however desirable, is not to be expected. The maximum size and weight of locomotives appear to have been reached some time since; increasing business will, therefore, be accomodated by a higher steam pressure, at the risk of trouble from the slipping of driving wheels.

It is believed that the extra cost of the occasionally deficient adhesion of light engines, is less than that of the extra repairs of way and equipment due to heavy engines.

Fourth.—By allowing thinner heating surfaces and greater uniformity of strength in boilers, to facilitate the economies of a higher steam-pressure, which are, chiefly, greater expansion, less priming, less boiler space, and less dead weight.

Fifth.—Another most important reason is, to increase the safety of boilers, since explosions are usually the result of insufficient strength of material, as well as of malconstruction.

After considering at length what are the defects of iron plates as now generally used, of copper also, and of steel, the author maintains with justice the superiority of the latter material.

Advantages of Steel.—The advantages of steel for all parts of boilers except fire-plates, are too evident to require special discussion. The leading fact is the superior strength of steel. The result of 150 recent experiments by Messrs. Robert Napier & Sons, on the standard kinds of iron plates, showed a mean strength of 49,215 lbs. to the square inch, while 80 experiments made by the same engineers, at the same time, on steel plates, showed a mean strength of 85,275 lbs. The difference in the weight of iron and steel plates of the same dimensions, is not great enough to be of practical importance. Other things being equal, therefore, a steel boiler is 73 per cent. stronger than an iron boiler. Or the weight of the steel boiler may be decreased in the same proportion, without reducing its strength below that of the iron boiler, or a smaller increase of strength and decrease of weight may be obtained by adopting a medium thickness of plate.

Steel plates of the thicknesses commonly used for iron, are frequently employed in practically testing the new boiler material, and it is as frequently asked, "What is the advantage of stronger material, if we cannot use less of it?" Without discussing the policy of being on the safe side, especially in new enterprises, it may be answered that the economy of a higher steam pressure and an earlier cut-off, or the occasional safe increase of pressure in emergencies, on the one hand, and the reduction of repair expenses on the other hand; or, to some extent, both these advantages, will result from the use of stronger boilers.

The history of steel boiler-plate is too short to throw much light on the subject of repairs, save that it has required no repairs during its limited service of three or four years. With the exception of fire-plates, the conditions of steel in boilers are so similar to its conditions under other uses, that we may safely predict for it that superior resistance to strain, oxidation, crystalization and general "wear and tear," which have characterized it under other circumstances.

The forces tending to destroy locomotive boilers are, first and chiefly, the steam pressure; second, the sudden and excessive strains caused by the lurching and pitching of the locomotive, the boiler being the backbone of the whole structure, stiffening the frame and ultimately receiving all strains not neutralized by the springs; third, the continuous jarring of the vehicle; fourth, the chemical action of water and its impurities. To these may be added the weakening of the material —first, its crystalization by reason of the strain and jarring, an occasional result, and second, the "fatigue of the metal," or the gradual loss of strength under permanent strain. It is not proposed to discuss these latter conditions, since nothing mathematically definite can be said about them. Explosions cannot be definitely traced to these causes, since the original quality of the metal is rarely known; old boilers are usually removed and broken up, not because the iron is weak, for it is often up to the average strength, but because they have so worn and decomposed and blistered as to be too thin for service. On the contrary, many striking instances have been adduced to establish these causes of failure. But since there is no authenticated remedy for these defects in iron, if they are really serious and universal, the employment of steel is the most promising method of avoiding them. Steel is already crystaline in structure, and therefore cannot become weak by becoming crystaline. General practice has not revealed the fact that steel becomes weak from continued use. But general practice has so few definite statistics to show, that nothing besides the more notorious peculiarities of metals is absolutely known. If steel is like iron, in this respect, however, its greater positive strength will the longer resist the strains which cause its deterioration.

To return to the more definite causes of failure, their enumeration at once shows the superiority of steel. It resists steam pressure better than iron, by reason simply of its strength—that distinct quality shown by the testing machine. It resists the sudden strains and the jarring incident to locomotive boilers, by superior elasticity. It better resists the attrition of the circulating water and its impurities, by its superior hardness. That steel corrodes less rapidly than iron, is a notorious fact—how much less in case of boiler steel is not known.

It is evident then, that in case no more steam pressure is carried, the repair expenses of steel boilers, as compared with iron of equal section, will be decreased, not only in proportion to their superior strength, but in a greater proportion, by reason of their elasticity, hardness, granular construction, and resistance corrosion. And if proportionately higher steam pressure is carried, so that the relation of strength to strain is the same as in iron boilers, the repair expenses will still be decreased by reason of the last-named qualities of steel.

What is true as to the expenses of maintenance is true as to safety. Recent discussions and recently compiled facts on the subject of boiler explosions, show quite conclusively that the larger proportion of these casualties result simply from the want of proper strength in the boiler.

Steel, like iron, is liable to one very serious defect, which, however, improved manufacturing processes—the perfection of the Bessemer process—will be likely to remove.

On this, naturally follows the subject of the construction of boilers, which is ably treated in chapter 4, and which we commend to the managers of our great boiler works. Chapter 5 discovers equal intelligence as to the construction of flues, the veins and arteries of the boiler, proceeding further, we find the great and important principle of construction fully discussed, one which has exercised the skill and powers of the most philosophic minds. Under this head, the varieties of fuel are examined and commented upon, the supplies of water, and the idea of super-heating.

The volume next treats of a permanent way which is elucidated in all its forms, both as regards material, economy, stability and relations to traffic. Rails and sleepers are particularly considered, and the information with regard to them is full, satisfactory and valuable.

The text is exemplified by a large number of lithographic plates, well designed and executed, leaving nothing unexplained. We hope to have room at no distant date, to quote more at length from this interesting work. It is impossible to do the author justice in so brief a notice.

The Plans for the Development of National Resources.

The country is now beginning to learn the secret of the prodigious financial strength displayed by the North since the breaking out of the great rebellion, and has already taken the most efficient steps to add to this strength by enlarging the conditions of its development. Our public works in the East may be said to have been completed the very moment that our domestic troubles commenced. They rendered labor highly remunerative in every portion of our wide domain, supplied the basis of a profitable foreign trade to take the place of cotton which instantly, and without warning, disappeared from the channels of commerce, and gave an activity to our internal trade never before experienced. They have enabled us to utilize in the highest degree whatever resources, or natural wealth we possessed, and have been the means of supplying, and in the greatest abundance to our whole population, at a crisis which is usually a period of great distress with other countries, whatever was necessary to a high degree of personal comfort.

The lesson taught has not been lost. If we have been saved by what we had accomplished, the most obvious duty was to prepare ourselves for still greater burdens and trials. The East was already sufficiently provided with railways. But the two extremes of the continent were still unconnected, and the means for the development of a vast interior, now a desert, unprovided. If the Eastern slope is richer than any other country in soil, and in facilities both natural and artificial for transporting its products, the Western is the great seat of deposit, probably for the world, of the precious metals. These deposits are reached as soon as we touch the base of the Rocky Mountains, and extend over an area of more than a thousand miles in every direction. Only a small portion of this immense area can now be worked to profit, owing to its inaccessibility, and to the peculiarities of its climate and soil. From the 100th meridian to the crest of the Sierra Nevada, the country is to a great extent rainless, so that no culture is possible except by irrigation. Lofty mountain ranges provide for the watering of considerable districts, although the area that can be irrigated, bears only a very small percentage to the whole—probably not over two per cent. The deposits of minerals are, however, a full compensation for this lack of agricultural wealth, and vast districts would soon become densely peopled, could the means of sustaining life, and of supplying industry with its necessary aids, be had. For this purpose a railroad spanning the continent is indispensable. It would instantly double our produce of the precious metals, to say nothing of the extent of their ultimate development. But this is only a portion of the benefits it would secure. A railroad across our continent is only wanting to make it the highway for the Old World as well as the New. It would be the indis-

pensable route for all commercial countries. No one could afford to have it interrupted for a moment, and it would in this way become a lasting bond of peace and good will between nations.

For such a highway the most liberal provisions have already been made by the Federal Government. The early commencement of the work of construction is no longer a matter of doubt, and the character of the route is such as to favor, for the greater part of the distance, its most rapid progress. It is a work which the people of the United States are prosecuting for the benefit of mankind, as its advantages will be shared the world over, just in ratio to the energy and enterprize, both of individuals and nations.

Another vast undertaking proposed to the Federal Government is the enlargement of the grand water-way, extending from the Mississippi to the harbor of New York. While the Pacific Railroad is to supply an indispensable condition to the commerce of nations, the enlargement of the great water-way is the indispensable condition to the proper feeding of them. The West has the gift of food as the West Indies have that of sugar, and the South that of cotton. If its products could be got to the consumer at a reasonable cost, it would have a monopoly for feeding the world. But as the best producing districts are 1500 miles inland, we must greatly enlarge our means of transportation before we can utilize to any considerable extent, the natural wealth we possess. Railroads will not accomplish the object. The cost of transporting over them for such a distance is too great. The Erie Canal, in connection with the great lakes, has in one sense, accomplished wonders. It has probably delivered at tide water the past year nearly 100,000,000 bushels of grain. But the amount offering has already so largely increased the cost of transportation, as to defeat to a considerable extent one of the objects of its construction. It is now proposed to enlarge this work by constructing new locks to be 220 feet long by 26 wide, instead of those now existing, which are 110 by 18. This enlargement would treble the capacity of the canal, allowing the passage of boats of 750 tons burden, would carry its capacity up to 15,000,000 annually, would reduce by more than one half the cost of moving breadstuffs between Lake Erie and the Hudson, and would give it a proportionably stronger hold upon the markets of the old world.

In connection with this great work it is proposed to construct one in the West, upon still more magnificent proportions, which is nothing less than the re-opening of the channel through which the waters of the great lakes at some early period, were discharged into the Gulf of Mexico. The depth of the cut to accomplish this, will be only 8 feet. For this purpose a canal 160 feet wide at the bottom, is to be constructed, with locks 350 by 75 feet. After reaching the Illinois river the navigation of this is to be improved by a series of dams, and of locks of the dimensions described. Such lock will pass the first class boats navigating the Mississippi, or its tributaries, and will, for all commercial purposes, change the outlet of that river from the Gulf of Mexico to Lake Michigan. The effect of such an improvement upon the cost of forwarding breadstuffs to market will be immense. It will reduce it to the lowest possible limit, while the capacity for movement, in reference to quantity, will be unlimited. This work in connection with the enlargement of the Erie Canal would accomplish all that is to be desired for the economical transportation of products of the interior to the seaboard. It would double the profits of the producer, while it would greatly reduce the cost to the consumer. Such works, in connection with a railway from ocean to ocean, would treble our financial strength, while they would render other nations still more interested than ourselves in maintaining a perpetual peace.—*Hallett's Financial Circular.*

Exports of Petroleum.

The rapid growth of the trade in petroleum is shown by the quantities exported. During the year 1862 the exports from the three leading Atlantic ports were as follows, in gallons:

Philadelphia,	New York.	Boston.
2,607,203	6,783,563	891,616

To exhibit the progress of the trade more in detail we subjoin the regular statements of the three ports.

MONTHLY EXPORTS FROM PHILADELPHIA.

	No. gallon:	
January	254,505	$53,290
February	3,686	1,785
March	369,094	89,570
April	145,575	25,730
May	192,462	29,519
June	97,375	29,519
July	272,450	11,963
August	156,120	26,088
September	385,904	55,447
October	185,757	33,557
November	264,100	70,977
December	280,905	85,655
Total	2,607,933	$529,575

QUARTERLY EXPORTS FROM BOSTON.

	1862—gallons.	
1st quarter	134,084	$54,631
2d quarter	34,923	18,150
3d quarter	118,963	52,593
4th quarter	603,646	332,475
Total	891,616	$475,859

QUARTERLY EXPORTS FROM NEW YORK.

	1861. No. gallons.	1862. No. gallons.
1st quarter	49,603	1,639,514
2d quarter	71,763	1,464,181
3d quarter	242,499	1,191,428
4th quarter	748,385	2,488,440
Total	1,112,250	6,783,563

The reader will no doubt be surprised to find that 891,616 gallons at Boston are rated so high in value, when 1,607,933 gallons from Philadelphia are worth but little more. The difference is caused by the longer distance it has to be transported to reach Boston. New York has this year monopolized the larger part of the trade, because of the facilities for transport by rail from the oil region to New York while there exists only the river route to Pittsburgh and transhipment by rail to Philadelphia. When the Erie road is opened through, a change will occur.—*Pittsburg Post.*

The Paper Famine.

The excessive rise in the price of paper, seems to us rather the result of combination than necessity. One would think that the waste of cotton material by our armies alone, would have enabled the purchasers of material to gather up all they wanted at least for a year or two to come.

The remedy against the present high rates of paper, is unquestionably a reduction of the duty. It will not do for us to print our books and newspapers on brown paper, as has been done in the confederate states. We are pleased to notice that the Boston *Journal* is printed on paper made of wood. It has good color, consistency and strength, and we see no mechanical or scientific difficulty in the way of its manufacture. The great question is, what is the cost of the new article, and this is what we wish the *Journal* would tell us.

That cotton was a cheap and economical material for paper, no one can doubt, but it cannot be possible that other materials are not to be found. The ingenuity of our countrymen is equal to every emergency, and we have great faith in its having by this time found a fitting substitute.

Let Congress however take off the duty, or at least so reduce it, that the present difficulty may be overcome.

Railroad Earnings--Weekly.

The earnings of the Toledo and Wabash Railroad Company for the 1st week of January, 1863, were $21,700 84
Same week, 1862 ..... 20,068 92

American Railroad Journal.

Saturday, January 24, 1863.

Stock Exchange and Money Market.

The rise in Railway securities has continued during the past week as will be seen by our daily quotations, and the transactions continue large. Money is plentiful and at moderate rates. Gold is not so active as it was, standing after various movements upwards and downwards, at 148½. It is said that the fortunate holders of this prime article are beginning to invest largely from their profits in property of a more fixed character, and are purchasing real estate, bonds and mortgages, and other things likely to survive the vicissitudes of the day. They evidently fear that the inflation of the currency will raise the price of other articles as well as gold, and that these profits will then disappear in the exchange if they do not make haste. Other people may ask as much for their property, as the former do for theirs. Of this they are sensible, and there is no fact better understood among political economists, than that a general inflation equalises the prices of commodities, and this repairs the mischief which is effected by an undue rise in any one of them. It is only measuring our cloth by a longer yard stick.

The President's special message in which he deprecates an undue issue of paper gives great encouragement to that class of bankers who look upon it as the greatest of all evils. The financial measures for the support of Government before Congress are at last getting into some shape. Amendments have been introduced authorising the Secretary of the Treasury to borrow from time to time on the credit of the United States a sum not exceeding three hundred millions for the current fiscal year, and six hundred millions for the fiscal year following, and to issue therefor conpon or registered bonds, payable at the pleasure of the Government after twenty years from date, and of such denominations not less than fifty dollars, as the Secretary may deem expedient, bearing interest at a rate not exceeding 6 per cent per annum, payable semi-annually in coin. This is a movement in a good direction and is in the spirit of the proposition we have advocated in this Journal, that the public loans should be brought within the reach of all persons even those of moderate means. There is scarcely a laborer, mechanic, tradesman, shop keeper, or employee of any description who is not able to take some small portion of these Government loans. A successful result might be obtained if their patriotism was appealed to, in the same spirit with which they were called to arms. Deny it who may, there is more money afloat, as well as hoarded at this moment in this country than there ever was before. Eight or nine hundred

millions are now in the pockets of the people, paid to them for their labor, or goods. Can it be possible they will not lend back to the Government some small portion of their profits? We have an idea, that there is not a soldier in the army who would not allot some portion of his wages as a subscription to this loan, the very best disposition he could make for his own future, or that of his family. A call on them from the Generals in command to this effect, would we believe be responded to, at once and cheerfully. If we have 800,000 men in the field, an allotment to take up one Bond of fifty dollars each would produce the enormous sum of forty millions of dollars, or in other words save the Government the necessity of issuing currency to that amount to pay their wages.

Another proposition is before Congress to permit the receipt of coupons of the public debt in payment of duties at the Custom House at any time within sixty days of maturity. This, says a cotemporary, if adopted would add practically twenty five millions to the quantity of Custom House notes afloat. We see no objection whatever These coupons are to be paid in gold, and if they are received at the Custom House will save the trouble of the Government's going into market to purchase that article, when the coupons fall due. It is evident that our system of taxation is to prove a great success, and the interest of the public debt is not only sure to be promptly paid, but a sinking fund can be provided for its final extinguishment at no distant period. We are therefore inclined to take a favorable view of the financial power of this country, and its ability to carry itself through its difficulties. Its actual known wealth by the census appears to be thirty thousand millions of dollars, exclusive of the public lands, and our inexhaustible mineral regions. The foreign immigration during the past year has been large, our exports are on the increase and have exceeded our imports, products for products by eight to ten millions. Our receipts of gold from California, Oregon and Colorado are large and regular, and in the aggregate increasing. There is not the least reason therefore to despond, and especially when we reflect, that the money which the Government is expending to put down the rebellion, will practically act so as much capital, used for the purpose of increasing the field of enterprise and industry, in countless forms, rapidly becoming visible throughout the North and West.

If the South can be brought back, as its sympathizing friends in the North say it can, not by foreign intervention, but by kindness and magnanimity on our part, the experiment can very soon be tried. The President, we are assured on high authority, will call the next Congress together in the beginning of March, and then a formal resolution offering peace on honorable terms, with submission to the constitution and the flag, can be adopted if thought expedient, and presented to the rebel Congress. This can all be done in ninety days.

Let the Money Market and Stock Exchange therefore make their hay while the sun shines. Great principles finally smother all the arts of discounters and money lenders. They are in this view of the subject, but dust in the balance and flies on the wheel of events.

We elsewhere give some interesting tables of the imports and exports of the port of New York for the years 1859, 1860, 1861 and 1862, showing the vast amount of its commercial transactions. It appears from these that our total imports were as follows, (including specie):

1859	$245,165,516
1860	238,260,460
1861	162,768,820
1862	174,652,317

In 1861, the specie included in the above stated amount, was $37,088,413.

Our exports (including specie,) for the same periods were:

1859	$137,696,187
1860	145,683,451
1861	142,831,151
1862	216,371,843

The specie exports were:

1859	$69,715,866
1860	42,191,171
1861	4,236,250
1862	59,437,021

So that excluding specie, our exports of products other than that would stand

1862	$156,934,822

against those of 1861, $148,594,901, or a gain in the amount of exported products of $88,339,921, which by the laws of trade would on that basis be in our favor, and should come back in gold. When we add to our exports the amount of specie exported the last year of nearly sixty millions, we confess we cannot account for this result except by supposing that the specie exported, while the balance of trade is in our favor, has gone out as proceeds of sales of our stocks held abroad.

We find the views which we have taken of the resources and power of this country fully sustained by the admirable leader in the *Financial Circular* of Samuel Hallett & Co., which we give entire in another column.

The following quotations of sales are in addition to those given elsewhere in our columns:

New York.—Illinois Canal reg. bonds, 1860, 100½; Illinois coupon bonds, 1862, 101¼; do., 1869, 105; do., 1870, 107½; do., 1877, 109; do., 1879, 110; Miss. and Mo. R. R. 7s, assorted, 65½; do., L. Baltimore.—Western Md. bonds, 78½; Md. 6s, coupon, 117; N. W. Va. 1st mort., 105; Central Ohio 1st mort., 103; do., 2d mort., 81; do., income bonds, 19; Balt. and Cuba stock, 99.

Chicago and Alton Railroad.

The Chicago and Alton, (late Chicago and Mississippi Railroad Company,) has been reorganized under a special charter enacted by the legislature of Illinois. Mr. James Robb, (late receiver of the old corporation,) has been elected president, and Joseph Price, Secretary and Treasurer.

The bonds and shares of this company, when the issue is full, and which, we understand, is now near completion, will be as follows:

First—First Mortgage Preferred Sinking Fund Bonds, bearing 7 per cent. interest, redeemable within fifteen years by an annual Sinking Fund of $30,000, interest payable 1st of April and 1st of October	$600,000
Second—First Mortgage Bonds at thirty years, bearing 7 per cent. interest, payable 1st of July and 1st of January.	2,400,000
Total	$3,000,000

The foregoing issues of bonds are secured by a trust deed to Samuel J. Tilden and Lewis H. Meyer, Trustees, on 220 miles of road and the entire rolling stock and property of the Company, being an average of $13,636 per mile.

Third—Income Bonds at 20 years, bearing 7 per cent. interest, payable 1st of May and 1st of November	1,100,000
Total mortgage and income debt. —averaging $18,636 per mile.	$4,100,000
Fourth—Preferred Stock when the issue is complete, estimated	2,350,000

This Stock is entitled to a Preferred Annual Dividend of 7 per cent. out of the net profits of the Company, but is not accumulative if the profit is not earned.

Fifth—Common Stock when the issue is complete, estimate.	1,750,000
Total Debt Capital.	$8,200,000

The Common Stock is only entitled to Dividend out of the excess of profits of the Company remaining after payment of Dividend on Preferred Stock, but in case the profits of the Company should exceed 7 per cent. on the Preferred and Common Stock, then they are to share equally in their division.

The receipts of the road, under the management of the late receiver were $938,000 in 1860; $1,098,000 in 1861, and will exceed $1,230,000 for 1862. These receipts are less in amount than was practicable to have been earned, if the rolling stock of the road in previous years had been equal to the demands of business, and the wants of the country on its line. This want will be soon overcome, as extensive improvements are being made in this department, and we are officially informed that provision to the extent of nearly $400,000 exists under the present organization to cover the cost of these improvements, and the renewals of the road, independent of any appropriation out of its receipts, being sufficient to advance its general condition to that of a first class American road.

The title of the new Company to the railroad was acquired by purchase under foreclosure and sale of the first and second mortgages of the Chicago and Mississippi Railroad Company, and confirmed by decrees and orders of the Circuit

Court of the United States for the Northern District of Illinois.

An agreement, proposed by the Joliet and Chicago Railroad Company for a perpetual lease of its road, from Chicago to Joliet, thirty-seven miles, and accepted by the trustees of the bondholders, fixes the compensation for its use, on the basis of a *pro rata* division of receipts and operating expenses, in the proportion of 220 and 37, being the mileage of each road, each corporation maintaining at its own separate cost the expense of maintenance of all bridges, stations and fencing of their respective roads.

The Capital Stock of the corporation under its charter, restricts its increase subject to the written consent and approval of three-fourths of its stockholders, and the same restriction exists as to the creation of debts and liabilities, except those incurred for supplies in operating the road. The charter of the corporation gives to its President and Directors the privilege of fixing the rates of toll in the transportation of freight and passengers; this being a vested right, it cannot be impaired by any future intervention on the part of the Legislature.

The office for the transfer of the shares of the Company is now open at No. 27 William street, H. F. Taintor, acting as temporary Transfer Agent.

New York and New Haven Railroad.

The earnings of this road for the year ending September 30, 1862 were:

From passengers		$756,925 36
" freight		165,805 42
" other sources		72,521 09
		$995,251 89
Operating road	$300,019 57	
Maintaining road	110,820 93	
Repairs, etc.	130,540 70	
		541,381 20
		$453,870 67
Harlem share of receipts	$97,951 73	
Loss on "Canal road"	23,842 40	
		121,794 13
		$332,076 54
Interest	$125,820 00

Shipments of Gold from California.

The following table shows the amount of treasure brought from California since the commencement of the year 1855:

1855	$41,682,524
1856	40,319,929
1857	84,222,903
1858	86,179,344
1859	89,975,750
1860	83,499,400
1861	84,379,547
1862	24,882,846

The Iron Horse Analyzed.

This wonderful structure, the work of man's ingenuity, may, by a slight stretch of the imagination, be compared to him. Thus, the boiler is the heart, which gives vitality and power, the water is its blood, the coal is its carbonaceous food, the grate is its teeth, the flues are the arteries and veins, the steam is its breath, (it is often troubled with a cough,) and the wheels are its legs. If it were a responsible being, we might warn it against being too fond of the whistle.

Pittsburg, Ft. Wayne and Chicago Railway.

The approximate earnings of the Pittsburg, Fort Wayne and Chicago Railway Company during the month of December ult., compared with the same period of last year, were as follows, viz:

	1862.	1861.
From freights	$249,660 81	$211,925 62
" passengers	96,194 49	71,637 80
" express matter	7,166 77	2,600 00
" mails	7,825 00	7,825 00
" rent of railway	7,084 33	7,083 33
" miscellaneous	966 49	886 20
Total	$368,896 89	$301,957 95
Earnings from Jan. 1, to Nov. 30	3,374,327 02	2,729,829 56
Total to Dec. 31	$3,743,223 91	$3,031,787 51

Increase for December, $66,938 94, or 21.6 per cent.; increase to December 31, $711,436 40, or 23½ per cent.

Brooklyn City Railroad.

The receipts of this road for the year ending September 30, 1862, were

		$491,629 34
Maintaining road	$10,961 96	
Operating road	362,277 18	
		373,239 14
		$118,390 20
Interest	$14,544 99	
Dividends	80,000 00	
		94,544 99
		$23,845 21
Capital stock paid in		$1,000,000 00
Funded debt		170,000 00
Floating debt		10,000 00
Cost of road and equipment		$1,332,505 59
Number of passengers carried in cars		9,985,504

Spanish Railways.

The great chain of the Pyrenees has at last been crossed by a railroad. The entire distance is 66 miles. South of Bilbao the mountains rise very abruptly, and there occurred all the engineering difficulty in crossing. The summit is at an elevation of 2,163 feet above the tide level, and this has been obtained by a maximum grade of 76 feet to the mile. On the Bay of Biscay, at its termination, a pier one mile long is being constructed, giving that place the best harbor on the northern coast of Spain.

Finances of Maine.

From the recent Annual Message of the Governor of Maine to the Legislature, we have compiled the following:

The total receipts into the Treasury from all sources for the year 1862, amounted to $659,812 03, and the expenditures were $633,893 12, leaving a balance of $94,358 54 in the Treasury on the 1st of the present month. The State tax, although much larger than formerly, is far from oppressive, being at the rate of two and a half mills to the dollar, whereas the tax assessed in the various towns for local purposes range from 9 to 13 mills. During the present year $50,000 of the State debt will mature, and the Governor earnestly advises that it be paid, and not renewed. The State debt, other than that contracted on account of the war, all falls due between this and the close of the year 1877, in annual sums varying in amount from $30,000 to $81,000, averaging precisely $44,600 per year. The whole of the war loan thus far negotiated ($800,000) matures in 1871, and a large portion of it may be provided for by creating a sinking fund of the sum reimbursed by the Federal Government. It is suggested that in raising loans the interest be fixed at the rate of five per cent. Rigid economy in all appropriations is recommended by the Governor.

The State expenditures have been increased by the war, but not in such a manner as to embarrass the Treasury, oppress the people or affect our credit. Indeed, at no previous period have Maine State bonds commanded so high a premium in the market as they have during the past year. At the outbreak of the rebellion the State debt amounted to $699,000, of this sum $250,000 was on account of the Massachusetts lands, purchased in 1853, and the remainder was incurred during the Aroostook war and in the years anterior thereto. During the year 1861, war loans were negotiated to the gross amount of $800,000, while in March last the maturing installment of the old debt, amounting to $30,000 was paid. The precise bonded debt of the State at this time, therefore, is $1,469,000. The total outlay from the Treasury on account of the war, up to the close of the past year, amounts to $1,127,767 52. Primarily the whole sum thus expended constitutes a claim against the United States, and up to this time accounts in detail to the amount of $1,091,069 61 have been presented to the Federal Treasury for auditing and liquidation, leaving a balance of $36,697 91 yet to be presented. On these accounts the Secretary of the Treasury has paid $320,000. He has further ordered the State to be credited with the payment of its share of the direct tax, under the twenty million bill of August 5, 1861. This tax, after the deduction of 15 per centum for the State's assumption of its payment, amounted to $357,702 10, and its credit to us together with the $320,000 just named, make an aggregate payment to us from the Federal Treasury of $677,702 10 on account, leaving still a balance in our favor of $450,065 42, to be farther increased, as just mentioned, by the sum of $36,697 91. Of this sum it is entirely probable that the amount paid as bounties to the first ten regiments, viz: $196,897 41, will not be allowed, and hence the amount to be expected from the General Government is $289,865 92. The exigencies of the past year in raising troops required the payment of large sums for bounties, which were advanced by the banks, and the Legislature is requested to provide for its payment. The amount is $340,000. A further use of State credit will be called for in carrying out the law by which the State assumes the expenditures made by towns to aid the families of volunteers.

The attention of the Legislature is called to the expediency of renewing the act permitting the suspension of specie payments by the banks, which expires by limitation on the 10th of this month. The banks were rarely, if ever, in a sounder condition. The report of the Land Agent shows that the proceeds in cash paid into the Treasury of the past year amount to $20,777 27. The State owns at the present time about two million acres of land, of which only about one-fourth at the most, can with any propriety be called timber lands. The other three-fourths pass under the name of "settling lands," though a considerable portion thereof is rocky, sterile and uninviting. The best portion of the public lands were granted to aid the construction of the Aroostook Railroad, provided the city of Bangor would loan its credit to the enterprise, but the citizens

having refused to do so the lands reverted to the State. It is greatly to be hoped that the effort to construct this important line of railroad will not be permanently abandoned, and the Governor suggests an appeal to the Federal Government to engage in its construction as a matter of military consequence. The great national advantages to be derived from the establishment of a naval and military station at Portland are adverted to, and the act passed last winter for reorganizing the militia of the State is commended. The scientific survey of the State is approvingly spoken of, and commended to the attention to the Legislature as a matter of essential importance to the prosperity of the State. The acceptance of the profier by Congress of a munificent grant of lands for the establishment of a State agricultural college is earnestly advocated. A renewed expression of the opinion enunciated by the last Legislature, that the reciprocity treaty with the British Provinces should be annulled, is recommended. The Governor remarks: "The treaty seems precisely adapted to the free admission of all the products of the provinces which come into injurious competition with similar products of our own; while all the articles which we might profitably export, are met at the provincial line with customs charges which strip us of all possible advantage in their markets."

Inter-colonial Railway.

We learn from the Morning *News* of St. John's N. B., that the Colonial Commissioners have returned home after a successful mission to the Mother Country in aid of the Inter-colonial railway. The plan is for Canada to assume 5-12ths of the responsibility, and the two lower provinces New Brunswick and Nova Scotia 7-12ths. The sum negotiated with the British Government is £3,000,000. The respective Governments are to build the road by commissioners, or grant a subsidy to some company to build it. Preliminary to the commencement of operations, the British Government is to appoint one surveyor, and the three provinces jointly two surveyors to examine the respective routes and determine which is the most feasible. The *News* says:

The Lords Commissioners of the Treasury are to take upon themselves to raise money upon debentures to be issued by them. By this arrangement the money, as it is well understood, can be obtained at 3½ per cent interest, which is one half per cent less than if the responsibility was with the Provinces; and therefore a saving will be effected of £15,000 to the Provinces, on the whole amount; and instead of New Brunswick and Nova Scotia being liable for £35,000 a year each, as was calculated upon at Quebec, it will not exceed £31,000. This is a great gain, and shows the interest which the British Government takes in the work, it being desirous that the cost to us shall be as small as possible. Another advantage to us will be that no commissions (one per cent being the usual charge) will require to be paid to Agents in England to float our paper. If there is any cost it will not exceed 1-8th per cent, the usual Government allowance to the Bank of England. Thus, in this way, a saving of £30,000 will be effected. The interest upon Colonial Debentures will be made payable at the English Treasury semi-annually. The interest on £3,000,000, at 3½ per cent, will be £105,000; and the saving, in the absence of commissions, will be £1050 annually. The guarantee to Canada by the English Government in 1842 was for £1,500,000—a portion of which sum was to be repaid in eight years from that date, and the balance was secured by a sinking fund of 4 per cent. per annum, and to be repaid in twenty years thereafter. Canada lost a great deal by this stringent regulation. Now, far more advantageous terms appear, the railway loan is to be repaid as follows:—

£250,000	in	ten years;
500,000	in	twenty years;
1,000,000	in	thirty years;
1,250,000	in	forty years.

But this sinking fund is not to commence until ten years after this, in the year 1873. The Delegates contended for this length of time, although much opposed by the Chancellor of the Exchequer and the Duke of Newcastle, inasmuch as there was no precedent for the English Goverment to grant a longer time than twenty years, whenever they have made a guarantee. The concession, however, was made through the indefatigable exertions of the Delegates.

The British Government have entered into the undertaking with heart and zeal, and the Chancellor of the Exchequer has not the least doubt of carrying it through Parliament. The Surveyors are to be sent over the ground immediately after the Provinces have decided, as the British Government require the surveys preparatory to submitting the measures to Parliament, in order to have the proper data to govern them in fixing the exac cost.

We believe that the English Government are for the shortest routes that can be found, so long as there are no engineering difficulties in the way. But whatever route is chosen we believe that this road will, as we stated on a former occasion, embrace a communication with the North as well as the South, by means of steamboats running on the Restigouche, the Miramichi and other large streams—for should the road take a central course, it must run across the head waters of these rivers. As the central route has been spoken of out of doors, we might offer a few remarks upon that. Taking St. John as the starting point, we proceed up the present line until we come to Anagance, situated a few miles above Sussex Vale—than run in a North Westerly direction for Boiestown, situate at the head of the Southwest branch of the Miramichi—run near or through Campbellton—through Carleton and Victoria Counties and so on to the Riviere du Loup. But whatever one is chosen the three important sections of the Province—East, North and South—must be benefitted from the construction of this road, as it will bring them all into direct communication with each other, which can never be the case by any other means.

Commerce of the Port of New York, for 1862.

Exports from New York to foreign ports during the years 1859, 1860, 1861, and 1862:

Interest and Dividends.

The New Jersey Railroad and Transportation Company has declared a semi-annual dividend of 5 per cent., free of Government tax, payable Feb. 2.

The Delaware and Raritan Canal and the Camden and Amboy Railroad Companies have declared a dividend of five per cent., clear of United States tax, out of the profits of the last six months, payable on and after the 21 inst.

The Oswego and Syracuse Railroad Company have declared a semi-annual dividend of 3½ per cent, payable on and after February 20.

The transfer-books of First Mortgage Bonds of the Hudson River Railroad Company, will be closed on and after 20th Jan. till 1st February, at which date interest will be paid.

The stock transfer books of this company will be closed from the 25th instant till the 10th February inclusive, on which latter day the dividend of three per cent. will be paid.

The Illinois Central Railroad Company have declared a dividend of two per cent, on the full paid and scrip shares and cancelled bonds scrip, payable on the 2d of February, free of Government tax. The payment on the full paid shares is in anticipation of the coupons of two per cent. due on said shares under the Deed of Trust, payable 1st July next.

The Norwich and Worcester Railroad Company have declared a dividend of two and one-half of one per cent. on the Preferred Stock of this Company (free from government tax) payable on the 29th instant, at the office of the Farmers' Loan and Trust Company, (Transfer Agency), 56 Wall street, New York.

The Receiver will pay at his office Zanesville, Ohio the coupons on the First Mortgage Bonds of the Central Ohio Railroad Company, falling due November 1st 1859, and February 1st, 1860, in current funds of exchange or New York.

The Quincy Mining Company has declared a semi-annual dividend of 4 per cent, free of Government tax, payable February 2.

The coupons on the Preferred Sinking Fund bonds, Appleton Extension and Green Bay Extension bonds of the Chicago and North Western Railroad Company, will be paid at the office, No. 12 Wall street, February 2.

TRIPS IN THE LIFE OF A RAILROAD ENGINEER. J. Bradburn. Publisher, 49 Walker street. 1862.

This is a very interesting volume, containing the singular experiences of an American locomotive engineer, and we have had great pleasure in its perusal. Among the contents are, Running in a Fog, A Collision, The Conductor, The Brakeman, Forty-two miles an Hour, Explosions, The Duties of an Engineer, &c., all illustrating the management, incidents, accidents, and requirements of the rail. The passenger rarely thinks as he glides along like lightning, what immense responsibilities and anxieties exist on the part of Engineers, conductors, and even brakemen. This little book gives a most lively and graphic account of them, as they are experienced by a conscientious and competent employee. It should be in the hands of all railway officials and travelers, that they may better know their relations to each other. We copy in full the concluding chapter "on the Duties of an Engineer."

Those unacquainted with the duties of an engineer, are apt to think that they are extremely light, and require him simply to sit upon his seat and, shutting off or letting on the steam, regulate the speed of his engine. Although this is a part of the duty, still it is but a small portion, and for the benefit of those of my readers who are not posted on the matter, I will briefly state a few of the things he has to think of.

Say we take the engine lying in the shop cold, and an order comes for him to go out on the road. There is no water in the boiler; he must see that it is filled up to the proper level, and that the fire is started. He must know beforehand that no piece of the machinery is broken or loosened, so as to endanger the engine. To know this, he must make a personal inspection of every part of the engine—trucks, wheels, drivers, cranks, rods, valves, gearing, coupling, flues, scales, journals, driving boxes, throttle gear, oil cups; in short, every thing about the engine must be seen to by him personally. He must know that every journal, every joint on the whole machine is in proper order to receive the oil necessary to lubricate it, for they will each and all receive a pretty severe strain in his coming ride, and, unless well oiled, will be pretty apt to get warm. He must know whether the flues are tight, or whether there are any leaks in the boiler to cause him trouble, or render it necessary for him to carry a light pressure of steam. He must see that there is water in the tank, and wood upon the tender; that he has upon the engine the tools usually necessary in case of a breakdown, such as hammers, chisels, wrenches, tongs, bolts, nuts, coupling-pins, plugs for the flues in case one should burst, chains, extra links, jack-screws, crow, and pinch bars, an axe or hatchet; waste or rags, oil, tallow for the cylinders, and material for packing any joint that may give out. All this he must see to and know before he starts. And then, when steam is up, he can go. Now he must closely watch his time-card, and run so as to make the various stations on time. He must know that his watch is correct and in good order. He must see closely to his pumps that they work right, and that the water keeps at the proper level in the boiler. He must watch the scales that the pressure of the steam does not get too great, also the working of his engine. To the exhausts of the steam his ear must be as sensitive as a musical composer would be to a discord, for by it he can tell much of the condition of his engine, the set and play of the valves, and the condition of the many joints in the working machinery. At the same time he must keep the strictest watch of the track ahead of him, ready-nerved for any emergency that can possibly arise; it may be a broken rail, cattle on the track, some stubborn, hasty fool striving to cross the track ahead of him, a broken bridge, washed out culvert, a train broken down; or it may be some

stranger frantically swinging his hands, and, in every manner possible, endeavoring to attract his attention. Something may happen to his train or his engine, and he must keep the strictest watch of both; his hands must be ready to blow the whistle, shut off steam or reverse his engine, on the instant intimation of danger, for his engine gets over the ground at a rapid rate, and nothing but a cool nerve and stout arm can stop it, perhaps not these. And if any thing does happen rendering it necessary for him to stop, he cannot say to anybody, "Here, do this;" he must go at it himself; and oftentimes, though it be but a trivial thing, it will tax his ingenuity to the utmost to repair it. Thus he goes on every day, be it clear or cloudy, whether summer breeze fill the air with balm, or the chill of winter make the road-bed solid as the rock, and the iron of the rails and wheels as brittle as glass; whether the rain, pelting down, makes of every tiny brook a torrent or the drifted snow blockades the track, and his engine has to plunge into the chilly mass; through it all his eye must never cease its vigil, nor his arm lose its cunning. In cold weather he must watch the pumps that they do not freeze while standing at the stations, or the wheels get fractured by the frost; and, in cold or warm weather, he must keep watch of every place where there is the slightest friction, and keep it well oiled. At every station where time is allowed, he must give the whole engine a close inspection, lest some little part be out of order, and endangering some larger and more important piece of the machinery. At last, after this his journey for the day is ended, his work is by no means done. He must again inspect his engine, and if there is any thing out of order, so much that he cannot without ass stance repair it, he must apply at headquarters for the necessary aid.

But there are a hundred little matters that he can attend to himself; these he must see to and do. The friction and enormous strain necessarily wears the brasses of the journals, and creates what he calls "lost motion," that is, the journal moves in its box loosely without causing the required motion in the part of the machinery with which it is connected; this he must remedy by various expedients. The spring-packing of the piston may have worn loose, and require to be set out; some one of the numerous steam joints may be leaking, and these he must repack. Some of the flues may also be leaking; if so, he must tighten them; or there may be a crack in the boiler that leaks which can be remedied by caulking; this he must do. The grate-bars may be broken or disarranged; he must enter the fire-box and arrange them. The packing in the pumps may have worn so as to render their operation imperfect, or the valves may be out of order, or the strainer between the tank and the pump may be clogged; if either or all be the case, he must take down the pump and rectify the matter. The smoke-stack also may be clogged with cinders, or the netting over it may be choked so as to impede the draught; if so, he must remedy it, or see that it is done. Some of the orifices through which oil is let on to the machinery may be clogged or too open; these he must see to. One or more of the journal-boxes of the wheels may need repacking, and he must do it. An eccentric may have slipped a little, or a valve-rod been stripped, or a wheel be defective, or a tire on the driving-wheel may be loose, and have to be bolted on or reset. A guage-cock may be clogged, a leaf of a spring broke, or the boiler may be very dirty and want washing out. Any of these things or a hundred others may have happened, and require his attention, which must on all occasions be given to it; for each part, however simple, goes to make up a whole, that, if out of repair, will render imminent a fearful loss of life and limb. Thus the engineer rides every day, having the same care, and facing the same dangers, with the same responsibility resting on him. Who then shall say that, though he be grimy and greasy, rough and uncouth, given to tobacco-chewing, and sometimes to hard swearing he is of no consequence to the world? Who shall blame him too severely if sometimes he makes an error?

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Jan. 15, 1863.

DIVIDEND.—*Resolved*, that the Treasurer be directed to announce that a Dividend of Two per cent. be paid on the full paid and scrip shares and Canceled Bonds Scrip of this Company on the 2d day of February next, free of Government tax; that the same be paid on all shares on which the calls shall have been duly paid, and that this payment on the full paid shares shall be in anticipation of the coupon of Two per cent. due on said shares under the Deed of Trust, payable 1st July next.

Resolved, That the transfer books of this Company be closed on the 22nd inst., and be re opened on the 2d day of February.

By order of the Board,
THOMAS E. WALKER, Treasurer.

An Invention of Rare Merit.

LONG WANTED, AND FOUND AT LAST!

A Kerosene Lamp Chimney, Easily Cleaned

AND WHICH

WILL NOT CRACK OR BREAK

FROM SUDDEN CHANGES OF

TEMPERATURE.

THE CHIMNEY in common use breaks from unequal expansion and contraction, caused by the upper portion becoming much more highly heated than the lower portion. This constant liability of the Chimney to be broken by being suddenly cooled or "over-heated," is entirely removed by a unique and beautiful invention, BROWN'S METAL TOP LAMP CHIMNEY, which, being made in accordance with the simple law of expansion and contraction, is found to be almost "fire-proof," as far as heating by the flame of the lamp is concerned.

The clear, positive superiorities of the NEW LAMP CHIMNEY over the old style, are—

1. It will not crack or break from sudden changes of temperature, or "over-heating."

2. The top can be instantly removed, and the glass wiped perfectly clean in a moment WITHOUT WETTING.

3. It is shorter than the common chimney, therefore less liable to accidents and more convenient for carrying about the house, it is of elegant proportions and a decided ornament to the lamp, which will be found to burn with a clear, steady and beautiful light.

It is really the ideal of perfection in a lamp chimney, and after using one for an evening you will wonder that you could tolerate the old expensive style.

A "BROWN'S METAL TOP LAMP CHIMNEY," **IS WARRANTED, with ordinary care, to last just as long as the lamp on which it is used.**

Price (with a small SHADE for common size,) Zinc-top, **25** cents, Brass, **31** cents, Silver-Plated, **50** cents.

Dealers will be furnished, per Express, with a SAMPLE BOX containing one-half dozen Chimneys, assorted styles and sizes, with circulars, colored show cards, Price list, etc., on receipt of **$1.25.**

BROWN'S

Metal Top Lamp Chimneys

ARE MANUFACTURED ONLY BY THE

NEW LAMP CHIMNEY MANUFACTURING COMPANY.

STOCKS AND BONDS

BOUGHT AND SOLD ON COMMISSION.

The New National Loan.

U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

VERMILYE & CO.,

No. 44 WALL ST., NEW YORK,

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in sums of

$50, $100, $500 and $1,000.

The Registered Bonds in sums of

$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 3m45

Manufacture of Paper from Wood.

An interesting statement appears in the Boston *Journal* of the 21st inst., communicating further particulars as to the successful experiment which has been recently made of manufacturing paper from wood. Two facts are stated which go a great way to secure its general use, that the cost of the article will be much less than that made from linen or cotton rags, and that it requires less ink than the ordinary paper. We have not from the first supposed the plan impracticable, since from the earliest times wood has been a favorite material. The most ancient paper was made from the white pellicle or inner coat found in many trees between the bark and the wood, and those commonly used were the maple, the plane tree, the elm, the beech, the mulberry and the linden.

The Chinese have for many hundreds of years manufactured paper out of the stems of bamboos, a kind still in use among engravers for obtaining the most perfect and beautiful impressions of their plates. The Japanese print their books from the Morus papyfera satifa, or otherwise Brousonetia papyfera, the fibre of which is easily changed into paper. Paper has even been made of asbestos, a mineral which is incombustible. It seems that the Philadelphia *Ledger* has for two or three years past been printed on paper made from straw, but the material comes out deficient in color and texture, and the cost has not been less than that of paper made from linen or cotton.

The wood paper on which the Boston *Journal* is printed, is manufactured under a patent granted in 1858 to Messrs. Ladd & Keen, Americans, and assignees of Watt & Burgess of England, and a subsequent patent granted in 1859 to Mr. Keen, for improvements in the boilers used in making the pulp. The manufacture has been commenced on a small scale in the neighborhood of Philadelphia. A committee, consisting of Mr. C. O. Rogers, one of the editorial staff of the Boston *Journal*, and Mr. A. Hollingsworth of Boston also, recently visited the works at Royers' Ford to report on the process. We publish the result of their observations:

"At the request of Mr. James Carson of New York, the undersigned, on the 6th inst., visited the paper mill at Royers' Ford, Pennsylvania, for the purpose of seeing the operation of wood (common white wood or poplar) being converted into paper pulp, and manufactured into paper. We arrived at the mill at 10 o'clock A. M. Mr. Walsh, the intelligent proprietor, and part owner of the patent right, received us in a very friendly and polite manner, and invited us into the mill. As we entered the mill yard a novel sight presented itself. Instead of seeing bales of foreign rags, heaps of old canvass and other domestic rags, as is usual, we saw piles upon piles of wood, and wagon loads of wood being unloaded; in fact, the paper-mill yard, bordering as it does on the Schuylkill river, presented the appearance of a wood wharf, thirty years since, in the city of Boston. Men were engaged in stripping off the bark from the wood, and splitting it into quarters. At one end of the yard, and where we entered the mill, the wood was being cut up. This was done in the usual way of chipping dye woods, and at very little cost. The chipped wood was then shoveled into boxes placed on wheels, and by the labor of one man, easily drawn over a rude railway to the room where the wood was converted into pulp. And this was done, so far as our observation extended, by putting the wood into a close iron tank or boiler, and subjecting it to the solvent action of caustic alkaline, with the application of a powerful heat. This operation occupied two hours and was attended with considerable expense, a large quantity of soda ash and lime being used, and a good deal of fuel required; and the services of an intelligent and practical chemist being necessary, in order that the proper result should be obtained, in this operation of dissolving the wood into a fibre suitable for paper. There lies the secret as well as the difficulty of making paper from wood. When the dissolved wood is drawn off from the tank or boiler into a vat or cistern, the blackish brown liquor is permitted to run off, and the operation is assisted by repeatedly filling the vat or cistern with clean water and drawing it off, leaving the wood pulp that remains of about the same color as the original wood. The pulp is then put into a common rag engine, and bleached in the usual way, with chlorine and sulphuric acid, and emptied into drainers where it remains to whiten. It is there mixed with twenty, thirty, or forty per cent. of linen or cotton fibre, and made into paper in the usual way.

The paper made on the machine, the 6th inst., was of good fair quality for newspaper, and contained not more than twenty per cent. of linen fibre, and not less than eighty per cent. of wood, and was produced at a cost not exceeding six cents per pound. This statement of the cost and per cent of wood used was made with great apparent fairness on the part of Mr. Walsh, and we have no reason whatever to doubt the truthfulness of his statement."

They ascertained that the pulp can be manufactured at 5 cents per lb., and if so, the high prices now exacted by the paper monopolists will be completely overthrown. For the paper even now produced from wood at the Royers' Ford mill, with but tolerable machinery afforded at 6 cents per pound, is equal to that for which twenty cents are paid. This difference will tell on the enormous amount consumed in this country, where the consumption equals that of France and England combined, illustrating in a remarkable manner the intellectual difference of the respective populations. In 1854, two hundred and fifty millions of pounds of paper were used in the United States and the amount was constantly increasing till the breaking out of the war.

We learn that Professor Chadbourne, of Williams & Boudoin Colleges has discovered a new process for preparing the pulp, depending on a combination of chemical and mechanical principles, by which the cost will be reduced still further.

Companies are being organized both in Pennsylvania and New England to test the value of these discoveries.

We have no doubt whatever of their final success

We would suggest that the material recently prepared from flax, known as flax cotton might also be usefully employed in the manufacture of paper. The article is cheap as prepared by the new process and without limit as to supply.

Atlantic and Great Western Railway.

The Atlantic and Great Western Railway was completed to Akron, Ohio, on the 12th inst. The following description of the route is from the Meadville *Republican*:

The eastern terminus of the road is at Salamanca, 416 miles from the city of New York, where it forms a junction with the Erie Railway. The route is thence westward, through Jamestown, N. Y. Meadville and West Greenville, Penn., Warren, Ravenna, Akron, Millersburg, Gallion and Marion to Dayton, Ohio, sixty miles east of Cincinnati, by which it will connect with the St. Louis road forming in the whole a line of 1,200 miles, of a continuous six foot gauge.

The work on this road was commenced in May, 1860, and was finished to Corry, sixty miles from Salamanca, by May, 1861. At that point work was suspended until the Spring of 1862, when it was again resumed; and in some nine months after we are permitted to record its completion to Akron a distance of 140 miles from Corry, and 201 miles from the junction with the Erie Railway. But this is not all, for within the same period, a branch has been extended from Corry to Titusville, a distance of 26½ miles. When the nature of the country through which the road passes is considered, we believe the work accomplished by this company since operations were resumed last spring, has no parallel in the history of railroads in this country. The cost is estimated at $47,000 per mile, including the rolling stock.

At Akron will be the centre of a great wheat and cattle region, and the point of transhipment from the Ohio Canal by which 40 miles of roundabout water communication will be saved. Again at Mansfield, 65 miles from Akron, a connection is secured with the Pittsburg, Fort Wayne and Chicago Railway, forming the quickest route with only one change between New York and Chicago, and so at Gallatin fourteen miles west with the Bellefontaine and Indiana, and the Cleveland, Columbus and Cincinnati, both important lines, and thus unavoidably becoming leaders of the Atlantic and Great Western. In its continuation at Dayton, it joins the Cincinnati, Hamilton and Dayton line, which is to widen its guage and unite. Indeed after passing the meridian of Cleveland, it cuts at various angles more than a dozen great lines of railways tending Northwardly and Southwardly, offering them the easiest grades and most direct routes to New York.

A branch to Franklin will be completed by July next, and also one to the coal fields at Sharon, Mercer county, at the same time. The former will find a heavy demand made upon it by the shippers of oil, as the branch now running from Corry to Titusville has. And the increased shipments of coal as exhibited by the returns made from the coal fields of Mercer country, show the importance that must be attached to this branch of business.

All the country through which the road passes is populous and fertile, rich in the products of the fields, the forests, and mines; and there cannot be a doubt that it will be of great benefit to the country, as well as a profitable investment to the stockholders.

The work on the road west of Akron will be continued in the Spring, by the present contractor, James McHenry, Esq., for the Ohio Company, and completed through to Dayton within the year.

On the day following the opening of the road to Akron, a banquet was given by the directors at the Barton House Meadville, in honor of James McHenry, Esq., of London, the contractor, T. W. Kennard, Esq., Engineer-in-Chief, and other gentlemen connected with the construction of the road. Below we give the speech of Wm. Reynolds, Esq., President of the Pennsylvania Division, which we doubt not will be perused with great interest:

"The several boards of directors and gentlemen present had assembled to testify their regard towards Mr. James McHenry, the agent and contractor of the companies; T. W. Kennard, Esq., under whose personal supervision the work has been so successfully prosecuted, and the many gentlemen in Europe to whose exertions and through whose pecuniary aid the Atlantic and Great Western railway has thus far been so triumphantly carried forward in the face of difficulties that have seldom been equalled. In proportion to the difficulties is the credit due to success.

In the short period of seven months, the means had been furnished and the work virtually completed on 205 miles of railway, on nearly all of which distance, on the first day of June past not a shovel-full of earth had been turned. This was a rapidity of construction unprecedented in railway history, and was the more surprising from the fact that no portion of the work had been subcontracted, but was carried forward under the personal supervision of the Engineer-in-chief.

The magnitude of the work could be appreciated when it is remembered that the accomplishment required nearly one mile of finished road per day for the time employed.

In addition to the roadway thus constructed, there was now on the line 16 first class engines and 340 cars; and 30 more engines and 700 cars were contracted and being constructed. The world may be challenged to show an equal instance in railway construction.

It would not be necessary to remind those present that the same energetic agent of the company had heretofore provided the means for the building of the 60 miles between Corry and Salamanca.

But, it was needless to enlarge on the merits of the enterprise. They were apparent to all who understood the end to be attained. And the alacrity with which many of the most eminent railway capitalists in Europe had expended their means in its construction, after a most careful examination of its character, was the best proof of its value.

It was for a grateful expression to these gentlemen that they were assembled at the festive board."

Terre Haute and Richmond Railroad.

The gross earnings of this company during the fiscal year ending November 30, 1862, were:

From passengers		$167,570 40
" U. S. troops		71,352 82
" freights		286,391 46
" coal		17,125 50
" mail, express, etc		20,874 47
		$563,314 15

And the expenses were:

Running road	$61,493 01	
Road repairs	38,763 74	
Machine shop	51,634 00	
Sundries	48,623 63	
Total operating expenses	$200,514 38	
Additional expenditures	1,527 11	
		202,041 29
Net earnings		$361,272 66

Compared with the previous year, the gross earnings show an increase of $185,621 78
With an increase in expenses of 40,533 07

Making the increase in net earnings $145,088 71

The number of through passengers carried was 50,141; way passengers, 73,765; troops, 53,146—total 176,452.

The total receipts from all sources during the year were $597,697 11; and the disbursements, $419,504 86—leaving a surplus for the year of $178,192 25.

The account with the stockholders is as follows:

Balance November 30, 1861	$290,588 58
Receipts from transportation, as above	536,314 15
Interest on bills receivable and judgments	20,087 76
Interest on E. & C. extension bonds	7,385 00
Work done in machine shop, etc	4,047 20
U. S. mail 1st quarter of 1856	1,825 00
Rent	1,038 00
	$888,285 69
Operating expenses, as above	$202,041 49
Government tax on passengers	2,095 91
" " December dividend	8,115 69
Tax stamps	51 00
State and county taxes	4,910 38
New freight cars	20,895 04
Additional telegraph wire	1,086 12
Interest and exchange	15,255 23
June dividend, 5 per cent. on $1,384,450	69,222 50
December dividend, 7 per cent. on $1,440,450	100,831 50
Balance November 30, 1862	468,780 83
	$888,285 69

Two hundred tons of iron rails have been purchased and laid on the track, and two hundred and fifty tons have been re-rolled and re-laid. Additional sidings have been laid at Terre Haute, Reelsville, and Indianapolis. The company have built in their own shops 1 baggage, 25 house and 10 flat cars. Early in the season it became apparent that the rolling stock of the line from St. Louis to Cleveland was insufficient to meet the heavy increase of freight, and arrangements were entered into, by which each company agreed to furnish a certain number of cars of "Compromise" gauge proportionate to the length of each road represented. A contract was accordingly made by this company for 32 compromise cars, which have been delivered; and also for 50 house cars of the gauge of this road which have not yet been delivered. These with what are building in the shops of the company at Terre Haute, it is thought will be sufficient for the wants of the road. Two first class locomotives were also ordered from the Rogers' Locomotive Works, to be delivered one in January, the other in February next. The report says:

In the Vigo Circuit Court, we obtained judgments against the Terre Haute, Alton and St. Louis Railroad Company, as follows: On the 10th day of September, 1859, for $69,788 11, and on the 15th of same month, for $9,121 69, being amount of claims held against that company, with interest to date of judgment. By agreement with the St. Louis, Alton and Terre Haute Company, the said judgments, with interest to December 31, 1862, have been assigned to that company, and we have received from them their bonds of new issue, as follows:

Second mortgage preferred	$57,000 00
" " income	37,500 00
Scrip	52 59
Total	$94,552 59

bearing interest at the rate of seven per cent. per annum, payable semi-annually, on the first days of May and November in each year.

The Court of Claims of the United States has decided, that this company is entitled to the sum of $7,543 75 for services rendered the Post Office Department in transporting the mail over the road in 1855 and 1856, in addition to the mail matter provided for by contract with the company. A bill was reported at the last session of Congress, making an appropriation for the payment of this claim, and the Post Office Department awaits its passage, to liquidate the amount. We have received from the Post Office Department the sum

of $1,825 due for mail service of the first quarter of 1856, but withheld by the Department.

To many of the stockholders it is known, that from Indianapolis to Cincinnati there is no railroad that enters the latter city by its own track. The "Indianapolis and Cincinnati Railroad" terminates at Lawrenceburgh; from this point, it uses, by means of a third rail, the track of the "Ohio and Mississippi Railroad," and by contract with that company, is prohibited from soliciting business from Cincinnati, for points to which the "Ohio and Mississippi Railroad" is the direct line; thereby preventing a large amount of business from Cincinnati, over the "Terre Haute and Richmond Railroad," and its connections. The "Indianapolis and Cincinnati Railroad Company" have taken measures through a company organized as the "Cincinnati and Indiana Railroad Company," to build a road from Lawrenceburgh to Cincinnati, a distance of 20 miles, the new road to be leased permanently to, and operated by the "Indianapolis and Cincinnati Railroad Company." Viewing the building of this twenty miles of road to be of great importance to the "Terre Haute and Richmond Railroad," we have loaned $50,000 to carry this into effect. This amount is secured to this company by the "Indianapolis and Cincinnati Railroad Company," they paying interest at the rate of seven per cent. per annum, this company having the option to take seven per cent. bonds, to be issued by the "Cincinnati and Indiana Railroad Company," should it so elect.

Miles run by passenger trains, 146,102; by freight trains, 149,678; by other trains, 23,471—total, 319,251.

GENERAL STATEMENT.

The officers and directors elected January 5, 1863, are as follows:

Directors—Chauncey Rose, James Farrington, Demas Deming, Charles Wood, W. K. Edwards, F. Nippert, H. Ross, W. R. McKeen, E. J. Peck.

President—E. J. Peck.

Secretary—Charles Wood.

Treasurer—John Scott.

General Superintendent—E. J. Peck.

Superintendent—R. E. Ricker.

Movements towards a Pacific Railroad.

We announced yesterday that the Central Pacific Railroad which was organized to construct so much of the Pacific Railroad as lies between the Eastern boundary of California and Sacramento city, had assigned the right to continue the road from Sacramento to San Francisco to a company lately organized under the name of the Western Pacific Railroad. To-day we present all the essential facts that reach us as to this new organization. The assignment it seems however, was made not to the new company alone, but to it jointly with the San Francisco and San Jose Railroad Company, in which last organization the county of San Francisco holds $300,000 of stock. This gives our citizens a double interest in the matter. Whatever builds the Pacific Railroad concerns them of course; this arrangement makes them to some extent stockholders in it.

This arrangement is, we understand, in pursuance of an agreement made at Washington upon the passage of the bill, but which hung fire for a season and for causes, that have not been publicly explained. Matters at last, however, are harmoniously arranged by which San Francisco becomes the terminus of the Pacific Railroad, and the chief obstacles to the early construction of the road through California are removed.

As to the San Jose Company, the public is sufficiently informed. There is every prospect now that the road will be completed and the cars running by next June. Let it be hurried up, for it is no longer simply a method by which citizens may get out of the reach of our raw summer winds into a genial, balmy suburb in an hour, but the first western link in the long chain of railroads that are to bind the Pacific coast to the Atlantic.

The Western Pacific Railroad Company was fully organized and became a corporation under the general laws of this State, on the 17th inst. Its expressed purpose is to construct and maintain a railroad from a point at or near the city of San Jose, (connecting at such point with "The San Francisco and San Jose Railroad,") and thence to pass through the counties of Alemada, Contra Costa and San Joaquin *via* Stockton to the city of Sacramento, connecting at that point with "The Central Pacific Railroad," which runs to the eastern boundary of the State. To this company and to the San Francisco and San Jose Railroad Company, the Central Pacific Company have assigned and transferred all the rights, benefits, and government and subsidy granted to them by the Pacific Railroad bill of the last session of Congress. That bill (section 9th) gives to the Central Company the right "to construct a railroad and telegraph line from the Pacific coast, at or near San Francisco or the navigable waters of the Sacramento river, to the eastern boundary of California," and to receive all the Government donations and subsidies granted to the other portions of the line of the great Pacific Railroad. The right on the part of the Pacific Central Company to make this assignment is inferred from the 15th section of the act in which the following sentence occurs:

Wherever the word Company is used in this act, it shall be construed to embrace the words "their associates, successors and *assigns*," the same as if the words had been properly added thereto.

The board of directors of the Western Pacific Railroad Company are T. Dame, R. Chenery, E. T. Pease, Charles De Ro and A. H. Houston, of San Francisco; G. H. Bodfish, of San Jose; and E. S. Holden, of Stockton.

The following are the officers elected by the Board of Directors:

T. Dame.....President.
E. S. Holden.....Vice President.
E. T. Pease.....Secretary.
R. Chenery.....Treasurer.
W. J. Lewis.....Chief Engineer.

We are told that books of subscription will be opened immediately in San Francisco, San Jose, and Stockton, and elsewhere along the line of the road.

The minutiæ of the arrangements between these three California Companies are not detailed to us. The main question in which we are interested is, whether they are such as promise an early construction of California's portion of the Pacfic Railroad; and that they certainly do. The Government subsidy provides $16,000 a mile over the level portion of the State. The three counties of San Francisco, San Mateo and Santa Clara have contributed munificently toward the construction of the road hence to San Jose. Alameda and San Joaquin will doubtless cheerfully subscribe to build the Western road, which will give their fertile valleys a market, and bring them within a few hours' distance of San Francisco. The names that appear as directors of the Western Company are those of men versed in railroad business. They promise to commence their surveys in February, preparatory to beginning early in the spring the work of grading. The route upon which the Pacific Railroad, then, will come from the Sierra Nevada to this port, may be stated, in general terms, as follows: Along the Truckee River, through the Truckee Pass, south of Donner Lake, down the Bear river, through Dutch Flat, approaching the North Folk of the American in the vicinity of Illinoistown, to Lincoln, to Sacramento, to Stockton, through Livermore Pass (we presume) to near San Jose, to San Francisco. This we give only as an outline of the route, from which the three companies now organized are not likely to stray far. Whether it is the best route we do not presume to say, but it makes San Francisco the terminus, and every section through which it passes—and especially our own city—cannot but be immensely benefitted by its adoption. San Francisco is so happily situated that she could afford to be somewhat indifferent to the question of routes, except so far as that involves the other question of how long it will take to build and complete a Pacific Railroad. Presuming that the route question is now definitely settled, it only remains for capitalists to contribute reasonably to the sums already provided, and the most difficult portion of the Pacific Railroad may be speedily completed. It is difficult to over-estimate the advantages which San Francisco will gain by building the road to Washoe alone. She will see that means are provided as needed to build it, or b blind to her own interests.—*San Francisco, (Cal.) Bulletin, Dec.* 20.

Public Debt of the United States.

In the course of his speech in the House of Representatives, Mr. Spaulding, of the Committee of Ways and Means, presented the following figures, as from the records of the Treasury Department of the public debt of the United States, January 2, 1863.

Loan of 1842 in course of payment	$2,383,364 11
Loan of 1847	9,415,250 00
Loan of 1848	8,908,341 80
Loan of 1858	20,000,000 00
Loan of 1860	7,022,000 00
Loan of 1861, act of Feb. 8, 1860	10,415,000 00
Loan of 1861, act of July 18, 1861	50,002,000 00
Loan of 1862, five-twenty 6 per ct.	25,050,850 00
Texas indemnity	3,461,000 00
Oregon war debt	1,026,600 00
Texas debt	112,092 59
Old funded and unfunded debt	114,115 48
Treasury notes under acts for 1857	104,561 64
Treasury notes under acts subsequent	2,750,350 00
Treasury notes 7-30 per ct. interest	139,998,000 00
Temporary deposits at 4 per cent.	38,458,008 00
Temporary deposits at 5 per cent.	41,777,638 00
U. S. notes, receivable for customs	14,913,315 25
United States notes legal tender	223,108,000 00
Postal currency less than one dollar	6,844,936 00
Certificates of indebtedness, 6 per ct	110,321,241 65
Requisitions on the Treasury for soldiers' pay and other creditors, due but not paid	59,117,597 46
Total funded and unfunded debt to January 2, 1863, according to the books in the Treasury Department	$783,804,252 64

Providence and Worcester Railroad.

The earnings of this road for the year ending November 30, 1862, were:

From passengers		$131,364 08
" freight		183,534 29
" mails, express, etc		12,558 24
		$327,456 61

And the expenses were:

Repairs of cars	$14,586 37	
" locomotives	11,729 90	
Freight department	26,031 27	
Passenger "	21,091 96	
Maintenance of way	41,546 05	
Fuel	18,612 34	
Oil	2,415 63	
Miscellaneous	30,086 29	
		166,099 81
Net earnings		$161,356 80
Interest		7,416 90
Surplus		$153,939 90

A semi-annual dividend of four per cent., free from Government tax, has been declared. The company have paid since September 1, a tax of three per cent. on the gross passenger receipts, and have added to the equipment thirty-four new freight cars, and have built and covered a new and substantial bridge, 254 feet long, over the Blackstone river, at Valley Falls.

The road-bed, bridges, and equipment of the road have all been kept in good order, and a large surplus remains to be applied to the bonded indebtedness. Of this indebtedness, which at the last report was $147,000, $50,000 have been paid during the current year, leaving $97,000 still due. Of this $23,000 was paid on the 10th of this month, and $24,000 more will be paid in February and August next, leaving $50,000 to mature in February and August following, which will be paid at maturity, and leave the road free from all indebtedness.

The Acquisition of Lands for Railroad Purposes.

THE POWER TO TAKE LANDS CONFERRED BY CHARTER.—THE QUANTITY TAKEN; AND THE NATURE OR EXTENT OF TITLE IN THE LAND ACQUIRED BY THE COMPANY.

The following case arose in Vermont, and was decided by the Supreme Court of that State. The action was brought by one Hill against the Western Vermont Railroad Company, to eject that company from the possession of three acres and ninety three rods of land in Manchester. The Company, by their directors, had, on the 10th of March 1851, surveyed and laid out their road bed and appurtenances, including in such survey, as and for depot grounds, a certain tract of land in Manchester, of which the demanded premises were a portion. This tract of land was purchased and taken by the railroad company under a bond executed to them by Josiah Burton, dated Sept. 15, 1850, the condition of which provided that Burton should, on reasonable request convey to the company such lands, owned by him, as should be required for their railroad on or near the line thereof, at a certain price per acre. The company paid Burton the stipulated price for the land at the time they took it, but no actual conveyance thereof was ever executed to them.

The plaintiff having recovered a judgment against the company, took out an execution against the company to satisfy his judgement, and levied upon the premises in question, on the ground that both at the time of the survey of the road and ever since then the land claimed was not necessary for the purposes contemplated by the charter of the company.

The charter of the company provided that their directors might cause such examinations and surveys of the road to be made as they should deem necessary; and that the road when so surveyed and the survey recorded, should be deemed the line on which the road was to be constructed; and that the corporation might enter upon and take possession of such lands as were necessary for the construction and maintenance of their railroad, and the requisite accomodations appertaining thereto, with a provision for the appraisal, by commissioners, of the land so taken if the parties should disagree as to the price.

The County Court for Bennington County rendered a judgment for the defendant, and the plaintiff appealed. The Supreme Court now affirmed the judgment of the County Court; holding that the company had no such estate in these lands as could be subjected to a levy by the creditors of the company. The following portion of the opinion, rendered at the determination of the case, discloses the arguments and principles of the decision.

REDFIELD CH. J. The first question arising in the case is as to the extent of estate which Burton is bound to convey to the company. The plaintiff claims that this is an estate in fee simple, as the contract binds him to convey such lands "owned by him" as shall be required by the company. This is no doubt, the fair and natural construction of such a contract between ordinary parties. If the land is to be conveyed, and is defined as land "owned" by the obligor, nothing less could be fairly intended, in ordinary cases, than an estate in fee simple. But here the land is purchased and to be conveyed to the company for their use, "such as shall be required by them." We do not understand by this all the lands they might ask for, but such as their powers and fnnctions and business required. We do not think the scope of the bond could fairly be made to extend beyond this. It would be very unreasonable, as it seems to us, to construe this bond as extending beyond this and including, at the election of the defendants, all the land owned by Burton, and lying near the line of the railway. So too, it seems to us, that as Burton, by the fair construction of the bond, was only bound to convey such lands as were reasonably required for the legitimate use of the company, so he was only bound to convey such estate therein as they required for those uses. If the extent of territory could fairly be defined and limited by the general objects and purposes of the contract, which is a familar rule of constructing all contracts, and as applied to a case of this character, a most significant and unquestionable one as we think, the same rule also applies with equal force to the estate to be conveyed. A contract to convey land for a particular use, or to a party having capacity to acquire a certain estate in land for a particular use, must of neccssity carry the implication of such limitation upon the estate to be conveyed. We think therefore that the bond as originally given, would not have bound the party to convey more land than the company fairly required for their legitimate uses under their charter or any greater estate in the land than such uses justly required. This is just what the company were empowered to take compulsorily. And their charter as we think was not intended to give them power to acquire any more land or any greater estate in such land, for the purposes of road bed or stations than was really requisite for such uses under their charter. We do not intend to say that if they purchased and took the conveyance of the fee of the land for these purposes, they could not hold it or convey it, although some courts have so held. Nor do we intended to intimate any decided opinion that they may do this. The general provisions of the charter of this company are much like other charters in this and the other states, and similar to the general railway act, and seem to have reference to acquiring the right to such an estate in the necessary lands as is requisite for the road bed and other incidental use and accomodation of the company in their prescribed and necessary business. The company may purchase lands for wood and timber, for their ordinary uses, and may no doubt purchase, take and hold and also convey the fee simple of such lands. We are not inclined here to question the right of this company to take the fee of lands by way of gift, or in payment of debts due them, either by voluntary conveyance or by levy, *in invitum*. It is not important to discuss these propositions here. They may all be conceded. But they do not affect the question, what extent of land and what estate the company were expected to take by purchase or gift, or by condemnation, for their road bed and depots. We think it very obvious from this charter and many others we have examined, where the quantity of estate is not defined, that it should be construed as we have already intimated in regard to the bond of Burton, according to the object and prospect of the grant, and the necessities or wants of the corporation thereby created. * * * * * * *

In regard to the mode of appropriating land to the purposes of the road bed and depots of a railway company, it is obvious that it should be done in some way which shall be judicial and final, for the time at least. This is necessary both for the company and the land owner, and when done in the mode pointed out in the charter, it must be final, or should be so, unless some power is reserved either expressly or impliedly, to change the location of the road, as in the defendant's charter seems to be given, or to enlarge its facilities with the advancement of business, which this charter does not give in terms. This is not ordinarily reserved to railways. When once located the location is commonly regarded as final. They must take such lands as will be likely to accomodate their business, both present and prospective. In doing this, it would not be wonderful if they should take more, sometimes, than every one regarded as necessary. The same may be true of their road bed. A jury or referee might well consider, in many cases no doubt that at many points four or five rods, or even three rods in width, was just as beneficial, for all the purposes of the road as six rods, which some of the early chartered roads in this state are allowed to take and do take. The same may be often true of the land taken for depot accommodations.

But if the road bed or land for stations is taken in the mode prescribed in the charter and general law of the state, whether by the judgment of the commissioners, as to its extent as well as the land damages, or by the act of the directors through their surveyors or engineers, as to its extent, and the appraisal of the commissioners as to its value,

or by the directors as to its extent, or the agreement of parties as to the price, as in this case, when once taken in the mode prescribed in the charter, as this land was taken, it is regarded as well settled that the land so taken is not subject to the levy of an execution. This is put upon the ground, and justly we think, that the estate, being a mere easement for a particular use, is not of the quality and character which by the statute is made subject to a levy. This is not an estate in fee, or for life, or years, or indefinitely, or an equity of redemption, which are the estates defined in the statute. But it is an easement, a right to use the land in a particular mode for a particular purpose, and which cannot be transferred to an ordinary person having no right to use it in that mode or for that purpose, since the estate would cease and the land revert, the moment it was put to any other use than the one designated in the charter or statute, by or under which the appropriation was made. So that whether the company take more or less, if taken for these purposes and no other, and only an easement is acquired by the company, it is not an estate which can be transferred by a levy to the creditors of the company, or by any conveyance in parcels, probably. But of this we need not speak. It is certain that the statute has not provided for levying upon any such estate. And this we think is the only estate for which the company contracted with Burton, or which he is bound to convey to them. And as to the quantity of the land taken, if the directors of the company have power to lay out their own road in any place they choose, and to the extent of five rods in width and to take such lands for depot purposes as they deem expedient, and they have acted in good faith, we do not see very well how their proceedings can be brought in question by any one. It may have been the folly of the legislature to grant any such powers to the directors of the company, but if they have done so, and this power is altogether unlimited, unless they act rashly or in bad faith, it is not very obvious how they are to be controlled in the matter. No doubt if they act recklessly or extravagantly, so as to indicate either utter incompetence or corruption, or undue influence, or bad faith, a court of equity, at the suit of the land owner or the stockholders, would set the matter right. But this would be done in such a mode as to settle it definitely, and not to leave it subject to the confusion consequent upon subjecting it to the action of independent tribunals, in regard to portions of the land taken for the same purpose whose decisions would almost inevitably produce more or less confusion and uncertainty. But so long as the land is appropriated to the road bed and depot purposes in the very mode prescribed in the statute, we do not very well comprehend how it can be appropriated in parcels to the payments of the debts of the company, by means of levies, even if the fee had been conveyed to the company. * * * * *

As the company had no such estate in there lands, or any such extent of territory as could be subjected to the levy of executions, at the suit of their creditors, treating their rights the same as if Burton had already executed all the conveyance which a court of equity would compel him to execute, it is not necessary to consider the other questions in the case.

Judgment affirmed.

New York City Passenger Railroads.

The following synopsis exhibits the condition of the several city passenger railroads on the 30th September, 1862, and the operations of the same for the year then ending:

	Second Avenue.	Third Avenue.	Sixth Avenue.	Eighth Avenue.	Ninth Avenue.
Length of single track	16 miles.	16½ miles.	8¾ miles.	16 miles.	18 miles.
Shares paid in	$650.000	$1,170,000	$750,000	$800,000	$795,360
Funded Debt	450,000	400,000	25,000	.....	22,000
Floating Debt	42,500	.....	.....	25,000	.....
Total capital	$1,142,500	$1,570,000	$775,000	$825,000	$817,360
Cost of road, etc.	$1,101,872	$1,757,028	$1,089,316	$938,365	$787,446
Passengers	4.711,119	11,432,892	6,955,647	7,399,696	1,789,963
Total receipts	$243,065	$586,736	$386,915	$369,985	$89,498
Repairs, etc.	$3.688	$21,591	$68,063	$13,108	$6,060
Operating road	187,878	347,205	201,603	235,311	64,009
Interest	37,629	26,066	.....	.....	1,474
Dividend	.....	140,400	75,000	96,000	.....
Total Disbursements	$229,195	$535,282	$344,666	$344,419	$71,543

OPERATIONS FOR 10 YEARS.

1. Number of passengers carried each year by the railroads severally:

Years.	Second Avenue.	Third Avenue.	Sixth Avenue.	Eighth Avenue.	Ninth Avenue
1853	354,000	.....	5,120,500	.....	.....
1854	2,500,000	.....	5,195,581	.....	.....
1855	3,547,660	5.770,078	4,237,583	4,311,676	.....
1856	3,367,371	7,131,881	4,757,108	6,097,299	.....
1857	3,936,008	8,105,515	5,240,978	6,829,452	.....
1858	4,504,645	7,945,462	5,612,357	6,768,203	.....
1859	5,182.011	9,974,101	6,479,127	7,589,997	170,440
1860	5,196,602	12,109,417	7,398,908	7,775,040	1,984,341
1861	4.640,751	11,824,928	6,890,801	7,413,905	1,906,086
1862	4,711,119	11,432,892	6,955,647	7,399,696	1,789,963

2. Total receipts from passengers, etc., each year by the railroads severally:

Years.	Second Avenue.	Third Avenue.	Sixth Avenue.	Eighth Avenue.	Ninth Avenue.
1853	$17,625	$.....	$233,551	$.....	$.....
1854	125,901	.....	248,861	.....	.....
1855	174,883	292,476	212,456	215,584	.....
1856	168,884	367,428	237,855	304,865	.....
1857	196,800	419,029	262,049	341,472	.....
1858	227,457	403.055	280,618	338,400	.....
1859	262,166	502,951	323,956	379,500	8,522
1860	263,062	610,597	369,945	388.750	99,217
1861	234,580	652,994	387,786	370.695	95.304
1862	243,065	586,736	386,915	369,985	89,498

3. Total expenditures for repairs and operating each year by the railroads severally:

Years.	Second Avenue.	Third Avenue.	Sixth Avenue.	Eighth Avenue.	Ninth Avenue.
1853	$12,099	$.....	$157,465	$.....	$.....
1854	103,534	.....	180,846	.....	.....
1855	174,883	217,838	165.234	132,592	.....
1856	168,884	255,706	150,731	174,890	.....
1857	196,800	263,692	162,060	194,383	.....
1858	171,800	242.811	178,226	177,754	.....
1859	180,644	307,188	216,685	252,871	5,068
1860	208,862	379,226	261,698	274,122	70,959
1861	196,800	409,763	291,404	255,229	75,431
1862	191,566	368,796	269,666	248,419	70,069

4. Dividends paid on the share capital each year by the companies severally:

Companies.	'53.	'54.	'55.	'56.	'57.	'58.	'59.	'60.	'61.	'62.

The Military Canal Enlargement.

The pressure upon Congress to enlarge the Erie and Illinois Canals, ostensibly for military purposes with a side bar argument, that the enlargement will greatly benefit the commerce of the West, is thus noticed in the Cincinnati *Gazette* of the 21st inst. The intelligent people of Ohio seem to have the same views of this project, that many of us have in New York.

The military canal schemers affect to be laboring for the interest of the Western farmers, and they have the assurance, or the ignorance, to assert that the increase of business beyond the capacity of the canals, has so raised the price of freight as to deprive the farmer of the rewards of his labor. For instance, the *N. Y. Times* asserts that were the proposed enlargement completed, "where the western farmer gets ten cents a bushel for his corn he would get thirty."

Such assertions are worthy of the project. High rates of freight have prevailed from Chicago and westward to New York, for the last two seasons, owing to good crops and the diversion of produce to the Northern route by the closing of the Mississippi; but the great advance has been in lake freight. How will the enlargement of the canals help this? It is just as much a reason for enlarging the lakes as the canals, for the capacity of the lakes has had no more to do with the advance in freight than the capacity of the canals. It was the supply of vessels and boats that was exceeded.

No forwarder on the canals will pretend *the the capacity of the canals is reached, or that anythin but the inadequate supply of boats for the sudden increase of business, has caused the rise in freight.* They desire the enlargement because larger boats may reduce the cost of carrying by a fraction. One or two cents a bushel is the advantage they are looking for. The freight on corn from Buffalo

to New York during the summer and early fall, is about twelve cents a bushel. *The advance was but a fraction above this last summer, while lake freight was double the average rate.*

Where out of this canal and river freight will the Times get its reduction of twenty cents a bushel to pay to the Illinois farmer? At the best only one or two cents a bushel can be calculated upon, and it is very doubtful if any difference in the dimensions of the Erie canal will make that difference in freight. But the Illinois canal is also to contribute to make up this twenty cents to the Western farmer. What the rate of freight is on that canal we do not know, but we know *that but a fraction of the corn that reaches the lake at Chicago comes through that canal; and furthermore boats on the Illinois canal carry three thousand bushels, and it is not worked to one-fourth of its capacity.*

These are specimens of the intelligence which is writing up this scheme.

Philadelphia and Reading Railroad.

The Philadelphia and Reading Railroad Company have leased the Little Schuylkill Railroad and the East Mahanoy Railroad, whereby they secure the possession and control of the tunnel route through the Broad Mountain into the Mahanoy coal basin. The coal lands and mines of the Little Schuylkill Railroad Company are not included in the lease.

The Philadelphia and Reading Railroad Company have also leased the Union Canal Company's Railroad and the Lorberry Creek Railroad, in the Pine Grove region.

A New Canal Project.

The Dutch have set on foot a gigantic work of canal improvement. It is proposed to construct a ship canal from Amsterdam through North Holland towards the sea; to be thirteen miles long, two hundred feet wide and twenty-four feet deep. The canal will shorten the distance from Amsterdam to London, and all ports south of the Texel, by about eighty miles, so that vessels will now be enabled to reach the sea in a few hours, whereas the present journey over the Siminger and the North Holland Canal now occupies several days, and sometimes weeks.

In order to form a safe sea entrance to the canal, it will be necessary to construct enormous sluices and an artificial harbor on the unprotected coast of Holland, the piers of which will extend more than a mile into the sea. This will be the chief engineering difficulty to be overcome. With the undertaking is connected the reclamation of the Y, containing fifteen thousand acres of rich alluvial clay, and when reclaimed is estimated to be worth one million sterling.

The total capital required is estimated at a million and a half sterling, upon which the Dutch Government guarantee an interest of four and a half per cent. The concessionaries are Mr. J. G. Jager, of Amsterdam, and the English engineers, Messrs. B. W. Croker and Charles Burn. These gentlemen have been ten years maturing this project, the concession having been originally asked in 1852.

Norfolk County Railroad.

The annual report shows the earnings for the year ending Nov. 30, to be $51,544 47; total expenditure for working the road, $36,545 65; interest paid on bonds during the year, $14,456 94.

Finances of the State of New York.

ANNUAL REPORT OF THE COMPTROLLER.

The Annual Report of the Comptroller reviews briefly the financial policy of the State during the last four years; the enforced transition from prodigality to thrift in the management of the State works; the improvement of the toll rates; the parsimony of appropriations, and the resort to necessary taxation. Of these ameliorations the Government enjoys the benefit in the form of a higher credit; the payment of all just claims; the enlargement of the Canals, and the reduction of the funded debt by the sum of $2,100,000.

The accounts with the United States, July 31, 1862, were as follows:

Amount charged to the U. S.		$2,948,963 66
Deduct amount returned in Dec. 1861		1,113,000 00
Balance due to the State		$1,835,963 66
Proportion of direct tax due from the State		$2,603,918 67
Deduct 15 per cent	$390,587 80	
Deduct above balance	1,835,963 66	
		2,226,551 46
Balance due to the U. S.		$377,367 21

On the 24th day of June last, there was paid to the United States, in cash, the sum of $400,000, for the purpose of discharging the balance due upon the tax. This leaves $22,632 79 in favor of the State, to cover any items which may be rejected upon the final settlement of the accounts. If more than that amount should be rejected, there will be a balance due to the United States; if less, there will remain a balance due to the State.

Further expenditures have been made since July last which are chargeable to the United States, but which are not applicable to the payment of the tax. They will remain for future adjustment.

The enlargement of the Canals, which was commenced in 1835 and was then estimated as likely to cost $12,000.000 and twelve years of labor. It has cost $40,000,000 and is now completed at the end of twenty-seven years.

The following is a statement of the receipts and payments on account of the canal revenues:

Receipts during the fiscal year ending Sept. 30, 1862:

From tolls collected on all the canals		$4,790,518 09
Rent of surplus waters		6,765 00
Interest on current canal revenues		39,363 49
Miscellaneous receipts		18,343 09
Total		$4,854,989 67
Payments during the year		
To Canal Commissioners for repairs	$236,318 16	
To contractors, for repairs	296,168 98	
To superintendents for repairs	131,919 64	
To collectors, for salaries, clerk hire, pay of inspectors, and expenses of collectors's offices	58,023 35	
To weigh masters	8,430 85	
For salaries chargeable to annual revenues, refunding tolls, printing and other miscellaneous payments	42,537 34	773,398 32
"Surplus revenues"		$4,081,591 35
Payment to Sinking Fund, under sec. 1, art. 7	$1,700,000 00	
Payment to Sinking Fund, under sec. 2, act. 7	350,000 00	
Transferred to the Sinking Fund, for the redemption of the canal debt under sec. 3 art. 7	1,146,242 66	
Transferred to the "fund" for support of Government	200,000 00	
The "remainder" under sec. 3, art. 7	685,348 69	$4,081,591 35

The entire state debt is now as follows:

Canal debt	$24,011,770 25
General Fund Debt	6,505,654 37
Total State Debt	$30,517,424 62

The following is an analysis of the debt:

Principal of Debt and Sections of Article 7 of the Constitution.		Annual Interest of the Debt.
Section 1—7s	$1,200,000 00	$84,000 00
6s	2,139,024 76	128,341 48
5s	5,500,000 60	275,000 00
Section 3—6s	11,000,000 00	660,000 00
5s	1,000,000 00	50,000 00
Section 10—6s	250,000 00	15,000 00
5s	392,585 49	19,629 28
Section 12—6s	2,500,000 00	150,000 00
Total	$23,981,610 25	$1,381,970 76

GENERAL FUND—REVENUE.

Balance in the Treasury 30th September, 1861			$53,750 51
Amount of receipts into the Treasury during the year ending 30th September, 1862			7,936,648 79
Amount transferred from the School Fund, for bonds for lands			1,170 00
Amount of warrants drawn on the Treasury remaining unpaid on the 30th September 1862			625 88
			$7,992,195 18
Amount of warrants drawn on the Treasury on account of the General Fund, during the year ending 30th Sept. 1862		$7,146,966 26	
Amounts transferred to the following funds for interest on money in the Treasury, during the year, belonging to said funds viz:			
School F'd.	$20,204 44		
Literature Fund	1,042 55		
U. S. Deposit Fund.	1,521 40		
Tonawanda R. R. Sin. Fund	333 62		
Long Island Sin. F'd.	21 31		
Tioga Coal, &c., Sinking Fund.	34 90	—$23,158 12	
Amount of warrants drawn on the Treasury remaining unpaid on September 30th, 1861		458 69	7,170,583 07
Balance in the Treas'y Sept. 30, 1863			$821,612 11

This balance says the report, is "rather apparent than real." It is caused by the payment into the treasury of the $1,500,000 advanced upon Comptroller's bonds, issued in anticipation of the two-mill tax, for the purpose of providing funds for the payment of bounties to volunteers. If this amount is deducted from the revenue, it leaves an actual deficiency of $678,387 89.

The balance in the treasury, Sept. 30th, was $1,355,732 03, which was due to certain funds. The estimated revenue for the year is $18,227,000 57 and the expenses $8,971,705 16, leaving a deficiency of more than $700,000.

The condition of the "General Fund Debt Sinking Fund" shows a balance of $104,960 38.

The "Contingent State Debt" is $338,000, being unredeemed state stock issued to railroads.

The "School Fund" amounts to $2,658,116 42. The revenue for the year was $421,643 50, and the expenses $358,977 54. The revenue for the present year is estimated at $327,081 27, and expenses $382,000.

The "Literature Fund" is $269,951 12. The revenue for the year was $60,389 85, and expenses $42,481 58.

The "United States Deposit Fund" amounts to $4,014,520 71. The expenses for the year are estimated at six thousand dollars less than the revenue.

Indian annuities have been paid during the year to the amount of $7,361 67.

The total amount received for labor in the State Prisons during the year ending 30th September, 1862, was $191,045 97; expenditures $311,744 81. The Receipts of the Auburn State Prison were $110,684 44; the expenditures, exclusive of the asylum for the insane convicts, were $38,901 09. The expenses of the asylum were $88,471 09, leaving a clear surplus of $10,321 16. The number of convicts in the State Prisons is rapidly diminishing. Since the war broke out convictions have been very few.

The amount received for auction dues was $76,536 04. The income from salt duties during the year was $81,189 43; expenses $40,268 76, leaving a surplus revenue of $40,910 67.

Since the suspension of specie payments by the banks there has been paid by the State $2,000,000 principal of the canal debt and $800,000 principal of the general fund debt besides the quarterly interest on the whole debt, making a total of $4,000,000, all of which has been paid in coin or its equivalent.

The aggregate valuation of property in the State, for 1862, is $1,449,303,948; the State taxes are estimated at $5,797,215 79; school, county and town taxes, about $16,000,000.

The State taxes for the year 1862 were as follows:

For the General Fund,	1	mill....	$1,449,303 95
For the United States,	2	do....	2,898,607 89
For the Canals	1	do....	5,449,303 95
For the School Fund	¾	do....	1,036,977 96
	4¾		$6,884,193 75

The taxes for the ensuing year need not and ought not to be more than one-half the above amount.

The Comptroller thinks that the whole amount of taxes required to be levied will be as follows:

For the General Fund,	¾	of a mill.	$1,086,977 96
For the School Fund,	¾	do..	1,086,987 96
For estim'd deficiency,	½	do..	724,651 97
For interest and Sinking Fund on $2,500,000 of Canal debt....	¼	do..	362,325 98
Total	2¼	mills,	$3,260,933 87

The National Finances.

The National Finances have come to be more than ever the absorbing topic. There are now two problems involved—the providing of means for carrying forward the operations of government, and the ultimate effect, or result of the plans suggested for adoption.

The most obvious plan for raising money, is, of course, a further issue of Treasury notes. They serve as money without, so far, any considerable appreciation of prices, except in gold. But the continued advance in this creates well grounded apprehensions, and an earnest desire to avoid every step that will tend to aggravate the present disparity between the value of coin and of paper money. Hence the hesitation that has characterized the action of Congress. The emergency is most pressing, but no plan proposes any adequate solution of the dilemma in which this body finds itself placed.

The first false step was in making Treasury notes legal tender in all contracts, thus rendering the credit attached to the Securities of Government the measure of all values. This credit or faith is in the most peaceful and quiet times subject to constant fluctuations. In periods of great political commotions, the fluctuations are excessive, and the value of every one's property or means increased or diminished in the same ratio. The idea of making political institutions the basis of material values is most incorrect and unfortunate, as the relief obtained on one hand only serves to involve us still more on the other.

Provision has now been made for the issue of Treasury notes to the amount of $400,000,000. Of these, $50,000,000 are retained to discharge the deposits at the Sub-Treasury. An additional amount of $300,000,000 are ot be issued by the Bill that has just passed the House. This Bill also provides for an issue of $300,000,000 of long bonds and $400,000,000 of short bonds, of small denominations, drawing interest and convertible at will into legal tender notes. A clause providing also for reconversion of legal tender notes into short bonds bearing interest has also been added. The Bill has not passed the Senate, but its adoption by that body may, we presume, be regarded as certain.

The most novel and important feature of the bill that has just passed the House, is the provision for the conversion into currency, at the will of the holder, of the $400,000,000 of short interest-bearing bonds. The plan is certainly ingenious, as it assumes to give a double function to such securities—that of an interest bearing, so long as a person has no call for his money, and of money when he has an occasion to use it. If the plan was practicable, it would render every man his own banker, and would dispense entirely with the necessity of banks. It may, and probably will have the effect in the outset of drawing a large amount of deposits from banks for the purpose of getting interest on the same, under the idea that the conversion will always be equivalent to the money in hand. The fallacy in the plan is in the assumption that legal tender notes are money. But they really have none of the attributes of money, and cannot long perform any of its functions. Money in the strictest sense is gold and silver. A paper, or symbolic currency, can take the place of the precious metals only so long as they can be converted into the latter, on demand. The symbol, consequently, must always have its constituent. The transfer of the former must pass the title in the latter. The holder of a bill of a specie-paying bank can always make partition of its assets to the extent of the bill it holds. The volume of such currency, consequently, measures approximately the volume of merchandize of the country which is subject to bargain and sale. That of the former swells and contracts with that of the latter. But Treasury notes represent nothing but the faith of Government. There is not a cent worth more of property in the country for all the $250,000,000 already afloat. There will be no more after the whole $650,000,000 shall be issued; not probably so much, as during the war we can hardly expect to keep our capital good.

The plan proposed while it may temporarily relieve the Government, will afford no permanent relief. It cannot create money by a legislative act. All it can do is to render its securities attractive investments for money, or capital, the product of labor. This is the only resource really left to it, and the sooner it abandons all other expedients the better. There is an abundance of capital in the country, and with the credit of Government maintained by military success, this capital can be had to almost any extent for its wants.—*Hallett's Financial Circular.*

Hamilton & Port Dover Railway Company.

Application is to be made to the British Parliament to amend the acts relating to this company. Its interests are understood to have passed into the hands of the Buffalo and Goderich Railway Company, by whom the road will be constructed from Hamilton to Caledonia, where it will unite with the Buffalo line and divert some of the traffic from the Great Western.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Jan. 16, 1863, was as follows:

Passengers	$15,423 29
Freight and live stock	45,241 99
Mails and sundries	1,749 65
Total	$62,414 94
Corresponding week of 1862	57,152 88
Increase	$5,262 05

The earnings of the Grand Trunk Railway for the week ending Jan. 17, 1863, were:

Passengers	$17,712 38
Freight and live stock	75,260 15
Mails and sundries	3,885 00
Total	$96,857 53
Corresponding week, 1862	73,262 23

Stock Exchange and Money Market.

The advance of gold to 154 on Wednesday and of exchange to 171, has given great anxiety to reflecting people. We are daily asked the question, "how high is gold going to rise?" We confess we see nothing to stop it getting up to 200. It is a commodity in the hands of comparatively few holders, and it is very easy for them with or without combination, to demand for it whatever they please. We have seen flour and sugar and coffee, selling at enormous advances from the same cause even in times of peace. Our product export, up to the last week was greater for the past year than our imports. The drain of gold must therefore be attributable to the sale of stocks, pressed upon our markets by foreign holders, and if so, this must have been attended with a heavy loss to them, if the proceeds were remitted in gold or exchange. The demand at this time cannot be explained in any other way, than it is caused by remittances for goods imported, to pay the interest on Government loans, or to hoard among ourselves under the apprehension of a violent depreciation of all other kinds of property. It is believed this last idea is more extensively carried out, than is generally supposed. It is asserted that some of our wealthiest citizens have sent abroad large amounts of gold to be invested in British funds, under the apprehension that the Union is about to be dissolved, and the public debt will finally have a practical repudiation from the very necessity of the case.

It is of no use to combat this opinion with those who entertain these fears, but we imagine from the latest expressions of opinion at the South, that the Union bids fair to out last this contest. The recent remarkable article from the Richmond *Examiner* which has been extensively republished in the North, supported by private intelligence that may be relied upon, is perfect demonstration to our minds that there as elsewhere, "exhausted nature can hold out no longer," and that though the leaders are still resolute and determined, the Southern people whom they have forced into the field are tired of the conflict, and will rejoice at the return of peace. There never at any previous time has been such strong concurrent testimony to this effect.

The apparent scarcity of gold, for it is not any longer to be seen in the ordinary transactions of business, seems to have upset one of the great maxims of financiers, viz., that where there is a demand, there will always be a supply. We see no such consequence in the present instance, although the importation of gold would give the

foreign merchant the opportunity of making a large profit on it, if he invested in our government stocks or New York State Stocks, or in houses or ands, or flour and innumerable other products which have not advanced to any extent under the effects of the Government issues. It is demonstrable that foreign investments in Government stocks which pay the interest in gold, can be bought with paper, so as to secure the enormous profit of this difference between paper and gold. So that demand does not bring supply as an infallible result. There never would be much scarcity of any thing if it did.

The financial measures about to be adopted by congress have not yet assumed that positive shape, which will justify conclusions as to their merits. The general tendency of them it is believed will be to limit the issue of Government money, and to absorb local currencies, particularly as the Subtreasury is to be exchanged for local Bank depositories, which will be sure to give their own circulation a preference so long as the redemption in specie is impracticable. How this will work, remains to be seen. It is yet to be learned what political influences will prevail in the selection of these institutions, if any selection is practicable under the bill, and if these prevail over other considerations, the Government will eventually be a large loser by misplaced confidence. If currency is to be the sole resort of the Government, and we see no other kind of money to be had in quantities enough to disburse even for three months expenses, we shall be in the same position then as now, with paper not so good as the Treasury notes.

The celebrated author of the Wealth of Nations, whose opinions resolutionised those of almost all other previous financial writers, laid it down as a rule, that the "whole paper money of every kind which can easily circulate in any country, never can exceed the value of the gold and silver of which it supplies the place, or which (the commerce being supposed the same) would circulate there if there were no paper money. So that if the recent statement of the *Evening Post* be true, that there are 800 millions of gold at this moment in the United States, it would be demonstrable that so far, according to Adam Smith, our currency was still of limited extent.

Mr. Adams the elder, a cotemporary for a time of Adam Smith who lived as late as 1790, enunciated nearly a corresponding idea, computing the amount of paper money which could be kept in circulation, at the sum it requires to carry on the whole amount of internal and external commerce of a country, and this he contended is easy of calculation.

Now then if we take these dicta together, we find that there is an exceptional difference in our case, which is very remarkable. If the gold according to Adam Smith will only sustain the same amount of paper as there is gold, how comes it that for so many long years our Bank currency has been equivalent to gold, when the former was often as 3 to 1.

And if as Mr. Adams asserts, the whole amount of interest and foreign commerce must be reckoned up to ascertain how much gold will regulate it, and so afford a sure basis for an equal amount of currency, then we have an element of greater power in our favor than any other nation in the world, and we can bear a larger amount of paper than any other. For it is absolutely certain and well known, that our domestic exchanges requiring the use of some kind of money, are hundreds of millions annually greater than our foreign exchanges. These imperial states of ours are or have been moving gigantic masses of commercial interests. The exchange of property and credits, the redemption of bank bills, the shifting of gold and the demands for domestic exchange throw our foreign custom house returns completely in the shade. So that on Mr. Adam's principle, our domestic exchanges founded on our billions of bushels of grain, and other cereals, the immense products of the Western stills, and provision markets, would of themselves warrant a large circulating medium, larger we imagine than has yet been created by the Government. Adam Smith maintained that money was not wealth, (he would be poor authority in Wall street just now) or that land was wealth, but that its true source was labor. And in this we agree with him. Labor has made this country what it is. We began without capital and if we should lose the greater part of it before this contest is over, labor would bring it back again, and with a power hitherto unfelt among us.

Our readers will find as usual a carefully corrected daily list of the movements in stocks, and our tables may be relied on as a sure index of the condition of the New York Market from time to time. There is a feeling of despondency among monied men, who are always the first to be alarmed at the approach of danger, while the great under lying strata of the middle classes act from circumstances and habit with far more coolness and philosophy.

The following quotations of sales are in addition to those given elsewhere in our columns:

New York.—Michigan War Loan, 106; Chicago and Northwestern shares, 18; Ohio 6s, 1870, 120; Illinois Canal registered bonds, 100; Miss. and Mo. L. G., 100; Cincinnati, Hamilton and Dayton, 125; Cumberland Coal pref., 24½; Canton Co., 30; Brooklyn City Water Loan, 119.

Lancaster Locomotive Works.

Messrs. Muller, Wilkins & Co., No. 5½ Pine street, have for sale one of the most valuable pieces of property ever offered in this market, consisting of the well-known Locomotive Works at Lancaster, Pennsylvania. The buildings are of great size and strength, fronting on the Pennsylvania Railroad, and fully stocked with the requisite machinery for the construction of locomotive castings, and the manufacture of general work in iron. It is ready for immediate use. The Pacific Railway, which is now certain to be built, will require the aid of works like these, with such commanding positions and facilities for business. We understand the terms of sale will be easy. See advertisement.

Cotton on the Pacific.

The last arrivals from California bring the intelligence that the cultivation of cotton of a superior quality has been entirely successful in several counties in that State, and in Southern Utah 95,000 lbs. have been baled and prepared for market. In the Tulare Valley, great preparations are making by the farmers there to cultivate the Peruvian kind, and in St Mateo, the experiment has been so successful as to justify the opinion that the cultivation of this staple will be on a large scale the present year, throughout the State. Commissioner Newton of the Bureau of Agriculture has been applied to for the best kinds of seed to be sent immediately to California. This cotton production is likely to alter a good many opinions abroad, and to expedite the construction of the Pacific Railroad. Cotton six days from San Francisco may be able to compete with Cotton two weeks from New Orleans. The Legislature of California seems to think highly of the prospect, and has authorised the expenditure of $12,000 to promote the cultivation.

St. Louis, Alton and Terre Haute Railroad.

The earnings of this road for December, 1861 and 1862, were:

	1861.	1862.
Passengers	$20,523	$29,487
Freight, etc	55,162	106,129
Totals	$75,685	$135,616

The earnings and expenses for the years ending December 31, 1861 and 1862, have been as follows:

	1861.	1862.
Earnings	$762,997 45	$1,117,603 01
Expenses	533,493 12	549,583 17
Net earnings	$228,504 33	$568,019 84

The liabilities of the company are as follows:

First mortgage bonds	$2,200,000
Second mortgage, preferred	2,800,000
do. income	1,700,000
Preferred stock	1,700,000
Common "	2,000,000
Total cost of road	$10,400,000

Girard College Passenger Railroad.

The receipts and expenses of the Girard College Passenger Railway, (Philadelphia), for the years ending December 31, 1860, 1861, and 1862, have been as follows:

	1860.	1861.	1862.
Receipts	$74,294 86	$58,659 25	$64,286 97
Expenses	53,808 58	45,874 36	43,513 03
	$20,486 28	$12,784 89	$20,773 94
Dividends	20,000 00	10,000 00	20,000 00
	$486 28	$2,784 89	$873 94

Construction account		$156,041 23
Ridge Avenue and Manayunk Passenger Railway Co's Bonds, 7 per cent.		3,300 00
Due by sundries		513 28

	$513,456 76	
Leaving surplus of earnings over operating expenses, and amount paid for interest on bonds, exchange, &c., from April 1, 1862, to Jan. 1, 1863		$327,397 47
Leaving balance to credit of income account, being excess of earnings over operating expenses, and amount paid for interest on bonds, exchange, &c., from June 1, 1859, to Jan. 1, 1863		890,012 82

Interest and Dividends.

The Cleveland, Columbus, and Cincinnati Railroad Company have declared a semi-annual dividend of 5 per cent, and an extra one of 5 per cent, both free of Government tax, payable on February 2.

The St. Louis Alton and Terre Haute Railroad Company will pay, in anticipation, the coupons of the Second Mortgage Preferred Bonds (Class D) and the Second Mortgage Income Bonds, maturing on May 1 next, on and after Feb. 1, at the Bank of North America, less the interest at 6 per cent from the time of payment to the said 1st of May.

The Hartford and New Haven Railroad has declared a semi-annual dividend of three dollars per share, free of government tax, payable Feb. 2.

The Morris Canal and Banking Company have declared from the earnings of the canal a semi-annual dividend of 5 per cent upon the amount of the preferred stock.

The Morris and Essex Railroad Company have declared a semi-annual dividend of 3½ per cent, exclusive of Government tax.

The Erie Railway Company have declared a dividend of five per cent, free of Government tax, on the Preferred Capital Stock out of the earnings of the year, ending 31st December, 1862, payable at the Treasurer's Office, Erie-place, on the 17th day of February next. The transfer books of the preferred stock will close at 2 o'clock on Monday the 2d, and open on 17th of February.

The New York and New Haven Railroad Company has declared a dividend of $3 per share, free from Government tax, payable Feb. 2d. The transfer books close on the 24th inst. till February 2d, inclusive.

The Milwaukee and Prairie du Chien Road has declared a dividend of 8 per cent on the First Preferred Stock, and 7 per cent on the Second Preferred Stock, both payable 1st Feb.

The Galena and Chicago Railroad Company gives notice that the time for extending its first mortgage bonds is limited to the first of April next.

The Philadelphia and Trenton Railroad Company have declared a semi-annual dividend of five per cent., payable on demand clear of all taxes.

The Lykens Valley Railroad and Coal Company have declared a semi-annual dividend of 5 per cent., clear of taxes, payable on and after the 2d of February next.

The Lykens Valley Coal Company have declared a dividend of 3½ per cent., clear of taxes, payable on and after the 2d of February next.

A semi-annual dividend of 5 per cent has been declared by the Bloomfield Railroad Company, exclusive of the Government tax.

A dividend of 4 per cent, less the Government tax, has been made by the Peoria and Bureau Valley Road, payable Feb. 10, at No. 13 William street.

The coupons due February 1, 1863, on the second mortgage bonds of the Huntingdon and Broad Top Mountain Railroad Company, will be paid on presentation at their office.

The Treasurer of Maryland gives notice to holders of Maryland State stocks that are at present due or overdue, that the same will be redeemed at the Treasury office, in Annapolis, on the 2d day of March next; and that after that date no interest will be allowed on overdue stocks.

Maine Banks.

From the Report of the Bank Commissioner we learn that there are sixty-nine banks in operation in Maine, with an aggregate capital of $7,983,000, with a circulation of $5,965,943, being $1,890,510 over the circulation of 1861. There has been an increase of a trifle over a million and a half in deposits. The loans amount to $12,829,517, being a slight increase from last year; but deducting $1,740,000 from this amount, composed of public securities, and there is shown a large reduction in individual indebtedness. A large increase of paper is overdue. Last year it was $776,115 37; now it is $1,109,860 61, being an increase of $333,745 24. The losses are estimated on this as $135,235 50. The act legalizing conditionally the suspension of specie payments expired on the 10th inst. During the year the specie in their vaults has only decreased some $40,000. The amount of specie on hand is $682,891 67. There are fifteen savings banks in the State, in fourteen of which the aggregate of deposits for last year is $1,876,165 18, being an increase of $255,894 92 over the previous year.

Hudson River Railroad--A Dividend!

The traveling public, or that portion of it that use the Hudson River Railroad, have no other concern than that it should furnish pleasant cars, capable engineers, gentlemenly conductors, careful brakesmen and trusty baggage masters, (all of which it does,) and that it departs and arrives "on time," which, also, it has a regular habit of doing.

There is another, but smaller class, with other interests, that is, the class by which the money was furnished for its construction. Prominent among these gentlemen stands its venerable first President, James Boorman, Esq., who contrary to popular expectation, has lived to witness the declaration of a dividend! Mr. Boorman cast his bread upon these waters nearly twenty years ago. It has eaten itself up, in interest, twice over, otherwise invested.

The question of a Hudson River Railroad dividend has been speculated upon, variously, for many years. Different, but always remote periods were indicated. Some settled upon the advent of a bridge at Albany; others inclined to the opinion that it would come along with "Miss Flite's" judgment in the English Court of Chancery; while others postponed it till the occasion of that meteorological phenomenon when it is supposed "Larks" may be caught. Stockholders, in laying their scrip aside with "Northern Railroad," "Parker Vein," &c., consoled themselves with the reflection that it might be worth something for their grandchildren. None, however, hit either upon the precise period or the true financial reason for their dividend, viz:—Rebellion! And yet out of that "venomous toad's head," comes, to stockholders of the Hudson River Railroad, this "precious jewel."

The realization of a dividend, upon this road, is our second surprise. We were originally among those who could not believe it would ever be built—who thought it irreverent to attempt to rival God's munificent, glorious highway, the Hudson River. If our files were searched we should be found expressing the opinion that the idea of a "Railway to the Moon," was scarcely more preposterous than the projected one along the banks of the Hudson River. The opinion was borrowed, we suppose, from one we heard so frequently expressed, twenty-five years earlier, that none who witnessed the commencement of the Erie Canal would live to see it completed.

But after all, and seriously, the stockholders of the Hudson River Railroad are indebted, for their dividend, to its excellent management. Years of indomitable industry, rigid economy, and strict integrity, tell the story. Nothing less or short of these qualities would have answered. The road has been deeply in debt, and sometimes almost hopelessly embarrassed. The question frequently was not whether it would ever pay a dividend, but whether it should be surrendered to the bondholders. But on these occasions it was saved by *not* borrowing money at ruinously usurious rates. And it has been finally rescued, and its affairs placed upon a paying basis, more by its savings than by its earnings.

To the enlightened, energetic, untiring devotion of their President, Samuel Sloan, the stockholders of this road are indebted for this dividend, and for the present palmy financial condition of their road. He has been ably seconded, in earning the money, by the efficient General Superintendent, Mr. Smith, and the thorough wide-awake agent, Mr. Briggs; and in saving it, by a model Treasurer, Mr. Clark. Indeed, Mr. Sloan's rarest merit, as president of a railroad, consists in finding the "right men for the right places." He has, in all his departments, capable and faithful subordinates.—*Albany E. Journal.*

Middleboro' and Taunton Railroad.

The earnings of this road for the year ending Nov. 30, 1862, were $27,828 56, of which $11,012 74 was derived from the carrriage of passengers, and $16,262 67 from freight. The balance was received for mail service. The expenses of the road during the same time were $27,266 71, and were chargeable to a great variety of items, among which the largest were as follows: to New Bedford and Taunton roads for toll on passengers $4,604 23; do. for merchandise $5,969 22; passenger department $2,925 45; fuel $2,800; freight $2,417; general expenses (including hire of engines) $1,820 23, &c., &c. The number of passengers transported during the year has been 19,381, against 16,219 the previous year. There were also 13,032 tons of freight carried during the past year, against 9,068 in 1861.

Long Island Railroad.

The annual statement of the Long Island Railroad for the year ending Sept. 30 is as follows:

Capital stock as by charter		$3,000,000 00
Amount paid in		1,852,715 79
Funded debt	$782,462 31	
Floating debt	15,212 73	
Cost of road and equipment		2,928,474 56
Length of road	98 miles	
Number of passengers carried in cars	383,983	
Number of tuns of freight	96,893	
Expenses of maintaining road		57,821 26
Expenses of repairs		30,120 58
Expenses of operating road		85,754 54
Dividend		45,000 00
Interest		42,811 25
Rent, sinking fund, &c.		12,723 83
Thompson's bonds and interest		48,679 75
Receipts		$294,537 92

Railways of France and Italy.

A convention recently concluded between the governments of France and Italy, relative to the railways which connect their respective territories, has just been promulgated. It stipulates that each government, at its own expense, execute the part of the Modane and Suze Railway, which is on its territory. The Italian government is, however, to make the whole of the tunnel through Mont Cenis, and France is to pay the expense of half of it, provided that expense does not exceed 190,000,000 francs, and that the tunnel be completed in twenty-five years; if the tunnel be completed in less than twenty-five years, a premium of 500,000 francs is to be paid by France for each year down to fifteen; and if in less than fifteen, the premium for each year is to be 600,000 francs. In case the tunnel be not finished in twenty-five years, and in case 250 metres on the French side and 250 on the Italian be not cut through every year, France is to be relieved from all her engagements. During the execution of the works she is to pay 5 per cent. interest on the outlay incurred. The convention also contains the stipulation that of the 20,000,000 francs, which the Victor Emmanuel Company is to pay for the use of the tunnel, Italy is to receive 13,000,000 francs and France the rest. Finally, France is to prolong the railway from Toulon to Nice to the Italian frontier near the convent of St. Lonis, and Italy is to prolong the Genoa to Vintimille Railway to the same place.

Pacific Railroad.

The Leavenworth, Kansas, *Times* says that a large number of railroad laborers had just arrived in that city, and would immediately commence the work of breaking ground on the Pacific Railroad, thence west. The work is to be pushed with the utmost vigor.

Railroad to Bedford Springs.

The new railroad from Hopewell to Bedford (Pennsylvania) has been graded for twelve miles from the former place, and direct communication will be established between Philadelphia and Bedford Springs before July 1st. The Pennsylvania Railroad Company hold stock in the concern to the amount of $75,000. The President is Samuel L. Russell, and among the directors are Wm. G. Moorhead and Thomas A. Scott.

Reading and Columbia Railroad.

This line will be opened from Columbia to Litiz in a short time. It is now in operation as far as Manheim. The new Superintendent is Robert Crane.

European and North American Railway.

The traffic receipts for the month ending 31st Dec. 1862, shows an increase over corresponding month, previous year, of $2,300 65—viz:

Source.	31st Dec., 1862.	Dec., 1861.
Passengers	$4,698 88	$3,838 44
Freight	5,372 42	3,343 48
Mails and Sundries	582 61	1,171 34
Totals	$10,653 91	$8,353 26

Atlantic and Great Western Railway.

At the Annual Election for Directors of the Pennsylvania Division of the A. & G. W. Railway, held at the office in Meadville, on the 12th inst., the following gentlemen were chosen: William Reynolds, President; Gaylord Church, John Dick, Jas. J. Shyrock, John M'Farland, Jas. E. M'Farland, Thos. W. Kennard, William Thorp, O. Hastings, Marvin Kent, A. W. Mumford, Geo. A. Bittenbanner and Jules Levita. The Board on organizing re-elected William Thorp, Secretary, and J. M. Dick, Treasurer.

The Mines of Chile.

There are 609 copper and silver mines in operation in Chile. One thousand five hundred laborers are employed at the mines. Many establishments are furnished with all modern mining improvements. The total monthly yield of all these copper mines is found to be from 8,524,000 to 10,518,000 pounds of ores, returning from 16 to 34 per cent. of pure metal. The general average is estimated at 25 per cent. The silver mines yield monthly about 30,000 pounds of ore, returning at the rate of 40 marks (20 lbs. weight) per box of 64 quintals ore. At all the mines in operation at present the works are regularly carried on. They all connect with the sea coast by means of cart

roads, built and kept in order by the owners of the mines.

Sorghum in the United States.

In the preliminary report of the Census of the United States, recently issued by Mr. Kennedy, Superintendent, we find some figures developing the amount of sorghum syrup manufactured in the United States during the year 1860. It will be seen by the table which we publish below, that the amount reaches over 7,000,000 of gallons, nearly half as much as the entire crop of Southern sugar cane made in the same year. It will be observed that considerable amounts of the Chinese sugar cane syrup were made in the Southern States—103,450 gallons in Georgia, 365,861 in Kentucky, 263,475 in North Carolina, 51,041 in South Carolina, 485,828 in Tennessee, 115,051 in Texas, etc. Another fact is also worthy of notice, and that is that the State of Iowa in 1860, or rather in 1859, manufactured as much sorghum syrup as the estimated product of Illinois the past year.

LANCASTER LOCOMOTIVE WORKS,
LANCASTER, PENN.,

FOR SALE—In good working order, with all necessary machinery, and a good variety of small tools, for locomotive or machine manufacture, such as foundry and smith's shop tools, lathe and planar tools, etc., etc., fronting on the Pennsylvania Railroad.

This property will be sold much below its original cost and on easy terms.

For further particulars apply to

ADRIAN H. MULLER,

1m5 P. R. WILKINS & CO., No. 5½ Pine st.

TO CAPITALISTS.
COAL MINES FOR SALE.

VERY valuable coal mines at La Salle, Illinois, in full working order and doing a profitable business. Having the advantage of a six feet vein, two leading railroads and a canal and navigable river by the works, with the large and growing city of Chicago near, and being in a country destitute of wood, these mines must become among the most profitable in the United States. Samples of both kinds of coal (cannel and bituminous) can be seen at our office. These mines will be sold at a great sacrifice. Apply to ADRIAN H. MULLER, P. R. WILKINS & CO., No. 5½ Pine st.

I. KENDRICK,

AMES IRON WORKS,

OSWEGO, N. Y.,

SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Knight's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Jan. 15, 1863.

DIVIDEND.—*Resolved*, that the Treasurer be directed to announce that a Dividend of Two per cent. be paid on the full paid and scrip shares and Canceled Bonds Scrip of this Company on the 2d day of February next, free of Government tax; that the same be paid on all shares on which the calls shall have been duly paid, and that this payment on the full paid shares shall be in anticipation of the coupon of Two per cent. due on said shares under the Deed of Trust, payable 1st July next.

Resolved, That the transfer books of this Company be closed on the 22nd inst., and be re-opened on the 2d day of February.

By order of the Board,
THOMAS E. WALKER, Treasurer.

THE NEW YORK CENTRAL R. R. CO.

TREASURER'S OFFICE,
ALBANY, January 21, 1863.

SIXTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of THREE AND ONE-HALF per cent. on the capital stock thereof, free of the United States income tax, payable on the twentieth day of February next, on stock registered at New York Boston and Albany, respectively, and on the twentieth day of March next on stock registered at London.

Dividends in New York will be paid at the office of DUNCAN, SHERMAN & Co.; in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the ALBANY CITY BANK; in London, at the UNION BANK OF LONDON, pursuant to circular and notice of December tenth, 1862, from the Transfer Office in that city.

The Transfer Books at New York, Albany, and Boston will be closed at the close of business on Saturday, the thirty-first day of January instant, and be re-opened on the morning of Monday, the twenty-third day of February next.

JOHN V. L. PRUYN,
6t5 Treasurer.

STOCKS AND BONDS
BOUGHT AND SOLD ON COMMISSION.

The New National Loan.
U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

BANKERS,
AND DEALERS IN
ALL ISSUES OF GOVERNMENT
AND OTHER
FIRST CLASS SECURITIES,
38 Wall st., N. Y.

VERMILYE & CO.,
No. 44 WALL ST., NEW YORK,

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in sums of

$50, $100, $500 and $1,000.

The Registered Bonds in sums of

$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 3m45

An Invention of Rare Merit.

LONG WANTED, AND FOUND AT LAST!

A Kerosene Lamp Chimney, Easily Cleaned

AND WHICH

WILL NOT CRACK OR BREAK

FROM SUDDEN CHANGES OF

TEMPERATURE.

THE CHIMNEY in common use breaks from unequal expansion and contraction, caused by the upper portion becoming much more highly heated than the lower portion. This constant liability of the Chimney to be broken by being suddenly cooled or "over-heated," is entirely removed by a unique and beautiful invention, BROWN'S METAL TOP LAMP CHIMNEY, which, being made in accordance with the simple law of expansion and contraction, is found to be almost "fire-proof," as far as heating by the flame of the lamp is concerned.

The clear, positive superiorities of the NEW LAMP CHIMNEY over the old style, are—

1. It will not crack or break from sudden changes of temperature, or "over-heating."

2. The top can be instantly removed, and the glass wiped perfectly clean in a moment WITHOUT WETTING.

3. It is shorter than the common chimney, therefore less liable to accidents and more convenient for carrying about the house; it is of elegant proportions and a decided ornament to the lamp, which will be found to burn with a clear, steady and beautiful light.

It is really the ideal of perfection in a lamp chimney, and after using one for an evening you will wonder that you could tolerate the old expensive style.

A "BROWN'S METAL TOP LAMP CHIMNEY," **IS WARRANTED, with ordinary care, to last just as long as the lamp on which it is used.**

Price (with a small SHADE for common size,) Zinc-top, **25** cents, Brass, **31** cents; Silver-Plated, **50** cents.

Dealers will be furnished, per Express, with a SAMPLE BOX containing one-half dozen Chimneys, assorted styles and sizes, with circulars, colored show cards, Price list, etc., on receipt of **$1.25.**

BROWN'S

Metal Top Lamp Chimneys

ARE MANUFACTURED ONLY BY THE

NEW LAMP CHIMNEY MANUFACTURING COMPANY.

Railroad Progress and National Growth.

Railroads are a good investment for the nation, whatever they may be to their shareholders. In every great commercial country, production and distribution go hand in hand and flourish together. Cheap freights create new industries, and every advancing stage of industrial growth evokes a demand for increased facilities of transportation. It is because of the stimulus they give to the development of wealth, that the railroads of any country are a sure index of its prosperity and material progress. The amount of capital invested in American railroads is stated to be 1,350 millions of dollars. In Europe the outlay is reported twice as much or 2,700 millions; and that of Asia and Africa at 250 millions. Thus the total cost of the railroads now in operation throughout the globe is at least 4,300 millions of dollars, giving an aggregate mileage of over 55,000 miles. Such is the enormous sum which the opulence, energy, and enterprise of a single generation has converted into this one form of fixed capital with the view to facilitate travel, connect remote districts, develop internal commerce, cheapen the transportation of goods, and augment the resources of nations.

The growth of our modern facilities for rapid locomotion has been so gradual, and at the same time so swift and steady, that one is apt to forget the revolution it has wrought in the habits of countries, and the innovations it has caused among all the nations of the world. Within the memory of men now living in England, the journey from London to York usually occupied four days, while at present a merchant, a farmer or a manufacturer can, without a tythe of the expense, or a hundredth part of the fatigue, perform the journey in five or six hours. The economy of time and expense secured by modern railroads for millions of the most industrious and productive laborers constitutes of itself no insignificant addition to individual wealth and to National productive power. Had no other advantage than this been conferred by railroad transportation the enormous capital expended upon it in the Eastern and Western hemispheres would have been well laid out.

But besides this economy of travelling for passengers, there are advantages arising out of the transportation of merchandise. Thus to cite a recent example, the new railroads now constructing in India, although no more than one-fourth of the projected lines are in operation, have already reduced the freight to tide water of inland grown cotton to 2 and 3 cents per ton per mile. Formerly the expense was 6 and 7 cents for the same service, while the cotton was so much injured in its transit that the conveyance on shipboard from the place of production really amounted to 9 cents per mile. Cotton under the new arrangements can be delivered in Manchester for $20 or $22 per ton or nearly one cent per pound for all cotton brought from a distance not exceeding 300 miles in the interior.

A still more striking illustration of the benefits of railroad traffic may be found in this country. For to this traffic in large measure is due the rapid growth of the population, and the amazing rise in the value of real estate in our Mississippi valley. For by railroads tributary to, and co-operating with, the other great highways of commerce, produce in teeming abundance is transported from points where it has little value to distant localities where it commands a high price and a ready sale. By this reciprocal interchange of commodities hence resulting between the Eastern and Western States, all parties are gainers. The consumer, the producer, and the merchant are equally benefitted. And the nation is of course enriched as its individual citizens thrive and prosper.

The total eastward traffic of the five great highways which connect the Mississippi valley and the great lakes with the Atlantic ports is at least 700 millions of dollars a year. And of this large and lucrative business, which is more than twice the value of our average exports to foreign countries nearly every dollar is due to our railroads and canals. The genius and enterprise of our people have developed this branch of their internal trade to its present dimensions by means of a connected and well arranged system of highways comprising 20,000 miles of railroad and 3,000 miles of canal, and involving an aggregate cost of 1,000 millions of dollars. If the warlike Romans were the most celebrated road makers of antiquity, the more commercial and equally energetic American nation may fairly claim a similar distinction in modern times.

As our giant commerce is thus stretching out his hand, wider and farther to gather the rich product of the great West, the rates of freight are being gradually reduced. Thus 38 years ago it cost $100 to move a ton of merchandise from Lake Erie to New York. To-day thirty tons can be transported more rapidly and for less money by the Erie canal. From Albany to Buffalo the freight was in 1836 $21 per ton, the cost is now little more than one-tenth of this sum. As freights have declined, so receipts have risen, and the expansive force of trade has responded to and rewarded every attempt to enlarge it.

Thus the area which our great railroad system has made tributary and productive is extending year by year. The cheaper the rates the greater the traffic. Thus if a reduction be made of one cent a ton on produce from Chicago to New York, Philadelphia, or Boston, the area of trade gradually extends itself one mile further in all directions. Each cent of reduction thus adds a certain increase of traffic. Hence an easy calculation shows that if the radius of trade, taking Chicago as a centre, be 500 miles, and this radius be

lengthened one mile, the area of commerce will receive an addition of 3,500 square miles. Should this law of increase hold good in the future as in the past, the rising tide of our national wealth will be swelled to an unprecedented extent. However this may be, there is no doubt as to the vast benefits conferred on the nation by our railroad system; though in some sections of the country this system is far from being adequate and complete. Many of these lines do not pay well as investments, but if a few shareholders suffer, the country at large is benefited. Robert Stevenson in one of his addresses before the Institution of Civil Engineers, says the railways of Great Britain, few of which pay adequate dividends to the shareholders, are a source of such wealth to the Nation, that the mere saving effected by cheap and rapid transportation is equal to 200 millions of dollars. It can scarcely be doubted that in the loyal States alone, the actual saving to our people from the free use of railroad facilities is at least equal to that estimated for England. If then in addition to this economy we take into account the political unity and social advantages that railroads secure to us—their influence on the growth of population, and on the value of property, with the productive power they create and the ennobling enjoyment they diffuse—we shall be ready to admit with a recent statistical writer, that a good system of railroads adapted to and extending with the growing wants of the country, is one of the most effective instruments devised by human intelligence for the development of national wealth.

Finances of Indiana.

From the recent Annual Message of the Governor we learn that the receipts into the Treasury from all sources during the year ending October 31, 1862, including balance from previous year, were $3,851,450 88, and the disbursements, $2,974,976 46—leaving a balance November 1, 1862, of $876,474 42.

A war loan, amounting to $1,225,500 has been raised, intended to be paid off in four years. The total expenses from the war to the State has been $1,969,248 36, of which $1,822,968 49 have been paid—leaving unpaid January 1, 1863, claims to the amount of $146,279 87, all of which have been duly audited.

The State has paid, in claims against the United States, its Direct National Tax, amounting, less 15 per cent for collection, to $765,144 03.

The account of the State against the United States for expenses incurred for war purposes, to January 1, 1863, stands as follows:

Total amount of expenses incurred	$1,969,248 36
Government draft returned to U. S. Treasury	68,701 60
Total	$2,037,949 96

On this account the United States are entitled to the following credits:

Proceeds of $450,000 Treasury notes	$432,639 30	
Paid by U. S. Quartermaster	196,728 16	
Paid on account of Ammunition	279,803 71	
Direct tax of 1861, deducting 15 per cent.	769,144 03	
		$1,678,315 20
Leaving due from the U. S. Jan 1, 1863		$359,634 75

In the account against the United States, are included expeuditures to the amount of $43,160 62, for which the State could not claim to be reimbursed under existing laws, but which are an equitable debt against the United States, and to cover which no doubt an act of Congress will yet be passed.

The indebtedness of the State up to the first day of January, 1863, has been increased by the war as follows:

Due on war bonds	$1,225,500 00
Due on military claims	146,279 87
Increase	$1,371,779 87

The entire public debt of the State now stands as follows:

Five per cent. stocks growing out of adjustment with creditors in 1846	$5,325,500 00
Two and a half per cent. stocks having the same origin	2,058,173 50
War debt, as above stated	1,371,779 87
In all	$8,745,453 37

This statement, however, doee not include 391 old Internal Improvement Bonds of $1,000 each, said to be outstanding, the holders of which failed to comply with the adjustment made in 1846.

Interesting statistics of the material wealth of Indiana are given. The mineral resources of the State are imperfectly understood. Nearly one-fourth of its whole area is a coal field—most of it of the first quality. Excellent iron ore is also found, and nearly all the soil of the State is very productive. It has 2,155 miles of railways in operation, which cost $70,295,148.

The Governor traces hindrances in the development of the resources of the State and the increase of its population to reckless squandering of public moneys and credit prior to 1846, and to the undeserved disgrace of the 2d Indiana Regiment at the battle of Buena Vista. But her credit is restored, and her courage since viudicated on a hundred battle-fields.

It is recommended that the State accept the Congressional grant in aid of a College of Agricultural and Military Instruction.

Lacrosse and Milwaukee Railroad.

The earnings of the Lacrosse and Milwaukee Railroad in 1862 have been as follows:

	Passengers.	Freight.	Miscellaneous.	Total.
Jan.	$18,453.83	$39,987.50	$2,613.50	$61,054.83
Feb.	14,724.49	37,280.96	2,780.27	54,785.72
M'rch	17,270.37	23,869 73	2,772.35	43,912.45
April.	18,517.35	27,687.95	2,560.80	48,766.10
May	22,098.18	101,359.94	2,541.07	125,999.19
June.	20,698.45	88,339 24	2,727.81	111,765.50
July	17,577.45	71.320.92	2,561.13	91,459.50
Aug.	26,299.23	39,799.46	2,574.33	68,673.02
Sept	19,982.52	114,484.71	2,719.62	137,186.85
Oct.	30,203.24	122,009.10	2,591.75	164,809.09
Nov.	27,161.01	92,855.95	2,845.85	122,862.81
Dec.	25,311.28	35,236.80	3,223.34	63,771.42
	$258,302.40	$804,232.26	$32,511.82	$1,095,046.58

The following is a comparative statement of the earnings of the road for the years 1861 and 1862:

	1861.	1862.
Passengers	$261,655 45	$258,302 40
Freight	766,685 29	804,232 26
Miscellaneous	42,481 12	32,511 82
Totals	$1,070,821 86	$1,095,046 48

☞ One of the largest locomotives ever constructed in the United States has arrived here from Patterson, N. J., where it was built, for the New York Central Railroad. It is a freight engine of the heaviest pattern, and is known as No, 234. —*Albany Argus.*

☞ The citizens of Rochester are moving in the matter of the proposed ship canal to connect the Erie Canal with Lake Ontario. A meeting was held in the Council Chamber of that city on the 26th ult., with reference to the project.

Cleveland and Mahoning Railroad.

The earnings and expenses of this road for the years 1861 and 1862, were as follows, viz:

RECEIPTS.

	1861.	1862.
Passengers	$56,643 90	$66,034 94
Express	1,297 63	1,457 17
Freight	84,157 30	99,055 07
Ore	34,206 26	41,229 94
Coal	194,907 79	164,468 68
Mail	4,578 56	2,973 47

	1861.	1862.
Gross earn'gs per mile of road	$5,608 82	$5,477 51
Working exp'ses " "	2,128 62	2,139 52
Gross earnings per mile run	1 52	1 51
Working expenses " "	57	59
" " per ct. of earn'gs	38	39

The principal articles transported during the year were as follows:

	1861.	1862.
Passengers	69,124	73,458
Through coal, tons	178,948	156,208
Way coal	27,021	30,078
Lake ore	37,870	49,809
Native ore	4,677	7,816
Limestone	113	948
Pig iron	8,908	13,153
Bar iron	4,335	6,830
Nails	3,737	5,041
Butter	566	622
Cheese	3,447	3,836

It will be observed that while there has been a handsome increase in receipts from passengers,

freight and ore, there has been a large decrease in receipts from coal, which is explained by the greatly increased demand by furnaces and rolling mills in the Mahoning Valley, which are now consuming some 800 tons per day, and the fact that some of the mines heretofore work are nearly exhausted. To remedy this latter difficulty, the company is now constructing a branch of its road running northwardly from Youngstown to the coal fields in Hubbard and Brookfield townships, which it is supposed will be completed by the first of May next. These fields, without any doubt, will furnish all the coal which will be required for consumption by the furnaces and rolling mills in the Mahoning Valley, and all that can be sold in Cleveland for a very long period of time. The quantity already known to exist along the line of this branch road, is immense, and new discoveries are, almost daily, being made.

It will be seen that while the earnings of the road for 1862 are but $582 17 less, the expenses are $3,940 15 more, thus making the net earnings $4,522 32 less in 1862 than in 1861, which is more than accounted for by the increased cost of bridge repairs. During the year, a new "Howe" bridge has been built over the Cuyahoga at Cleveland, and new and substantial iron bridges over the C. C. & C. R. R. track, and Eagle Creek, in Windham. The iron bridges cost more than double the amount paid for their wooden predecessors, but their total cost is charged to "bridge repairs."

Although there is a falling off in net earnings, of $4,522 32, the decrease in interest and taxes leaves the actual net profits in 1862, $7,057 33 greater than in 1861.

Much inconvenience and extra expense has been caused by the want of sufficient accomodations at Cleveland for handling coal, ore, and miscellaneous freight. Negotiations are now pending for the construction of section 1, and it is believed that this important and much needed work will be completed during the current year.

The constant growing short trade of the Mahoning Valley, with the prospective increase of the through traffic in coal and lake ore, render additional rolling stock indispensably necessary. Arrangements are therefore made for building at the shops of the company, fifty coal, and twenty house cars.

During the past year, one superior freight engine and twenty-five coal and platform cars, have been added to the rolling-stock, which is all in good condition, and consists of 13 locomotives; 6 first class passenger, 5 baggage mail, 3 caboose, 50 house freight, 194 coal, 31 platform, 11 hand, 2 hand dump, and 14 iron cars.

The balance sheet of the company's books, Jan. 1, 1863, is as follows:

ASSETS.

Real estate	$251,185 48
Right of way	98,717 21
Construction	2,113,008 12
Docks	30,329 10
Shops and engine houses	49,353 26
Hubbard branch	10,568 71
Locomotives	119,846 45
Cars	178,942 79
Rails, chairs, spikes, ties, coal, wood and shop materials on hand	29,187 72
Canal and R. R. stock	23,340 00
Bills receivable	12,843 64
	$2,917,322 48

LIABILITIES.

Capital stock		$1,036,065 48
First mortgage bonds		850,000 00
Second do. do.		244,200 00
Third do. do.	$738,240	
Less sinking funds, in hands of G. Tayler, Esq., Trustee	80,200	
		658,200 00
Real estate bills		35,445 60
Bills payable		51,491 77
Sundry accounts		41,919 63
		$2,917,322 48

The bonds of the company mature as follows, to wit:

1st	Aug. 1, 1873
2d	Sept. 15, 1864
3d	Sept. 15, 1876

Early in December last, it was determined to allow the holders of second, to exchange them for third mortgage bonds, giving them a premium of ten per cent., since which time $255,000 have been thus redeemed, leaving but $244,200 outstanding. For the present, exchanges will continue to be made on the same terms.

The office of the Company is at Cleveland, Ohio. the officers and directors are as follows:

Directors—David Tod, Charles Smith, Frederick Kinsman, Dudley Baldwin, Reuben Hitchcock, Joseph Perkins, Henry B. Perkins, James Magee, R. W. Cunningham.

President—David Tod.

Vice Pres't and Sup't—Charles H. Rhodes.

Secretary and Treasurer—O. M. Burke.

Engineer—Geo. Robinson.

Master Machinist—John Young.

Philadelphia Corn Exchange.

The Corn Exchange Association of Philadelphia has entered upon its tenth year. From its Ninth Annual Report we learn that there have been added to its list the past year 64 members, making a total of 315 individuals and firms. We are happy to learn that the Association has become all that its most sanguine friends predicted for it, and is vigorous, growing, and full of energy. The following is an extract from the report:

A register of the daily receipts of produce by railroad and tidewater has been kept during the year, and although it is not as accurate as we could desire, still it gives us a better approximation to the actual receipts of the port of Philadelphia than we have ever had before. They foot up as follows:

Flour, bbls.	970,654
Rye, bbls.	11,162
Corn Meal, bbls	45,116
Wheat, bush	3,059,515
Corn, bush.	1,732,121
Oats, bush	1,408,450

Our exports have been large for the last year. Flour and corn meal show a large increase over former years. White wheat and corn show a slight falling off from last year. They are as follows:

	1860.	1861.	1862.
Flour, bbls	295,137	362,552	464,290
Corn Meal, bbls	49,857	30,672	50,149
Wheat, bush	811,961	2,054,938	1,957,673
Corn, bush	390,569	803,235	778,525

Showing an increase over last year in the export of flour of 101,738 bbls., corn meal 19,477 bbls.; a decrease of 87,265 bush. wheat, and 24,710 bush. of corn. We still hold a broad pre-eminence as the great cloverseed market of the United States. The foreign exports for six years past has been as follows:—

1857, bush	4,450	1860, bush	52,212
1858, "	16,021	1861, "	18,097
1859, "	21,939	1862, "	7,971

Besides the shipment of 7971 bush. wheat, 50,000 bush. corn were shipped *via* New York.

The Pennsylvania Railroad has been ably and effectually managed during the past year, and while the roads west of Pittsburgh have been blocked by the accumulations of freight at the various points, the Pennsylvania Railroad has been kept free, and able to deliver promptly the immense amount of freight poured upon her by the various lines at that point. This company has recently completed a fire-proof grain elevator in this city, at the foot of Washington street, on the Delaware river. It is thus accessible by cars bringing the grain from the West, and has ample wharf accomodations, with sufficient depth of water to float the largest ships to carry the grain to foreign ports. The storage capacity of the present building is about 475,000 bushels, but it is so constructed that it can readily be doubled. It is estimated that 5000 bushels of grain per hour can be taken from the cars, and either put in store or placed at once on board vessels, as the consignees may require. All of the latest improvements in machinery for securing the most economical and efficient treatment of grain have been introduced in this building.

The Company has adopted a liberal scale of charges for receiving, storing and shipping grain. It is anticipated that the trade of our port will continue to improve under the additional facilities thus offered by the railroad company for either shipping the grain to foreign ports or for consumption in our own market.

Turnpike Lands taken for Railroad Purposes --Original Owners Entitled to Damages.

THE LEGISLATURE HAS NO AUTHORITY TO TRANSFER A TURNPIKE TO A RAILROAD COMPANY WITHOUT COMPENSATION TO THE OWNERS OF THE FEE.—THE USE OF LAND FOR RAILROAD PURPOSES, IS ENTIRELY DIFFERENT FROM THAT OF A TURNPIKE.

When land is taken for the use of a railroad, and the owner is paid a sum equivalent to the damages he sustains by reason of such an appropriation either agreed upon by the owner and the company, or settled by appraisement, the company acquire only a right to use the land for the legitimate purposes of a railroad; they do not acquire a fee simple; the fee remains vested in the original owner, and if the company ceases to exist, and the road is abandoned, the land immediately reverts to the original owner. The rule is the same where land is taken for the purposes of a turnpike; and it has now been held by the Court of Appeals of the State of New York in Mahon *et al vs.* The New York Central Railroad Company, that land taken for a turnpike, and afterwards transferred by legislative authority to a railroad company, without compensation by the latter to the owner of the fee, such owner may maintain successive actions for damages resulting from such occupation, as a continuing nuisance. The use of the land for a railroad being totally different from that public right of passage for which highways were designed.

The action was for damages for the construction by the Utica and Schenectady Railroad Company, to whose rights and liabilities the defendant had succeeded, of an embankment in front of two houses of John Mahon, the plaintiff's testator, in the village of Herkimer, and partly on the lands of said Mahon, by which he was deprived of the use of the highway called the Mohawk turnpike, which ran immediately in front of the dwelling houses, and by reason of which the houses and lots aforesaid were frequently inundated and the dwellings rendered damp. Damages were also claimed for the construction, and operation of a railroad upon the land of the testator, extending to the middle of the highway in front of his dwellings, without

purchasing the land or causing the testator's damages to be assessed.

One of the defences was, that, in July, 1842, the plaintiff's testator commenced an action in the Supreme Court for the same causes of action as those stated in the complaint in this suit. Upon the trial the plaintiffs proved title in their testator, by deed to half an acre of land the northerly line of which was described as "running along the turnpike-road six rods;" and that from the date of said deed which was before the construction of the railroad until his death, John Mahon continued in possession. The turnpike was north of Mahon's land, and its grade was two and a half feet lower than the lots. In 1836, the Utica and Schnectady Railroad Company, in pursuance of an act of the Legislature requiring it to do so, purchased all the rights of the Mohawk Turnpike Company, which was incorporated April 4, 1800. In constructing the railroad along the turnpike, an embankment was made raising the grade two and a half feet higher than the lots of Mahon's, and a single track was laid upon it. It was for this occupation of the land that the action pleaded in bar by the defendant was instituted. Subsequently, in 1847, the embankment was widened so as to approach nearly to Mahon's dwellings, its height increased and an additional track was laid thereon. Before the widening of the embankment, there was room for the passage of carriages between the same and Mahon's fence; but after the laying of the second track, this was impossible.

The plaintiff was non-suited at the trial; and the judgment thereon in favor of the defendant having been affirmed at a General Term of the Supreme Court, for the fifth district, the plaintiff carried the case to the Court of Appeals. The following opinion was rendered by that court at the decision of the case.

Clerke J.—If the plaintiff's testator could have recovered all that he was entitled to in the first action, it is, of course, a bar to the second. And this depends, chiefly, though not altogether, upon the question whether the Utica and Schenectady Railroad Company in any way transcended the authority constitutionally vested in them by the legislature. If they did, their road is a nuisance—a perpetual nuisance; and every day's continuance of it is a legal wrong, for which they are liable in damages after they have occurred. If they did not transcend their authority, and yet, in constructing their road have necessarily injured the rights of others, they are equally liable to respond for prospective as well as accrued damages; and, in such case they cannot be vexed again in a second action. Did the Utica and Schenectady Railroad Company transcend the authority constitutionally vested in them by the legislature? If the plaintiff's testator owned the fee of the land over which the turnpike company's road ran, at the time of the transfer of the road to the Utica and Schenectady Railroad Company, it could not be taken away from him without causing his damages to be assessed and paid, and the illegal appropriation of it would make them liable for damages in successive actions as the damages accrued. It seems to be admitted that no such damages were assessed or paid.

The rule that owners of land bounded on public highways *prima facie* own the land to the centre of the highway is not alone applicable to ordinary highways, but also to turnpikes. (Hooker *vs* The Union and Himden Turnpike Company, 12 wend 371.) And although the general act relating to turnpike companies passed March 13, 1807, declares, when the president and director pay to the owners of the lands the sums assessed and awarded by the appraisers in their inquisition, they shall have and hold to them, and their successors and assigns forever, the lands and tenements described in their inquisition; yet it has been always held that this and the special act of incorporation vests in the company the title to the lands over which the road passes only for the purposes of the road, and when the road is abandoned the land reverts to the original owners. The company only acquired such an estate in the land taken by it as was necessary to fulfill the end and intent of the corporation, and could hold it to no other use, intent or purpose. Having ceased to occupy the land in question for the purpose of a turnpike road, the Mohawk Turnpike Company, in transferring it, in effect abandoned it; and, although they were authorized by the legislature to transfer it to the Utica and Schenectady Railroad Company, this could not constitutionally, deprive the original owners of the land of their right of reversion without compensation. Davis *vs* The Mayor &c. of New York, 14 N. T., 526; Williams *vs* The New York Central Railroad Company, 16 id 97.) An easement for the purpose of a highway, does not authorize, as against the proprietor of the soil, the laying down of a railroad upon the track of the highway. The use of the land for a railroad is totally different from that public right of passage for which highways were designed.

The Railroad Company, therefore, having without compensation to those entitled to the reversion of the land, constructed, maintained and operated their road upon the highway in question, acted and continued to act unlawfully, and are liable to damages from time to time as they accrued, and on this ground the second action is maintainable.

The learned judge then discussed another ground on which he thought the action maintainable, notwithstanding Mahon's recovery in a previous suit, viz., the enlargement and raising of the embankment in 1847 was a new injury for which compensation could not have been recovered in the first action.

Wright J.—Was for a reversal, on the ground last stated; but Selden, Denio, Davies and Welles Jr., without passing upon that question, were for reversal on the ground first stated, that the appropriation of the land for a turnpike did not authorize its use for a railroad.

Judgement reversed, and a new trial ordered.

Sault Ste. Marie Canal.

The Annual Report of the St. Mary's Falls Ship Canal, shows that during 1862 there passed through the canal twelve millions of dollars worth of copper and iron, and about ten millions of dollars worth of general merchandise. The total receipts for tolls during the year was $21,607 17.

The number of vessels, sail and steam, that passed through the canal was 838, and the aggregate tonnage was 349,612 tons. In 1861 the number of vessels was 527 and the tonnage 276,637 tons. The trade last year may be divided as follows:

Iron—pig and ore, tons	150,000
Copper, tons	9,300
General merchandise, tons	80,000

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the year ending October 31, 1862, have been as follows:

From passengers		$1,644,517 01
" freight and express		506,245 20
" rents		16,268 04
" mails and miscellaneous		54,752 62
		$2,221,782 87
Add earnings of New Castle and Frenchtown Line		27,282 31
Total for both roads		$2,249,065 68
Expenditures, viz:		
Operating expenses	$681,964 82	
New Work and improvements, including new buildings, new cars and engines, double track, etc.	329,341 53	
Operating Newcastle and Frenchtown Line	16,993 13	
Taxes and bonus to the State of Delaware and New Castle County	11,000 00	
Add loss in operating Delaware railroad	22,107 48	
		1,061,406 96
		$1,187,658 72
Interest on bonded debt, ground rents, etc., less interest received		150,000 00
Net earnings		$1,187,658 72
From this two dividends have been paid—		
One in April of 4 per ct.	$224,000 00	
One in October of 5 per cent and National tax	289,639 17	
		513,639 17
Leaving		$524,019 55
Appropriations to Sinking Fund		43,666 67
Leaving an actual surplus of		$480,352 88

A large portion of this surplus is due from the United States Government.

The total earnings of both lines in 1861 were $1,516,984 81; and the expenditures of all kinds, including loss on Delaware railroad, $841,501 01—leaving net revenue $675,483 80. Deducting two dividends of 3 and 3½ per cent, $364,000, and appropriation to sinking fund $41,666 67—and there remained a surplus over every other item for the year of $269,817 13.

The year 1862, therefore, shows a net result, after dividends, of $210,535 75 more than 1861, besides an excess of $216,685 16 in improvements, or a total result of $427,220 91 in surplus improvements more than in 1861, besides an excess of dividends of $149,639 14.

The number of miles run by locomotives during the year was as follows:

By pass. locomotives burning coal	309,945 05
By pass. locomotives burning wood	60,882 23
By freight locomotives burning coal	134,909 95
By freight locomotives burning wood	55,571 18
By gravel locomotives burning coal	1,289 00
By gravel locomotives burning wood	20,017 86
Total miles run by locomotives burning coal	446,144 00
Total miles run by locomotives burning wood	136,471 27
Total run by all locomotives	582,615 27
Cost per mile run, includ'g all expenditures	$1 73½
Cost per mile run, including only operating expenses	1 17½

Earning per mile run with trains earning money, $3 95.8 per mile run.

The cost of new work and improvements per

mile run by locomotives, has been 56 cents. The Report says:

The year which this report embraces shows the largest amount of work ever done on the road. This is evident from the gross revenue, and the number of miles run by locomotives. A large proportion of this work has been done for the Government at reduced rates, the trains earning money only in one direction. This would naturally increase the ratio of expenses to earnings, and yet the result of the year shows a ratio of expenditures to earnings of only 44.8 per cent. The ratio of expenditures for additions and improvements, to earnings, was 14.1 per cent. Deduct this from the whole expenditures, and it leaves a ratio of 30.7 per cent only for operating expenses. Such a result has been attained only by a careful system, and by running no superfluous trains. Every engine running in the direction of the trade has been made to carry nearly a maximum load, and thus the work has been done for a minimum cost. Had the business been equal in both directions, the ratio of expenses would have been much smaller, and of net earnings much larger.

Besides the ordinary operating expenses, the following amounts have been expended for substantial additions to the means and value of the road:

15.062 miles of double track and additional track, costing with grading and masonry	$122,534 60
New Locomotives	70,835 77
" Mail cars	3,042 82
" Freight and market cars	77,527 83
" Stations, buildings, &c.	30,511 52
" Wharf at Wilmington	3,591 49
Susquehanna bridge	5,685 66
Additional to depot, Philadelphia, land in 16th street	15,611 75
	$329,341 53

In the item of "New Track" is included a track running into the Arsenal yard at Philadelphia, and also a track in the borough of Chester, connecting with our road, and running to the works of Messrs. Reaney, Son & Archibald, on the Delaware river, being about 2,200 feet in length.

Besides the foregoing we have paid off $36,500 mortgages on Depot Lands.

Our freight business has so much increased during the past few years, that our grounds at Philadelphia are inadequate, and we have been obliged to enlarge them by the purchase of a lot west of Sixteenth street, to be connected with our present depot grounds by tracks laid across the street, and thence into the main tracks on Washington avenue. This lot cost $15,611 75, besides the cost of the building on it. The improvements have been already commenced on it, and will be finished during the present year. The entire freight business of the Pennsylvania Railroad, destined for shipment on the Delaware, now passes over that portion of the road between the Arsenal and the Delaware. This has very largely increased our business on that part of our road, and rendered more valuable all our property in this part of the city. The facilities furnished by the Pennsylvania road and our road will ultimately bring many of the manufacturing establishments, now scattered over the city, to Washington avenue, where they will be adjacent to the Pennsylvania road and our road, and by means of them and the Junction road, connected with all the railroads of the city.

Such advantages will not long be overlooked by those who know the value of railroads as a means of obtaining supplies of raw materials and sending off their manufactured products. While our remote connections have been cut off by the rebellion, it is not a little gratifying to know that we have thus discovered at our own doors the means of increasing our revenue, and thus compensating for the losses sustained from a distance.

Having thus said much of the details of the operations of the road, it is proper that we should reiterate our opinion of its future value as an investment. We have seen nothing during the last year to diminish our confidence, often expressed, in the present and future value of this road. Our road is the nearest practicable air line, and if Congress should be persuaded by popular clamor to adopt a Government air line, they could only do so by taking possession of our road and using its track and roadway. This they could not do without ample compensation to us. We feel confident, however, that such an experiment will not be tried.

The road, therefore, may be considered as having passed its period of uncertainty and doubt, and may now be regarded as one of the certain dividend-paying institutions of this country, if it only continues in the future as it has in times past, to develope its legitimate resources and anticipate all reasonable demands for improved facilities. If we do these things, it cannot be expected that all its earnings can be divided among the stockholders. They must be content with reasonable and certain dividends for all time to come, rather than large dividends at present and an uncertainty for the future. Let us put this road in a condition to serve the public better than any other, by adopting promptly all improvements, and its position will be impregnable. Such a policy will require the expenditure of a part of its earnings every year in enlarging its capacity and adding to its conveniences. Such will be our policy if you trust to us the management in future as you have in times past.

Pittsburg, Ft. Wayne and Chicago Railway.

The earnings of this road for eleven months, ending November 30, 1862, were:

From freight		$2,151,889 37
" express		28,630 55
" passengers		1,019,100 16
" mail		86,075 00
" rents		3,205 45
" rent of railway		77,916 66
" miscellaneous		7,600 03
		$3,374,327 27

And the expenses were:

Conducting transp	$454,233 15	
Motive power	556,381 28	
Maintenance of way	482,368 11	
" cars	154,887 85	
General expenses	63,083 68	
		1,710,954 07
Net earnings for eleven months		$1,663,373 20
Eleven m'nths' int'r'st on funded debt		827,638 63
Net surplus		$835,734 57

The expenditures on account of construction and equipment for eleven months ending November 30, 1862, were: on the Eastern Division, $365,759 77; and on the Western Division, $630,909 44—total $996,669 21. From which deduct $22,500, amount received from U. S. Government for three steam cars—making the total construction, etc., expenditures, as shown in Income Account, $974,169 21.

The earnings of this road by months for the past three years are given in our Table of "Monthly Earnings."

INCOME ACCOUNT NOV. 30, 1862.

Balance to credit January 1, 1862		$239,919 12
Discount on $1,000 bridge bonds of O. & P. R. R. Co. redeemed by trustees		1,200 00

Postmaster General's Report.

The report for this year exhibits a very healthy financial condition of the Postoffice Department, and shows it to be thoroughly impregnated with the spirit of improvement. The efficiency of the service has been maintained at the highest point, accompanied by a great diminution of expenditures. The gross revenue of the Department for this fiscal year, including the standing Treasury credit for free mail matter, and a small amount appropriated for the relief of individuals, was $9,012,549 56. The expenditures for the same year amounted to $11,125,364 13.

The regular postal revenue for 1862 is only $49,775 50 less than it was for the fiscal year 1861, during a large part of which year revenue was paid in from all the States of the Union. This fact shows a large increase in the correspondence of the loyal States.

While the revenues have been so nearly sustained at the highest standard, the expenses have been largely reduced. For the preceding year the expenditure was $2,481,394 98 greater than last year. The following comparisons of figures are interesting:

Expenditures for 1860 for services in all States	$14,874,772 89
Revenues for the same year	9,218,067 49
Deficiency	$5,656,705 49
Expenditures for 1861, (service interrupted in 1861,)	$13,696,759 11
Gross revenues for 1861, (service interrupted in 1861,)	9,049,296 40
Deficiency	$2,112,814 57
Expenditures for 1862	$11,125,364 13
Revenues for 1862	9,012,549 56
Deficiency	$2,112,814 57
Reduction of expenditures, as compared with 1860	$3,749,408 00
Reduction of expenditures, as compared with 1861	2,481,394 00

The Department has not been for many years so nearly self-sustaining. This result is largely owing to the suspension of postal expenditures in the South, which were greatly in excess of postal receipts there; but not alone to that. A revision of all discretionary expenses has been made, and large reductions ordered. The pay of agents has been regulated and equalized. Economy has been established in the larger offices where waste was found. Incompetency, wherever found in official position, has been removed, and an effort made to adopt a standard of merit and of administrative efficiency, in lieu of other and inferior motives for appointment. The Postmaster-General expresses his determination to adhere to this course.

The number of postage stamps issued to postmasters during the year was	251,307,105
The number of stamped envelopes was	24,869,300
The value of these stamps was	$7,078,188 00
The value of letter envelopes was	733,255 50
The value of stamped newspaper wrappers was	23,648 50
Increase of issue over 1861 is	1,144,858 27
The total value sold was	6,910,131 89

The increasing demand on the part of the public for the stamped newspaper wrappers shows that their introduction has satisfied a public demand, and promoted the convenience of correspondents.

In the first quarter of the current year, ending 30th of September, the number of stamps issued to postmasters was 104,000,000, their calls being for about 200,000,000, which would have been nearly sufficient to meet the usual demand for a year.

This extraordinary demand arose from the temporary use of these stamps as a currency by the public, in lieu of the smaller demonstrations of specie; and ceased with the introduction of the so-called postal currency.

The difference between the value of stamps sold and stamps cancelled in the fiscal year 1862, show $738,379 96 as the amount in the hands of purchasers on the 1st July, 1862.

The whole number of dead letters received and examined during the year is 2,282,018, which is 267,000 less than in the previous year. The whole number of valuable letters sent out by the Dead Letter Office was 51,239. Many interesting details are given in the report touching the operations of this office. Out of 21,493 cases, where causes of non-delivery were ascertained, only 225 were attributable to the fault of postmasters. Eight hundred and twenty-two letters had no address whatever.

Congress at its first session, passed an act authorizing the employment of 25 additional clerks to facilitate the return of dead letters to their writers, with the expectation that the receipt of postages thereon would cover the appropriation of $20,000, made for their compensation. The result thus far shows that an excess of revenue therefrom over the expenses has accrued to the amount of several thousand dollars.

The whole number of postoffices in the United States remaining established on the 30th June, 1862, was 28,875, of which there were in loyal States and districts 19,973, and in insurrectionary States and districts there were 8,902.

The net increase in the established offices over last year was 121.

The number of cases acted upon by the appointment office during the year was 7,785.

The total postage accruing on United States and European mails during the year amounts to $1,144,095 82, being a reduction from the amount of the previous year of $217,940 88. Of the total amount collected, the excess collected in the United States was $212,607 36, which constitutes the balance paid to the several foreign departments, the cost of exchange being defrayed by the United States. The Postmaster General objects to this cost as inequitable, and proposes, if possible, to relieve the Department from this burden.

The Postmaster General has made special efforts to relieve the foreign correspondence of the country from its complexity, now embarrasing alike to correspondents. Separate negotiations have been found altogether inadequate to secure simple and satisfactory arrangements. He therefore opened a correspondence in August last, through the Department of State, with foreign administrations, proposing a convention of postal representatives at some convenient point, to consider the enumerated difficulties, and the means of remedying them. Several replies have been received from various Governments, and all are favorable and agree to the project. This country, comprising immigration from almost every civilized nation is especially interested in the subjects proposed to be brought before this conference. It is a sphere of postal improvement requiring the establishment of greater uniformity and some common principle of arrangement, and is connected with our prosperous commercial intercourse with other countries.

The mail lettings which went into operation on the first of July last in the western division were effected on such favorable terms as compared with the previous letting, that a reduction of expenditure resulted to the amount of $331,000. At the same time the length of route was increased by 6,159 miles, with an annual increase of transportation of 754,428 miles. Notwithstanding the increase of miles, the net saving is over 9 per cent. as compared with the previous term.

The total annual cost of inland service in operation on the 30th June last was	$5,853,834 00
To which add the cost of the various agencies, route, local messenger &c., &c	460,630 92
And the cost of service at that date is	$6,314,464 92

which includes $1,900,000 for the overland mail route, not before charged upon the revenue of this Department.

The saving in the lettings of July, 1862, is attributed to a strict adherence to the law of 1845, authorizing what is known as "Star bids."

The Report renews the recommendation for codifying all the postal laws, and hopes it may be done at this session.

Among the improvements under consideration by the Postmaster General, is that of embossing postal stamps on business and other envelopes supplied for that purpose by persons desiring to furnish their own designs. It is believed that this will largely increase the use of stamped envelopes in lieu of stamps, which is an object of great importance to the department.

He also discourages the use of the mails for transmitting money, and speaks favorably of a limited money order system, and of an amendment to the registry system, by which a return receipt shall be sent to the dispatching party as evidence of the fact and date of delivery of his package.

He also proposes to abolish many of the discriminating rates of postage now existing, approximating as far as possible to uniformity, and increasing the efficiency and extent of the delivery and collection of letters by carriers in cities.

The public attention is called to the great importance of good postal officers for a successful administration of this Department. If postmasters and their clerks are selected without chief reference to their efficiency and personal fitness, no amount of good legislation will secure public satisfaction. An energetic, faithful and efficient postmaster, devoted to the interests of the service, should be retained so long as he illustrates those qualities in his administration of the office. He attributes the success of the English system largely to the the permanent character of their officers, and their familarity with the laws and regulations, and regrets the extent to which other motives to appointments have prevailed in this country. He urges a return to the old standard of honesty, capability and fidelity; and anticipates more public satisfaction and administrative success from the adoption of such a principle, than from any other single act of reform. The documents as a whole will be read with unusual interest, and contains numerous suggestions of great importance to this branch of public service. He uses this language; "It is my intention to displace incompetency and indifference wherever found in official position under my control, without any discrimination in favor of appointments which I may myself have made under misinformation of facts."

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Jan. 23, 1863, was as follows:

Passengers	$14,701 10
Freight and live stock	46,567 14
Mails and sundries	2,027 46
Total	$64,095 70
Corresponding week of 1862	51,751 53
Increase	$12,344 17

The earnings of the Grand Trunk Railway for the week ending Jan. 24, 1863, were:

Passengers	$16,276 19
Freight and live stock	73,853 54
Mails and sundries	4,024 00
Total	$94,153 73
Corresponding week, 1862	83,313 72
Increase	$10,840 01

The earnings of the Illinois Central Railroad for the 3d week of January, 1863, were:

	$64,056 98
Do., 1862	47,986 65
Increase	$16,070 33
Increase in first 3 weeks of Jan. 1863	$42,524 67

The earnings of the Chicago and Alton Railroad for the 3d week of Jan., 1863, were:

	$23,704 53
Same week, 1862	19,649 53
Increase	$4,055 00

Cleveland and Pittsburg Railroad.

Length of main line, Cleveland to Wellsville	101 miles.
" Tuscarawas Extension	32
" Hanover Branch	1½
" Beaver Extension	22
" Wheeling Extension	47—102½ "
Total length of line owned by company	203½ "
Pittsburg, Fort Wayne and Chicago Railroad used under lease ($85,000 per annum)	26 "

The gross receipts of the company for the years ending November 30, 1861 and 1862, were as follows:

	1861.	1862.
Passengers	$376,936 93	$435,527 08
Freight	682,254 14	930,410 12
Mails, Express, rents, &c.	55,750 78	70,379 91
Total receipts	$1,114,941 85	$1,436,317 11
The payments were:		
Expenses of operating	$616,335 41	$662,064 88
Pittsb. F. Wayne & Chicago Lease	85,000 00	85,000 00
Interest on 1st Mortgage Bonds	65,730 00	55,720 00
Interest on 2d Mortgage Bonds	129,325 00	86,065 00
Interest on 3d Mortgage Bonds	123,235 00	81,497 50
Interest on Funded Debt Mort. B'ds	.....	26,235 00
General interest and Exchange	6,780 89	32,651 29
New Engines and Cars	18,041 21	30,219 81
New Bridges, Station Houses, &c.	31,789 66	43,581 70
Total payments	$1,076,237 17	$1,109,935 18
Excess of rec'pts over expenditures	$38,704 68	$327,281 93

The receipts and expenditures for the past eleven years have been as follows:

Years.	Gross Earnings—Pass'ger.	Freight.	Mails, etc.	Total.	Operat'g expenses.	Earnings less expenses.	Divid.
1852	$187,291	$107,635	$10,872	$305,798	$127,398	$178,400	12
1853	215,256	203,331	14,095	432,682	165,405	267,277	10

Stock Exchange and Money Market.

One of the most noticeable events on the money market the last week was the sudden fall in the price of gold, having the appearance somewhat of the effect of a panic. Whether it is destined to advance again, or fall still lower depends on a number of circumstances. There is evidence of a disposition both at Washington and Albany to legislate upon this subject, so as to prevent an illegitimate use of the article by Banks or Brokers. It may be stated, that legislation of this character is considered by political economists both unwise and unavailing. There are some things in this world which can never be controlled by law, and the employment of capital is one of them. During the French revolution the plan was tried to an extreme without success, and a similar attempt in the confederate states has been equally unsuccessful. To put down the price of gold there is but one way, and this is to make its use less necessary, not by prohibition but by the teachings of commerce and business, by which all men are generally convinced. As long as the balance of trade is against us, and the people require and will have foreign goods, no matter what they cost, so long will gold be in demand, whether a paper currency exists or not. As long as the Government continues to receive its duties in coin, to that extent there is an additional demand; so long also as the passion for watches and jewelry is carried to its present excess, there will be a demand for it by the manufacturers of those articles.

We have then these causes constantly operating for a rise, and one other, that of the disposition to hoard, existing every where in the world in time of public danger. This disposition is shown some times to such a degree, so great is the distrust of all usual securities, that by a vast number of persons especially in the old countries, the precious metals are actually buried in the ground, deemed by the timid owners the only safe place of deposit.

It is suggested that there is an indirect remedy in the shape of a legitimate financial measure, which might bring the price of gold down to a more reasonable figure, with the additional advantage of relieving the people from a pressure on their pockets from which they are now really suffering. To comprehend this, it is necessary first to state that our importers of foreign goods are obliged to buy them for gold, or foreign exchange at almost the price of gold, and when these arrive here, they are again obliged to pay the duties in gold. This of course enhances the price of those goods to the consumer, who in fact pays the cost

in gold, for remittance and possibly the cost of gold for the duties. Is it any wonder then that goods are rising rapidly, far beyond their intrinsic value, or that fortunes are sometimes made by speculations in them, even while they are unopened in the warehouses, for they know the profits on these transactions are just as sure to follow in the present state of things as the consumption itself. Thus a person or a family which uses a certain amount of foreign goods, is in fact not only paying the full value of them, the duty laid on imports by the Government, but the price of gold for the foreign remittance and perhaps for passing the Custom House. If the amount of this consumption be, as we will suppose in the case of persons in moderate circumstances, two hundred dollars a year, the price to them at the merchant's counter will for those goods be three hundred. This loss of one hundred dollars is believed by many persons to be factitious and unnecessary, a wasting away of the substance of the consumers, which is onerous under the additional weight of taxation, and might be remedied in the simplest manner. The idea is certainly worthy of consideration.

It is that Congress shall authorize the Secretary of the Treasury to issue say fifty millions of customs' duties notes, or some amount equivalent to what is paid in for duties receivable as specie for duties on imports, and sell them in the market for whatever price they will bring. This would ensure a handsome profit to the Government at the start, and as they fell gradually to par, they would drag down the price of gold accordingly. No merchant would buy gold at 60 when he could get these Custom House duty notes at a less price. Gold would inevitably fall, and as a consequence the prices of imported articles would follow, and the public would buy their goods so much cheaper.

Consumers would gain the amount of the difference in the prices paid for articles imported, and would save enough by that very means to bear taxation more easily. In the case of the family which pays three hundred dollars for two hundred dollars worth of goods, under the present system they would save enough to pay perhaps the whole amonnt of their taxes!

We have thus given a brief outline of the proposed policy, and we must confess it appears just and feasible. The Government if it can lighten the burthens of the people should unquestionably do so, and the immediate effect on the Treasury would be beneficial, for if it knocked down gold to a fair value as a commodity or medium for exchange, it could procure as much of it as was necessary to the public and the bondholders would have renewed confidence in the future payment of their interest in that form. Thus all interests would be materially advanced if the idea is practicable, and we confess we as yet look in vain for any sound objections. We shall take care to bring the subject to the notice of Congress and the able chief of the Treasury department.

The rumor of the disaster at Charleston has had the effect of stiffening the price of gold. The deliberate conviction of the street, however, is, that this disaster is not so serious as first supposed, and that an immediate and final attempt on Charleston must be made, to settle the question already mooted, whether the blockade is really and legally raised. This question can be best settled by a capture, and not so satisfactorily in any other way.

The following quotations of sales are in addition to those given elsewhere in our columns:

New York.—Illinois State bonds, 1862, 101; do., 1877, 109; do., 1879, 108½ and 110; Illinois Canal registered bonds, 100; Ohio 6s, 1886, 120; Brooklyn City 6s, 110; Illinois Central full stock, 90; do., cancelled bond scrip, 80.

Boston.—Northern (Ogdensburg) 1st mort., 105; do., 2d mort., 16½ and 20¼; Rutland and Burlington 1st mort., 66 and 75; do., 2d mort., 7½; Vermont Central 1st mort., 30¼ and 40; Vermont and Massachusetts 6s, 106½; Cambridge (horse) R. R. 6s, 1882, 109⅞; Worcester and Nashua, 76; Concord, 66; Concord and Portsmouth guar., 129; Cheshire, pref., 29½; Rhode Island 6s, 120; Vermont 6s, 1871, 114¾; Connecticut 6s, 115; Mass. 6s, 1876, 136¼; New Hampshire 6s, 1874, 116¼; do., 1869, 114; do., 1867, 112⅝; do., 1870, 113; Maine 6s, 1870, 115; Albany City 6s, 1879, 115¼; Brooklyn 7s, 1865, 102¼; Chicago Municipal 7s, 115; Charlestown City 6s, 108; Boston and New York Air Line 6s, 60.

Philadelphia.—City 5s, 95; Philadelphia, Wilmington and Baltimore 6s, 132; Camden and Atlantic, 8½ to 17½; do., pref., 16½ to 24¾; do., 2d mort., 60; Cleveland and Mahoning 2d mort., 97; Pennsylvania State 6s, reg., 100; Long asland 7s, 108½; Allegheny 7s, 100; Philadelphia and Erie, 35 to 39; 17th and 19th streets, 11; Ridge Avenue, 17¾; 5th and 6th streets, 57½; North Penn. 1st mort., scrip, 82½; Sunbury and Erie scrip, 90½; Elmira Chattle scrip, 65; Chester Valley, 3; Delaware Division, 41; West Branch, 80; Schuylkill Nav., 5⅛; do., pref., 14½; do., 6s, 1872, 100; do., 1882, 70; Morris Canal, 56; do., 1st mort., 113; Union Canal 6s, 23; Chesapeake and Delaware 6s, 102; Huntington and Broad Top, 20½.

Baltimore.—Central Ohio income, 25; do., 4th mort., 30½; Western Md. bonds, 86; Maryland State bonds, 1870 and 1890, 117¼; North Western Va., 4th mort., 25½.

Gauge of the Pacific Railroad.

Not many days since a proclamation was issued by the President stating that in virtue of the authority vested in him by the act authorizing the construction of the Pacific Railroad, he had determined its gauge should be fixed at five feet. It is understood the Attorney General strenously advocated the measure and that his influence outweighed the opinions of many eminent railroad managers.

We regret this decision of the President. In his attempt to compromise, he has pleased no one. All the Railways now reaching the Missouri river are of the uniform gauge of 4 feet eight and one half inches. On the contrary, there is not anywhere in the North or West any of 5 feet. If he had said six feet, a connection might have been made with the Atlantic and Great Western and Erie. If the usual gauge of 4 feet eight and one half inches had been adopted, there would have been no breakage of bulk between New York and San Francisco, and all our railways but one would have been placed on an equality.

It is understood the President said there would have to be a break at the Missouri river, and therefore the gauge was of no consequence, but in this he was much mistaken. Eminent engineers assert that a bridge can be easily built over the river, and if not, then the trains can be transported across in ferry boats just as they now are on the Susquehannah, or at Buffalo for the Lake Huron Road. The President's decision is therefore unfortunate and it is expected Congress will revise it before they adjourn. Mr. Lincoln did not understand the effect of this decision, which will be damaging in the cost of construction, in the necessary change of models and machinery, and will also seriously interfere with the cheap working of the line, as well as increase the expense of transportation. Mr. Lincoln would have done well to have consulted Engineers instead of Lawyers and Attorney Generals. There seems to be an unusual fog prevailing at Washington.

Rutland and Burlington Railroad.

An adjourned meeting of the holders of the first mortgage bonds of this company was held in Boston the 27th ult., John S. Farlow in the chair. Hon. Dwight Foster, chairman of the committee—consisting of Messrs. Foster, William T. Hart, J. M. Wightman, Lorenzo Sabine, and John S. Farlow—appointed at a former meeting to consider what measures should be taken to secure the interests of the first mortgage bondholders, submitted a report. It was set forth that a first mortgage had been taken some ten years ago for $1,800,000, that as fourteen semi-annual coupons amounting to $882,000 had not been paid, the road was now in arrears to the first bondholders to the amount of $2,682,000. The security for this debt was a first mortgage on a railroad, a hundred miles in length, with all its property and appurtenances, and which ought to pay 6 per cent on its cost. An agreement was made some years since between all the parties interested, which was confirmed by a decree in chancey in Vermont obtained in an amicable suit where the trustees under all the three mortgages and the corporation were parties, but the second mortgage trustees were to run the road until the maturity of the first mortgage, the 1st of February, 1863, when they were to deliver possession of all the property to the trustees under the first mortgage, who were to run the road according to the terms of that instrument. While the road has been in possession of the second mortgage bond-holders it has been greatly improved and is now in good condition, but only a few of the coupons of the first bond-holders have been paid. The committee say that the interests of the first bond-holders require that their trustees take possession of the road and foreclosure the mortgage unless after possession some other satisfactory arrangement can be made. They reported two resolutions, which were adopted by the meeting, for the appointment of an Executive Committee to take such measures as they may see fit to secure possession of the railroad and foreclose the mortgage; and also for the appointment of a Finance Committee to take charge of a voluntary assessment of one per cent. on the amount of the bonds held to defray expenses and litigation if opposition is made by the other bond-holders. The Executive Committee appointed was Dwight Foster, W. J. Hart, John S. Farlow, Joseph M. Wightman, John G. Page, Joseph Warner and Lorenzo Sabine. The Executive Committee were authorized to appoint the Finance Committee and selected the following gentlemen:—J. Amory Davis, President of the Suffolk Bank, Benjamin E.

Bates, President of the Bank of Commerce, and Wm. Thomas, President of the Webster Bank. In order to obtain possession of the road, it is required that a power of attorney should be given to the Executive Committee by holders representing two-thirds the amount of the mortgage, or $1,200,000. Those present represented $800,000 of the bonds, and the power of attorney was signed by them. It is thought that the decree of the court is so clear that no opposition will be made to their claims. It was voted to publish the report of the committee and the decree of the court.

Rome, Watertown and Ogdensburg R. R.

The following is a comparative statement of the earnings and expenses of this road for the month of December, 1861 and 1862:

	1861.	1862.
EARNINGS.		
From passengers	$13,527 20	$20,021 87
From freight	20,361 34	22,071 35
From mail	2,483 84	2,027 28
Total	$36,372 38	$44,120 50
EXPENSES.		
Maintaining road	$20,414 37	$10,580 13
Repairs machinery	2,307 28	2,299 58
Operating road	8,237 91	12,818 12
Overcharges refunded	107 02	.....
Total	$31,066 58	$26,387 83
Net	$5,305 80	$17,732 67

Philadelphia and Reading Railroad.

The business of the Philadelphia and Reading Railroad Company for the month of December, 1861 and 1862, has been as follows:

	1862.	1861.
Received from coal.	$357,966 33	$202,693 70
Do. merchandise.	52,714 69	44,468 12
Do. travel, etc.	44,145 27	31,057 59
	$454,826 29	$278,219 41
Transport'tion, roadway, dumpage, renewal fund, and all charges	196,462 62	122,785 85
Net profit for the m'th	$258,363 67	$155,433 56

The Pacific Railroad.

The following is a copy of the President's decision, filed in the Department of the Interior, determining the gauge of the Pacific Railroad:

Whereas, by the twelfth section of an act of Congress entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri river to the Pacific ocean, and to secure to the government the use of the same for postal, military, and other purposes," approved July 1, 1862, it is made the duty of the President of the United States to determine the uniform width of the track of the entire line of the said railroad, and the branches of the same, and whereas, application has been made to me by the Leavenworth, Pawnee and Western Railroad Company (a company authorized by the act of Congress above mentioned to construct a branch of said railroad,) to fix the gauge thereof:

Now, therefore, I, Abraham Lincoln, President of the United States of America, do determine that the uniform width of the track of said railroad, and all its branches, which are provided for in the aforesaid act of Congress, shall be five feet, and that this order be filed in the office of the Secretary of the Interior for the information and guidance of all concerned.

Done at the city of Washington, this twenty-first day of January, in the year of our Lord one thousand eight hundred and sixty-three.

ABRAHAM LINCOLN.

The Financial Situation.

The financial situation at Washington has changed so frequently since our last CIRCULAR that we find it difficult to say much on the present occasion which would be really applicable to the subject two or three days hence. The speculators in gold coin, through the last week, in their eagerness to fan what they assume to be a popular distrust in the National currency of U. S. Notes have, without intending it, and to the defeat, in a measure, of their own hopes of a still greater advance and profit in gold coin, thoroughly alarmed the course of legislation in Congress on the Treasury bill, which after passing the House of Representatives last week, is held in abeyance in the Senate for radical amendment. At the moment it is wholly uncertain what shape the measure will finally take. It would therefore be premature as well as useless to attempt to discuss details, now proposed, but which may be changed in an hour. The immediate prospect in the Senate is, *that the currency section of the bill will be stricken out*, and that by substituting a general banking scheme, free to the whole country where a further infusion of bank note circulation may promise usefulness or profit, and *the House of Representatives*—deferring to the apprehensions of the Secretary and his alarm at the advance in gold coin—*will probably concur.*

There would seem to be a substantial reason for this sudden change beyond the rise in gold and the probable usefulness of a bank note circulation secured by pledge of U. S. Stocks, in the fact that the volume of U. S. Notes, together with the old bank circulation of the States, is already felt to be sufficient for all ordinary trade and commercial purposes, and that when made full under the recent joint resolution of Congress, it *ought to be sufficient* also for all Treasury purposes. *If it is not*, the query suggests itself whether an addition of $200,000,000 or $300,000,000 would, under the present depreciation, help the main difficulty which we assume to be the floating of the Public Loans hereafter required to carry on the Government. The circulation of U. S. Notes, now authorized is as follows:

1. Act of Feb. 25, 1862, new paper.	$90,000,000
2. Same Act substituting like paper for the Custom House notes, as fast as absorbed	60,000,000
3. Act of July 11, 1862, new paper	100,000,000
4. Same Act, reserve of new paper	50,000,000
5. Joint Resolution, Jan. 1863	100,000,000
Total of all	$400,000,000
Already issued:	
Whole of class No. 1.	$90,000,000
Of class No. 2	50,000,000
Whole of class No. 3.	100,000,000
	240,000,000
Leaving in reserve about	$160,000,000

That the prospect of a further addition of $300,000,000 (or $200,000,000 in addition to the joint resolution,) more under the third section of the bill passed by the House, but now arrested in the Senate, was quickly availed of by speculation to put gold up from 140 to 160 per cent., there is no question; and there seems as little doubt that this movement has for the present at least defeated itself by creating a degree of alarm and reaction in Congress which is to lead to the striking out of the currency section of the bill altogether, or has also done more for the favorite banking bill of Mr. Chase, than popular sentiment could otherwise have been induced to do for it in Congress or out of it.

We have only to add that the effect upon the Gold and Stock Markets is to create a serious pause in speculation. How far the two interests will go together, in case the price of gold should as rapidly return to 140 or less as it advanced from this point, remains to be seen. The speculation in the Railway shares early in January was really more vigorous and continuous when gold was 15 or 20 per cent. lower than after it rose above 150. Since then the movement has been feverish and the ups and downs of the market spasmodic.—*Hallett's Financial Circular.*

Flax Culture in Central Ohio.

The people of Central Ohio are preparing to raise a large quantity of flax the coming season. It is said the present price of flax seed will fully reimburse for the whole labor and cost of raising a crop of flax, and with a vast amount of land in the State unoccupied by any other crop, probably the people cannot in any other way better improve their time.

New Jersey Railroad and Transp. Co.

The following is an abstract of the report of this company for the year ending December 31, 1862:

RECEIPTS.		
From passengers		$793,814 72
From freight		110,392 94
From U. S. Mail, rents, express, freight and other sources		206,879 09
		$1,111,086 75
EXPENSES.		
Maint'ning railroad, bridges and buildings	$76,628 06	
Repairs of locomotives, cars and machinery	67,813 32	
Fuel—cost and labor in preparing	79,119 78	
Operating the road and transporting passengers and freight	224,499 31	
Office expenses, salaries and contingencies	10,891 46	
		458,962 43
Total		$652,124 32
Disbursed as follows, viz:		
Interest on bonds		$41,050 00
Transit duty on passengers and freight		22,818 73
State tax on capital stock		21,989 00
Government tax		14,617 79
Dividends in cash, August and Febr'y		439,770 00
Profit and loss, to surplus earnings		111,878 80
		$652,124 32

The number of passengers transported over the road during the year was as follows:

Over the whole line of the road	432,711½
Between Jersey City and Newark	1,245,730
" " Elizabeth	247,020½
" " Rahway	67,244
" " N. Brunswick	90,736
All intermediate places	311,183
Total	2,394,625

The number of miles run by passenger, freight and other trains was 512,349.

The number of tons of goods, wares and merchandise transported over the road during the year was as follows:

Over the whole line of the road	4,202½
Between Jersey City and Newark	49,660
" " Elizabeth	3,935
" " Rahway	3,546
" " N. Brunswick	8,539
All intermediate places	40,333
Total	110,215½

GENERAL STATEMENT.

Capital stock		$4,397,800 00
Funded debt, including $485,000, the cost of the property and privileges purchased of the Jersey associates		678,000 00
Profit and loss, being surplus earnings, represented by permanent improvements, and the property and cash stated below	$436,312 88	
Less amount paid for relaying road with new rails and other improvements	36,296 11	
		400,016 77
Dividend, 1st Jan., payable 1st Feb., 1863		219,887 50
Total		$5,695,704 27

COST OF RAILROAD AND EQUIPMENTS.

For graduat'n and masonry, bridges, superstructure, iron, passenger and freight stations, buildings and fixtures, engine and car-houses, workshops, machinery and fixtures, engineering, land and land damages		$3,583,950 90
Locomotives, tenders, and snow-plows		168,175 09
Cars—pass'ng'r, fr'ght and baggage		229,203 36
Property, viz:		
Bridge, ferry, turnpike, and other stocks, real estate, ferry boats, privileges and fixtures (including the property and privileges purchased of the Jersey associates for $485,000)		1,397,974 41
Cash in bank and cash items receivable on demand		316,400 51
Total		$5,695,704 27

President—JOHN S. DARCY.

Treasurer—H. J. SOUTHMAYD.

Sec'y and Gen'l Sup't—F. WOLCOTT JACKSON.

Railroad to the Pacific.

In order that we may understand the importance of this project, it may be well to note what our Canadian friends think will be the consequence of a similar work of their own, now seriously contemplated, viz: "a railway from Western Canada to Red River, thence to the head waters of the Fraser, and thence to the Pacific." In a recent letter of the Hon. Malcom Cameron, who has gone to England as a delegate from British Columbia, we find the following glowing eulogy of the project.

"Canada would thus become the centre—the very life's blood of the 'great thoroughfare of the universe,' over which every nation will pass and repass in the expanding civilization and Christianisation which are going on from the east to the west, and which is now alive to the truth that there are no Rocky Mountains to overcome. The Almighty left a level open passage in this huge mountain chain. There are no natural barriers, it is all plain and easy. With knowledge of the facts, faith in our resources, courage in our hands, honesty in our rulers, within two years the waggon and the steamboat will have made us familiar with a route that may be accomplished in twenty days. In short, in less than ten years the steam whistle that awakes the drowsy 'blue nose' as it leaves Halifax on Monday morning will cheer the people of Westminster B. C. as they sip their tea on Saturday night; while the magnificent China steamer will be smoking at the dock, waiting to bear the English merchant to Hong Kong and Japan; the steamer Austaalia to carry them to the Sandwich Islands and New Zealand; the Labouchere, which now runs to the Russian possessions, will have given place to the Sitka, of 3,000 tons, and the Golden Gate from California; and steamers from every seperate South and Central American state will all be lying with their bows in the bank, as was once the case on the now dammed-up Mississippi. Hoping to live to see this picture of the future, I bid you adieu, as I am off to England."

Gas from Petroleum.

Dr. W. Gibbs of this city states that he has found the illuminating power of petroleum gas, as determined by actual photometric experiments, to be equivalent to 27.48 standard candles, while the average of the ordinary coal gas supplied by our companies is but 16. The St. Nicholas Hotel is said to be lighted with the petroleum gas to the extent of 36,000 feet per night and day, at a cost of about $16,000 per annum, while its former expenditure for gas light was $32,850.

New York State Canals.

ANNUAL REPORT OF THE AUDITOR.

The important facts and statements of this report are presented below:

There was in the Treasury and invested, belonging to the Canal Fund, on the 30th September, 1861, the sum of	$2,604,621 25	
Received during the fiscal year ending on Sept. 30, 1862	7,793,494 37	
Total receipts, and available and unavailable balances		$10,398,115 62
Payments during the year, as shown by the tables herewith submitted		5,808,811 79
Leaving a balance on Sept. 30, 1862, of		$4,589,303 83
Total balance invested, Sept. 30, 1862		4,593,306 49

The above amount belongs to the several constitutional Sinking Funds, pledged to the payment of the principal and interest of the stock debt of the State, including the sum for the support of the Government &c.

The receipts from the Canals during the fiscal year were:

From tolls collected on all the canals		$4,790,518 09
Rent of surplus waters		6,765 00
Interest on current canal revenues		39,363 49
Miscellaneous receipts		18,343 09
Total		$4,854,989 67
Payments during the year:		
To Canal Commissioners, for repairs	$236,318 16	
To contractors, for repairs	296,168 98	
To superintendents, for repairs	131,969 64	
To collectors, for salaries, clerk hire, pay of inspectors, and expenses of collectors' offices	58,023 35	
To weigh-masters	8,430 85	
For salaries chargeable to annual revenues, refunding tolls, printing and other miscellaneous payments	42,537 34	
		$773,398 32
Surplus revenues		$4,081,591 35
Payments to Sinking Fund,		
Under sec. 1, art. 7	$1,700,000 00	
Under sec. 2, art. 7	350,000 00	
Under sec. 3, art. 7	1,146,242 66	
Paym'ts to the Treas'y,		
Under sec. 8, art. 7, to defray the expenses of Government	200,000 00	
		$3,396,242 66
Remainder to be appropriated, &c.		$685,348 69

Annexed is a recapitulation of the Canal Stock Debt, paying interest Sept. 30, 1862:

Under art. 7, sec. 1 of the Constitution	$8,839,024 76
Under art. 7, sec. 3 of the Constitution	12,000,000 00
Under art. 7, sec. 10 of the Constitution	642,585 49
Under art. 7, sec. 12 of the Constitution	2,500,000 00
Total	$23,981,610 25

The annual interest on the above is $1,381,970 76.

Of the Canal Debt Sinking Fund on hand there remains $3,532,784 32; $5,532,193 66 have been paid. Balance on hand Sept. 30, 1862, $1,533,374 98. The first instalment of the debt that matures under this Sinking Fund is July 1, 1864, when $400,000 becomes due, and in October following $1,200,000 is redeemable. The Sinking Fund for the redemption of the Canal debt is $2,892,833 57—paid during the year $1,928,000—balance on hand September 30, 1862, $964,833 37. Included in the above balance as now stated is the sum of $406,242 65, received from the surplus revenues of the canals at the close of the fiscal year covered by this report. There is also included in the above balance the sum of $28,112 03, due from broken banks, which is now and probably ever will be unavailable. Deducting these two sums from the balance on hand at the close of the fiscal year, and there will be a deficiency of $180,478 89 in the fund to pay the interest on the debt. This deficiency will be made good by the receipts from taxes to be collected the current year.

If, however, the State continues to receive its canal tolls, taxes, and other dues in the paper currency of the country, and to pay the quarterly interest on its stock in specie or coin, it will be very difficult to estimate what the deficiency will be. The whole loan, called the Floating Debt Loan, principal and interest, is secured by an irrepealable annual tax levy. Of the above balance $276,764 76 are set apart and invested to pay the principal maturing in 1866.

The Repair Trust Fund interest is $93,501 22, besides the accumulations of interest which are added to the principal at the close of each six months the loan is held. When reinvested, the accumulations are added to the original deposit and loaned as principal.

Of this debt, paying interest, on the 30th day of September, 1862, there was held

On United States account	$22,528,782 89
On foreign account	1,452,827 38
Total	$23,981,610 27

In 1863 and 1869 there will fall due of the principal of the canal stock debt, amount required in currency, $5,933,097 98.

This sum will vibrate as the rate of discount rises and falls.

The tolls and other canal dues are not paid in gold and silver, but in the bankable currency of the State.

The 4th section of the act, Chap. 271 of the Laws of 1859, which provided for a loan of $2,500,000 to pay the floating debt of the State, authorized and directed the levy of an annual tax sufficient to pay the interest and redeem the principal of the loan authorized within 18 years, from the time it was contracted. This loan is reimbusable in three installments, as follows:—$800,000

July 1, 1866; $800,000 July 1, 1872, and $900,000 July 1, 1877.

On the 1st day of July, 1866, the Sinking Fund will have accumulated, from these annual taxes, or from other sources, a capital of $800,000 to pay this debt. The payment cannot be postponed. This Sinking Fund, at the close of the fiscal year, amounted to $276,754 76.

The estimates for the business of the present fiscal year are as follows:

Receipts from tolls from Sept. 1, 1862, to the close of navigation...	$2,314,613 00
Receipts from tolls from the opening of navigation in the Spring of 1861 to Sept. 1 of the same year.....	2,200,000 00
	$4,514,613 00
Estimated proceeds of the tax required to be annually collected under the act, chap. 271, laws of 1859...	$288,889 00
Total estimated gross receipts..	$4,803,502 00
Deduct appropriation for collection, superintendence and ordinary repairs	800,000 00
Total estimated net revenue...	$4,003,502 00

This sum is charged, under the Constitution, with the following annual payments:

Under sec. 1, art. 7...	$1,700,000 00	
Under sec. 2, art. 7...	350,000 00	
Under sec. 3, art. 7...	710,000 00	
Under sec. 3, art. 7...	406,242 65	
Under same sec. & art.	200,000 00	
Under the act, chapter 271, laws of 1859, section 12, article 7.	288,889 00	
		3,655,131 65
Remainder over.....		$348,370 35

Of the prospective traffic of 1863, the Auditor indulged in anticipations that have been more than realized during the season of navigation. The future demand of Europe for our surplus breadstuffs is not now so clear as then, nor are we quite certain that our surplus for export will be near as large in 1863 as they were in 1861 and 1862. The tonnage in vegetable food alone in 1861 was only 747,573 less than the whole number of tons carried on all the canals of the State in 1847 of every description of property moved. Comparing the movements of 1860 and 1861 with former years, as far back as 1847, and we must be satisfied that our position in reference to trade on the canals since 1859 has been an exceptional one to a considerable extent. The traffic on the canals has been somewhat, but not largely, increased by the closing of the Mississippi river. This we know by comparing the grain movements from the Western States in 1860, when the river was open, with those of 1861, when it was closed.

The aggregate of $24,712,253 67 is what has been received from the sources named and applied in payment of the completion of the public works since 1846, including payments for land damages and expenses of engineering—a sum far exceeding the highest and widest estimate ever ventured upon by the most vehement doubter of engineering infallibility.

When, in 1853, the 3d section of the 7th article was amended so as to permit the borrowing of nine millions of dollars to complete the enlargement, the estimates showed this was all that would be needed for that purpose, but we have already exceeded it by $9,160,287 87, and more is required.

In addition to the above, we have made deficiency loans, on the credit of the Sinking Fund, to pay the quarterly interest on the new enlargement debt of $10,500,000, to the amount of. $1,500,000 00

Since 1854 we have levied and raised taxes to pay the quarterly interest on that debt, to..... 3,318,448 21

Making a total of..... $4,818,448 21

The Auditor will not indulge in any extended reflections. He believes that the future of our Canals is more hopeful and encouraging than we could have anticipated previous to 1860. Our public works, in many material respects, are imperfect and need improvements; but we should lay aside all thought, design or expectation of calling for aid outside of their revenues.

B. F. CORLIES & MACY,
No. 33 Nassau St., opposite the Post Office.

1m5 P. R. WILKINS & CO., No. 5½ Pine st.

TO CAPITALISTS.
COAL MINES FOR SALE.
VERY valuable coal mines at La Salle, Illinois, in full working order and doing a profitable business. Having the advantage of a six feet vein, two leading railroads and a canal and navigable river by the works, with the large and growing city of Chicago near, and being in a country destitute of wood, these mines must become among the most profitable in the United States. Samples of both kinds of coal (cannel and bituminous) can be seen at our office. These mines will be sold at a great sacrifice. Apply to ADRIAN H. MULLER, P. R. WILKINS & CO., No. 5½ Pine st.

THE NEW YORK CENTRAL R. R. CO.
TREASURER'S OFFICE,
ALBANY, January 21, 1863.
SIXTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of THREE AND ONE-HALF per cent. on the capital stock thereof, free of the United States income tax, payable on the twentieth day of February next, on stock registered at New York Boston and Albany, respectively, and on the twentieth day of March next on stock registered at London.
Dividends in New York will be paid at the office of DUNCAN, SHERMAN & Co.; in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the ALBANY CITY BANK; in London, at the UNION BANK OF LONDON, pursuant to circular and notice of December tenth, 1862, from the Transfer Office in that city.
The Transfer Books at New York, Albany, and Boston will be closed at the close of business on Saturday, the thirty-first day of January instant, and be re-opened on the morning of Monday, the twenty-third day of February next. JOHN V. L. PRUYN,
6t5 Treasurer.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years, with uniform success, they confidently offer their services to those requiring such aid.

BOUGHT AND SOLD ON COMMISSION.

The New National Loan.
U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

BANKERS,
AND DEALERS IN
ALL ISSUES OF GOVERNMENT
AND OTHER
FIRST CLASS SECURITIES,
38 Wall st., N. Y.

VERMILYE & CO.,
No. 44 WALL ST., NEW YORK.

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in ums of
$50, $100, $500 and $1,000.

The Registered Bonds in sums of
$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 3m45

An Invention of Rare Merit.

LONG WANTED, AND FOUND AT LAST!

A Kerosene Lamp Chimney, Easily Cleaned

AND WHICH

WILL NOT CRACK OR BREAK

FROM SUDDEN CHANGES OF

TEMPERATURE.

THE CHIMNEY in common use breaks from unequal expansion and contraction, caused by the upper portion becoming much more highly heated than the lower portion. This constant liability of the Chimney to be broken by being suddenly cooled or "over-heated," is entirely removed by a unique and beautiful invention, BROWN'S METAL TOP LAMP CHIMNEY, which, being made in accordance with the simple law of expansion and contraction, is found to be almost "fire-proof," as far as heating by the flame of the lamp is concerned.

The clear, positive superiorities of the NEW LAMP CHIMNEY over the old style, are—

1. It will not crack or break from sudden changes of temperature, or "over-heating."

2. The top can be instantly removed, and the glass wiped perfectly clean in a moment WITHOUT WETTING.

3. It is shorter than the common chimney, therefore less liable to accidents and more convenient for carrying about the house; it is of elegant proportions and a decided ornament to the lamp, which will be found to burn with a clear, steady and beautiful light.

It is really the ideal of perfection in a lamp chimney, and after using one for an evening you will wonder that you could tolerate the old expensive style.

A "BROWN'S METAL TOP LAMP CHIMNEY," **IS WARRANTED, with ordinary care, to last just as long as the lamp on which it is used.**

Price (with a small SHADE for common size,) Zinc-top, **25** cents, Brass, **31** cents; Silver-Plated, **50** cents.

Dealers will be furnished, per Express, with a SAMPLE BOX containing one-half dozen Chimneys, assorted styles and sizes, with circulars, colored show cards, Price list, etc., on receipt of **$1.25.**

BROWN'S

Metal Top Lamp Chimneys

ARE MANUFACTURED ONLY BY THE

NEW LAMP CHIMNEY MANUFACTURING COMPANY.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

Railroads and Markets for Produce.

History everywhere exhibits an energetic reaction between National progress and the development of traffic. In the Italian and Hanseatic cities, in Holland, England and France, we see the productive power and consequently the opulence of individuals keeping pace with the increased facilities of transportation, the enlargement of commerce and the multiplication of markets. Nowhere else in the world, however, has domestic trade been extended with so much enlightened energy as by the railroads, canals, and other communications of the United States. Hence no country under the same disadvantages from sparse population, extent of territory, and limited capital, has ever progressed with so much rapidity in production and material prosperity. Improving to the utmost every means of natural and artificial communication, we have regarded stagnation as synonymous with decrepitude and decay. Hence has arisen an active development of our manufactures, agriculture and internal commerce until the growing opulence of all classes of our people has become the wonder and the envy of the more fettered and less enterprising nations of the Old World. Every patriot will strive, and every friend of liberty must earnestly desire that our political troubles, if they check for a time, may not materially weaken, or permanently compromise the future outgrowth of our National resources.

The two great causes which have contributed to this growth are our rapid production and our free distribution of wealth. Railroads have rendered immense service to each of these sources of our prosperity. And both are equally important.

It is a shallow political economy which declares that labor and capital when devoted to distributing merchandise among the consumers, are much less advantageous to the community than when employed in agriculture or in manufactures. For of what value are the products of industry except they can find a remunerative sale and a ready market.

The early history of the Pacific States affords a striking illustration of the swiftness and certainty with which a contiguous and sure market for produce builds up the prosperity of a community. Prior to the gold discoveries in 1847 the physical advantages enjoyed by this whole region were almost unvivalled. Its crops were immense and of fine quality. Still its population were impoverished though hardy and industrious. For the first four seasons the progress of our enterprising pioneers in Oregon was slow, painful and discouraging. Such was the surfeit of agricultural produce that horses were commonly fed with the choicest wheat.

The scene however suddenly changed. California was peopled. The hills and streams of the modern El Dorado were alive with men. These new comers had to be fed. They were too intent on gold-hunting to plant, to sow, or to gather in the fruits of the earth. Oregon it was supposed would be depopulated by the violence of the gold-fever. But contrary to expectation multitudes of temporary or permanent settlers were attracted to its fertile lands. Their wheat and corn now commanded high prices and a ready sale. A value was given to farms which shortly before had been almost worthless. Capital accumulated, and the farmers of the now prosperous valley of the Willamette found by experience that the surest way to obtain gold was to stay at home and cultivate the soil. The peaceful and secure pursuits of husbandry were more lucrative than digging and washing the auriferous sands for themselves, with less chance of finding a fortune in a ponderous nugget than of perishing with hunger and fatigue.

Thus the new markets opened in California not only converted, as it were, every farm in the neighboring region into a gold mine, but furnished the people in unexampled abundance with the elements of material progress and productive power. During the decade ending in 1860 the population of Oregon rose from 13,294 to 52,465, being an increase of 294 per cent. Its real and personal property advanced from $5,063,474 to $28,930,637 showing an increase of 471 per cent. Its improved lands increased from 132,857 acres to 895,375 acres. The value of the farms was multiplied five-fold. In 1850 their cash value was $2,849,170, while in 1860 it had increased to $14,765,365. The live stock were augmented from $1,876,189 to $6,272,892. The crop of wool was increased seven-fold. Local manufactures were called into existence, while the increased purchasing power of the farmers opened new markets for the products of the skilled labor and manufacturing facilities of the Atlantic States.

In this vigorous progress of the young states bordering our great Western gold field, we have an epitome of the growth of the nation at large. Wherever we look the same facts meet the eye. In proportion as our system of public works has been extended the density of our population has advanced, division of labor has followed, capital has increased, machinery with its mighty productive energies has been multiplied, and our mines, forests, quarries, our arable and grazing districts, our fisheries, harbors and rivers have become prolific sources of wealth. Thus it has been computed that the net-work of iron-roads constructed in the loyal States since the year 1850 have opened new markets and developed a domestic trade which could not otherwise have existed, and that this new traffic at a low estimate equals in annual value the whole foreign commerce of England of which she is so justly proud. Now, as it is more lucrative to create a new market at home than to compete for one abroad, the true interest of every great country possessing a rich soil, and an energetic, versatile, enterprising population is to perfect its internal communications, and to make the development of its productive forces a paramount object of its domestic policy.

Pennsylvania Railroad.

OFFICE PENNSYLVANIA R. R. COMPANY,
PHILADELPHIA, Jan. 31, 1863.

To the Stockholders of the Pennsylvania Railroad Company :—

The following statements will exhibit to you the operations of the Company for the year 1862:—

The earnings of your Railway between Philadelphia and Pittsburg during the year were:—

From pass. first-class	$1,684,433 85	
" Emigrants	46,958 35	
		$1,731,392 20
" United States Troops		379,393 21
" United States Mails		74,773 43
" Expresses under contract	$75,120 00	
" Extra Express Freight	71,731 96	
		146,851 96
" Freight		7,668,419 85
" Miscellaneous sources		303,460 31
Total earnings		$10,304,290 96

The expenses of operating the line were:

Conducting Transportation	$1,318,137 17	
New buildings and extensions	7,322 01	
Motive Power	1,430,665 09	
New Tools and Machinery	14,409 38	
New Locomotives added to stock	378,930 95	
Maintenance of Road	1,004,922 53	
New Second Track and Siding	341,039 14	
Maintenance of Cars	387,255 07	
New Cars added to Stock	480,077 06	
General Expenses	73,313 64	
		5,431,072 59
Leaving Net Earnings		$4,873,218 37

The gross revenues of the line this year are equal to $28,783 per mile of road (358 miles), and exceed, in the aggregate, those of 1861, $3,004,290 01. This is made up by an increase of $325,373 79 for Passengers and Emigrants; of $234,235 07 for Troops; $2,270,394 29 for General Freights, and $174,286 86 for Express and Miscellaneous Freights.

The whole number of passengers carried over the road during the year was 1,143,418, averaging a distance of 72½ miles for each passenger.

The number of tons of freight moved (including 164,503 tons of fuel and other material transported for the Company), was 2,223,051 embracing 135,146 tons of coal. The increase in the coal traffic is 130,392 tons, and the whole tonnage of the line over that of last year, 602,465 tons.

To accomodate this increase of tonnage—a large share of which is due to the continued interruption of the navigation of the Mississippi river—it has been necessary to expend $859,008 01 for 37 new locomotives and 930 eight-wheeled freight and coal cars, and $341,039 14 for additional second track and sidings; the cost of all of which is included in the operating expenses of the road.

The operations of the Road have been managed by its judicious General Superintendent, Enoch Lewis, Esq., aided by his vigilant Division Superintendents, G. C. Francisous, S. D. Young, A. Carnegie and R. Pitcairn, with much economy, success and exemption from serious accidents, notwithstanding the immense tonnage that has so rapidly accumulated on the line.

The repairs and renewals of the fixed and running machinery of the Company were committed, under the General Superintendent, to J. P. Laird, Esq., as Superintendent of Motive Powers, on the 1st of July last. The increased economy and efficiency of this Department, since he entered upon his duties, promise satisfactory results for the future.

The earnings of the Company's Canals were:

From the Susquehanna Division	$203,630 09
" Juniata Division	23,142 29
" Western Division	8,801 02
" Miscellaneous sources	15,908 36
Total earnings	$251,481 76

The expenses of maintaining, improving and operating the Canals were:

For Susquehanna Division	$74,736 29
" Juniata Division	161,295 41
" Western Division	22,059 86
Total	$258,091 56

The receipts of the Canals exceed those of last year $75,872 72, and the expenses $110,218 97. The latter is nearly all due to the heavy increase ($100,250 33) in the outlays for rebuilding the upper Juniata Division, still unfinished. It has been the policy of the Company to expend the whole proceeds of the Canals in their maintenance and enlargement under the expectation that the increasing local traffic of the country will at an early date make it a valuable improvement, not only to the country it traverses, but also to its proprietors. This policy would effect a much earlier enlargement of the canal east of the mountains, if the unreasonable discrimination in favor of the Susquehanna traffic, required by the Main Line bill, was abandoned. The affairs of this Department have been very satisfactorily managed by T. T. Wierman, Esq., its judicious and energetic Engineer and Superintendent.

The net revenues of the Company during the past year would have justified a larger increase in the annual dividends of the Company than 2 per cent. (the amount paid), if the surplus profits remaining—after the payments of interest, sinking fund, and dividends—had been earned while the country was at peace, and its finances based upon a specie standard or if the surplus earnings during this exceptional condition of things could not be profitably invested to protect the future interest of the Company. But as the first position mentioned unfortunately does not exist, and as the other contingency can be fulfilled with great advantage to the permanent prosperity of the Company, the Board has deemed it best to pursue the conservative policy indicated by the dividend (eight per cent. per annum) declared. It has been strengthened in this course by the unfortunate results that have visited other corporations from a division of earnings arising from adventitious circumstances. Instead of increasing the Company's indebtedness to meet expenditures that had been previously authorized to preserve the prosperity of the Company, the Board has deemed it to be the permanent interest of the shareholders that these unusual net earnings should be applied towards their completion. Under this view, they have been appropriated to the construction of the "Philadelphia and Erie Railroad," the extension of our own works to the Bald Eagle Valley Road, to the Tyrone and Clearfield Road, and a number of other smaller branch lines, all of which will hereafter add to the business of the main stem, and enable it to pass through any financial crisis that the country may experience, without a diminution in the rate of its semi-annual dividends. The expenditures of the Company upon these works during 1863, and the improvements and additions to its new line, will fully absorb its net revenues for that period, after the payment of its necessary expenses and dividends.

It is impossible to foresee what influence the condition of the currency of the country will hereafter have upon the net revenues of the Company. Its charges are limited while the expense of operating the line will be materially affected by a non-specie paying currency. If, after the Company has passed through the exceptional condition of things that now exists, there should remain surplus profits after providing for the gradual liquidation of the obligations of the Company, as far as advisable, and for unforeseen contingencies, a bonus in shares for the money thus appropriated can prudently be divided.

The operations of the existing Sinking Fund, with such appropriations as can be made to it this year, will reduce the Company's obligations as they fall due to an amount as low as it will ever be desirable that they should be cancelled. The comparative small debt that will then be left unpaid can be negotiated when the bonds mature, at a low of interest.

The net earnings of the Road during the year, after deducting the loss on the Canals, were $4,866,608 57; these have been applied, as far as expended, as follows:

To payment of interest on Company's debts		$572,174 67
To payment of the annual interest and an installment due on the principal upon the debt to the State for the purchase of her Main Line of Railroad and Canals		460,000 00
To payments under lease of "Harrisburg and Lancaster Railroad."		132,159 09
To interest paid on Philadelphia and Erie Railroad bonds, and expenses of maintaining organization of Company, (Coupons due April 1, 1862, not included.)	$182,418 72	
Less the amount received from 30 per cent. of the earnings of the Road, from Feb. 1 to Dec. 31, 1862	118,566 66	
		13,852 06
To interest, &c., paid on mortgages on Real Estate		29,067 69
To appropriation to Sinking Fund to pay mortgages on the "Harrisburg and Lancaster Railroad," it being the difference in the results of the working of the old and new leases		150,998 33
To appropriation to Sinking Fund to pay second mortgage bonds of "Pennsylvania Railroad Company"		349,030 14
To interest paid on the bonds of the "Steubenville and Indiana Railroad Company," guaranteed by the Pennsylvania Railroad Company.		34,050 00
To appropriation to "Commutation Railroads," according to the Act of Legislature, (including "West Pennsylvania Railroad,")		453,990 01
To dividends paid to shareholders		986,842 50
To purchase of Bonds of the Philadelphia and Erie Railroad Company		600,100 00
To subscriptions to Junction Railroad Company stock		1,700 00
Towards the completion of East Brandywine and Waynesburg Railroad		21,572 23
To amount advanced to the Huntingdon and Broad Top Railroad Company, in connection with the Philadelphia and Reading Railroad Company, to complete a Branch line		11,892 15
To purchase of Bonds of Tyrone and Clearfield Railroad Company, towards the completion of the first 3½ miles of its Railroad.	$27,400 00	
To payments made under lease of the Tyrone and Clearfield Railroad, to finish said road	7,484 08	
		34,884 08
To the extension of the Pennsylvania Railroad to the Pittsburg and Steubenville Railroad		13,467 65
To the extension of the Pennsylvania Railroad to the Philadelphia Gas Works		40,163 10
To the erection of the Grain Elevator, Freight sheds and Wharves, at the Delaware terminus		197,565 82
To the purchase of real estate for road		255,768 66
To the payments of mortgages and ground rents on real estate		130,000 00
		$4,489,878 18

This Company entered into the possession of the Philadelphia and Erie Railroad on the 1st of February last, under the lease sanctioned by your vote at a special meeting held during the previous November. This line was then committed to the superintendence of Joseph D. Potts, Esq., Civil Engineer, as General Manager, who has successfully conducted its operations for the eleven months it has been in his charge.

It will be gratifying to the shareholders to learn that, notwithstanding the unfinished condition of the work, this Company has not suffered any pecuniary loss in consequence of the responsibility assumed under this lease. The progress made towards completing the whole line, though not as great as we could have wished, owing to the difficulty in procuring labor, has been such as to lead us to confidently expect that it may be opened for use, throughout its length, during the ensuing autumn.

The views of the Board, in relation to the great value of the Philadelphia and Erie Railroad, not only to the Company, but also to the State and this city, as expressed in its Report, submitted at your special meeting, remain unchanged.

Including the receipts from the Philadelphia and Erie Railroad line, and its canals, the total revenues of the Company for 1862, were:—

From the Pennsylvania Railroad, proper	$10,304,290 96
From the Philadelphia and Erie Railroad, including service of cars on other roads	413,467 00
From the receipts of the Pennsylvania Canals	251,481 76
Total revenues of Company	$10,969,239 72

The repairs and additions to the Pennsylvania Railroad have been committed to the charge of William Hazel Wilson, Esq., as Chief Engineer, who has managed the affairs of this Department for several years past, with much system, economy and ability. Under his direction the second track has steadily progressed until the space requiring to be filled up is but 32⅔ miles. He has been instructed to provide materials and lay the second track between the Juniata Aqueduct and Newport, and between Anderson's Siding and Garvin's Bridge, during the present year. This will leave but fourteen miles of single track on the line between Harrisburg and Pittsburg, after 1863, all of which is between Lewistown and Mill Creek, except one mile at the Susquehanna bridge. Directions have been given to prepare the road-bed of this portion, (except the Susquehanna bridge) that it may be laid in the summer of 1864, thus giving to the entire line of the old Pennsylvania Railroad—with the exception mentioned—a double track. A third track, at proper intervals to allow the passenger trains to pass the freight, will be required at no remote period.

That portion of the Harrisburg and Lancaster Railroad Company's Road between Marietta and the Swatara River, a distance of twenty-four miles, originally laid with a superstructure entirely too light for the traffic it was designed for, will soon require a second track of heavier rails. This line was laid by that Company in lieu of a second track on its main stem, by way of Mount Joy. In consequence of the more favorable gradients of this branch, all of our freight trains pass over it. The large and increasing tonnage thus thrown upon it will render the increased facilities referred to necessary.

The Board of Directors have been admonished for several years past, by the increasing number of trains that traverse Liberty street, Pittsburg, east of the Pittsburg, Fort Wayne and Chicago Railway connection, that a due regard for the convenience of the citizens of that city would require that this narrow portion of that street should be relieved from the interruptions and risk they cause to the general travel. The delay in securing the necessary legislation from the Pittsburgh City Councils to enable the Company to effect so desirable an object has prevented its accomplishment at an earlier date. The legislation desired has now been obtained, and the real estate and right of way required to effect this change in the line of the road has nearly all been purchased.

This outlay, including that required to move the tracks from this portion of Liberty street, will be quite heavy—not less than four hundred thousand dollars—but the objects secured, both to the Company and to the city, by the change, will fully justify this expenditure. Until this change in the location of the Road was decided upon, it was impossible to determine the proper location for the contemplated Union Passenger station, to be erected for the accomodation of our own and the several railway companies entering Pittsburg from the West. This improvement, so long demanded by the travelling public, will now be erected during the present year.

The extension of your line to the Delaware river has been a source of great relief to the business of the Company, which could not have been satisfactorily disposed of without the increased facilities it has afforded. A branch from it to the Philadelphia Gas Works has also been constructed during the year, which will add materially to its revenue. The Grain Elevator, at the Delaware terminus, in progress at the date of your last annual meeting, is now ready for use. When the business of the country resumes its accustomed channels, the facilities it will afford will add largely to the attractions of the line for the staple of the West.

The investment made by the Company in the Pittsburg, Fort Wayne and Chicago Railway, for the purpose of securing a share of the northwestern traffic, will, in addition to the advantages originally anticipated from the expenditure, in a short time return full interest upon the capital devoted to that object. The traffic of the line this year would have justified a reasonable dividend upon the shares of that Company, but it has been deemed by its Directors more prudent to devote the surplus earnings, after paying interest upon its first and second mortgage bonds, to the renewal of temporary structures erected upon the road, and otherwise bring the standard of the property up to the character which the position and importance of the line demands.

The finances of this Company are now founded upon a substantial basis, and it possesses a business which will insure to it not only ample revenues to meet the interest upon all of its bonds, but also fair returns to its shareholders.

Since our last annual meeting, legislation has been obtained from Congress, and from Virginia, authorizing the extension of the Pittsburg and Steubenville Railroad across Brooke county, in the State of Virginia, and the Ohio river. The work of constructing the road and its bridges has been vigorously commenced, and will be steadily prosecuted to completion. When finished and connected with our road, it will give us a line from Pittsburg to Cincinnati twenty-four miles shorter than any existing route, and free from the vexatious interruptions which have heretofore prevented the full development of our southwestern passenger traffic. The completion of this line will also enable the Steubenville and Indiana Railroad Company to provide the means to meet the annual interest upon its bonds guaranteed by this Company, which have for several years been a tax upon its revenues.

It is gratifying to your Board to be able to continue to report the successful results of the enterprise in which you embarked your funds, originally with but a faint hope of other returns than those which looked to sustaining the commercial and manufacturing interests of this city. During the eight years the Company's road has been in operation to Pittsburg its transportation has steadily increased from 250,000 tons in 1854 to 2,223,000 tons in 1862—a result which proves that, whatever may have been the defects of the policy of the Company, it has not failed to largely develope the vast internal resources of the Commonwealth, while it has preserved and immensely increased her traffic with her sister States.

The same liberal policy pursued in developing the traffic of the Pennsylvania Railroad, will be exercised on the Philadelphia and Erie line, and we trust with the like beneficial results to the city, the State and the Company, in the development of its local and the distant rail and lake trade.

The Directors have much pleasure in renewing their acknowledgements to the officers and employees of the Company generally, for the successful results of their past year's labors in its service.

By order of the Board.

J. Edgar Thomson, President.

Thomas A. Scott, Vice President.

Miscarriage of Passengers.--Duty of Railroad Employees as to giving Notice.

NOTICE OF A NECESSARY CHANGE OF CARS MUST BE GIVEN TO PASSENGERS BY THE EMPLOYEES OF RAILROAD COMPANIES. IF A PASSENGER PASSES BEYOND A POINT OF DIVERGENCE, HE IS BOUND TO TAKE A RETURN TRAIN, AND HIS REFUSAL RENDERS HIM LIABLE TO BE EJECTED FROM THE CARS.

On the 8th of October, 1855, one Page who resided in Brooklyn, purchased a ticket at Albany for Lyons over the road of the New York Central Railroad Company, and took the train which left Albany at half past six o'clock in the morning. At Syracuse the company's road divides into two branches, one called the old road, going by the way of Auburn to Rochester, and the other called the new road going by the way of Lyons to Rochester. At this time two trains left Albany in the morning—one at 6½ and the other at 7½ o'clock. The train leaving at six and a half A. M., arrived at Syracuse at 12 at noon, and left immediately by the old road. The train leaving at 7½ A. M. arrived at Syracuse at 1 P. M., and left at 1.35 P. M. by the new road. Page instead of leaving the cars in which he took passage at Albany at Syracuse, and waiting there for the 7½ o'clock train, proceeded on from Syracuse by the 6½ o'clock train, until he was removed forcibly from the cars by the conductor and other employees of the defendant, at Vienna, after refusing to pay additional fare. Page then brought this action against the company to recover damages for being ejected from the cars. The case was tried in the Superior Court of the City of New York, and a verdict rendered by the jury in favor of the defendant. From the judgment rendered on that verdict the plaintiff appealed to the Court of Appeals. During the pendency of this appeal Page died, and his administrators were substituted in his place.

The company assumed to justify this forcible removal on the ground that at and before reaching Syracuse, Page had been notified in the usual way to leave that train at Syracuse, and take the 7½ o'clock train, on its arrival, for Lyons; and also on the ground that the conductor, soon after leaving Syracuse, and between there and Marcellus the first station, and about ten miles from Syracuse, told Page to change cars at Marcellus and go back to Syracuse by the train which would be met there going the other way, and that if he did so he would reach Syracuse in time to take the 7½ o'clock train, from Albany for Lyons.

Upon the trial the defendant gave evidence tending to establish these facts; and also the fact that a train was met at Marcellus which Page might have taken and reached Syracuse in time for the 7½ o'clock train from Albany; and that it was customary to carry passengers back free of charge under such circumstances. Page who was sworn as a witness on the trial, testified that when he bought his ticket at Albany, a few minutes before 6½, he asked the ticket agent what train he

should take for Lyons, and that the agent pointed to the train he did take. There was no contradictory evidence as to this fact. Page further testified that the train arrived at Syracuse at a quarter to 12 o'clock, noon; that a man came to the door and cried out, "this train stops twenty minutes for dinner;" that the train left there a few minutes past 12; that he heard no notice before or after arriving at Syracuse, or while there, that passengers for Lyons should change cars at Syracuse; that he did not learn in any way that he had to change cars thus. He also testified that he was not told by the conductor that he was on the wrong road until they had got twenty or twenty-five miles from Syracuse, and that he did not know that he was on the wrong road until then; that no offer was made to send him back to Syracuse unless he paid fare.

The following opinion, discussing the principal questions involved, was rendered at the decision of the case by the Court of Appeals. The decision affirms the judgment of the Superior Court.

SUTHERLAND, J.—The material questions in this case are raised by the exceptions to the charge of the Court.

The Court charged the jury, if the agent at Albany pointed to the train which Page took, then it was necessary for the defendant to show, either that actual notice was given to him, before or on reaching Syracuse, to change cars there, or that such means were used after leaving Albany to give such notice "that every traveler of ordinary intelligence, by the use of reasonable care and attention, would have acquired a knowledge of that fact," and that it was not proved affirmatively that notice was in fact given before reaching Syracuse. The Court then submitted to the jury the question whether the agents of the defendant did use such means to give the information or notice before or on reaching Syracuse; and charged that if they did, it was Page's fault and not that of the company, that he remained ignorant of the necessity of changing cars at Syracuse and waiting for the next train from Albany, and he was wrongfully in the cars when they left Syracuse; but if they did not use such means then he was not in fault for continuing on the same train from Syracuse.

The exception was to that portion of the charge which submitted to the jury the question, whether the agents of the defendant had used such means (as had been previously defined by the Court,) to give the information or notice and the consequent portion, charging that if the jury believed such means were used, then it was Page's fault and not that of the Company that he remained ignorant of the necessity of the change, and he was wrongfully in the cars, &c. In my opinion, this was submitting the question of notice to the jury quite as favorably to Page as it should have been.

The exception rises this question, and none other that I can see. If before or on reaching Syracuse, notice was given that the passengers for Lyons must change cars there, in such manner that all the passengers of ordinary intelligence, and with ordinary care and attention would have heard it, was Page wrongfully in the cars when they left Syracuse? The plaintiff's counsel insists that the action of the defendant's ticket agent at Albany, in pointing to the cars which Page took, was a misdirection, and misled Page, and put the defendant in the wrong, and absolved Page from the duty of giving that attention from any information or notice of a change of cars which ordinary passengers are supposed to give, or which he ought to have given had it not been for the misdirection; that if he was not awake, if he did not exhibit any vigilance at all, it was the fault of the company, which had misled him in designating the train which he took at Albany as the train which went to Lyons. But can the direction of the ticket agent at Albany be called a misdirection? I think it cannot. Passengers from Albany for Lyons could go by either the 6½ or 7½ o'clock train. If Page took the 7½ o'clock train he had to wait in Albany an hour; if he took the 6½ o'clock train he had to wait in Syracuse an hour and thirty-five minutes. How was the ticket agent at Albany to know that he did not prefer the delay at Syracuse? From his presenting himself and purchasing the ticket just before the 6½ o'clock train started, the agent had a right to presume that he preferred that train. Under these circumstances I think the designation by the agent of the 6½ o'clock train as the train for Lyons cannot be called a misdirection or fault. It was natural and reasonable under the circumstances that he should tell Page that the 6½ o'clock train was the train for Lyons, for the ticket which he bought would take him there, if he took the 6½ o'clock train, in about the same time as the 7½ o'clock train, and the agent had a right to suppose that he preferred the 6½ o'clock train.

The next exception to the charge of the Court was to that part of the charge submitting to the jury the question of fact whether Page was told by the conductor before reaching Marcellus to change cars there. As to this the evidence was contradictory. The charge was, substantially, that, if the jury found that Page was not in fault in continuing on from Syracuse, under the rules which had been laid down as to the notice to change cars on or before reaching there, then, if he was not told, before reaching Marcellus that he was on the wrong road, nothing occurred before reaching Marcellus to place him in the wrong; but if he was told before reaching Marcellus that he was on the wrong road, that he would meet there a train going to Syracuse which he must stop and take, then it was his duty to have done so, if the jury believed that he would have reached Syracuse in time to take the train which left Albany at 7½ A. M., for Lyons, and that he would have been carried back free of charge.

A train was met at Marcellus which Page might have taken and returned to Syracuse. There was no contradictory evidence on this point. The conductor had testified that he told Page, before reaching Marcellus to take the train which would be met there going to Syracuse. Page had testified that he had not been told that he was on the wrong road before reaching Marcellus. The conductor had not testified that he told Page that he would be carried back free, but he had testified that it was the custom of the company to do so under such circumstances; that he never knew of a charge for taking a person back who got on the wrong road by mistake. Page did not pretend that he made any inquiry as to his being carried back free. This being the evidence bearing on the question whether Page should have changed cars at Marcellus, I see no error in the charge of the Court in submitting that evidence to the jury. If it was the fault of the employees of the defendant, and not of Page, that he did not change cars at Syracuse, how could they remedy their faults otherwise than by sending him back to Syracuse in time for the 7½ A. M. train from Albany, free of additional charge? I see no other way. He was not tendered a free pass back, nor told that he would be carried back free; but, if told by the conductor, before reaching Marcellus, to take the train which was met there back to Syracuse, ought he not to have assumed that, under the circumstances he would have been carried back without charge? It appears to me that the question whether, if he had taken the train at Marcellus for Syracuse, he would have reached there in time for the 7½ o'clock train from Albany, and whether he would have been carried back without charge, were properly submitted to the jury. It cannot be said, I think, if Page was carried on the wrong road from Syracuse to Marcellus without any fault of his, that, therefore, he had a right to be carried to Rochester on the wrong road.

My conclusion is that the judgment of the Superior Court should be affirmed.

Judgment affirmed.

Financial Resources and Position of the Country.

As the base of all our great military operations the question of finance remains and extends itself. Victories may be expected with a full military chest, but without bread and shoes armies disappear.

With military successes or defeats, finance and commerce deeply sympathize, and no Government can carry itself along without their aid and confidence. These questions have also immediate reference to individual transactions, and affect the judgment of men in their private conduct, particularly in the United States, where the instructed and intelligent classes, contrary to experience and history in the old world, are vastly in the majority. The pulsations of the body politic are here therefore full and frequent, the nervous and sensitive portions are wide-spread and minute, and public opinion is consequently easily excited and is highly emotional. It is the duty of those who influence it, to guard it carefully against being misled, and it is at this moment not only proper for but the eventual interest of the capitalists and bankers of this country to look coolly and steadily at results, through the medium of facts, principles, and experience. It is in this position we desire to place ourselves with our correspondents at home and abroad.

The magnitude of the contest can scarcely be realised by us in the North, because the peculiar horrors of war have never reached our homes and firesides; little have they affected our comforts, or diminished our personal security. Our Northern cities are full of life and activity instead of death and decay; all our material interests appear to be thriving; we hear of debt and taxation, but as yet they are scarcely felt beyond the anxiety which attends a perusal of the statements of our indebtedness; our internal and external commerce are on the increase, and not from the transportation of men and munitions of war as some might suppose who have not noticed how little their actual transportation amounts to, in proportion to the freight which comes from our forests, our fields and our manufactures. It requires but a little concentration of mind to realize the actual state of things, and ordinary impartiality of judgment to decide some of these important

questions of the moment, and a correct decision is due to this and succeeding generations.

What then is the actual ability of the North to continue this contest to a successful issue. Has it money, has it credit, is it entitled to both, may we rely on our resources, shall we re-establish our once glorious nationality, or are we to fall apart into insignificant and divided communities, repelled from each other by each other, with as many codes as States, with new and every varying legislation, conflicting interests, petty jealousies, disputed boundaries, broken and interrupted lines of railway and canal communications, standing armies and navies in every port and on every lake and river, and taxation multiplied by the number of the States to maintain even the shadow of independence. Let those who on the great Ledger are thoughtlessly proposing to carry a separation of the States to the account of profit and loss, and let it go, never expect to make another entry if this Union is dissolved. It will be but a limited mart in which our future merchants will have an opportunity to traffic.

Before therefore we take any counsel of our fears, let us see if we have any reason for entertaining them. Our country is beyond all question an exception to all other nations. Centuries have been required to establish even the least respectable of Europe, and have established few or rather none at all in Asia and Africa. Our political rank, our wide-spread commerce, our large population, our great cities, our vast internal improvements have been the growth of about three generations. There are large numbers of persons still living, who stood at he altar of liberty, and saw the infant Union at its baptism. Our territory instead of being a narrow strip of land along the Atlantic coast, is now continental in area, and on a simple line of latitude we can march one quarter round the globe without a passport. Our railways, emulating our rivers in length and importance, are four times greater than those of any other country in the world, our internal trade infinitely larger, our foreign commerce second only to that of Great Britain, a thousand years old. Our soil offers every variety for culture, and our broad acres between the Atlantic and Pacific are capable of sustaining hundreds of millions of people without crowding each other. Our system of industry is on the largest scale affording the opportunity of the development of industry, talent, and common sense, to the full extent capable of their exercise by mortal men.

Instead of our population shooting off into colonial dependencies, irregular appendages of the main body, often destructive of its health, draining the seat of life, counteracting its vital forces and disturbing its natural action, our people, our emigrants, ourselves wherever we go, become a part of the body itself, an integral portion of the State and Government absorbed into its system, strengthening it, increasing it, enlarging it, steadying it, and renewing it. Until now, until this senseless, unjustifiable attempt at separation was commenced by ambitious and heartless theorists, our system was homogeneous, well arranged, truly full of reciprocity and generous interchange, and if we are true to ourselves we may have all this again.

We learn with regret therefore, that far from looking at the condition of our public affairs with philosophic if not patriotic eyes, there is a class of capitalists who have become wealthy under the protection of our free institutions, and yet distrust the very source from which their wealth has been derived; and it is estimated that as many as from 50 to 75 millions have been secretly remitted to Europe for safety. Without stopping to condemn this conduct as it might deserve, it will be better to point out the fact, that there is even yet all the gold in the country which it needs, if peace were at once restored. It may now lie where the precious metals always retreat in time of danger, in vaults and iron safes, until its time comes again for it to emerge. When it comes forth from its concealment it will be in tremendous masses.

That the quantity of specie existing in the United States at the present time is large, compared with former periods, the following statement will clearly exhibit:

Amount of specie existing in the United States at the commencement of 1849		$122,000,000
Product of California mines from 1849 to present time		1,016,000,000
Other sources of supply, within the U. States, during the same period		28,000,000
Amount imported from foreign countries during the same period		141,000,000
Amount introduced by immigrants during the same period, (3,500,000 immigrants, at $30 per head.)		105,000,000
Grand total		$1,412,000,000
Amount exported to foreign countries from 1849 to present time	$610,000,000	
Amount consumed in the arts, destroyed by fire and shipwreck, &c.. &c., during the same period	14,000,000	
		624,000,000
Amount of specie existing in the United States at the present time		$788,000,000

The correctness of this estimate is founded on the fact, that the amount of gold from California, placed on the manifests, bears no certain proportion to that actually brought into the Country; in fact that we can trace but about one quarter of the actual annual product of the Pacific gold regions, through the freight lists or Custom House returns. And also from the circumstance that the annual internal trade of the United States is ten thousand millions of dollars, it is evident some other medium than Bank bills merely, has hitherto been employed in the transfer of property and credits.

We have therefore good reason to believe that there is gold enough in this country, when it can reappear with safety to the holders, to form a basis for the largest financial operations in a prosperous future. It is the weigher of commercial values, not the value itself, and by its constitution and habits is never employed as a wholesale disbursing agent. It waits upon credit and commerce, but it is neither of these. It is the universal adjuster of differences, but is not either convenient for use in large masses, nor profitable nor even economical in that shape. We are therefore driven to the necessity of using other forms of money when larger sums are suddenly called for and disbursed, and this is our own condition at this moment. We have a large public debt, which to the imagination of the timid has already assumed the colossal proportions of two thousand millions of dollars. This is a mere delusion. We state on the best authority, authority not to be questioned, that our public debt on the 1st of February was but $815,000,000.

We go further and from the most careful examination of the working of our Internal revenue system and custom duties, and the estimates are purposely made low, *that we shall have revenue enough to pay our expenses, and interest, and a surplus* to form a sinking fund "ample enough" for the payment of our entire debt within the next third of a century. This statement not more satisfying than demonstrable, may be relied upon if the war should even last two or three years longer, and the present estimates now before Congress should be enlarged in 1864.

The creative power of American industry is too little considered by our financial theorists. They are continually looking at the dollar, but never how it is made. It is labor which has performed all the miracles on this side of the Atlantic. The aggregate of the real and personal property in the United States by the last census was estimated at about $17,000,000,000, and without including our public or mineral lands and the annual products or income. But looking from this dry tabular statement to the living work of men, we see that in a single year, our hay fields are raked over and stacked with a crop worth two hundred millions of dollars; that our churns produce about one hundred and twenty millions of dollars, that our hops, furnish three millions; that our live stock at this moment would pay off the national debt, and nearly 50 per cent of the stock would still be alive, and these are but a few items of the results of labor, when compared with the enormous cereal products, wheat, rye, corn and oats which stand in sheds, of miles in length upon our Western railroads and canals waiting their turn for market; our orchard bearings, our garden stuffs, our sugars, our seeds, our oils, our coals, our mines, our metals, all inexhaustible sources of remuneration and profit, though the laborers of the world were here, and hundreds of millions strong. It is simply absurd then to doubt the wealth or the permanent resources of this country. France and England having extended their limits of taxation as far as it is possible to go, always alarmed at a deficit of even two or three millions of dollars, or when as the French Minister Fould would say everything is not in equilibrium, may with some fear calculate perhaps the exact hour when their system of finance may come to an end. But with us it is totally different. In England the secret is "to double the tax bearing power" when the debt gets to be double. A distinguished British journal boasts of the endurance of the taxpayers. It says "England is peculiarly adapted for taxation. No financier could imagine a country more within the gripe of almost any financial system, whether bearing chiefly on consumption, on expenditure, on home produce, or on imports. There is no escaping the tax-gatherer here. But the United States, for the very reason that it is the most open, the most undeveloped, more expansive, and by nature the freest country in the world, so it can most easily evade the tax-gatherer."

The journalist in this last sentence, had nearly stumbled on the truth. It is expansion, development and freedom which have raised up in this country a mass of willing tax-payers, who for the first time in their lives have been now called to estimate their incomes and contribute directly to the suppression of a great rebellion. England has a geographical limit beyond which she cannot expand, and an arrangement of society which makes labor the only unprivileged power of the State. Here there are no limits of land or soil, or nature, on the earth or in its bosom, to keep back the earnest hand of the industrious man. The fu-

ture is sure to him if he persevere. But we have not space to follow up these opinions to their legitimate effect: this we will undertake to show on some future occasion, that compared with our actual wealth and resources, the annual productions of our industry, the vast and unlimited field for new operations, the debt of the country, and the financial difficulties of the current hour sink into absolute insignificance. If these gigantic powers of the North, then were but in the hands of the real talent of the country, our present history, would be the most brilliant, the most instructive and the most satisfactory, ever exhibited to the gaze of men.

If we appear in this CIRCULAR to have gone beyond our usual limit of topics, we have done so under the conviction that the position and resources of the North are not fully appreciated and that the despondency about our financial affairs which prevails among many good citizens, is as yet without any just foundation.—*Hallett's Financial Circular.*

North Pennsylvania Railroad.

The earnings of this road for the years ending November 30, 1861 and 1862 have been as follows:

	1861.	1862.
From passengers	$138,096 49	$148,329 53
" coal	101,375 62	105,390 19
" pig iron	7,855 93	12,349 01
" Catawissa lumber.	4,057 20	8,897 51
" local freight	73,373 47	86,559 02
" through "	25,571 89	29,743 55
" mails	2,756 00	2,756 00
" rents, etc.	5,138 86	3,161 45
	$364,225 46	$397,186 26

The expenses of 1862 were:

Maintenance of way	$26,705 04	
Motive power	62,665 16	
Maintenance of cars	15,008 66	
Conducting transportation.	58,501 72	
General expenses	15,345 62	
		178,226 20
Net earnings		$218,960 06

Compared with the previous year the gross earnings show an increase of $32,960 80; with an increase in expenses of only $16,124 57—making the increase in net earnings $16,836 23. The report says:

The arrangement entered into in 1861, for funding the coupons of the Company, and in progress of being carried out at the date of the last Annual Rsport, has enabled the Company to extinguish their floating debt, and to resume the prompt payment of the coupons as they mature. The amount funded at the close of the fiscal year, was $204,332 50 of the six per cents, and $35,500 00 of the ten per cents, making the total amount of scrip issued $239,832 50, leaving but $6,027 50 of the six per cent., and $500 00 of the ten per cent. yet to be funded, which, when all in, will make the total funded debt of the Company stand as follows, to wit:

Six per cent. bonds	$2,500,000
Ten " "	360,000
Scrip " "	246,360
Total funded debt.	$3,106,360

On which the annual interest will be, say,

On six per cent. bonds	$150,000 00
" ten " "	36,000 00
" scrip " "	14,781 60
Total interest on funded debt	$200,781 60
Ground rents, and interest on mort.	5,432 06
Making total annual interest	$206,218 66

During the past year a substantial and convenient passenger station house has been erected on the lot owned by the Company, fronting on Third street north of Thompson street, which was made the terminus for passenger trains, on the first day of September. The separation of the passenger business from that of the freight, has greatly increased the facilities for conducting both, as it has relieved the passenger trains from frequent and unavoidable delays on the city track, and has enabled the Company to appropriate the Willow street station to freight exclusively.

The construction account has been increased by the building of the new passenger station, &c., $23,076 58, of which amount $8,913 36 was derived from the sale of real estate, (referred to in previous Annual Reports,) covered by the Real Estate and Chattel Mortgage, and the proceeds reinvested in the new Station House, by the trustees, under the stipulations and provisions of said mortgage.

The completion of the Penn Haven and White Haven Railroad, now in course of construction, will add considerably to the business of the North Pennsylvania Road, as it will open a new and direct railroad route between Philadelphia and Wyoming Valley, over which passengers and freight can be carried through between Philadelphia and Wilkesbarre without change of cars, with a saving, in distance, of about fifty miles over either of the other routes. It is expected, by the Engineer in charge of the work, to have the road finished and opened for use before the close of the present year.

The company have 18 locomotives. The number of miles run has been: with passenger trains, 170,367, with freight trains, 92,967—total 263,334. Cost of repairs $11,863 66. Cost of fuel, 22,689. Cost of stores, $1,633 06. Number of passengers carried in the cars, 304,214; number carried one mile, 5,637,191—equal to 101,654 through passengers. Tons of freight carried one mile, 8,886,766.

CONDENSED BALANCE SHEET.

The officers and directors for 1863 are as follows:

President.—FRANKLIN A. COMLY.

Directors.—John Brock, John Jordan, Jr., Algernon S. Roberts, J. Gillingham Fell, S. Morris Waln, William C. Ludwig, Ellwood Shannon, Edward C. Knight, William L. Hirst, Alfred Hunt.

Treasurer.—WILLIAM WISTER.

Secretary.—EDWARD ARMSTRONG.

Engineer and Sup't.—SOLOMON W. ROBERTS.

The Paper Question.

A resolution passed the U. S. Senate on the 24th ult., requesting the Secretary of the Treasury to communicate to the Senate the amount of revenue, if any, which has accrued to the United States since the passage of the act of March 2, 1861, at its various ports of entry, from the duty on printing paper, and whether, in his opinion, a reduction of the duty on printing paper would tend to increase the public revenue.

To obtain the requisite information for the period subsequent to the date of the returns made to this office, the collectors of the principal ports were directed to make immediate reports.

From the Secretary's reply, it appears that at the ports of Philadelphia and Baltimore there have been no importations of printing paper, and, consequently, no revenue has been collected therefrom.

The tariff act of July 25 last classifies all paper under the heads "writing paper" and "manufactures of paper," in which latter classification printing paper is included.

The aggregate value of importations at Boston, under those heads, is $31,741, and the revenue collected thereon $10,020, of which $9,688 45 is the revenue on "manufactures of paper," including printing paper.

At New York the value of importations under the head of "manufactures of paper" is $126,141, producing a revenue of $39,683 95, making an aggregate value of the importations at the four principal ports, under the head of "manufactures of paper," of $156,825, yielding an aggregate revenue of $49,372 40, which amounts include manufactures of paper of all kinds other than writing paper. What proportion of this revenue is derived exclusively from printing paper it is impossible to ascertain. The Secretary adds:

"In my opinion the reduction of the duty on printing paper would not lessen the revenue from that source, but would tend largely to increase it."

The following documents accompanied his reply:

CUSTOM HOUSE, BOSTON,
COLLECTOR'S OFFICE, Jan. 26, 1863.

SIR—In compliance with your request, under date of 23d inst., I have caused the requisite examination to be made, and as the result I transmit an abstract of all the paper, including manufactures of paper, entered at this office under the act of March 2, 1861. *The whole amount of paper, and it all is included under the head of "writing paper," you will perceive is quite insignificant.* Very respectfully, your obedient servant.

J. Z. GOODRICH, Collector.

Hon. S. P. CHASE, Secretary of Treasury.

Imports of paper and manufactures of paper into the port of Boston from and after the passage of the act of March 2, 1861.

Whence.	Writing Paper.	Man'fac- tures of Paper.	Amount of Duty 30 per ct.	Total Value.
England	$597	21,019	6,484 80	21,616
France on the Atl'tic	171	—	51 30	171

B. F. COPELAND, Deputy Collector.

DISTRICT OF BOSTON AND CHARLESTOWN, Collector's Office, Jan. 26, 1863.

COLLECTOR'S OFFICE, CUSTOM HOUSE, NEW YORK, Jan. 26, 1863.

SIR—I am in receipt of your letter of the 23d instant, enclosing a resolution of the Senate calling for information as to the amount of revenue collected since the passage of the act of March 2, 1861, on printing paper. Printing paper not being subject to a different rate of duty from other paper, it has not been distinguished as such in the invoices and entries. *It is thought that but little, if any, has been imported.* The headings prescribed for the returns to the Treasury are "writing paper" and "paper and manufactures of not specified." Printing paper would be embraced under the latter head. I enclose a statement of the value of imports under each head, with the amount of duties accrued thereon. Very respectfully, your obedient servant.

C. P. CLINCH, Deputy Collector.

Hon. S. P. CHASE, Secretary of the Treasury.

Imports of Paper into the Port of New York from April 1, 1861, to December 31, 1862.

	Value.	*Duty.*
Paper, writing, 30 per cent	$72,157	21,647 10
Paper, writing, 35 per cent	22,432	7,851 20
Paper, m'n'fact'res of 30 per ct.	89,308	26,792 40
Paper, m'n'fact'res of 35 per ct.	36,833	12,891 55
Total	$220,730	69,182 25

CUSTOM HOUSE, BALTIMORE, Jan. 27, 1863.

SIR—Yours of the 23d instant, conveying a copy of a resolution of the Senate calling for information concerning the duty on printing paper, is received. After a careful examination *I have to report no printing paper entered at this port since March 2, 1861.* I am very respectfully, your obedient servant,

HENRY W. HOFFMAN, Collector.

Hon. S. P. CHASE, Secretary of the Treasury.

CUSTOM HOUSE, PHILADELPHIA, COLLECTOR'S OFFICE, Jan. 26, 1863.

SIR—In reply to your letter of the 23d instant, I beg leave to state that *there have been no importations of printing paper at this port since the 2d of March, 1861, and consequently no revenue received therefrom.* Very respectfully, yours,

WILLIAM B. THOMAS, Collector.

Hon. S. P. CHASE, Secretary of the Treasury.

Finances of Michigan.

The following statement, compiled from the Annual Report of the Treasurer, exhibits the financial condition of Michigan, and the various funds of the State, November 30, 1862:

The total receipts into the treasury during the fiscal year were		$1,124,595 10
Balance against the treasury Nov. 30, 1861	$27,179 97	
Total payments for the year	896,620 69	
		923,800 48
Balance in the treasury Nov. 30, 1862		$200,794 62

STATE DEBT.

The funded debt of the State is as follows:

Full paid "$5,000,000 loan" bonds, 6 per cents, due Jan. 1st, 1863	$77,000 00
Adjusted bonds, 6 per cts., due Jan. 1st, 1863	1,746,185 00
Temporary Loan, 7 per cts., due Jan. 1st, 1878	59,000 00
Renewal Loan, 6 per cts., due Jan. 1st, 1878	216,000 00
Canal Bonds, 6 per cts., due Jan. 1st, 1879	100,000 00
War Loan, 7 per cts., due Jan. 1, 1886	607,300 00
Outstanding Internal Improvement Warrants	3,553 75

FUNDABLE DEBT.

$140,000 outstanding *part paid* "$5,000,000" Loan, which when funded, will amount to	80,999 80
Total of funded and fundable debt	$2,981,038 55

During the past year, the balance of the "Penitentary Bonds," amounting to $13,000 has been paid. The War Loan Sinking Fund has realized $40,072 99, and that sum will be applied, Jan. 1st, 1863, to redeeming certain small war bonds. The sum of $21,506 98 has been levied in the State tax of 1862, and will be applicable to the Sinking Fund of the $2,000,000 loan, together with all the proceeds, after Jan. 1st, 1863, of the Primary School, Normal School and University Funds.

RECEIVED BY THE TREASURER.

South Shore Railroad.

The Treasurer's Report gives the receipts from all sources for the year ending Nov. 30, 1862, as $41,048 02; expenditures, $20,563 70; net earnings, $20,484 32. Out of the earnings have been paid of the coupons, $9,147 00; into the sinking fund, $2,000 00; dividend of three per cent., $7,500. The road was reported to be in a satisfactory condition. The last year's Board of Directors were elected as follows: Wm. Humphrey, James C. Doane, John W. Loud, Eliot L. White, Minot Tirrell, Wm. Sohier, Jos. Loud, Jr., Charles Humphrey.

The Oil Creek Railroad.--Its Extension to Franklin.

The Oil Creek Railroad, on which ground was broken in May last, and over which cars passed in October, from Corry to Titusville, 27 miles, is in progress of extension from Titusville down Oil Creek to Oil City, a distance, we believe, of 16 miles, beyond which point it is to be continued down the Allegheny river to Franklin, 27 miles from Titusville and 54 miles from Corry. This will make the Oil Creek Railroad Company—(which is an independent corporation free to enter into treaty for intertrade with all connecting roads, with the "favored nation clause" open equally to each, so far as mechanical causes do not interpose)—the owners of 54 miles of railroad, from the mouth of French Creek at Franklin, up the Allegheny to Oil Creek, thence up Oil Creek beyond the oil wells, and thence to Corry, whence a wide gauge route is open to Jersey City and a narrow gauge route will be opened to Philadelphia.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Jan. 30, 1863, was as follows:

Passengers	$14,983 34
Freight and live stock	47,092 37
Mails and sundries	1,286 93
Total	$63,362 64
Corresponding week of 1862	51,263 02
Increase	$12,099 62

The earnings of the Chicago and Alton Railroad for the 4th week of Jan., 1863, were:

	1863.	1862.
Passengers	$11,854 16	$7,138 89
Freight	14,662 41	11,352 66
Sundries	1,035 33	947 83
Total	$27,551 90	$19,439 38
Increase	$8,112 52	.....
Total for this month	$96,306 46	$81,463 12

In consequence of a change in the contract with the Joliet road, their proportion is included for both years.

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week of Jan., 1863, were $20,757 72
Same week, 1862 18,365 23
Increase $2,392 49

The earnings of the Cleveland and Toledo Railroad for the 4th week of January, 1863, were $48,781 00
Same week, 1862 33,576 00
Increase $15,205 00

The earnings of the Chicago and Rock Island Railroad for the 4th week of January, 1863, were $35,863 00
Same week, 1862 27,187 00
Increase $8,676 00

The earnings of the Galena and Chicago Union Railroad for the 4th week of January, were:

	1862.	1863.	
Freight	$29,372 25	$30,256 31	Inc. $884 06
Passengers	5,637 98	7,921 31	Inc. 2,283 33
Mails, etc.	2,020 21	1,100 00	Dec. 920 21
Total	$37,030 44	$39,277 62	Inc. 3,167 39

The earnings of the Chicago and Northwestern Railway for the 4th week of January, 1863 were $25,979 27
Do., 1862 13,445 15
Increase $12,534 12

The estimated earnings of the La Crosse and Milwaukee Railroad for January, 1863, were:

First week	$11,794 30
Second "	13,346 96
Third "	14,455 95
Fourth "	27,102 44
	$66,699 65
January, 1862	61,054 83
Increase	$5,644 82

The earnings of the Grand Trunk Railway for the week ending Jan. 31, 1863, were:

Passengers	$16,589 18
Freight and live stock	73,159 38
Mails and sundries	3,980 00
Total	$93,728 56
Corresponding week, 1862	82,771 04
Increase	$10,957 52

American Railroad Journal.

Saturday, February 14, 1863.

Stock Exchange and Money Market.

The distrust in the gold market continues. The price fell Tuesday nearly 3 per cent., reacted, and then closed at a fall of 3½ per cent. from the rates of Saturday last. There appears to be a settled conviction in the public mind, that it has been pushed up beyond its real and comparative value, considering the circumstance that other commodities have not universally appreciated to the supposed over issue of paper. This is a remarkable fact, which has a strong influence on the opinions of financial men. Sympathetically, exchange had gone down to 168 per cent., and now that Mr. Chase's plan of a general banking system with a uniform currency appears likely to succeed, still greater hesitation appears in the operations of our money brokers and exchange dealers. This system has its friends and opponents, as have all other projects of a public nature. It is contended, that as in several of the States it substantially prevails to the extent of requiring a deposit of State and Government stocks as a basis of issue with a limit to circulation, that the local system will still be preferred to that of Mr. Chase. But the answer to this is, that the currency of these State banks can never obtain the extent of circulation, they would if they issued a national currency.

The best New York State bank bill is at a discount in a distant State, and so *vice versa*, while a national note, for such it may be called, would pass freely everywhere. Thus the great difficulty of domestic exchanges, and the oppressive discounts

charged in different parts of the country would be done away with. Such are the views which are beginning to prevail on the subject, and if there be any force in them, the plan of Mr. Chase when put in operation, would unquestionably prevail after a time.

While under this state of things the Share List at the Stock Exchange has declined, it is noticed that Government stocks and Treasury currency are again on the advance and in good request.

Our foreign trade exhibited great strength and activity during the week ending 10th of February. Our exports of domestic produce and miscellaneous goods amounted to the enormous sum of $5,154,962, against $2,144,476 the same week in 1862, and $2,664,873 in 1861.

A movement has been made in Congress to have Government demand notes, receivable at the Custom House for duties, and the merchants and bankers of this city are understood to be universally in favor of it. We had in this JOURNAL previously put forth a similar proposition, but modified, so as to limit the amount to the quantity necessary in the usual course of a year's business. This is a material improvement for many reasons. The Government having the right to avail itself of its credit and resources, should issue say fifty or sixty millions of Custom House duties notes, receivable at the Custom House, and sell them in open market for what they would bring. It has the same right to do this, that it has to invite offers for its stocks and gain the premium by the competition. In the present state of the market, a very handsome sum could be realised at once. As the price fell, so would gold and exchange beyond all question. Not only this, but the cost of goods would fall and the consumers gain correspondingly. We have attempted to find out the objections if any to this measure, and in vain. The merchants would gain by it, the revenue would be increased by it, and while the importations would increase, the price of goods would lessen.

It is confidently stated that the amount of "green backs" held in the City Banks of New York is really less than one half of the amount of gold coin they report as in their possession. This is conclusive therefore of the fact, that this currency is absorbed and preferred in the business transactions of the people. Another curious fact is ascertained, that more than six hundred millions of the public debt, which on the 1st of February all told was but $815,000,000 are held by the people, and only 18 per cent. of it is owned or held by the banks in the city, and this mostly in trust for depositors. That this estimate is the truth or very nearly, appears from collateral evidence at hand.

The following official statement is from the Bank Department at Albany, made up from the returns of the banks, on the call of Superintendent Van Dyke, of the amount of United States securities owned by the banks of the State and City of New York, Jan. 19, 1863:

United States stocks	$81,631,780
Treasury Notes, 7.30s	25,383,505
Indebtedness Certificates	14,941,679
Certificates bearing interest	37,047,870
Certificates payable in gold	6,774,612
Demand and Legal Tender Notes	20,189,098
Total of all	$135,968,044

The Banks for Savings in this State and City hold, in addition, in trust for their depositors, $18,018,530, of which $10,392,102 is in funded stocks.

It is also interesting, to know the per centage of the Stocks and Treasury paper (interest bearing) of the United States, and of the United States Circulation of legal tender, held by the banks of the sum total outstanding at about the close of January. It is as follows:

	Total.	Owned by N. Y. B'ks.	Per ct. By b'ks.
Funded 6 per ct.	$112,818,142		
Funded 5 per ct.	30,483,000		
Total funded	$143,301,142	$31,631,780	22
Treas. b'ds 7.30s.	139,998,000	25,383,505	18
Treas. Deposits	79,285,000	43,821,982	55
Treas. Certific'tes	138,444,000	14,941,679	11
U. S. Notes	247,021,315	20,189,098	8½
Total	$747,999,457	$135,968,044	18p.c.

It is thus seen that of the funded debt of the United States, 78 per cent. is distributed among the people, including their bankers, in other States than New York, and 22 per cent., or $31,631,780 is owned by the banks of the State and City of New York, including $11,899,150 which they have pledged in the Bank Department as security for their own circulation.

It also appears that of the entire legal circulation of U. S. Notes, the banks held on the 19th of January last only $20,189,098, or about 8½ per cent. of the whole outstanding issue. Those who pretend therefore that there is a superabundance of this currency are refuted by this fact, and we have general and concurrent testimony that the financial condition of the Government is yet strong and unimpaired, and that the confidence of the people is unabated.

Great anxiety is beginning to be felt for the immediate construction of the Pacific Railroad. Its friends and supporters are getting stronger, and the splendid success of the Atlantic and Great Western in the construction of 201 miles of railway in seven months, at a very moderate cost per mile, is cited as evidence that the Pacific can be constructed with equal rapidity and by similar moderate expenditure. The road to the Colorado territory could be made in a single year, and it would pay from the start.

The following interesting statement is valuable just now, as it embraces facts useful to members of Congress who are legislating upon the finances. It is carefully prepared by an officer of the Government:

In the following named States there is no security given for bank note circulation beyond the liability of stockholders in case of failure:

	Circulation Jan. 3.
1. Maine	$5,000,000
2. New Hampshire	3,500,000
3. Vermont	3,000,000
4. Rhode Island	6,250,000
5. Connecticut	8,000,000
6. New Jersey	8,124,000
7. Pennsylvania	27,500,000
8. Delaware	1,200,000
9. Maryland	5,000,000
10. Kentucky	7,000,000
11. Michigan	150,000
Total	$74,724,000

In the following States the circulation is wholly secured by State bonds deposited as collateral security:

12. Illinois	$600,000
13. Iowa	1,164,000
14. Minnesota	80,000
15. Wisconsin	2,643,000
Total	$4,487,000

In the following States there is a mixed system, partly based on State bonds, as collateral security and partly on individual liability:

16. Massachusetts	$2,600,000	$26,820,000	$29,420,000
17. New York	34,556,000	*4,000,000	38,556,000
18. Indiana	1,100,000	5,560,000	6,660,000
19. Missouri	2,500,000	2,020,000	4,520,000
20. Ohio	3,608,000	6,425,000	10,033,000
Total	$44,364,000	$44,825,000	$89,189,000

*Remnant of the old Safety Fund system—the whole of which will disappear in the years 1863–66.

RECAPITULATION.

Eleven States unsecured	$74,724,000
Five States unsecured	44,825,000
Total	$119,549,000
Four States secured by bonds	4,487,000
Five States secured by bonds	44,364,000
Total	$48,851,000

GRAND TOTAL.

Unsecured	$119,549,000 or about 71 per cent.
Secured	48,851,000 or about 29 per cent.

Total bank circulation of the loyal States	$168,400,000	100

It will thus appear, and from official data in almost every case, that the secured bank circulation of the loyal States at the end of the year 1862 or beginning of 1863, was only $48,851,000, or about 29 per cent. of the whole, leaving the sum of $119,549,000 totally unsecured, except by the recourse (in case of failure) to the private property of shareholders.

The following statistics are from reliable data as to the years 1856 and 1862:

	1856.	1862.
Number of banks	1,317	1,389
Number whose notes are not counterfeited	463	253
Number of kinds of "imitations"	1,462	461
Number of kinds of "alterations"	1,119	3,039
Number of kinds of spurious	224	1,685

The Canal enlargement for military purposes has signally failed in Congress. This JOURNAL from sincere convictions of its being entirely useless for such purposes, has always opposed the project, and besides the State of New York has canals fully large enough for its commercial necessities. If the people of Illinois wish to enlarge their canal and improve their river, there is no objection to that. But let it be done on its own proper merits, and without political or other combinations.

Our readers will find our tables this week containing the latest corrections, and full of instructive facts.

The following quotations of sales are in addition to those given elsewhere in our columns:

Night Travel on Railway.

SMITH'S AIR LIGHT.

It is well understood that the night trains on our numerous railways are crowded with passengers. Men of business prefer them, as a means of saving time, and the introduction of cars with accommodations for sleeping, an American invention, characteristic of our countrymen, has made a night journey not only convenient, but really comfortable. This improvement has nowhere else been adopted, except in India on some of the new lines, and the reason is, that journies in that country are from climatic reasons, generally pursued at night. Our system is well arranged. To leave we will say, the City of Buffalo at half-past 10 p. m., to enter a sleeping car, to rest comfortably while the train is at a speed often of from 30 to 40 miles per hour and to wake up at sunrise at Troy or Albany is a most agreeable arrangement.

To accomplish this however safely, not only requires good engines and careful drivers, but good lights. These have been obtained to a certain extent by the use of large oil lamps set in parabolic reflectors which by the nature of their curve, throw forward or reflect the rays of light in parallel lines, in a great body forward on the track. Yet they are difficult to keep in order, the light depends on the quality of the oil, the temperature of the weather, and the care of the persons charged with keeping the apparatus clean.

It was quite natural then for our ingenious inventors to attempt a substitute for these head lights, both to obtain a larger illuminating power, and to reduce its expense. Who ever has examined the reports of the Superintendents of our great lines will find the lamp department a serious source of outlay. On the New York Central Railway it is ascertained, that the head lights of an Engine, oil, breakage of glasses, wicks &c., cost for five hours each day, and three hundred days in the year, no less than $108 75.

Dr. George Hand Smith, a scientific and practical gentleman of the City of Rochester, after several years careful study of the subject, has arrived at the most important and valuable results, and has produced an air light, though this term does not fully explain its principle, which bids fair to throw even the famous oxyhydrogen combination completely into the shade. His method may be thus popularly explained, as it is now successfully employed on the Central Railway. Two small iron casks or reservoirs, are respectively charged with the ordinary coal gas of our cities, and atmospheric air, which operation is easily performed in about three minutes. These are carried under the boiler of the Locomotive and occupy but little space. From these pass two tubes, one from each reservoir, to the burners in the lamps. These are quiet simple in their construction, and carry four bent tubes pointing to a common centre in which is a small cylinder or pencil of lime, about the thickness of a pencil case about two inches in length and representing the wick. The gas and air are let on from the reservoirs by a stop cock, and an arrangement which secure a regular and commensurate supply of the gas and air. Below these jet tubes, is a slot through which a small quantity of the coal gas is allowed to escape so as to burn and heat the tubes as it passes through. A match is applied, and one of the most brilliant and powerful lights imaginable is at once produced. It may be well to say the theory of this process of combustion as stated by Dr. Smith is, that the preheating of the tubes through the slot, supplies the loss of heat from the nitrogen of the air, which is a supporter of combustion though not combustible itself, and would abstract a considerable quantity from the heat of the flame. We imagine also, that the heating of the atmospheric supply is also an advantage, as we see in the hot blast of the iron furnaces. Be this as it may, from these small four jets and this pencil of lime, at the small cost of one cent and a half per hour, while the oil burner costs six cents, a ball of light twenty inches in diameter of dazzling brilliancy is projected forward a distance of two thousand feet, or in other words more than three times as far as that of the old oil lamps. Fine print may be read at the distance of three hundred feet.

It is evident then that this admirable contrivance of Dr. Smith, gives entire command of the track for that distance to the Engineer, increasing his power of control in time three fold, as he approaches an obstacle by timely application of the brakes. As the cost of Dr. Smith's light for an engine is ascertained to be, on the basis before stated, of five hours' work for three hundred days, but $26.87, its use will be a saving on every locomotive of $81.88 per annum.

We may therefore pronounce economically, that the question of its superiority is settled, and of its principle, so simple, so ingenious, and so easily applied we can not doubt, nor fear that we are "by the glare of false science betrayed." We perceive at a glance, that railways alone are not to be benefitted by this discovery. It must come into general use for public buildings, parks, steamers, and light houses. We presume that a single lamp from the dome of a theatre, with an appropriate reflector, would light up the interior of the largest edifice we have of that description.

We have avoided entering into any scientific analysis of this invention or comparison of its effects as compared with other well known lights, as well as the extent of their illuminating power photometrically ascertained.

West Chester and Philadelphia Railroad.

The following is a comparative statement of the earnings and expenses of this road, for the years ending December 31, 1861 and 1862:

	1861.	1862.
Earnings	$129,447 16	$140,202 61
Expenses	61,367 16	61,556 40
Net earnings	$68,080 00	$76,646 21

The increase in gross earnings was $10,755 45; in expenses, $189 24; and in net earnings, $10,566 21. The number of passengers carried during the year, and the amount received therefrom was as follows:

	No. Passeng's.	Am't Rec'd.
Through passengers	32,296	$19,219 65
Way pass. to Philadelphia	.....	.....
Local travel	98,374	32,521 31
Coupon travel	19,239	6,276 15
Passengers between Philadelphia and Phila. and Baltimore Central R. R.	35,106	13,340 28
Passengers between West Chester and Phila. and Baltimore Central R. R.	7,112	1,280 16
Excursion pssengers from Philadelphia. Full and half passengers	8,722	932 75
Commutation passengers	23,875	2,224 50
Local travel	39,383	10,072 18
Total	264,107	$85,866 98

The number of regular passenger trains run during the year was 3,232; average number of passengers per train, 79.

The freight tonnage was as follows:

Freight through	2,785
" way	10,678
Coal, way	16,978
" through	2,938
" to Phila. and Baltim'e Central R. R.	5,430
Freight between Phila. and Balt. Central R. R. and Philadelphia	21,505
Freight between Phila. and Balt. Central Railroad and way stations	877
Total tonnage	61,191

The number of freight cars (4 wheel) hauled was as follows:

	West.	East.
Loaded	10,016	5,725
Empty	2,085	6,325
Total	12,101	12,050

Average distance hauled by trains, 16 miles; average number of freight cars per train, 24.

The amount received from freight and passengers to and from the Philadelphia and Baltimore Central Railroad was as follows:

	1861.	1862.
Passengers	$12,954 38	$14,620 44
Freight	11,104 93	10,416 60
Total	$24.059 31	$25,037 40
—Increase	$977 73	

Debt of Ohio.

From the Report of the Commissioners of the Sinking Fund we learn that the total funded debt of the State, November 15, 1860, was..$14,250,238 89
The "Union Loans," contracted during the year 1861, were 1,212,039 45

$15,462,273 34

During the year 1861, there was redeemed..$565,000 00
During the year 1862, there was redeemed. 755,610 78

$1,320,610 73

Total funded debt, Nov. 15, 1862..$14,141,662 61

Consisting of the following loans:

FOREIGN.

Loan of 1856, not bearing interest...	$1,666 33
Loan of 1860, bearing 6 per cent. int.	1,608,905 07
Loan of 1865, bearing 5 per cent. int.	1,015,000 00
Loan of 1868, bearing 6 per cent. int.	379,866 00
Loan of 1870, bearing 6 per cent. int.	2,183,531 93
Loan of 1875, bearing 6 per cent. int.	1,600,000 00
Loan of 1881, bearing 6 per cent. int.	4,095,309 47
Loan of 1886, bearing 6 per cent. int.	2,400,000 00
Total foreign debt	$13,283,778 80

DOMESTIC.

Not bearing interest.....	$1,825 36
Loan of 1863, 6 per cents.	275,385 00
Loan of 1866, 6 per cents.	299,704 32
Loan of 1868, 6 per cents.	280,969 13
Total domestic debt.....	$857,883 81
Total funded debt.....	$14,141,662 61

The interest on the above is as follows:—

Annual interest on the foreign debt...	$786,806 75
Annual interest on the domestic debt.	51,363 51
Total.....	$838,170 26

To this sum there should be added the irreducible debt, composed of school or trust funds, held by the State, which is now $2,879,379 29; thus making a grand total of $17,021,041 90. The Commissioners state that $4,095,309 47 of the loan of 1860 have been converted into the loan of 1881, under the provisions of an act passed March 28, 1862.

The domestic debt is payable, principal and interest, at the State Treasury. The foreign debt is payable, both principal and interest in New York. On the latter the interest has been paid in gold, and on the former in currency. This distinction is believed to be unjust, and the Governor desires that provision be made for a uniform rule upon the subject. He says:

Upon the question, itself, of paying our interest in coin, much may be said on either side. In favor of the measure, it may be claimed that Ohio agreed to pay in coin, and having thus agreed, and being abundantly able to perform all her agreements we can not with honor, compel our creditors to take anything else.

On the other side, it may be said, that when this agreement was made, it was not even contemplated by our wisest statesmen that anything but coin would ever be declared a legal tender, nor that the national government would ever be compelled to issue a currency, and require the business community to receive it at par, when the same would not command, in coin, its nominal value.

This state of things, however, is upon us, and the wisest cannot tell how long it may continue. Is this a sufficient reason to justify us in violating an agreement? Surely our constituents will respond. No. The fund commissioners should, therefore, be directed by law to provide sufficient coin to pay the interest upon all of our debt. The principal of the debt, being payable at our pleasure after stated periods, may be suffered to run until a more favorable time for its liquidation.

The following will show the receipts and disbursements by the Sinking Fund Commissioners during the year ending November 15, 1862:

RECEIPTS.

Balance in the Treasury, November 15, 1861		$9,306 83
From taxes—sinking fund	$1,249,832 43	
From taxes—war loan	301,623 19	
		1,551,455 62
From sales of school land—section 16....	73,023 96	
From sales of school land—section 29 ...	4,485 36	
From Virginia military	8,708 73	
		86,218 05
From sales of land.....		1,489 75
From surplus revenue.....		14,883 86
From dividends and interest on stocks and bonds.....		23,753 69
From assets of J. G. Breslin, late Treasurer		2,555 53
From sales of Little Miami R. R. stock....	$205,905 50	
From sales of Little Miami R. R. bonds...	54,646 67	
From stock of Cincinnati and Whitewater canal.....	1,500 00	
		262,052 17
From other sources.....		1,122 50
Total receipts for the year.....		$1,952,838 00

DISBURSEMENTS.

For interest on foreign debt.....	$806,793 12	
For interest on domestic debt.....	13,373 10	
For int'r'st on Union loan	54,223 66	
		$874,389 88
For interest on school funds.....		168,305 37
For redemption of foreign debt.....	$600,150 46	
For redemption of Union loan	251,500 00	
		851,650 46
For expenses of Union loan		39 00
For expenses of New York office...		3,076 34
For expenses of home office.....		1,216 64
For expenses of Commissioners....		875 00
Total disbursements.....		$1,899,552 69
Balance in Treasury.....		$53,285 31
Balance in New York.....		98,072 00
Total balance of sinking fund on hand, Nov. 15, 1862.....		$151,357 31

Great Improvements in Spikes and Bolts.

We publish an advertisement in another column, in relation to copper coated spikes and bolts, a valuable article, made by a new and scientific process, and apparently indestructible. A copper coating is applied to the iron by an intense heat, which fuses and amalgamates it so as to convert it almost into a bronze. Neither salt water corrodes, nor electricity acts upon it. The price is moderate. The Agenti sa well known Steam Ship Builder, and his recommendation is a good warrant for the excellence of the article.

Winter Freight on the Grand Trunk.

We notice in the Montreal papers a circular from the Local Superintendent of the Grand Trunk, to the general agents, in which he offers to reduce the rates on large consignments, to induce shippers of wheat, flour, &c., to forward at once, instead of waiting the opening of navigation. The agents are directed to exert themselves among the merchants and shippers in the western section, for that object.

Finances of New Jersey.

We extract from the message of the Governor the following statement of the financial condition of this State:

The receipts from all sources since the date of the last statement laid before the Legislature have been $263,922 02
Cash on hand Jan. 1, 1862..... 14,235 55
Total..... $278,157 57
Disbursements 186,073 07
Balance Jan. 1, 1861..... $92,084 50

Debts due and payable same date were $168,504 87, being $76,420 37 in excess of cash on hand. But, compared with the statement of January, 1862, the ordinary indebtedness account has been reduced in amount $61,072 03, and is now within the constitutional limit.

The State quota of the Direct National Tax was $450,134. It was paid, after the deduction of 15 per cent, in claims against the United States.

The war fund account of the State is as follows

Bonds issued.....		$791,100 00
Due Banks		405,870 84
Total		$1,196,970 84
Due the State from the United States.....	$317,796 84	
Cash on hand.....	27,550 62	
Tax assumed by State..	382,613 90	
		$727,961 36
Total.....		$469,009 48

The Treasurer has cash in hand, beside the above, $67,560 10, being the 15 per cent deducted from United States tax. In all $410,164 52 are due the State—more than sufficient to pay the Bank indebtedness. A State tax of $100,000 is recommended to pay interest on bonds and to secure a sinking fund,

The attention of the Legislature is inviting to the act of Congress granting lands in aid of a College of Agriculture, Mechanic Arts, and Military Instruction.

Grand Trunk Railway.—Change of Terminus.

We take the following extract from the Annual Report of the Boston Board of Trade for the year 1862, which has just been published:

"In January, 1860, the Government of this board appointed a committee to confer with the president and directors of the Grand Trunk and of the Maine and Eastern Railroads, relative to changing the terminus of the first named road from Portland to Boston. This committee performed much and valuable service; but such was the nature of the question itself, and the hostile action in the State of Maine, that the object was not accomplished. But in stating the obstacles to success in our last annual report, we said, in substance, that we deemed the present terminus of the Grand Trunk, and the transfer to steam-vessels of merchandise laden in cars at the West for Boston, as in direct contravention of the laws of trade, and as sure, therefore, to come to an end in the natural course of things. The fact is so, even before the time we anticipated. Late in 1862, the Boston and Lowell, the Nashua and Lowell, the Concord, the Northern New Hampshire, the Vermont Central, the Vermont and Canada, and the Northern New York, concluded an arrangement with the Grand Trunk, by which persons and things to and from the West, are to pass the St. Lawrence at Ogdensburg, and thus avoiding Portland, be transported direct to Boston. The saving of distance, by this change of route is one hundred and nine miles. The track on the Grand Trunk is about a mile from the village of Prescott, but is to be extended to the river, to connect with a steamer of a model and capacity to carry across to Ogdensburg a train of loaded freight cars. In

Boston the facilities for unloading and storing the exports of the West for home consumption are to be increased; while at the wharves of the 'East Boston Wharf Company,' merchandise can now be received into the warehouse for storage, or to be shipped coastwise, or to Europe, directly from the cars, thus saving the expense of carting and labor, and damage by handling. From this brief statement of facts, it seems that the union or consolidation of the 'Northern roads,' or from Boston to the Canada side of the St. Lawrence, which during the year, we have endeavored to promote between the roads which connect us with Albany, has been consummated. Since the policy of this board has ever been, and will continue to be, to encourage every line of transportation whether by land or sea, but, to recommend or favor none; and since nothing is truer, as a rule than the commercial maxim that, 'The cost of carriage determines the route,' we leave the future with those who, managing the lines of Lake Erie and to Lake Ontario, by way of Buffalo, Oswego, and Ogdensburg, respectively, are of necessity, in competition with one another and with the Public Works of Canada. We simply add, that our own part in this arrangement is limited to efforts to include an increase of storehouses, and the construction of grain elevators in this city through a select committee, at the request of one of the trustees of the Northern New York road, and other officers of the line, in connection with merchants who are deeply concerned in the corn, flour, and provision trade of the West."

New York and Boston Air Line Railroad.

The Directors of the New York and Boston Air Line Railroad have published a report which deserves the attention of capitalists. The road is now in full operation to Bellingham, a distance of 33 miles, and 7 miles more road will extend it to Woonsocket in the valley of the Blackstone. "When this shall be accomplished (say the directors) they are certain of the possession of as good a line of road, for way of business, as any other of like extent leading out of Boston." But they aim at carrying out, in part at least, the original idea of making "a more direct, rapid, and consequently cheaper and more frequent communication between Boston and New York than now exists." With this view they desire to extend the road 22 miles from Woonsocket to Daysville on the line of the Norwich and Worcester Railroad, to make connection with the Norwich route to New York and to accommodate and profit by the large manufacturing business of the valley of Pascoag. A letter from D. S. Whipple of Mapleville, R. I., shows that the extension would accommodate 44 factories, employing nearly 3,000 operatives, and requiring the transportation of 25,000 tons of freight per annum. The directors propose to issue $1,500,000 first mortgage bonds, secured by a mortgage of the road from Brookline to Daysville. With the proceeds, in part, they will complete the road, and dispose of the balance as follows:—

1st. Exchange with parties holding mortgage notes of this corporation bonds to the entire amount of ($400,000) at equal rates.

2d. Make a just settlement with holders of Charles River Railroad bonds, paying part in new bonds and part in stock.

3d. Liquidate and settle all the floating debt of the corporation, by proffering to the holders one-half in bonds, and the balance in shares.

The directors are confident that with the road opened to Woonsocket the earnings will pay the interest on the bonds required for the purpose, and, when completed to Daysville, the interest on the bonds and 6 per cent. on the stock.—*Boston Advertiser.*

RAILROAD IRON.

3,400 TONS BEST QUALITY WELSH RAILS—T pattern—53 lbs. per lineal yard, for sale by

CHAS. L. PERKINS, or E. LIVINGSTON,
54 Exchange Place.
3m15

EDWARD KING,
(Late of the firm of JAMES G. KING'S SONS,)
OFFERS his services at the Board of Brokers for the **purchase or sale** of
STOCKS, BONDS AND GOVERNMENT SECURITIES.
No. 23 WALL ST.

INTERESTING TO SHIP BUILDERS AND ENGINEERS.
THE COPPER COATING CO.
ARE now fully organized, and are coating one ton per day of IRON Bolts and Spikes.
They are exclusively used by the GOVERNMENT, and have the quality of Copper, combined with the strength of iron, and are vastly superior to galvanized iron or composition, and will not cost more than one-fourth the price of Copper, and are warranted to stand a red heat. This process is admirably adapted for roofing, gutters and leaders.
For information, address EDWARD MILLS, General Agent, 198 Broadway, where samples will be exhibited and information given. 1t7

QUARTZ MILLS
OF THE MOST APPROVED KIND,
MANUFACTURED BY **BURDON, HUBBARD & CO., 102** Front st., BROOKLYN, N. Y. Also Agents and manufacturers of the BEST PATENT PREMIUM AMALGAMATORS. the best and simplest in use for saving both **fine** and **coarse** gold.

LANCASTER LOCOMOTIVE WORKS,
LANCASTER, PENN.,
FOR SALE—In good working order, with all necessary machinery, and a good variety of small tools, for locomotive or machine manufacture, such as foundry and smith's shop tools, lathe and planar tools, etc., etc., fronting on the Pennsylvania Railroad.
This property will be sold much below its original cost and on easy terms.
For further particulars apply to
ADRIAN H. MULLER,
1m5 P. R. WILKINS & CO., No. 5½ Pine st.

TO CAPITALISTS.
COAL MINES FOR SALE.
VERY valuable coal mines at La Salle, Illinois, in full working order and doing a profitable business. Having the advantage of a six feet vein, two leading railroads and a canal and navigable river by the works, with the large and growing city of Chicago near, and being in a country destitute of wood, these mines must become among the most profitable in the United States. Samples of both kinds of coal (cannel and bituminous) can be seen at our office. These mines will be sold at a great sacrifice. Apply to ADRIAN H. MULLER, P. R. WILKINS & CO., No. 5½ Pine st.

THE NEW YORK CENTRAL R. R. CO.
TREASURER'S OFFICE,
ALBANY, January 21, 1863.
SIXTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of THREE AND ONE-HALF per cent. on the capital stock thereof, free of the United States income tax, payable on the twentieth day of February next, on stock registered at New York Boston and Albany, respectively, and on the twentieth day of March next on stock registered at London.
Dividends in New York will be paid at the office of DUNCAN, SHERMAN & Co.; in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the ALBANY CITY BANK; in London, at the UNION BANK OF LONDON, pursuant to circular and notice of December tenth, 1862, from the Transfer Office in that city.
The Transfer Books at New York, Albany, and Boston will be closed at the close of business on Saturday, the thirty-first day of January instant, and be re-opened on the morning of Monday, the twenty-third day of February next.
JOHN V. L. PRUYN,
6t5 Treasurer.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & CO., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

The New National Loan.
U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

VERMILYE & CO.,
No. 44 WALL ST., NEW YORK.

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in sums of
$50, $100, $500 and $1,000.

The Registered Bonds in sums of
$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 3m45

An Invention of Rare Merit.

LONG WANTED, AND FOUND AT LAST!

A Kerosene Lamp Chimney, Easily Cleaned

AND WHICH

WILL NOT CRACK OR BREAK

FROM SUDDEN CHANGES OF

TEMPERATURE.

THE CHIMNEY in common use breaks from unequal expansion and contraction, caused by the upper portion becoming much more highly heated than the lower portion. This constant liability of the Chimney to be broken by being suddenly cooled or "over-heated," is entirely removed by a unique and beautiful invention, BROWN'S METAL TOP LAMP CHIMNEY, which, being made in accordance with the simple law of expansion and contraction, is found to be almost "fire-proof," as far as heating by the flame of the lamp is concerned.

The clear, positive superiorities of the NEW LAMP CHIMNEY over the old style, are—

1. It will not crack or break from sudden changes of temperature, or "over-heating."

2. The top can be instantly removed, and the glass wiped perfectly clean in a moment WITHOUT WETTING.

3. It is shorter than the common chimney, therefore less liable to accidents and more convenient for carrying about the house, it is of elegant proportions and a decided ornament to the lamp, which will be found to burn with a clear, steady and beautiful light.

It is really the ideal of perfection in a lamp chimney, and after using one for an evening you will wonder that you could tolerate the old expensive style.

A "BROWN'S METAL TOP LAMP CHIMNEY," **IS WARRANTED, with ordinary care, to last just as long as the lamp on which it is used.**

Price (with a small SHADE for common size,) Zinc-top, **25** cents, Brass, **31** cents; Silver-Plated, **50** cents.

Dealers will be furnished, per Express, with a SAMPLE BOX containing one-half dozen Chimneys, assorted styles and sizes, with circulars, colored show cards, Price list, etc., on receipt of **$1.25.**

BROWN'S

Metal Top Lamp Chimneys

ARE MANUFACTURED ONLY BY THE

NEW LAMP CHIMNEY MANUFACTURING COMPANY.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

American Railroad Journal.

New York, Saturday, February 21, 1863.

Our Ability to Bear Taxation.

The leading British journal of the day boasts of the ability of the British people to bear taxation, no matter how great be the ingenuity of their National Legislature in imposing it, nor how pressing the burden of the imposition. In this Country it has been our boast, that taxation is the last object of our Government, and indirection and voluntary payment have been the rule in obtaining the necessary revenue. But the crisis is upon us, as it has been at sometime or other, on all other nations, when their existence has depended on the ability of the people to pay, and their readiness to give. We are involved in a struggle which might, with common forbearance, have been avoided altogether. We have armies on the field, and navies on the sea, all charged with the mission of death against those who are our kin. Mourn over this as we may, the die is cast. Men will have it so, and it appears as if the sword alone can give us peace.

But any peace that should destroy the Union, set State against State, sever and oppose their interests, endanger their boundaries, destroy the freedom of their trade, obstruct their rivers and lakes, shut up their ports, break up their internal lines of communication, vary their traffic, interrupt their established relations, introduce conflicting laws and throw society ere long back upon its original elements, to be rearranged, reconstituted and moulded into form, to be again torn asunder with each new whim of their founders, or of the hour, would be no peace at all, but endless war and misery. It is in this light we accept the struggle which is forced upon us, believing in the long settled principle, that the greater must control the less, and that tranquility cannot be restored except by the ascendancy of the most powerful. It would be well if those who have broken down the old ramparts, should learn this truth before they discover they can never find again such a strong hold, and rock of defence, as this they assail.

So then we are compelled to lay aside all our sentimentalism, for the consideration of material facts, and to have recourse to what the staticians tell us of the power and resources of the North to support and continue the conflict. In population we are as three is to one, and that one but a half, if it be divided by color, vastly superior in area, in cities, towns and villages, in railways, ships and steamers and factories, in all products of value but a single one, in schools, academies and colleges, in the learned professions, in effective labor and positive wealth. It is ascertained that if even our National debt should reach two thousand millions of dollars, about half of that of Great Britain, it would not be more than about 18 per cent of the real and personal property of the loyal States, which sum distributed over a series of years would be repaid easily out of the ordinary profits of labor and business. During the French revolution, and while England was far more agitated with its own future than we have been with ours, it was proposed by them to raise 20 per cent at once out of all the property in the kingdom (as a gift never to be repaid,) by the people to the Government. Mr. Pitt reserved the proposition for the last moment, and it never arrived. What the British people were willing to do to save their Country from threatened subjugation, might be expected from our patriotic citizens in our extreme. But that time has not come for us and never can, for even while war is raging in distant borders, we are here enjoying exemption from its ravages, and the productive power of the people was never in greater activity. The thousand millions of dollars expended thus far by the Government has gone directly into the hands of the workers of this Country, and most of it will remain there. The classes chiefly affected by taxation are therefore prepared to meet its demands. Capitalists who have accumulated fortunes under our benign institutions must in return cheerfully part with something to retain what they have so readily accumulated. Thus we have the doctrine of equivalents at work to make all things right in the end. We continue therefore to hope for the best in spite of the evils which come upon us in the shape of debt and taxation. "There is a Providence that shapes our ends, rough hew them as we will."

Philadelphia and Erie Railroad.

The Annual Meeting of the stockholders of this company was held in Philadelphia on the 9th inst. The Report, which was read by Wm. G. Moorehead, Esq., President of the Company states that operations of the past year have been chiefly confined to the prosecution of the work on the unfinished portion of the road, and to the payment of the floating debt of the company.

On the 1st of September the road was opened for use from Whetham station to North Point, at the mouth of Young Woman's creek, a distance of eight and a half miles, and on the 1st of December a further distance of fifteen miles to the mouth of Sinnemahoning. To this point the trains have been regularly running until the 5th of last month, (January,) when they were extended a further distance of ten miles to Grove Flatt, making the whole extension of the eastern division, as now run above Whetham, thirty-four miles.

On the western division, the track has been extended from Warren to Sheffield, 13 miles, on which trains are now running regularly, thus making 47 miles of track laid and put in use during the past year. There remains but 90 miles of track to complete the entire road from Sunbury to Erie. On this a large amount of grading has been done, and although considerable remains to be done, we have the assurance of the contractors that, with their present organized force and arrangements for an increase, together with the fact that most of the iron, cross-ties and other material for the superstructure, have been secured

and are ready for delivery as wanted, the whole line will be finished and opened for use during the present year—probably on or before the 1st of November, but at the latest by the 1st of December.

The transportation of petroleum as a source of revenue is referred to. It is stated that "the yield of all the wells in the oil district of Northwestern Pennsylvania during the past year is estimated at 2,106,000 barrels. Of this amount there has been transported over portions of the road 220,000 barrels, or over one-tenth of the whole. The completion of your road, with suitable branches to the oil district, and proper facilities in this city for refining and exporting the oil, in connection with the fact that this extraordinary oil district approximates nearer to your railroad than to any other outlet to market, cannot fail to secure to your line much the largest share of this important business, as well as make our commercial metropolis the greatest mart in the Union for its sale and export."

On the 1st of January, 1862, the floating debt of the company was $1,810,626, and on the 10th of the ensuing month (February), it was reduced to $994,188. Of this amount there has since been paid $875,312, leaving a balance on January 1, 1863, of $118,876 unpaid.

The lease entered into with the Pennsylvania Railroad Company did not go into effect until the 1st of February, 1863. Consequently the road was not operated during the month of January by that company.

The receipts for January were	$34,428 92
Remaining eleven months	408,980 94
	$443,409 86

The following statement of the receipts for the last three years will represent the comparative increase in the business of the road:

Receipts in 1860	$239,418
do. 1861	350,430
do. 1862	443,419

Showing an increase of $11,977 in 1862 over 1861, which extra may be fairly credited to the use of additional road opened late last fall.

The terms of the lease to the Pennsylvania Railroad Company gives to this company thirty per cent. of the entire business of the road. This, on the gross receipts of the past year, ($443,419,) is $138,026, a result which, in view of the increased productiveness of the road heretofore finished, and the extensions recently added and to be added as the track-laying progresses, leaves no reason to doubt that the proportion belonging to this company will be sufficient to pay the interest on its bonded indebtedness as it becomes due, and that soon after its completion the stockholders may expect to realize their long-deferred hope of remuneration for their outlay.

The report concludes by saying that it is believed, indeed is not doubted, that the revenue from the road will go on increasing to an extent which will insure a continuance of dividends after payment of the State interest in 1872 shall be resumed.

The reports of the Treasurer and Chief Engineer were also read.

The meeting adjourned to go into an election for managers, of which the result was the choice of Messrs. William G. Moorhead, Ellis Lewis, Henry Duhring, D. K. Jackman, C. B. Wright, Edward F. Gay, J. D. Whetham, F. M. Drexel, P. Metcalf, John S. Brown.

Sandusky, Mansfield and Newark Railroad.

The earnings of this road for the years ending December 31, 1861 and 1862, have been as follows:

	1861.	1862.
From passengers	$75,584 31	$90,851 03
" freight	80,537 53	132,471 38
" mails, express, etc.	15,590 14	16,073 26
	$171,711 98	$239,395 67

The expenses of 1862 were:

Repairs of engines	$10,299 79	
" cars	16,484 64	
" track	54,138 37	
Train expenses	23,289 86	
Station "	17,974 38	
Shop "	2,135 68	
Fuel	13,052 21	
Oil, waste, etc.	1,935 88	
Salaries, etc.	17,096 38	
		156,407 19
Net earnings		$82,982 48

Compared with the previous year, the gross earnings of 1862 show an increase of $67,683 69 with an increase in expenses of $22,305 44—making the increase in net earnings $45,378 25.

The income, both gross and net, is the largest realized by the company since 1856. The gratifying increase is mainly attributable to the liberal wheat crop of 1862. With an equally good crop, the present year, it is believed that the earnings will show a handsome increase over those of the past year. Of the increase in gross earnings, the sum of $57,489, or 85 per cent of it, was gained in the last half of the year. As a large share of the last wheat crop still remains with the farmers, a large increase is expected in the traffic the ensuing spring over the corresponding period of last year.

The road has been maintained in good order the past year; 141 tons of new rails have been purchased and laid in the track, also 100 tons of re-rolled rails; 16,000 lbs of spike, 8,079 wrought iron and 100 cast iron chairs have been used, and 2412 rails repaired. Important alterations and improvements have been made in side tracks water stations, wood houses, etc., at various points on the road. The bridges, culverts, masonry and "protection" have received proper care, and 11½ miles of track balasted during the year. The company will require during the ensuing year, 35,000 cross-ties, 200 tons of new T rail, 11,650 new chairs, 8 tons of T rail spike, and 150 tons of old T iron re-rolled. Eleven new bridges, of an aggregate length of 450 feet, will be required to keep the bridges perfectly secure.

The receipts from all sources during the year have been $245,782 40; and the disbursements $234,483 32—leaving a balance in cash of $11,299 08. Included in these disbusements is $5,209 42 for taxes; $1,313 76 for interest on domestic bonds, and $61,550 for the redemption of over due domestic bonds. Upon this subject the report says:

The Directors at their April meeting, directed your Treasurer to pay the balance of the original issue of "Domestic Bonds" falling due July 25, 1859, and at their October meeting, he was further instructed to pay the same class of Bonds that had matured July 25, 1860 and 1861. Notice was accordingly given to the holders, as far as they were known to him, to present their Bonds for payment, and, as will appear from his report, the sum of $61'550 has been redeemed within the year ending December 31st, 1862. Of these Bonds there remain outstanding and unpaid, at this date, the sum of $2,900. The Treasurer has been instructed to issue public notice in a daily newspaper, requiring the presentation of these Bonds for payment, before 1st day of February next, and that interest on them will cease at that date.

We congratulate the Stockholders on our release from this long standing obligation: we likewise take the occasion to express our grateful satisfaction for the patient forbearance, exercised by the holders of these Bonds. Of the new series of Domestic Bonds, issued under a decree of court on final settlement with the Receiver of the Old Company, amounting in all to $20,000, the Board have to state that they were payable in instalments of $5,000 each, maturing in April and October, 1862 and 1863. It will be seen that two instalments ($10,000,) have already matured, and the balance matures this year.

When this small sum shall have been paid, the Company will stand charged with no other indebtness but its Mortgage Bonds. The holders of these mortgage securities may now look forward to an early receipt of their interest regularly, either in whole or in part. A moderate increase over the business of 1862, will enable us to pay a full year's interest, and the prospects now strongly indicate that increase.

The total mileage of all trains has been 214,404 miles. Through passengers carried, 1,194; way, do., 101,369. Total tonnage, 64,961.

CONDENSED BALANCE SHEET.

Capital stock issued	$806,520 19
" " due receiver	42,250 00

The company have built during the year, 1 passenger car, 27 box grain cars, 4 hand and 4 ditching cars. The equipment now consists of 11 locomotives; 10 passenger, 5 baggage, 74 box grain, 50 merchandize, 41 platform and coal, 5 lime, 22 hand, 12 ditching, 12 stock, and 11 rack cars.

The officers and directors for 1863, are as follows:

Directors.—Wm. Durbin, Wm. P. Chapman. John W. Sprague, Samuel M. Robinson, Robt. McComb, H. P. Warden, Jas. E. Woodbridge, Jerome Buckingham, James Lyon.

President.—Wm. Durbin.

Secretary.—John W. Sprague.

Treasurer.—Wm. P. Chapman.

Assistant Sup't.—James H. Stewart.

Schuylkill and Octorara Railroad Company.

On the 10th inst., Mr. Clymer introduced into Senate of Pennsylvania, a bill to incorporate the Schuylkill and Octorara Railroad Company, with power to construct a railroad from the valley of the Schuylkill, in the county of Berks to the Maryland line, by the most eligible route, with the right to continue or extend the same into the State of Maryland, and connect with any railroad therein, with the consent of that State. The capital stock of the company is to consist of 10,000

shares of $50 each, with power to increase the same from time to time and borrow money. The road must be commenced within five years and completed within eight years after the passing of this act.

Finances of Pennsylvania.

EXTRACTS FROM THE MESSAGE OF THE GOVERNOR.

The balance in Treasury, Nov. 30th, 1861, was		$1,551,605 72
Receipts during fiscal year ending Nov. 30th, 1861, were as follows:		
Ordinary sources	$4,047,822 39	
6 per cent. loan act, May 15th, 1861	387,850 00	
From various banks as an equivalent for coin for the payment of interest on public debt	140.768 30	
Refunded cash, milit'ry	29,566 42	
U. States Government.	605,740 52	
		5,211,747 63
Total in Treasury for fiscal year ending March 30, 1861		$6,763,353 35
And the payments have been as follows:		
For ordinary purposes.	$3,083,110 06	
Paid on State interest as an equivalent for coin	146,631 22	
Military expenses, Act April 12, 1861	7 62	
Military expenses, Act May 15, 1861	460,548 68	
Military expenses, Act May 16, 1861	1,217 26	
Military expenses, Act April 16, 1862	20,607 04	
Military pensions, Act May 15, 1861	400 54	
Commissioners of sinking fund	427,881 51	
Domestic creditors	105 32	
Temporary loan redeemed	100,000 00	
United States Government direct tax	350.000 00	
		4,590,509 25
Leaving balance in Treasury Nov. 30, 1862		$2,172,844 10
Of which amount one hundred and ninety-five thousand five hundred and seventy-six dollars and twenty-seven cents is the balance of unexpended military loans as follows:		
Balance of said fund Nov. 30, 1861	390,507 41	
Receipts under Act May 15, 1861	387,850 00	
		$778,357 41
Paid for military expenses as above	482,781 14	
Paid for redemption of temporary loan	100,000 00	
		582,781 14
		$195,576 27
Receipts from ordinary sources:		
For year ending Nov. 30, 1862		$4,047,822 39
" " " 1861		3,017,645 57
Excess of receipts for 1862		$1,030,176 82
Payments for ordinary purposes, excepting interest:		
For year ending Nov. 30, 1861		$1,118,662 93
" " " 1862		$1,023,345 77
Decrease in expenditures of 1862		$95,317 16

From the tables exhibited it will appear that the receipts from ordinary sources of revenue for the year 1862, are in excess of the receipts of the year 1861 one million thirty thousand one hundred and seventy-six dollars and eighty-two cents (the excess of interest paid in 1862 over that in 1861 being $144,095 37); and that the ordinary expenditures for 1862 were ninety-five thousand three hundred and seventeen dollars and sixteen cents less than the year previous.

The healthy condition of the revenues, and the excess of receipts over the expenditures, secured by the rigid economy which has been practiced (especially considering the necessary increase of taxation by the National Government,) seem to invite the attention of the Legislature to a revision of the revenue laws, with a view to lightening the burthens of the people. In this connection it is proper to invite your attention to the justice and expediency of restricting the rate of local taxation now in some parts of the State oppressive.

Amount of public debt of Pennsylvania, as it stood on the 1st day December, 1861		$40,580,666 08
Additional amount received at the State Treasury during the fiscal year ending November 30, 1862, on military loan, authorized per Act of May 15, 1861		387,850 00
		$40,968,516 08
Deduct amount redeemed at the State Treasury during the fiscal year ending November 30, 1862, viz:		
5 per cent. State stocks.	$268,809 49	
4½ per ct. State stocks	50,000 00	
4 per cent. State stocks	100,000 00	
Interest certificates	17 25	
Relief notes	1,411 00	
Domestic creditors' certificates	64 52	
Military loan, per Act of April 12, 1861, redeemed	100,000 00	
		$520,302 26
Public debt, Dec. 1, 1862		$40,448,213 82

Towards the extinguishment of the public debt, the sinking fund holds securities amounting to ten millions seven hundred and eighty-one thousand dollars, as follows:

Bonds of Sunbury and Erie Railroad Company	$3,500,000
Bonds of Pennsylvania Railroad Company	7,000,000
Bonds of Wyoming Canal Company	281,000
	$10,781,000

Should there be no extraordinary demand on the Treasury, there can be appropriated from the large balance on hand and the increasing revenues, at least a million and a half of dollars during the coming year towards the payment of the public debt.

The operations of the sinking fund, during the last year, have been, as shown by my proclamation of the 8th of September last, as follows:

Amount of debt of commonwealth reduced		$262,801 67
As follows, viz:		
State loans	$261,178 74	
Interest certificates	370 41	
Domestic creditors' certificates	64 52	
Relief notes cancelled	11 88	
		$262,801 67

It will be observed that the fiscal year ends on the thirtieth of November, and the sinking fund year on the first Monday of September. This is the reason for the apparent deficiency in the amount of debt paid as stated in the Treasurer's Report and by the Commissioners of the sinking fund.

In accordance with the Act of 10th February, 1862, the quota of this State of the direct tax of the United States, amounting to one million nine hundred and forty-six thousand seven hundred and nineteen dollars and thirty-three cents, was on the 14th June, 1862, paid to the United States, partly by a relinquishment of a portion of the sums claimed by this State from the Government and partly in cash, after deducting the fifteen per cent. allowed by the Act of Congress for prompt payment. Pennsylvania thus paid her quota of the direct tax before any other State. There is still due to the State, principally for advances since made for transportation and equipments of volunteers, about three hundred thousand dollars.

On the 20th of February last, I issued my warrant authorizing the State Treasurer to deliver to the Philadelphia and Erie Railroad Company one thousand of the bonds deposited with the State in conformity with the Act of May 7, 1861. On the 20th of November I issued a similar warrant. Both warrants were granted after receiving reports from John A. Wright, Esq., the Commissioner appointed for the purpose, that the proceeds of the bonds previously issued had been appropriated in accordance with the provisions of the law. The company has now received three of the five millions of bonds deposited in the State Treasury. With the proceeds of the bonds issued, fifty-two miles of road have been completed, making with what had formerly been finished, a total of one hundred and ninety-nine miles, leaving eighty-nine miles unfinished, of which nearly all is graded and ready for the iron. The bonds still in the Treasury will yield an amount ample to complete the road, and thus open this important route of trade and commerce. The development of the vast mineral and other resources of our northwestern counties by this means, will undoubtedly in a few years render valuable the securities of the Sunbury and Erie Railroad Company, now forming part of the sinking fund of the commonwealth.

The interest on the State debt was paid in August last in specie or its equivalent, in conformity with the existing law, at the cost of one hundred and forty-six million seven hundred and thirty-one thousand one hundred and twenty-two dollars for the difference between specie and paper currency, of which the banks under the provisions of the Act of 17th April, 1862, have already refunded to the State one hundred and forty thousand seven hundred and sixty dollars and thirty cents.

This burden on the banks has become heavier than in my judgment, ought to be borne by any special interest.

Unless the Legislature should otherwise provide it will be the duty of the State Treasurer to pay in like manner the interest which will fall due hereafter. We should all be careful not to violate the faith or impair the credit of the Commonwealth. The serious and early consideration of the Legislature is invited to the whole subject.

In my opinion there are already more incorporated banks in the Commonwealth than are at required for the public convenience, and I therefore recommend that no more shall be incorporated.

The Wyoming Canal is still in the hands of the receiver. Certain creditors of the Company having instituted proceedings in the Supreme Court for selling the canal under the mortgage, the Attorney General has intervened in the suit to oppose the making of a decree of sale. No decree has been made, and the proceedings are yet pending. Meanwhile, it being alleged that the subscribers and stockholders have paid up but a small part of the nominal capital of the Company, and information has been filed in the Supreme Court by the Attorney General, to compel them to pay up the capital, or such charges and assessments as may be necessary to extinguish the debt due to the Commonwealth. This proceeding is also still pending. It is understood that the gross receipts of the canal during the last season have been about one hundred and thirty thousand dollars, and the annual interest on the mortgage bonds of the Company a little over fifty-one thousand dollars.

In pursuance of the joint resolution passed 11th of April, 1862, the Attorney General has instituted proceedings on the proper cashier's bonds to recover the money due to the Commonwealth by the Bank of Commerce at Erie, and I have employed John H. Walker, Esq., as special counsel

for the Commonwealth, in the prosecution of the officers of the bank in the Court of Quarter Sessions of Erie county.

In accordance with the provisions of the Act of 6th May, 1862, an information in equity was filed by the Attorney General against the Delaware and Hudson Canal Company and the Pennsylvania Coal Company. The case was argued before the Supreme Court at Sunbury, in October last.

Our Position.

This rebellion has been not only a calamity to the American people, but the whole world. We had reached a point where we had demonstrated the value of republican institutions and their power rapidly to develop human interests and human happiness. The great masses were industrious prosperous and content, our national ark had borne us safely over the floods which had devastated other lands, and nothing remained for us to reach the greatest national glory, but to foster industry and commerce, cultivate the refined and useful arts, and be true to each other, our country and our God.

From this proud eminence we have been pushed by mad ambition and bigoted propagandism alike, by extremes hating each other, yet uniting cordially in the common work of destruction, while those who really constitute the nation, who have given it power and wealth, and stability, find themselves in the midst of a tempest which threatens every interest dear to man. Happily all is not lost, that may seem lost. The questions of the day find earnest minds determined to answer them, and it only requires the answers to be truthful and certain, to determine what the action of the country shall be. There is no rage of sections, nor animosity of parties, nor ambition of leaders that has not to yield to destiny and time. We believe the restoration of this Union is one of those events, which must come sooner or later, either by the effect of the present contest, or the indissoluble influences of our natural boundaries, and interests, our climate and social ties. This may be easily demonstrated financially, and all we want is, that military success shall not fall behind what it should speedily be. Several interesting questions at once present themselves for solution. We know that taxation is heavy, that the country is incurring debt, that gold and exchange are high and our paper currency is expanded.

Our public debt on the 1st of February was $815,000,000, which is but about five per cent. of the real and personal property of the country. But suppose it should reach the sum of $2,000,000,000, in the event of the war continuing for two years longer, it would then be far from a crushing debt, even with our present population. This may be seen by reference to the following table which shows the public debt of other nations, and its pressure per capita on their respective peoples.

POPULATION AND PUBLIC DEBT.

	Population.	Debt.	Debt per capita.
United States.	31,443,322	$2,000,000,000	$63½
Great Britain.	29,293,319	4,410,951,476	137
France	37,382,225	1,905,926,999	51
Russia	66,891,493	1,296,800,000	19½
Austria	35,018,988	1,195,118,428	34
Prussia	17,739,913	382,362,963	21½
Italy	21,728,529	453,132,650	21
Spain	15,464,340	700,551,497	45½
Holland	3,521,416	422,036,198	119¾
Turkey	36,600,000	555,160,680	15

Now if we take the valuation of the real and personal property of the United States, as ascertained by the last census to wit, $16,159,616,068, we perceive that even a debt of $2,000,000,000, will be but 12½ per centum of that valuation. But if we consider also, that the products of labor as ascertained by the last census are almost as many millions more, the proportions are greatly lessened. Establishing then the fact of our ultimate ability to pay our debt per capita, in the actual value of the present real and personal property of the nation, we must not overlook the immense and constant annual additions to it by the hand of labor, whether directly or indirectly applied to production. The exchanges of the commodities annually produced in the United States, in the shape of a direct internal trade, are estimated to be full ten thousand millions of dollars per annum.

There is still a cotton crop in this country undisposed of, according to the estimates of the foreign consuls remaining at the South, of four millions of bales, say 1,000,000,000 lbs. worth 80 cents per lb. This cotton belongs to this country and will never be sold except upon the event of a restoration of the Union, or by the permission of the Government of the U. S. This value is therefore to be considered as inseparable from any financial views of the future, and to be held in reserve for that purpose.

Its sale under any circumstances therefore will have a controlling effect on Exchange, and the price of gold. The product of labor in other forms is also constant in all elements of calculation, and if it be estimated at what it amounts to in the shape of exports alone, is equal to $248,000,000 per annum. But this is the smallest part of production. What we consume and lay up among ourselves annually, may be judged from the ease and comfort of our industrious population, and the continuous studding of our plains, and hills and river sides, with cities, towns and villages, public and private buildings, and the increase of our railways, ships and steamers.

So with regard to the precious metals. We have these too in abundance, ample enough for all the duties they are ever called on to perform in times of peace and in the business of commerce.

ESTIMATE OF SPECIE.

The late Albert Gallatin estimated the amount of gold and silver in circulation in 1821 at		$30,000,000
Domestic gold and silver produced (of which $12,800,000 was deposited in the mint for coinage) from 1821 to 1847		15,000,000
Specie and bullion imported from 1821 to 1847 $243,878,841 Exported 164,755,050		79,123,791
Total specie and bullion apparent 1847		$124,123,791
California gold produced 1848, '-61		975,000,000
Other domestic		20,000,000
Domestic silver		5,000,000
Total domestic bullion		$1,124,123,791
Coin and bullion imported 1848, 1860		141,686,735
		$1,265,810,526
Coin and bullion exported 1848, 1861		553,826,603
Apparent increase 1848, 1861		$711,983,923
Domestic production in 1862		75,000,000
Probable total in circulation and in deposit in 1861		$786,983,923

To this must be added amount brought over by emigrants, and by passengers from the Pacific, not entered on manifests.

It is thus evident, we have gold enough in this Country to meet any present and future contingency for the adjustment of all our exchanges foreign and domestic.

Among other elements in our favor, there is one at work which is active, though at first sight it would not seem so. And this is the price of Exchange. At present rates, it offers extraordinary inducements to American shippers, who may send nearly everything abroad and sell it. The time is come when we may almost send coals to New Castle and escape the charge of folly. Articles are continually going abroad, which would not have paid freight and commissions in former years. So also foreign merchants and capitalists, if they have divested themselves of the prejudices, and fears of which they at first took counsel, will find that the very best use they can make of their gold, is to place it in our public securities and railway shares, which they can pay for in currency at an enormous profit. Indeed that movement seems to have commenced, as it is well known, orders to a large amount of this character have been filled within a few weeks in this city. When we look over the long list of foreign loans, and speculative companies, in which foreign capitalists are to renew the experience they have already had in Spanish and South American and Turkish investments, we are amazed they continue to risk their property in enterprises where there is neither industry nor commerce, or protection to either—in countries worn out and effete in the long and luckless struggles of centuries—instead of placing their means in this young and vigorous country, full of life and resources and courage. Every dollar properly invested in the United States, has a root, which throws out many branches and much fruit. In this country it is the rule; in others, the same result is the exception.—*Hallett's Financial Circular.*

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad in January was:

LAND DEPARTMENT.

Acres construction lands sold	11,288.25	for	$105,219 26
Acres interest fund lands sold	1,078.56	"	22,467 68
Acres free land sold	2,220.17	"	10,322 03

The earnings of the Cleveland and Toledo Railroad in January, 1863, were $145,950 00
January, 1862..... 106,664 00
Increase..... $39,286 00

The earnings of the Toledo and Wabash Railroad in January, 1863, were..... $86,321 00
January, 1862..... 82,235 00
Increase $4,086 00

The earnings of the La Crosse and Milwaukee Railroad in January, 1863, were $66,699 65
January, 1862..... 61,054 83
Increase $5,644 82

The earnings of the Galena and Chicago Railroad in January, 1863, were..... $130,199 00
January, 1862..... 109,867 00
Increase..... $20,332 00

The earnings of the Chicago and Alton Railroad in January, 1863, were $96,306 46
January, 1862..... 81,463 12
Increase..... $14,843 34

The January earnings of the Norwich and Worcester Railroad show a large gain upon January, 1862, when there was a gain of $6,000 on January, 1861. The figures are:

January, 1863.....	$27,793 24
January, 1862.....	22,066 01
Increase.....	$5,727 23

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Feb. 6, 1863, was as follows:

Passengers.....	$16,303 67
Freight and live stock	53,894 09
Mails and sundries.....	2,603 90
Total.....	$72,801 66
Corresponding week of 1862	50,562 01
Increase	$22,239 65

The earnings of the Michigan Central Railroad for the 4th week of Jan., 1863, were..$56,977 04
Same week, 1862 ..... 41,287 07
Increase..... $15,689 97

The earnings of the Grand Trunk Railway for the week ending Feb. 7, 1863, were:

Passengers	$14,676 94
Freight and live stock	61,802 04
Mails and sundries.....	4,080 00
Total.....	$80,558 98
Corresponding week, 1862	79,539 07
Increase	$1,019 91

The earnings of the Galena and Chicago Union Railroad for the 1st week of February, 1863, were $26,639 69
Same week, 1862 ..... 27,128 02
Decrease..... $488 33

The earnings of the Chicago and Rock Island Railroad for the 1st week of February, 1863, were..... $32,452 00
Same week, 1862..... 28,452 00
Increase..... $4,000 00

The earnings of the Michigan Southern Railroad for the 1st week of Feb., 1863, were ..$50,988 00
Same week, 1862 ..... 33,575 00
Increase..... $17,413 00

The earnings of the Chicago and Alton Railroad for the 1st week of Feb., 1863, were:

	1863.	1862.
Passengers	$9,828 50	$6,055 88
Freight	17,207 04	10,561 03
Sundries	974 33	899 38
Total.....	$28,009 87	$17,516 24
Increase	$10,493 63	.....
Total since Jan. 1	$124,316 33	$98,979 36

In consequence of a change in the contract with the Joliet road, their proportion is included for both years.

The earnings of the Illinois Central Railroad for the 1st week of Feb'ry, 1863, were..$56,613 39
Do., 1862..... 35,959 00
Increase..... $20,654 39

The earnings of the Toledo and Wabash Railroad Company for the 1st week of February, 1863, were $20,081 24
Same week, 1862 ..... 12,724 11
Increase..... $7,357 13

The earnings of the Chicago and Northwestern Railway for the 1st week of February, 1863, were $25,978 97
Do., 1862..... 13,444 15
Increase..... $12,534 82

The earnings of the Cleveland and Toledo Railroad for the 1st week of February, 1863, were $34,125 00
Same week, 1862 ..... 24,620 00
Increase..... $9,505 00

The following is a comparative statement of the earnings of the La Crosse and Milwaukee Railroad for the week ending Feb. 7, 1863:

Freight	$13,256 34
Passengers	3,733 34
Miscellaneous	640 29
	$17,629 97
Earnings for week ending Feb. 7, 1862:	
Freight	$6,880 47
Passengers	3,707 93
Miscellaneous	679 31
	11,217 71
Increase.....	$6,412 26

Taxation of Banks.

THE ACT ALLOWING A DEDUCTION WHEN THE PROFITS DO NOT EQUAL FIVE PER CENT OF THE CAPITAL. A BANK ORGANIZED ONLY THREE MONTHS LIABLE TO BE TAXED THE FULL AMOUNT THOUGH ITS PROFITS ARE LESS THAN FIVE PER CENT.

The Park Bank claimed the right of being exempted from paying taxes upon the full amount of its capital, under the act of 1853. By this act the Legislature provided that any incorporated company named in the assessment roll whose profits during the preceding year were not equal to five per cent. of its capital stock paid in or secured to be paid in, should be entitled to commute for their taxes by paying to the treasurer of the county in which the company might be located, a sum of five per cent. upon their net income, and the amount assessed upon their real estate.

The Bank was duly organized under the general banking law of the State of New York on the 12th of March 1856, but it did not commence business till the 31st of March. In July 1856 it was assessed upon its capital by the assessors of the City of New York; the tax amounting to $21,000. The bank claimed that it was not liable to taxation on its capital stock until one year from the date of its commencing its banking business on the 31st of March. It claimed to commute by paying $2,400, being five per cent. on the net profits or clear income which had accrued from its business.

The claim being rejected by the board of supervisors, a case agreed upon pursuant to section 372 of the code, was submitted without action to a General Term of the N. Y. Supreme Court. The General Term decided in favor of the supervisors and the bank then appealed to the Court of Appeals. The Court of Appeals now affirm the judgment rendered by the Supreme Court, holding, that the act of 1853 (ch 654), allowing corporations which have not received net annual profits equal to five per cent. upon their capital, to commute for taxes was applicable only to corporations which have been in existence for a full year before the assessment is made. That the Park Bank having been organized only three months was liable to be taxed for the full amount of its capital, though its income and profits were less than five per cent. The following opinion was rendered upon the decision of the case.

LOTT, J.—It was provided by an act of the legislature, passed July 21, 1853, (ch 654), that any incorporated company named in an assessment roll upon proof made to the board of supervisors, as therein required, that it had "not been during the preceding year in the receipt of net annual profits or clear income, equal to five per cent." on the capital stock paid in or secured to be paid in after deducting therefrom the assessed value of its real estate, should be "entitled to commute for their taxes on such capital stock by paying directly to the treasurer of the county in which the business of such company is transacted, a sum equal to five per cent. on such net annual profits or clear income, and also such further sum as shall have been assessed on such roll as the taxes on their real estate."

The Park Bank claimed the right of commutation under that act, and in the proof made to the board of supervisors of the City and County of N. York at their annual meeting in July 1856, it appeared that it was a banking association duly organized under the general banking law on the 12th of March in that year, but did not proceed to carry on any banking business, except to call in its capital and take other steps preparatory thereto, till the 31st of March thereafter; that its capital stock paid in or secured to be paid in was two millions of dollars, and that its clear income from the period of its organization till the time such exemption was claimed in July amounted to and did not exceed the sum of forty-eight thousand and five dollars and seventy-nine cents, being less than five per cent. on its capital after the deduction of the assessed value of the real estate, which was one hundred and twenty-five thousand dollars. Upon these facts the question is presented whether this bank was entitled to the privileges claimed by it under the provision of the act above referred to. As a general rule the whole of the capital stock of banks, except such as is held by the State, or incorporated literary and charitable associations, is liable to taxation, and no regard is had to the time during which they have carried on business. It is the duty of the assessors to include all in the assessment roll, and they are to be charged by the board of supervisors with their proportional share of the public burdens on such capital. The provision of the law above referred to was an innovation upon a long established system and continued in force only till 1857, when it was repealed (Laws of 1857 ch. 456 sec. 1.) It was a special privilege granted, and the corporations claiming it were bound to furnish the board of supervisors with the requisite proof to entitle them to it, within two days from the commencement of their annual meeting. It was, therefore, an exception to a general rule, and it should appear that a corporation was clearly within the exception before it should be permitted to discharge itself from its just proportion of the public burden, to the prejudice of other tax payers. One of the requirements to entitle a bank to its benefit, in my opinion, is that it should have been in existence for a year previous to the annual meeting of the board of supervisors. The law requires that it should be shown that the company has not been "during the preceding year in the receipt of net annual profits or clear income equal to five per cent. on its capital stock," &c., and the commutation is to be based on such net annual profits or clear income. It contemplates that the corporation shall have been in business during a whole year. It is in such cases only that their annual profits or income can accrue. It was no doubt the object of the law to relieve all incorporated companies from taxation on their capital, when their business was not sufficiently profitable to justify the imposition of the ordinary burden to which property is subject for the support of government. A year preceding the usual time designated for imposing taxes was fixed as the period for determinating that fact, and therefore the annual profits were the test of success, and formed the basis of taxation. Such, indeed, is claimed to be the construction of the law by the bank. It says that "the effect of the words is, and the intent was, that the corporate capital should not be fully taxed in its corporate form until it had been one year successfully operating; and that whenever corporate operations were successful like indulgence should be allowed." It is claimed, in other words, that if it should appear that corporations which have been in existence for less than a year, have been prosperous and have during the time they have carried on their business, realized more than five per cent. on their capital, that they nevertheless could not be taxed on the whole capital, and consequently that their corporate existence for a year and the receipt of profits to the amount specified, were both "pre-requisite to liability," on the part of a corporate company, to be taxed in the usual way.

Assuming, therefore, that the law in question has application to such incorporated companies as have been in existence for a whole year preceding the annual meeting of the board of supervisors, it, in my opinion, follows as a necessary consequence that the claim of the Park Bank was properly refused. The fact of such existence during that time is a pre-requisite to the right of commutation and not to the ordinary mode of taxation. The law does not prescribe a new rule of taxing corporations, but merely gives them the privilege of relieving themselves from the operation of that rule upon showing certain facts to the satisfaction of the board of supervisors. In the present case the material fact necessary to be shown, the corporate existence of the bank for a whole year was wanting. There was, moreover, no basis on which the commutation could be made. There were no "net annual profits or clear income" on which it could be estimated. It was impossible, therefore, to include it within the privileged class of corporations, and it has no ground of complaint when it is subjected to the same rule of taxation which is applicable to the community generally. A different construction would lead to results which could not have been intended by the legislature. The rule contended for by the appellant would leave all the capital that had been invested in an incorporated company at any time within the year from its ordinary burden of taxation, although profits far exceeding five per cent. had accrued thereon both before and after its investment.

The law should not be so construed as to produce such a result if any other meaning can be reasonably and fairly be given to it, and the views above expressed show that such a construction is not only unnecessary but unwarranted. The judgment of the Supreme Court should therefore be affirmed.

Goods Traffic on British Railways.

The total extent of general goods carried in England and Wales in 1861 was 25,074,982 tons, yielding a revenue of £7,978,803; in Scotland, 4,101,938 tons, yielding £1,026,524; and in Ireland £1,461,973, yielding £417,978—presenting an aggregate for the three kingdoms of 30,638,893 tons, and £9,423,305.

The Drain of Gold.

With two slight exceptions, the drain of gold has now been continued week by week for the unprecedented period of half a year, until a total reduction has taken place to the extent of £4,100,089, while we are still without the slightest symptoms not only of an approaching reaction, but even of a temporary cessation of the outflow. Under these circumstances the opinion increases that the banking facilities afforded to the importers of foreign produce must have been unduly great for some months past, and are now probably on a scale which, unless greater prudence should be immediately enforced, may ultimately necessi-

ate an advance of the bank rate of discount to 5 per cent.—*London Times.*

Product of the Lake Superior Copper Region.

We have prepared (says the *Lake Superior News and Journal*, of January 16,) the following tables, from the most reliable data at our command, showing the rise and progress of the copper business of the Lake.

Aggregate shipments of rough copper from Lake Superior from 1845 to 1862:

	Tons and lbs.	Value.
1845	.1300	$390
1846	29.	2,610
1847	239.	107,550
1848	516.	206,400
1849	753.	301,200
1850	640.	266,000
1851	872.	348,800
1852	887.	300,450
1853	1,452.	508,200
1854	2,300.	805,000
1855	3,196.	1,437,000
1856	5,726.	2,400,100
1857	5,759.	2,015,650
1858	5,896.	1,610,000
1859	6,041.	1,032,000
1860	8,614.	2,520,000
1861	10,337.	3,180,000
1862	*10,000.	4,000,000

Amount of rough copper, in tons and pounds, shipped from the principal mines of the three districts:

Total exports	$91,738,590	$87,868,919	$146,316,938
Exclusive of specie	71,068,277	84,223,833	110,131,694

The following will show the total value of dry goods imported at New York for January of six years:

1858	$10,956,200
1859	17,906,790
1860	15,333,400
1861	10,575,600
1862	2,965,300
1863	5,269,200

The following is a comparative summary of the importations of dry goods at this port for January—

ENTERED FOR CONSUMPTION.

	1861.	1862.	1863.
Manufactures of wool	$1,618,912	$1,140,129	$1,562,012
" cotton	733,748	314,598	632,815
" silk	1,494,635	406,210	610,196
" flax	373,677	164,259	553,356
Miscellaneous	391,993	63,600	259,092
Total	$4,822,966	$2,110,796	$3,907,470

WITHDRAWN FROM WAREHOUSE.

Manufactures of wool	$282,902	$403,133	$244,098
" cotton	306,304	492,796	181,530
" silk	368,107	523,924	180,983
" flax	165,848	259,844	154,763
Miscellaneous	80,865	62,547	32,812
Total	$1,161,512	$1,742,244	$794,116
Add entered for consumption	4,822,966	2,110,796	3,907,470
Total on market	$5,984,478	$3,853,040	$4,701,586

ENTERED FOR WAREHOUSE.

Manufactures of wool	$1,170,623	$517,479	$619,476
" cotton	1,940,394	61,493	227,135
" silk	1,633,536	208,565	298,163
" flax	607,490	47,881	177,469
Miscellaneous	229,858	22,048	39,448
Total	$6,133,891	$854,456	$1,361,711
Add entered for consumption	4,822,966	2,110,796	3,907,470
Total	$10,966,857	$2,965,252	$5,269,181

The following will show the value of dry goods entered for consumption, withdrawn from warehouse, and entered for warehousing, in January for three years:

	Entered for consumption.	Withdrawn from warehouse.	Entered for warehouse.
1861	$4,822,966	$1,161,512	$6,133,891
1862	2,110,796	1,742,244	854,456
1863	3,907,470	794,116	1,361,711

For seven months the amounts have been as follows:

ENTERED FOR CONSUMPTION.

	1861.	1862.	1863.
Manufactures of wool	$17,906,790	$6,708,176	$14,516,587
" cotton	5,939,979	1,219,266	3,711,169
" silk	17,396,886	2,381,425	6,667,155
" flax	3,124,359	1,103,540	4,721,091
Miscellaneous	3,752,608	551,536	1,701,429
Total	$48,169,752	$11,963,913	$31,316,431

WITHDRAWN FROM WAREHOUSE FOR CONSUMPTION.

Manufactures of wool	$2,268,396	$1,339,417	$1,823,711
" cotton	1,033,460	1,739,679	902,011
" silk	928,996	2,457,942	1,124,131
" flax	610,737	900,491	709,067
Miscellaneous	265,420	222,309	383,061
Total	$5,007,020	$6,659,738	$5,041,961
Add consumption entries	48,169,752	11,963,913	31,316,431
Total on market	$53,176,772	$20,623,651	$36,358,402

ENTERED FOR WAREHOUSING.

	1861.	1862.	1863.
Manufactures of wool	$4,751,965	$2,111,907	$2,494,600
" cotton	4,939,732	484,777	934,265
" silk	3,673,569	1,631,516	1,069,304
" flax	1,898,299	197,189	736,456
Miscellaneous	795,166	173,690	281,400
Total warehouse entries	$16,058,731	$4,599,309	$5,516,227
Add entered for consumption	48,169,752	11,963,913	31,316,431
Total entered port	$64,228,483	$16,563,222	$36,832,658

The following will show the value of the different descriptions of dry goods imported at New York for seven months of three fiscal years:

	1860-'61.	1861-'62.	1862-'63.
Manufactures of wool	$22,722,900	$8,820,100	$17,010,600
" cotton	10,867,000	1,704,100	4,645,400
" silk	21,060,600	4,073,900	7,736,500
" flax	5,050,800	1,300,700	5,457,600
Miscellaneous	4,547,900	725,400	1,982,700
Total	$64,250,600	$16,563,200	$36,832,900

American Railroad Journal.

Saturday, February 21, 1863.

Stock Exchange and Money Market.

The Bank statements of the last week discover a decrease in loans of $1,788,569, in circulation $23,837, and an increase in specie $182,621, and in deposits $1,380,103. The supply of money in the street is ample. First class mercantile paper has been taken at 5½ per cent. Government stocks and certificates of deposit have advanced, and a better feeling prevails generally with regard to the future. On Monday gold took an upward start selling at 158, and Wednesday it stood at 162.

Exchange which sympathises with gold, also advanced and was quoted at 173½ without much demand. It stood on Wednesday at 178. All the active railways are in favor, and are selling at an advance from former prices. State stocks are firm. We are waiting to see what the final action of Congress will be, as regards Mr. Chase's financial measures. We do not choose to speculate upon their probable consequences, until we know their final shape. We may say of them, however, that they are conservative in their character, and have the general purpose of restricting the Government circulation to a safe limit, to keep up the credit of the national stocks, to derive revenue from a tax on local bank circulation, and to obtain finally the immense advantage of a uniform national currency, an advantage we can not estimate too highly. An able writer on the subject twenty-two years ago, expressed himself in lan-

guage which we can not do better than repeat even at this distance of time.

"*A uniform and unquestioned* paper currency is the very pole-star to which all our wishes point. It is what all our schemes and contrivances of laws, and checks, and oaths, and examinations, wisely or unwisely formed, feebly or even falsely conceived, are intended to approximate unto. Its perfect consummation would seem only to be but too mighty an attainment even for our wishes; for what a happy world (financially speaking, we mean,) ours would be, if through our wide spread land there were neither 'broken banks,' no 'suspected issues,' no 'bank note reporters' to consult, no unwilling 'discount or uncurrent notes' to pay, no 'bad bills' to fret our tempers, nor 'doubtful' ones to tempt our honesty with palming upon others what others had palmed upon us! What limits, in short, could we set to such blessed change when all bankers, merchants, travelers—the public, in short—would find half their anxieties at once cut off and all their fears and no small share of their labors, through the miraculous change of a uniform and certain currency substituted for an *always fluctuating and too often worthless one.* And yet this would be so if the notes of *one sound national issue* could everywhere be *substituted* for those of the present unnumbered and often almost nameless issues of our money.

"The saving of the country, we need hardly speak of; the removal of all doubt and suspicion, the equalizing of all differences in the thousand varieties of our national currency, by bringing all up to the highest standard—*this*, even setting aside all question of actual losses prevented, would be relieving society from much expense and labor, and loss of time and power—*points of economy telling as definitely upon the profits of the country as would the universal, instantaneous conversion of its deep, muddy and often impassable roads, into smooth and solid macadamized ones never out of order.*"

If such results can be obtained by the adoption of Mr. Chase's bank measure, the country would be unanimous in its favor. Even the banks themselves would find their permanent advantage in its operations. These institutions to be profitable, respectable, and secure in the confidence of the public, have as much need of a sound currency as the people themselves.

We give elsewhere the leading article from this week's *Circular* of Messrs. Samuel Hallett & Co. We understand this house has been intimately connected with the financial affairs of the Atlantic and Great Western Railway, one of the most remarkably successful enterprises of the day, and has a foreign correspondence which brings it into close relations with capitalists and men of mark. We therefore regard its Circulars as expressive of opinions deeper, and more valuable than we find in the off-hand daily reports of commercial editors. In this article some remarkable positions are taken, which if maintained should give stability to our national policy and confidence to the people. They may be briefly stated thus:

That our national debt, only $815,000,000 up to the 1st of February, even if it should by the war's procrastination reach to $2,000,000,000, would not be in the ratio of population more than half that which the people of Great Britain bear per head, and a little more than half only of what the people of Holland endure without complaint. But while population in this country *means wealth*, which it does not in any other country of the world, we find this debt of $2,000,000,000 is in fact but 12½ per cent. of the value of the real and personal property of this country as ascertained by the last census, without reference to the annual products of property and labor, which are many thousands of millions per annum more.

Again our cotton crop of four millions of bales, is claimed as an element of the future of our exchange and finance, and that it cannot be parted with except by permission of the U. S. Government. This is undoubtedly true as the result of the blockade and the war. When France and England recognize this truth, their sympathies with the confederates may be confidently expected to decline. It also appears from the *Circular*, we have twice as much gold in this country as has been commonly supposed, and when the time comes for its resuming its ordinary and most valuable functions, we infer we shall glide gradually back into specie payments without any convulsion.

It is also evident from the facts stated in the *Circular* that our securities at this moment through the operations of exchange offer extraordinary inducements to foreign capitalists for investments; and that this idea of the *Circular* is not without truth, is shown that orders to that effect are now actually being filled to large amounts. It is not difficult to perceive, if this idea shall be adopted generally abroad, there would be soon some remarkable changes in the money markets of Great Britain, France and Germany, and we should hear of some very sudden notices from the Bank parlor in Threadneedle street.

That we are not far out of the way in some of the preceding remarks, is evident on reading the last *London Weekly Circular* of E. F. Satterthwaite, good authority on the subjects of which it treats. It informs British capitalists, that the civil war in the U. S. has had an entirely different effect on railway securities and earnings, from what was anticipated by those who early took the alarm and sold out. On the contrary, even our struggling companies, in the words of the *Circular* have "triumphantly emerged" from their difficulties, "and become properties yielding large net earnings." This remarkable prosperity in our railway system, even under such apparent disadvantages, is in strong contrast with the very moderate condition of most British railways, earning no very large amount of profits, as appears from the last yearly returns, and the fact is or ought to be instructive in its teachings to capitalists abroad, viz: that the industry and enterprise of this country are unextinguishable, and that the properties which they create, foster and guard, are as safe and valuable as those in any other part of the world. We are not surprised to learn, therefore, that re-investments in American railway shares and securities have recommenced on a pretty large scale.

The following quotations of sales of railroad and other securities are in addition to those given elsewhere in our columns:

New York.—N. Y. State 6s, 1874, 128; Ohio 5s, 1865, 100¼; do., 6s, 1886, 118; Illinois coupon bonds, 1862, 100½; do., 1870, 105½; do., 1877, 107½; Illinois Canal registered bonds, 1860, 99½; Chicago and Alton Income bonds, 109; Detroit, Monroe and Toledo 1st mort., 104; Rome and Watertown, 84; Little Miami, 146; Miss. and Mo. L. G., 60; Lackawanna and Western bonds, 117½; Central New Jersey, 170; New Jersey R. R., 155@157; Second Avenue R. R., 70; Brooklyn City Water Loan, 119; Citizens Gas Co., Brooklyn, 100; Canton Co., 26½; Cumberland Coal pref., 20½; Quicksilver Mining Co., 17.

Boston.—Northern (Ogdensburg) 1st mort., 106@107; do., 2d mort., 18½; Rutland and Burlington 1st mort., 65½@68½; do., 2d mort., 8; Vermont Central 1st mort., 38; do., 2d mort., 5¼; Boston and New York Air-Line 6s, 46; Vermont and Massachusetts 6s, 106; Eastern R. R. 6s, 113; N. Y. and New Haven (genuine,) 124@125; Cambridge R. R. 6s, 107; Boston, Concord and Montreal shares, 40; Nashua and Lowell, 135; Worcester and Nashua, 76; Cheshire, preferred, 29½@30; Connecticut River, 112; Mass. State 6s, 1871, 132; do., 1872, 134½; do., 1875, 132; do., 1876, 132; do., 5s, 1880, 115; do., 1891, 117½; Rhode Island 6s, 1881, 116; Boston City 5s, 1882, 123¼; do., 1877, 124¾; Bath Me. 6s, 1890, 108; Brooklyn 7s, 1865, 104½; Augusta 6s, 1870, 108¼; Bangor 6s, 1870, 107½; Somerville, horse, 36¾; Copper Falls Mining Co., 10½; Huron, 14¾; Hancock, 12¼; Bohemian, 6¼; Pontiac, 4; Petherick, 3; Superior, 6½@9½; Toltec, 3⅝; Acton, 6¼; Columbian, 3¼; Mesnard, 8¼; Albany and Boston, 10⅛; Canada, 1⅛.

Philadelphia.—Reading 6s, 1844-'80, 115; Allegheny Co., 6s, 60; Delaware R. R. guar. bonds, 105; West Chester R. R. 7s, 102; Philadelphia and Erie shares, 37¾@38½; Huntington and Broad Top 1st mort., 101; do., 2d mort., 85; North Penn. mort., scrip, 85@87; Camden and Atlantic, 11; do., pref., 20; do., 2d mort., 62; Schuylkill Nav., 5½; do., pref., 14⅜; do., 6s, 1882, 70½; do., 1872, 100; Morris Canal, 56¼@59; do., pref., 131; do., 2d mort., 106½; Susq. Canal, 6¼; do., 6s, 39; Del. Div., Canal, 41; West Branch 6s, 108; Wyoming Canal, 11; 5th and 6th streets R. R., 58; 17th and 19th streets, 11¼; 2d and 3d streets 7s, 2d mort., 110.

Baltimore.—City 5s, 92; City 6s, 1860, 113½; Maryland State 6s, 1870, 122; North Western Va., 1st mort., 107; Western Md. bonds, 85; Central Ohio, 4th mort., 30.

Cincinnati.—Cin., Ham. and Dayton 138@140; do., 2d mort., bonds, 120; Little Miami, 135; do., 1st mort., 115; Col. and Xenia R. R., 154@155; Indianapolis and Cincinnati R. R., 70; do., 2d mort., 7 per cent., 100; Clev., Col. and Cin. R. R., 160; Indiana Central R. R., 25; do., 2d mort., 10 per cent., 110; Covington and Lexington 2d mort., 7 per cent., 90; Cincinnati City 6 per cent., 100@105; Hamilton Co., Ohio, 6 per cent., 105 Cincinnati Gas and Coke Co., 160.

New Bedford.—New Bedford and Taunton R. R., $92@$92.50; New Bedford Copper Mills, 120.

Baltimore and Ohio Railroad.

A regular monthly meeting of the directors of the Baltimore and Ohio Railroad was held in Baltimore on the 11th inst., when the President announced that the second iron span of the Harper's Ferry bridge was completed, and that the third or remaining span had been commenced. The President stated to the Board that arrangements had been made for the completion of the second track from the Washington Junction (Relay House) to Washington city, some months since, but the crossties and other material accumulated for that purpose were absorbed in the reconstruction of the main-stem track. During the last raid of the Confederates, forty miles of the track was destroyed. The vital importance of the immediate reconstruction of that important portion of the main line caused the materials to be thus used. The Com-

pany has since made great efforts to replace the requisite materials; and the President now felt, from the arrangements made, that it would be proper to recommend the early construction of the entire line of the Washington branch road with double track.

Upon this statement the Board unanimously adopted a resolution authorizing the immediate construction of the track. At an early period the public may, therefore, look for a complete line of double track between Baltimore and Washington. Whilst the Baltimore and Ohio Railroad Company had previously made arrangements for the safe and prompt transmission of business for the National Capital, this increased facility will not only insure the ability to meet all possible demands of transportation during the war, but will, when transportation returns to its normal condition, afford facilities of the highest class for the rapid and safe movement of all traffic in the future.

Union Canal.

An important bill has been introduced into the Pennsylvania Senate by Mr. Kinsey, relative to the Union Canal Company. The preamble sets forth that the creditors of the Company, in pursuance of the Act of April, 1862 have agreed to accept bonds in lieu of coupons for interest. The creditors representing $2,415,000, have agreed to become bound by the Act of 1862, while creditors representing $85,000 have refused. They are to receive in lieu of their claims a *pro rata* share of the net annual income of the Company. After fully setting forth the condition of the Company, the bill enacts that after the franchise and property shall have been assigned by the Trustees to the corporation in trust, as contemplated by the act of 1862 and from thence forward, and so long as any bondholder, secured by mortgage, shall continue to refuse to accept the said act, the Union Canal Company shall be deemed to hold and possess the franchises and property, and all receipts therefrom, subject to the same trusts and limitations contained in the indenture of Oct. 28, 1857, and the bondholders shall be entitled to have an account from the Corporation, as Trustees, of the annual receipts and expenditures of the canal; and the net annual revenue shall be apportioned and paid among the bondholders, preserving the relative rights of the several classes and parties interested in the second trust. And the sums which shall be found due to the bondholders accepting the act of 1862 shall be received by them in satisfaction of all coupons for interest accrued and payable at the time of such account. And the sums due to the bondholders not concurring in said act shall be paid to and received by them on account of the amount due them and with like effect as if the said act had not been passed, so that the relative rights and interests of the respective parties shall be preserved and continued. Further provision is made whereby the non accepting bondholders may signify their intention in writing to accept the provisions of the act of 1862.

Morris and Essex Railroad.

At a recent meeting of the directors of this road, it was determined to proceed at once with the construction of the extension of the road to the Delaware river, at Phillipsburg. The project has been for some time under consideration; but hitherto the necessary preliminaries were not arranged. This road will open a large agricultural district not before intersected by a railroad line, and furnish another avenue for the outlet of the Pennsylvania coal fields.

United States—The War—Railway Receipts and Dividends.

When two years ago the great question of the restriction of slavery in the United States was decided by the people in the ballot-box, by the election of Mr. Lincoln, but which decision was subsequently referred to the arbitration of arms, there was incorporated a state of civil war which has unhappily continued up to this day. The suspension of specie payments soon came about, and much distrust was felt on this side the water in the financial ability of the Government to prosecute the war. This distrust led to very large sales of States stock, and railroad stocks and bonds. The effect of the disturbance to the ordinary course of business affairs was regarded with much anxiety, with reference, more particularly, to the operations of railroad companies, whose prospects at that time seemed likely to be much damaged. The actual result has shown, however, under such adverse circumstances the enterprise of the American people has not been damped, for we find, with scarcely an exception, that the variousl railroad companies have had steadily increasing traffic receipts; that while in most cases old rates of dividend have been maintained, in many others increased dividends have been paid, and that many roads which had long been struggling under the difficulties attending construction and equipment, have triumphantly emerged therefrom, and become properties yielding large net earnings. The chief source whence these large receipts arise appears to be from the continually increasing amount of produce raised in the west, which seeks an eastern market for consumption and export, while little, if any, additional means of transportation has been provided. We append a list of companies, giving the dividends paid during the year 1862, and the mileage, which, though incomplete, still conclusively shows what a great length of mileage, is being successfully worked, for it must be remembered that, besides the earning of the dividends, the bonded debt interest has been provided, and that most, if not all, are working with closed capital accounts:

Baltimore and Ohio....	6	per cent.	..287 miles.
Boston and Providence.	8	"	.. 54 "
Boston and Worcester..	8	"	.. 69 "
Buffalo and State Line.	10	"	.. 68 "
Cleveland, Painesville, and Ashtabula.....	20	"	.. 97 "
Cleveland, Columbus, and Cincinnati.....	10	"	..142 "
Cincinnati, Hamilton, and Dayton.....	7½	"	.. 60 "
Camden and Amboy....	12	"	.. 93 "
Columbus and Xenia...	8	"	.. 54 "
Galena and Chicago....	6	"	..188 "
Little Miami.....	8	"	.. 84 "
Michigan Central.....	8	"	..285 "
N. Y. and New Haven..	6	"	.. 62 "
New York Central.....	6½	"	..556 "
New Jersey.....	10	"	.. 34 "
Old Colony.....	6	"	.. 88 "
Providence & Worcester	8	"	.. 44 "
Panama.....	16	"	.. 49 "
Pennsylvania Central...	8	"	..862 "
Terre Haute and Richmond.....	10	"	.. 78 "

Thus showing 2,749 miles operated, yielding dividends of from 6 to 20 per cent., besides which some of the above roads have paid bonuses. If to the above list we add the Illinois Central, 707 miles, which has earned 4 per cent., and the Erie, 492 miles, which has earned 10 per cent., we get a total of 3,948 miles. This statement shows conclusively that much better results are obtained on the working of railroads in America than are obtained in this country or in Canada. It would seem, therefore, that no investment in railroad property can be more safely or profitably made than in American railroads, whether it be bonds or stock; the only drawback is the existing high rate of exchange; this, of course, is not felt when bonds are issued in sterling, as is the case with Panama first and second mortgage, and Pennsylvania Central bonds (second mortgage), or the Illinois Central 6 per cent., and Atlantic and Great Western (first mortgage) dollar bonds, in both which the principal and interest are payable in sterling, at fixed rates per dollar. The proposed issue of the Marietta and Cincinnati first mortgage 7 per cent. bonds is intended to be in the last named form, by which all the advantages of the dollar bonds are secured, with the additional advantage that the investor in this country is able to know with certainty the minimum amount of annual interest he will receive. Those who have followed the prosperous course, under reorganization, of the Erie, the Pittsburgh, Fort Wayne and Chicago, and other roads financially similarly situated, will understand the intrinsic value of the first issue of first mortgage bonds of such a road as the Marietta and Cincinnati, where the existing net income is sufficient to meet more than double the amount required for interest, and whose charter limits the entire borrowing powers of the company to one-third of the share capital, after the English method.—*E. F. Satterthwaite's London Circular.*

Another Important Patent Case.

U. S. Court, Albany, Jan. 29th, 1863.

Irvin A. Williams *vs.* Jonathan Mayhew and others, constituting the Buffalo Steam Gauge Company. This action was for an infringement on a patent granted to the plaintiff for improvements in locomotive head lights for burning coal oil.

The Jury found for the plaintiff, thus establishing the validity of the patent. If we understand the verdict, it gives to the plaintiff the key to the use of coal oil for locomotive head lights, and on this account is important.

We understand that steps have already been taken against other parties to prevent the further infringement. S. D. Cozzens and A. G. Williams of New York for the plaintiff; and E. B. Furbush of Buffalo, and H. Sweet of Albany, for defendants.

Canada and Nova Scotia.

The London *Times* in a leader expresses surprise at the report that the Government is about to contract a debt of some £3,000,000 sterling, in order to construct a railway which is to unite Canada and Nova Scotia. Five-twelfths of the capital it is said, are to be found by Canada, and seven-twelfths are to be taken by the other two provinces, the money to be raised by imperial debentures, a sinking fund to pay off the principal in 40 years. What benefit is England to receive? The use of the line would be purely military, and it would be wiser to wait and see what becomes of the American Republic before we set up so costly a defence against it. The *Times* opposes the scheme upon every ground.

Railroad between Woonsocket and Boston.

It gives us pleasure to announce that the portion of the air-line between Woonsocket and Boston will be finished at an early day. The Company expect the rails will be laid by the first of May next, and that the road will be open for public travel by the first of July. The road is graded to the Mendon road, near Bellingham, and the balance is under contract, there being now at work thereon one hundred and thirty-five men and fifty-eight horses. The bridge piers under the Norfolk County Railroad, near Mill river, are being laid of cut granite, and an iron structure for the same has been ordered. The greater part of the rails for the unfinished portion are on the ground, and the ties are now being delivered.—*Woonsocket Patriot.*

The Illinois Canal Enlargement.

We perceive from the Montreal papers that the recent movement of the Illinois Legislature to cooperate with the Canadians "in improving the means of transportation across the Atlantic" meets with favor, and that the old idea of a canal from the Georgian Bay is again started.

Atlantic and Great Western Railway.

We are advised on good authority that the A. & G. W. Railway Co., are surveying a route from the line of their road, commencing at or near Warren, O., by which it will have a terminus at Cleveland, Ohio. The grading is to commence as soon as spring opens, and will be hurried to a speedy completion. This will afford important advantages to the enterprising company, and to the business interests of the West and East—interests which have suffered largely of late for the want of adequate transportations.—*Dunkirk Journal.*

Southern (Chili) Railroad.

The third division of the Southern Railway of Chili was lately opened to San Fernando, the Capitol of the province of Colchagua, distant from Santiago 86 miles. This railroad is stated to be well constructed, it having numerous iron bridges constructed in a solid and creditable manner.

Railroads in New Jersey.

A supplement to the charter of the Perth Amboy and Woodbridge road has passed both Houses, empowering a new survey of the road, and authorizing a branch from some point south of Woodbridge to Staten Island Sound, which will give a new avenue to New York to the residents of the Island, enabling them to avoid the long ferry they are now obliged to use. The road above named is expected to be one of the most important local roads in the State, and its prompt completion is confidently expected.

An effort is being made to secure a railroad from Westfield, on the New Jersey Central line, to Rahway, in order to give better facilities to the latter town for obtaining coal than it now possesses, and which it is claimed, its important manufacturing interest demands.

The Central Railroad Company are preparing to construct their new bridge over Newark Bay, which it is expected will be pushed to speedy completion, and the Company thus be in possession of a through route to the Hudson River.

It is probable the application of the New Jersey Railroad Company to permit them to retain their old bridge at Centre street, Newark, after their new bridge at Market street shall be completed, will be granted by the Legislature, with proper stipulations as to width of draws, &c., which are necessary to protect the interests of navigation.

The contemplated extension of the Morris and Essex road to the Delaware River, will be a most important step, opening as it does a new approach to the coal fields of Pennsylvania, and draining a wealthy, agricultural and mineral region of the State. It cannot fail to be advantageous to the interests of the State at large, as well as of the Company.

Atlantic and Great Western Railroad.

The first passenger train on the Atlantic and Great Western Railroad came through on Tuesday, 10th inst., from Meadville to Ravenna. The train contained the Directors of the road, with several invited guests.

Painesville and Hudson Railroad.

The Painesville and Hudson Railroad Co. have invited the Atlantic and Great Western Railroad Co. to take and complete their road from Hudson to Fairport upon liberal and generous terms, as an outlet to the Lake of the A. & G. W. Road. The proposition states that the P. & H. Road has been permanently located and partially completed; that nearly all the heavy grading and bridging has been finished; that the depot grounds at Fairport are most ample, and that the harbor at Fairport is one of the best on Lake Erie.

Finances of Ohio.

This following statement, compiled from the Annual Report of the Auditor, exhibits the gross amount of revenues of the State during the fiscal year ending November 15, 1862, and also the disbursements for the same period:

RECEIPTS.

Balance in the Treas'y, Nov. 15, 1861.		$129,176 43
General Revenue—from taxes	$1,226,511 82	
General Revenue—from Canals	30,960 85	
General Revenue—from other sources	138,759 71	
		1,396,232 38
Military Fund—From the United States	$724,783 30	
Military Fund—From other sources	91,690 26	
		816,473 56
Sinking Fund—From taxes	$1,249,832 43	
Sinking Fund—From taxes War Loan Levy	301,623 19	
Sinking Fund—From School Lands	86,218 05	
From sales of stocks and Bonds	262,052 17	
From other sources	43,805 33	
		1,943,531 17
Common School Fund—From taxes.		1,242,630 17
National Road Fund—From tolls		19,510 65
Soldiers' Allotment Fund—From Pay Agents		820,945 21
Total Receipts		$6,368,499 57

DISBURSEMENTS.

From General Revenue	$993,274 98	
From General Revenue—For Canals	104,949 47	
		$1,103,224 45
From Military Fund		920,952 92
From Sinking Fund		1,899,887 18
From Common School Fund		1,207,675 90
From School Library Fund		245 53
From National Road Fund		16,450 47
From Bank Redemption Fund		294 00
From Soldier's Allotment Fund		741,312 63
Total Disbursements		$5,800,943 08
Balance in Treasury		478,456 49

The estimated receipts and expenditures for the year 1863 are:

	Receipts.	Expenditures.
General Revenue	$1,252,668 90	$890,414 13
Sinking Fund	1,704,785 31	1,692,537 27
Common School F'd.	1,192,650 45	1,160,000 00
School Library Fund (balance)	185 29	185 30
Soldiers' Relief Fund	510,000 00	510,000 00
National Road Fund	24,036 21	21,000 00
Totals	$4,681,824 16	$4,374,136 39

Which would leave in the Treasury on November 15, 1863, a balance of $410,187 47.

The valuation of property on the duplicate of 1861, was $892,850,084; upon which taxes were levied for State purposes $4,056,379 28; for local purposes, $7,014,748 61; total $11,071,127 89. To this sum there should be added delinquences and forfeitures $585,686 03, which would make the total taxes, delinquencies, &c., $11,656,813 92.

The valuations of property on the duplicate of 1862, the taxes upon which will be collected during the fiscal year 1863 are:

Real estate not in cities and villages.	$494,101,182
Real estate in cities and villages	151,568,898
Chattle property	243,615,212
Total valuation for 1862	$889,285,292

The Auditor argues against the acceptance by the State of the lands granted by Congress for the purposes of establishing a College of Agriculture and Mechanic Arts. He says:

"The grant by Congress to the State of six hundred and thirty thousand acres of land, for the benefit of agriculture and the mechanic arts, at first view seems magnificent; and yet, upon reflection and careful examination, it is not clear that, if accepted this may not prove to be a grant entailing burdens upon the people greatly exceeding any advantages that may accrue from it. The advantages consists in the grant of six hundred and thirty thousand acres of land, or scrip for that number of acres, which may, in a long series of years, produce a capital of five hundred thousand dollars; not more than that; the establishment of colleges where agriculture and mechanic arts are to be the principal subjects taught, and where scientific and classical studies, and military tactics, must also be taught—for these cannot be excluded. On the other hand, the cost of selling the land, of managing the fund and of erecting all buildings connected with the colleges is to be borne by the people, who are also, through all time to come, to stand sureties for the safety of every investment that may be made of the fund. While the State is barely a trustee of the fund, it is, unlike other trustees, bound for the absolute safety of all the investment, and for the due payment of the interest: and if loss should happen, though without fault anywhere, the people must make it good.

The estimates in the cost of putting into operation a single college will not be less than $100,000 to $150,000, exclusive of the cost of selling the land and managing the fund.

The three-fifths of a mill tax levied by the Act of last February for the relief of the families of volunteers amounts to $538,178 80, which will probably be reduced by delinquencies, &c., to $510,000.

The States quota of the direct tax was paid by accounts and vouchers for moneys expended by the State for the military service of the United States to the amount of $1,000,000, and by cash $380,000. Though these sums exceed the States quota, the exact amount of such surplus cannot now be stated, as the accounts and vouchers have not yet been passed upon by the proper authorities at Washington. As the tax has been suspended until 1865 no payment will be required during the present year.

Upon full reflection, it seems to me clear that some other provision must be made, and that it would not be safe or expedient to rely on the banks for a continued supply of coin.

It is therefore recommended that an act be passed releasing the banks from their obligation to furnish coin to the State, upon condition, however, that they furnish $340,000 for the July interest in the proportions and upon the terms mentioned in the suspension act, accepting however, in lieu of their own notes, Treasury notes or the unselected notes of the solvent banks of the State; and also, that a law, making provision for future payment of this interest in coin, be passed.

There are in Ohio 7 independent banks, 13 free banks, and 36 branches of the State Bank, making an aggregate of fifty-six banks authorized to issue notes to an amount somewhat exceeding thirteen million dollars. There were also two independent and three free banks in process of liquidation with an outstanding circulation of $125,000. The following table shows the circulation of the banks with its changes, as also of the coin held by them, during the past year:

November, 1861	$9,705,412	$3,062,251 15
February, 1862	9,396,556	3,737,051 07
May, 1862	9,936,286	3,808,984 5
August, 1862	16,148,361	3,404,932 1
November, 1862	10,208,451	3,385,131 8

The report, in conclusion, states that the financial transactions of the State, during the past year, exhibit gratifying results. Taxes have been met with more than the usual promptness. During the year 1860 there were collected $2,899,014 41 of a levy of $2,997,918 60, the difference being $98,904 19. The collections during 1861 amounted to $3,383,472 06 on a levy of $3,503,712 93, the dif-

ference being $120,280 87, while those of 1862 were $4,020,597 61 on a levy of $4,056,379 28, the difference being but $35,781 67. This shows that, notwithstanding the existence of an extensive and powerful rebellion against the rightful authority of the Federal Government and the unity of the States, in several of the sister States, withdrawing from Ohio, in the service of the Government, a large number of her most active and industrious citizens, and otherwise greatly taxing the material wealth, and the physical and mental energies of her people, the soil has brought forth its fruits in their wonted abundance, and general prosperity has crowned the labors of all.

New York City Crosstown Railroad.

Senator Woodruff's bill to provide for the accommodation of passengers in the city of New York, makes it lawful for the "New York City Crosstown Railroad Company," or their assigns to construct a railroad with a single or double track, and to convey passengers and freight thereon for compensation, throughout the following streets, &c., in New York:

Commencing in Chambers street at the intersection with West street—thence running through and along Chambers and James Slip to South street thence returning through and along James Slip and Chambers street to the junction of Chambers and Duane streets near Chatham street; thence through and along Duane street to West street, and through West street to place ofbeginning.

Also, commencing at the intersection of Battery Place and West street, and thence through and along Battery Place and Bowling Green to Whitehall street; thence along Whitehall street to Beaver, along Beaver to William along William to Old Slip, along Old Slip to South street.

Also, through and along Beaver street, from William street to Wall street to the ferry. Also, commencing in Hoboken street, at its intersection with Canal street, along Hoboken to West street along West street to Desbrosses street, along Desbrosses to Hudson street, along Hudson to Broome, along Broome to Mangin, along Mangin to Grand street, along Grand to East river, returning through and along Houston street and First street to the Bowery, along the Bowery to Bleecker street, along Bleecker to Christopher street, thence to the place of beginning.

Also, commencing at the intersection of Fourth street and Eleventh avenue; thence running through Fourteenth street to Avenue D, along Avenue D to Tenth street, along Tenth street to East river; returning through Tenth street to Sixth avenue, through Sixth avenue and Christopher street to the North river. Also, along Sixth avenue and Amos street to Greenwich avenue, along Greenwich avenue to Fourteenth street, thence to the place of beginning.

Also, commencing at the foot of Twenty-third street, North river; thence along Twenty-third street to East river, and returning by same route.

Also, commencing at the foot of Thirteenth-street, North river; thence to Sixth avenue, along Sixth avenue to Twenty-seventh street, along Twenty-seventh street to First avenue; thence to Twenty-third street; thence to East River, returning along Twenty-third street and First avenue to Twenty-eighth street, along Twenty-eighth street to Sixth avenue, along Sixth avenue to Thirty-first street; thence along Thirty-first street to Tenth avenue, along Tenth avenue to Thirtieth street; thence along Thirtieth street to the place of beginning.

Also, commencing at the foot of Forty-second street, North river; thence along Forty-second street to the First avenue; thence along First avenue to Thirty-fourth street, along Thirty-fourth street to the ferry, and returning by same route to the place of beginning.

With the privilege of laying all necessary sidewalks, turnouts and switches necessary for the proper working and accomodation of said railroads.

The cars are to run as often as the public convenience requires, and the fare not to exceed five cents per passenger. The bill contains the restrictions usually imposed upon city railroad corporations, with the exception of the restrictions contained in the general act of 1850, which compels the completion of the entire line of road within five years.

China.

Late advices gives us some interesting commercial information as late as the 15th December.

The ports on the Yang-tsze have been brought into notice lately by the publication of revised regulations for trade on that river. The three ports of Hankow, Kiu-kiang, and Chin-kiang, are declared open to trade. The foreign customs collectorate has established agents at each, and the strictest measures are to be adopted to prevent illegitimate trading in any other part of the river, except at the three ports. Provisions are made for the effective operation of a revenue service, whose officers may board every foreign vessel and remain on board to the end of their trip, anywhere between Hankow and the Lang-shan Crossing. A large and lucrative trade in smuggled goods will thus, it is said, be destroyed. At Hankow all is quiet.

From Shanghae we hear that the increase of residents, buildings, and shipping shows no signs of abatement.

At Swatow, the disputed question as to a new site for the foreign settlement has at last been definitely settled, the Kai-lut situation being fixed upon. The lots are being sold by auction; and as Mr. Bruce has decided that none but British subjects can become landholders within the limits of the acquired site, there cannot be more than three firms to compete for the land.

At Pekin the United States Legation is the latest addition to the staff of foreign representatives.

Coal Burner.

A new coal-burning locomotive, the "Minnesota," has just been placed on the Hudson River Railroad. It was built by Walter McQueen, at the Schenectady Locomotive Works.

TO CAPITALISTS.
COAL MINES FOR SALE.
VERY valuable coal mines at La Salle, Illinois, in full working order and doing a profitable business. Having the advantage of a six feet vein, two leading railroads and a canal and navigable river by the works, with the large and growing city of Chicago near, and being in a country destitute of wood, these mines must become among the most profitable in the United States. Samples of both kinds of coal (cannel and bituminous) can be seen at our office. These mines will be sold at a great sacrifice. Apply to ADRIAN H. MULLER, P. R. WILKINS & CO., No. 5½ Pine st.

THE NEW YORK CENTRAL R. R. CO.
TREASURER'S OFFICE,
ALBANY, January 21, 1863.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & CO., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

BOUGHT AND SOLD ON COMMISSION.

The New National Loan.
U. S. FIVE-TWENTY BONDS.

THE interest on these Bonds is at the rate of Six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE-TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500, $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in these Bonds, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR; INTEREST TO COMMENCE FROM THE DATE OF PURCHASE.

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these Bonds.

Orders or enquiries by mail will receive prompt attention, and the Bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These Bonds are the CHEAPEST GOVERNMENT SECURITY NOW IN THE MARKET, and pay the LARGEST INTEREST on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all the Bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a First Mortgage upon everything in the country, as no Railroad or Corporation of any kind can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National Credit.

These are the Bonds upon which the Government now relies, THROUGH THE CONFIDENCE AND PATRIOTISM OF THE PEOPLE, for continued financial support.

We keep them for sale to encourage investment in them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these Bonds, can obtain them at our counter without trouble or delay.

VERMILYE & CO.,
No. 44 WALL ST., NEW YORK.

HAVE on hand for immediate delivery, the **NEW TWENTY-YEAR SIX PER CENT. BONDS** of the United States, designated as "Five-Twenties," redeemable at the pleasure of the Government after five years, and authorized by Act of Congress, approved February 25, 1862.

The Coupon Bonds are issued in ums of

$50, $100, $500 and $1,000.

The Registered Bonds in sums of

$50, $100, $500, $1,000 and $5,000.

Interest will commence from date of subscription, and is payable in Gold at the Mint or any Sub-Treasury or Depository of the United States on the first days of May and November of each year. At the present premium on Gold, the Bonds yield about eight per cent. per annum. The ample provision made by Custom Duties, Excise Stamps and Internal Revenue for the payment of Interest and liquidation of the Principal, makes an investment in this loan safe, profitable, and available at all times.

This being the permanent Loan into which the Legal Tender Notes are convertible, it will become the principal Loan in the market, and a profitable mode of investment for Trust Funds, the surplus funds of capitalists, as well as the earnings of the industrial classes.

Subscriptions received at par in Legal Tender Notes or notes and checks of Banks at par in New York. Subscribers by mail will receive prompt attention, and every facility and explanation will be afforded on application at this office. 3m45

An Invention of Rare Merit.

LONG WANTED, AND FOUND AT LAST!

A Kerosene Lamp Chimney, Easily Cleaned

AND WHICH

WILL NOT CRACK OR BREAK

FROM SUDDEN CHANGES OF

TEMPERATURE.

THE CHIMNEY in common use breaks from unequal expansion and contraction, caused by the upper portion becoming much more highly heated than the lower portion. This constant liability of the Chimney to be broken by being suddenly cooled or "over-heated," is entirely removed by a unique and beautiful invention, BROWN'S METAL TOP LAMP CHIMNEY, which, being made in accordance with the simple law of expansion and contraction, is found to be almost "fire-proof," as far as heating by the flame of the lamp is concerned.

The clear, positive superiorities of the NEW LAMP CHIMNEY over the old style, are—

1. It will not crack or break from sudden changes of temperature, or "over-heating."

2. The top can be instantly removed, and the glass wiped perfectly clean in a moment WITHOUT WETTING.

3. It is shorter than the common chimney, therefore less liable to accidents and more convenient for carrying about the house; it is of elegant proportions and a decided ornament to the lamp, which will be found to burn with a clear, steady and beautiful light.

It is really the ideal of perfection in a lamp chimney, and after using one for an evening you will wonder that you could tolerate the old expensive style.

A "BROWN'S METAL TOP LAMP CHIMNEY," **IS WARRANTED, with ordinary care, to last just as long as the lamp on which it is used.**

Price (with a small SHADE for common size,) Zinc-top, **25** cents, Brass, **31** cents, Silver-Plated, **50** cents.

Dealers will be furnished, per Express, with a SAMPLE BOX containing one-half dozen Chimneys, assorted styles and sizes, with circulars, colored show cards, Price list, etc., on receipt of **$1.25.**

BROWN'S

Metal Top Lamp Chimneys

ARE MANUFACTURED ONLY BY THE

NEW LAMP CHIMNEY MANUFACTURING COMPANY.

FRIED. KRUPP,

At ESSEN, in RHENISH PRUSSIA.

Patent Railway Tires, without a weld. **Axles, Cannon, Anchor-Flukes, Propeller Blades and Shafts. Cranked Axles and Shafts up to Twenty Tons weight.**

CAST STEEL IN BARS, BEST QUALITY,

Suitable for Axles, Shafts, Rolls, Tools, Dies, Needle and Music Wire, Fine Cutlery, etc.

KRUPP'S TIRES

ARE CHEAPER AT THEIR COST THAN IRON ONES GRATIS.
THEY WILL, WITHOUT TURNING, ENTIRELY OUTWEAR THE BEST IRON ONES.
WEAR UNIFORMLY, WITHOUT FLAT PLACES, OR LAMINATION.
ARE NOT AFFECTED BY EXTREME COLD.
MORE THAN FORTY THOUSAND OF THESE TIRES HAVE BEEN SUPPLIED.

KRUPP'S AXLES

Possess similar advantages over Iron ones that the Tires do.

The Pacific Railroad.--Its Prospects.

We are so constantly asked for information in relation to the present condition of this great National enterprise, we think we cannot do a better service to our readers and the public, than to state the most recent facts which have come to our knowledge. It is well known that books of subscription were opened in all the principal cities and towns of the North and West, and that only about the sum of three hundred thousand dollars was obtained, and this chiefly in the far West. The capitalists of the East evidently waited for some amendments to the charter, and for an understanding with each other as to the best method of securing success for the project, before entering into the necessary financial arrangements. Meanwhile, it was ascertained that the probable line of the road offered very few difficulties in construction for the greatest part of the distance, while surveys undertaken by a Californian Company whose report we have already published, had demonstrated that the Sierra Nevada, so much dreaded, was as practicable as any part of the route. In addition to this, it was ascertained, contrary to the general opinion, but not of those individuals who were familiar with railway construction, that the expense per mile would be much less than was at first supposed. This is verified by positive offers to build the line for the sum to be loaned by the Government to the company, and the fact that the Atlantic and Great Western, begun and finished for a distance of two hundred miles in seven months, has, under the able engineering of Mr. Kennard, cost not more than sixteen thousand dollars per mile. At the present session of Congress, under the leadership of Mr. McDougall, U. S. Senator from California, the corporators of the Pacific through their committee at Washington, have sought various amendments to the original bill, and within a few days past some new features have been proposed of a novel but important character. To effectually secure the right of way and entry on the lands necessary for construction, to reduce the shares to such a sum as would secure the largest popular support, to repeal that portion of the charter which allowed the Government to keep back a part of its credit loan and to restore the grade to 4 feet 8½ inches, which the President with great thoughtlessness had settled at 5 feet, were the first objects of the amendments introduced into Congress. Within a few days past, however, two other propositions have been considered, one to permit the company to enlist the laborers to be employed in their work, and to receive their rails from abroad duty free, if the price here should exceed $60 per ton. It is a fact worthy of being stated, that the Atlantic and Great Western Company found it difficult to keep the large body of men they constantly employed, strictly to their engagements. Out of nine thousand men from time to time engaged in their service, but three thousand were continuously effective. On the Pacific railroad where, in all probability, hundreds of thousands of men will be at work at one time, it will be indispensable to have them under discipline of some certain character, to make their labor effective. They must know when they enter the service of the company that for the liberal pay they are to receive, their faithful service will be demanded, under proper penalties. By some such system, similar to that of Russia, the whole work will be harmoniously prosecuted. We have had during the present war very frequent examples of the dispatch and excellent character of bridge and railway work performed by our soldiers. In a few days rivers have been re-spanned by lofty bridges, viaducts re-built, and whole lines of way renewed and promptly in order for transportation. The system is not a new one. In Russia as we have already stated, its well-known military colonies have been long examples of combined industry and discipline.

A committee of the corporators has also been selected to apply to the Legislature of this State, for a remission of tolls on the rails which shall be transported for the use of the road over the canals. That committee however has been waiting to see what would first be the action of Congress, before it repairs to Albany. Some of these measures will be adopted beyond question, and the charter so amended will then be open to capitalists for their action, and the people for their support.

By an actual subscription to the stock of two millions, and a payment thereon of ten per cent., the company can be at once organized and proceed to work.

We undertake to say, that there are capitalists ready, on the passage of the amendments, to take up the work, that the money necessary is also ready, without disturbing our own markets, that it will be prosecuted without delay, and in the same style and with the same skill as were displayed in the construction of the Atlantic and Great Western; that the line to the Colorado will be built just as fast as human labor can be applied to it, and that the whole railway, if this plan is is adopted will be finished in four years.

We learn that Henry Farnum, Esq., of Chicago, will shortly produce a report on the trade of the Pacific, certainly to be within our grasp when this great work is completed, which will open the eyes of the American people to the grandeur of the prize within their reach; and in conclusion we may observe that the Hon. Mr. Cameron, a delegate from British Columbia is now actively engaged in England in advocating the construction of a similar work to the Pacific Ocean, through British North America, by a route which offers no serious obstructions.

Breadstuffs in Great Britain.

The question of food is one which in late years, has caused much anxiety in Great Britain. Limited in area, the products of the soil, notwithstanding the continual efforts to improve its fertility, cannot be made equal to the wants of even the home consumers. Besides this, the policy of the British Government, and the interests of its commerce, unite to keep a large proportion of the population at other labors than those of the field. "The spinners and weavers and other mechanical folk," are unfit for the plough, and yet they must be fed, be the state of the country what it may, favorable or unfavorable; the demand for food is constant, and is with British legislators an element ever entering into their financial calculations and bearing directly on the measures of Government.

The London *Gazette*, a speciality on this subject, is always on the look out to see how the question of bread is going to turn, and what the supplies are to be, under certain contingencies. In a recent article it states that—

Notwithstanding that the crop of wheat produced in the United Kingdom in 1862 was "middling," both as to quantity and quality, and that consumption has been on the increase, the demand has continued in a very inactive state, and the value of all kinds has ruled low when compared with some former periods. Considering, however, that upward of nine million quarters of foreign and colonial wheat, and seven million hundred weights of flour, were imported last year—an amount of supply equal to nearly a moiety of the consumption in England—we can scarcely feel surprised either at the present comparative heaviness in the trade or the moderate quotations which now rule in our markets; nevertheless, it is said that owing to the heavy stocks of produce in warehouse, and the late advance in the value of money in the discount market, a certain amount of anxiety prevails among the holders of foreign produce in reference to the future. To show the extent of the importations in the past year, we give the following table of the arrivals in the whole of the ports:

IMPORTS INTO THE UNITED KINGDOM IN 1862 AND TWO PREVIOUS YEARS.

	1860.	1861.	1862.
Wheat, qrs	5,903,175	1,966,838	9,542,359
Barley, qrs	2,122,016	1,398,976	1,868,578
Oats, qrs	2,308,380	1,875,569	1,622,914
Rye, qrs	96,898	54,138	1,691
Beans, qrs	440,860	564,470	479,753
Peas, qrs	317,548	402,927	229,945
Indian Corn, qrs	1,855,594	3,106,588	2,751,261
Flour, cwt	5,139,188	7,233,976	7,314,311

It appears from this, that the imports of wheat and flour the last year are the largest perhaps on record, while the receipts of other articles were only moderate. Since 1859 wheat has increased 5,498,785 qrs, and flour 3,959,522 cwt, or in the aggregate, reducing the flour to the imperial measure, 800,000 qrs. Prices have been reduced in consequence, as may be seen by the following table.

QUATERLY AVERAGE IN 1862.

	1st Quar.		2d Quar.		3d Quar.		4th Quar.	
	s.	d.	s.	d.	s.	d.	s.	d.
Wheat, per qr.	60	1	56	8	56	0	48	2
Barley	36	3	35	6	33	8	35	0
Oats	22	0	22	8	24	6	21	2
Rye	37	0	37	8	36	9	33	9
Beans	39	10	39	8	41	4	38	8
Peas	40	1	39	6	40	1	41	0

Thus it will be seen that the value of wheat has declined 11s 10d per quarter, and that all other articles, except peas, have given way in a similar proportion.

The *Gazette* contends however, that "notwithstanding prices are not likely to rule lower than they now do. At the commencement of the present month the stocks of foreign grain and flour in warehouse in the metropolis, represented the following totals:

STOCKS OF PRODUCE IN LONDON.

	1860.	1861.	1862.
Wheat, qrs	429,589	415,157	442,967
Barley, qrs	23,495	20,646	19,665
Oats, qrs	160,477	113,247	108,830
Rye, qrs	520	23	92
Maize, qrs	2,751	3,392	10,674
Beans, qrs	953	11,479	5,152
Peas, qrs	8,204	11,702	4,977
Tares, qrs	4,748	5,659	2,549
Totals	630,747	591,305	594,406
Flour, sacks	64,861	40,528	19,406
Flour, barrels	145,743	133,934	145,058

These figures show a slight increase in the stocks of wheat in the metropolis this month, and a full average supply of flour; but there is nothing indicative of unusually large qualities of other kinds of produce. When, however, we sum up the total quantity of wheat, foreign and colonial, now in warehouse in the whole kingdom, it must be admitted that there is a large supply on hand to meet the demand. The stocks are as under:

STOCKS OF WHEAT IN THE UNITED KINGDOM.

	Qrs.
London	442,967
Newcastle	55,538
Liverpool	735,888
Leith	140,000
Glasgow	100,000
Gloucester	60,460
Wakefield & Leeds	120,000
Hull & Goole	115,000
Various other ports, including Ireland	260,000
Total	2,089,862

To this supply we may add about one million quarters of flour, barley, oats, &c; consequently, rather over three million quarters of produce and still in the hands of the importing houses or about 800,000 quarters more than at the corresponding period in 1862. Little or no relief has been afforded the trade by an export inquiry, such as was the case in 1861; consequently the imported supplies have either passed into consumption or been held for future markets.

The dependence upon the foreigner for a supply of wheat in 1862 exceeded 88.00 per cent. of the entire consumption, and that the quantity of English amounted to only 11.16 per cent. In 1855 the per centage of foreign was 59.02, of English 40.59. The great increase in the former and heavy decline in the latter in 1862, as we have shown, prove clearly enough that general consumption is increasing, and that our own produce is far too limited in quantity to have any important influence upon the quotations."

The article concludes with this important remark, (ominous of a large demand from this country during the present year) "that though there are now large supplies of grain and flour on hand, and though prices are low, we *shall still have to import on an extensive scale during the present year.*"

We perceive then that our exports of breadstuffs bid fair to be as large as ever, that our husbandmen may expect a good continuous foreign market for their products, that our canals and railways are to enjoy another year of prosperity, and our financial future, so far as it is to be effected by the balance of trade, looks in this respect, both bright and cheering.

Illinois Central Railroad.

The receipts from operations of this road for the years ending December 31, 1861 and 1862 have been as follows:

	1861.	1862.
Freight	$1,780,073 52	$1,803,998 63
Passengers	661,392 77	919,487 71
Extra baggage	1,451 28	1,324 26
Mails	76,300 00	76,300 00
Express	29,042 52	26,476 73
Rents	5,587 11	8,413 30
Rent of property	69,792 15	62,726 43
Rent of eng'es & cars	2,453 15	8,171 02
Storage & dockage	236 27	247 96
	$2,626,328 77	$2,907,146 04
Earn'gs over P. & O. Railroad	66,155 33	63,366 87
Army earnings:		
For troops	143,376 42	410,278 80
" freight	63,752 22	65,035 17
	$2,899,612 64	$3,445,826 88
Less operating expenses:		
Salaries	$72,168 08	$72,313 96
General expenses	74,729 60	94,004 92
Legal expenses	10,043 58	8,751 66

Loss and damage by fire	19,384 60	7,059 00
	$1,584,344 09	$1,615,256 04
Leaving net earning	$1,315,268 55	$1,830,570 84
Deduct charter tax	164,365 05	280,000 00
	$1,150,903 50	$1,600,570 84
Add amount applicable to Interest Fund, as per Land office Report	223,852 83	212,525 70
Add amount applicable to Free Land Fund	72,375 85	57,626 88
Balance of Income Account	$1,447,132 18	$1,870,723 42

Compared with the year 1861, the gross income from traffic in 1862, shows an increase of $546,214 24, with an increase in operation expenditures of only $30,911 95—making the increase in net earnings $515,302 29. Deducting the charter tax, the gain is $449,667 34. The balance to credit of income account, being amount applicable to interest and dividends, is $423,591 24 in excess of the preceding year. We give the report of the President entire:

The traffic upon our line the last three quarters of the year abundantly made up the loss of the first quarter. In fact, if it had been thought pru-

dent at an earlier date to have supplied more rolling stock, the cost of five hundred cars would undoubtedly have been already earned. Since the 1st of June it has been out of our power to transport the freight offered. The failure to provide cars for grain in the autumn, in accordance with our proposals to take grain in payment for lands, abridged the collections in the Land Department several hundred thousand dollars.

I am pleased to report a gain in traffic of $546,-213 64, with a slight decrease in working expenses, and refer especially to the Superintendent's Report, and to the Locomotive Statement. The working expenses were forty-six per cent. The trains have run 2,561,192 miles, and the total expenses are $1,615,256 04 or 63 cents per mile. The locomotive expenses, including wages, fuel, repairs, etc., are $17.42 per mile.

The title to our depot property in Chicago was finally determined by the Supreme Court. One other title to right of way in Chicago has been settled this year, closing up the last of these claims. Of the outlays upon capital account, $125,636 22 is chiefly for new structures and additional cost of iron bridges beyond estimate for wood, $19,712 56, for new engines and tools, and $36,334 38 for right of way and depot grounds. The receipts on capital during the year were $995,-265, the disbursement as per table A, $525,830 76, leaving a balance of $469,434 24. The total revenue, $1,870,723 42, as per table B, after providing for the coupons, and for four per cent. on the full paid shares, leaves a balance of $465,895 39; these two balances make up $935,329 63 of cash in the hands of the Treasurers at New York and Chicago.

		$465,895 39

It will be seen from the above figures, that the debt, the source of so much trouble heretofore, will be under control in the future. The attempt to build this railway upon credit was unsuccessful. The credit system was also carried to excess in the plan of selling the lands. The value of the bonds was established upon the prospective value of various classes of the lands after the construction of the railway. This plan of sale was in progress previous to the disposition of the bonds, and has proved to be in some respects very defective. The low rate of interest fixed at two per cent., at a period when speculation was at its maximum in the Northwest, was a temptation to speculators, who frequently made their purchases second-hand, through irresponsible parties. The company was not disposed to sift the character of the applicant for land to the bottom, inasmuch as every buyer paid something, and became at once an interested party to invite others to the prairies. The topography of the country in relation to opening new farms was not regarded with sufficient care. Every effort was made to direct the purchasers to the localities where the company had the most land for sale. At several of these points where respectable bodies of *bona fide* purchasers were settled, a thorough system of drainage is indispensable to successful farming. These men of small means, strangers to each other, cannot combine, before owning the land, to perform work which properly belongs to the largest proprietor. A very moderate expense for main drains—moderate as compared to the resources and benefits accruing to the Company thereby—would enable the small farmer, by cross-draining, to secure his crops and pay the company; moreover, the first notes given for principal, matured at the period of the two unfortunate harvests, seasons fatal to the speculator, and very disastrous to farmers placed upon lands unfavorable for surface draining.

During the past two years, a radical improvement has been made, no sales have been allowed to speculators, all the contracts bear 6 per cent. interest, and purchasers are dissuaded from taking too large tracts of land; the average quantity taken by 2,000 purchasers is 67 acres; during the past year a very minute inspection of all the lands sold has been made, and the company has resumed possession of the tracts from which no payment can be looked for; this action explains the large cancellations. It should be borne in mind by the shareholders, that in the face of all these obstacles upwards of *five million* dollars have been collected; that the title to only 271,890 62 acres of the land has been parted with—the title to 2,323,009 38 acres is still vested in the company and trustees. Of this quantity, 926,956 28 are under contract, partial payments having been made thereon,—leaving ten millions six hundred thousand dollars of notes and contracts in hand. The collection of five millions, under the circumstances, attest the great value of the prairie lands. The greater variety of crops, with the present improved and more intelligent culture of the soil will inevitably give better results, especially if the important measure now under consideration for the enlargement of the New York canals is carried into effect, as every dollar taken from the cost of transportation adds directly to the income of the Illinois farmer. The grain shipments from Chicago very nearly equal the exports of grain from the United States. Either by the new York canals, or by the natural outlet of the lakes, the St. Lawrence, Chicago seems destined at an early day to possess the advantages of an ocean port.

We are liable to great changes growing out of the rebellion, and shall try to make the best of circumstances as they occur. Of late there have been numerous applications and larger sales and collections than for several years past. There is a steady tide of emigration from the adjoining States into Illinois. The disorder and absence of civil law in the States south and south-west of this, tends to prevent new settlements in those States, and removes from them many citizens who prefer to live in a law-abiding community. The disorder on the frontier will restrict the circle of settlements. The immense quantity of grain carried over our road is an index of the prosperity of the country adjacent to it. This is well understood by those seeking new homes.

The sales in 1862 amount to $989,376 08, the collections were $576,771 71; of this $92,782 54 was collected in December. During 1861 and 1862, a period of great depression in prices, the company received upwards of three million bushels of grain. The first year the corn was shipped through to New York, and partly to England. The estimate of loss, stated in the accounts that year to be $56,421 27, fell short of the actual loss (chiefly on account of shipments abroad) $73,987 98. This excess was made good by the profit on the purchase of some of the Company's Sterling Bonds in London, which were paid into the sinking fund at par. The loss on grain last year was $32,302 29. This grain business has involved much care. Upwards of one hundred and fifty cargoes were shipped to Buffalo. The company cannot well compete with experienced grain merchants, who specially devote their whole attention to the various markets for grain; the risks of loss are great; the business is not sufficiently regular and constant to make it an object to employ competent parties specially to conduct it. It is of too great magnitude to be conducted incidentally by any of the present officers of the company. It has therefore been decided to make a reduction direct to the shipper of the grain, by giving a drawback of 30 per cent. upon the tariff rates of freight to all parties owing the company for lands, who may consign to it grain for sale. The grain is delivered to commission houses, sold at once, and the proceeds carried to the credit of the shipper.

The culture of Sorghum has proved very profitable and successful. A few years since, the road brought into the State *via* Cairo, from twelve to fifteen thousand barrels of molasses per annum. The import has ceased, and Illinois is now exporting syrups from Sorghum.

The cotton seed obtained from Tennessee proved to be inferior; the acclimated seed, from the planting of previous years, was, as usual, quite successful in Southern Illinois. There was no large tract planted, for the seed could not be obtained. We hear of ten or twelve cotton gins at work at various points.

The loss of Louisiana sugars has directed the attention of several German gentlemen to the culture of the Sugar Beet. The prairie soil seems peculiarly favorable to its production. The yield of several fields last season was from 9 to 13½ per cent. of saccharine matter.

The dividend of two per cent. declared on all the shares and canceled bond scrip, payable 2d February, appropriates $371,732 60 from the $465,895 39 to credit of revenue. The construction of five hundred freight cars is in progress; this number will be completed at the company's shops by the 1st of June. It is proposed to build six locomotives this year, and to complete several iron bridges to replace wooden structures.

The financial condition of the company, December 31, 1862, is shown in the annexed

GENERAL BALANCE SHEET.

Permanent expenditures		$27,765,671 24

From the report of the Superintendent we learn that the motive power and rolling stock of the company have been fully maintained in as perfect condition as during any previous year, not permitting any part of it to fall below the standard of the greatest efficiency. The number of miles run by engines with passenger trains during the year was 855,522; with freight trains, 1,224,382; with construction trains, 59,176; with road trains, 1,780; and with switching trains, 420,382—making the total mileage of locomotives for the year, 2,561,192, an increase of 103,169 miles over 1861. Average number of cars hauled, 12.08; lbs. waste used, 34,167½; gallons of oil, 20,645 34; cords of wood, 25,333⅞; tons of coal and coke, 43,037 73. Cost of repairs, $159,588 54. The cost of repairs is 6.23 cents per mile, and for fuel, 6.1 per mile. The entire cost per mile run by each locomotive, including oil and waste, wood and coal, wages of engineers and firemen, and repairing and cleaning engines, 17.42 cents, against 18.92 cents in 1861—a saving of 1.5 cents per mile. This saving is due principally to the increased use of coal as fuel for all classes of motive power.

The number of locomotives belonging to the company is 112; of these, 67 are burning coal, 15 of which have been altered from wood-burning to coal-burning during the year, and 3 others are undergoing the necessary alterations at this time. There is now building, and nearly completed, a first class freight coal-burning locomotive, at the company's shops, and materials are on hand for two more of the same class which will be built during the summer.

The company have 61 passenger cars, 23 baggage, mail and express cars, 2 officers' cars, 1 pay car, and 7 sleeping cars; 2,312 freight cars; 9 derrick, wreck and tank cars; and 14 snow plows. During the year extensive repairs and renewals have been made to the rolling stock: 5 passenger cars have been built, 18 have had thorough repairs and 6 new tin roofs; 3 baggage cars have been re-built, 9 have had thorough repairs, and 2 new tin roofs; 18 house cars have been re-built, and 113 have had thorough repairs; 65 flat cars have had new bodies, and 5 re-built entirely; 299 house cars have had new tin roofs and 4 canvas roofs; 600 cars have had partial repairs during the year. The cost of repairs of passenger cars has been 1.24 cent per mile run; of freight cars, .4 of one cent. per mile run. The company have on hand and in new cars, material for 550 house cars, 150 of which have been completed; the remainder will be completed early in June.

The roadway and structures have been kept in excellent order, and in no case permitted to deteriorate. The cost of repairs for each mile of road is $566.77, and for each mile run by locomotives, 15.73 cents. There have been placed in the track during the year 171,182 sleepers, 1,671 tons of re-rolled iron, 11,089 bars of repaired iron, 9,242 bars of partially worn iron replaced, 24,212 chairs, and 148,957 lbs. spike. The bridges have all been thorougly repaired, or replaced by new ones. The station buildings have also received necessary repairs, and are in good condition. The superintendent says:

During the last six months of the year, there was more freight offered than we were able to accommodate, owing to the insufficiency of rolling stock. Every means were adopted to work the line up to its greatest possible capacity, with the stock at our disposal, and we thereby reached an amount of earnings per month, that formerly was believed could not be attained. This, however, could not be maintained for any length of time without increased facilities. The cars now under construction will enable us, during the present year, to do a very considerably increased amount of business, should it offer.

The following is a comparative statement of earnings in the years 1861 and 1862—showing an increase in 1862 of $543,425 88:

	1861.	1862.
Freight	$1,976,136 20	$1,995,767 54
Passengers	804,769 19	1,329,766 51
Extra baggage	1,451 28	1,324 26
Mails	76,300 00	76,300 00
Express	29,042 52	26,476 73
Rents	5,587 11	8,413 30
Rent of property	69,792 15	62,726 43
Rent of engines and cars	2,453 15	8,171 02
Storage & dockage	236 27	247 96
	$2,965,767 87	$3,509,193 75

In the working expenses, as shown in the following comparative statement, all charges are included, except the Charter tax. The expenses show an increase of $30,911 95; the net earnings an increase of $515,802 29:

	1861.	1862.
Salaries	$72,168 03	$72,313 96
General expenses	74,729 60	94,004 92
Legal expenses	10,043 58	8,751 66
Claims and damages	18,602 53	28,991 06
Station expenses	244,315 02	254,520 75
Train expenses	362,636 37	346,447 95
Maintenance of mach'y.	319,592 53	367,229 36
" road	341,444 53	402,829 58
Repairs of fencing	11,904 69	8,266 12
Operating St. C. Air Line	685 77	957 48
Interest	2,432 09	.....
Loss on currency	79,390 22	.....
Insurance	27,014 53	20,315 21
Loss & damage by fire	19,384 60	7,059 00
Exchange	.....	4,564 14
	$1,584,344 09	$1,615,256 04

The proportion of expenses to gross earnings in 1862, is 46 per cent. In 1861, it was 49.1 per cent. The net earnings are equal to 5 per cent. on the bonded debt and capital stock.

From the report of the Land Department we learn that the total land sales for 1862 were 87,599.35 acres, for $989,376 08. The aggregate sales from commencement to January 1, 1863, were 1,198,846.90 acres, for $15,209,213 42. The unsold lands amount to 1,396,674 acres.

The following is a statement of transactions of the Land Department during the past year, and general statement of accounts to December 31, 1862:

DISTRIBUTION OF PROCEEDS.

Land Notes on hand as per report of 1861		$11,593,057 57

Gratuitous Passengers.--Contracts with as to Responsibility for Accidents.

A CONTRACT BETWEEN A PASSENGER, RIDING FREE, AND THE COMPANY EXEMPTING THE LATTER FROM LIABILITY FOR ACCIDENTS, IS NOT AGAINST PUBLIC POLICY, AND IS VALID. THERE IS NO DISTINCTION BETWEEN SLIGHT OR GROSS NEGLIGENCE IN RESPECT TO THE LIABILITY OF COMMON CARRIERS OF PERSONS.

The N. Y. Court of Appeals in the case of Wells *vs.* The New York Central Railroad Co., have now settled the rule of law in the State of New York, as to the validity of contracts made between companies and gratuitous passengers. The action was brought against the company to recover damages for injuries sustained by the plaintiff, when a passenger upon the defendant's road, from a collision between the train in which he was riding and a freight train carelessly left standing upon the track in the night time. The plaintiff paid no fare, but was under a free ticket, on which were printed the following words: "The person accepting this free ticket assumes all risks of accidents, and expressly agrees that the company shall not be liable under any circumstances whether of negligence of their agents or otherwise, for any injury to the person, or for any loss or injury to the property of the passenger using this ticket." The trial was by the Court, a jury being waived, the only evidence received being a stipulation between the parties and the pleadings. The complaint was, that the injuries to the plaintiff were caused by, or resulted from, the negligence of the defendants simply, without characterizing that negligence by the vituperative epithet gross, or culpable, or by any other term or epithet. The answer of the defendants did not deny the negligence, but set up the contract in bar of the action.

The judgment at the circuit or special term was rendered upon a statement of facts settled and submitted by stipulation of the parties. By this statement, the defendants admitted that the injuries to the person of the plaintiff "were occasioned through and by reason of the carelessness and negligence of the defendants and their agents and servants;" but in the statement nothing was said about the negligence being gross. The justice at the circuit upon the facts so agreed upon and submitted to him by the parties, found and decided as matter of fact, that the injuries complained of were occasioned by the gross negligence of the defendants, their agents and servants; giving judgment in favor of the plaintiff, on the ground that the contract was not valid so far as to exempt the defendants from liability for gross negligence. This judgment was reversed by the General Term of the Supreme Court upon the ground, that, if there was any such practical distinction between gross and any other kind or degree of negligence, as the justice at the circuit seemed to suppose, that the contract was valid and effectual to protect the defendant from liability for gross as well as any other kind or degree of negligence.

The plaintiff then carried the case to the Court of Appeals, which Court now held, that a contract between a railroad corporation and a gratuitous passenger by which the former is exempted from liability under any circumstances of the negligence of its agents for any injury to the passenger is not against law or public policy and is valid; and that it is immaterial whether the negligence of the agents be slight or gross. The following opinion was rendered at the decision of the case:

GOULD, J.—There being made some question whether the endorsement on the ticket ("the person accepting this free ticket assumes all risk &c., and expressly agrees," &c.,) is a contract, on the part of the passenger with the company, it seems necessary to say that the word "agreed" means the concurrence of two parties; and that the act of acceptance binds the acceptor as fully as his hand and seal would. The point is too well settled to admit of debate.

The true questions in the case arise upon the legality of such a contract; and what acts or omissions it does by fair construction cover. The terms "negligence," "ordinary negligence," "gross negligence," had their origin in the rules of law as fixed in regard to bailments, generally, and not in regard merely to the duty of common carriers, since they were held responsible for any and every degree of negligence. But a naked depositary, without reward, was responsible only for gross negligence; and gross negligence, in that use of the term, was considered as evidence of fraud; and, unexplained, equivalent to fraud. The term has since been used in reference to common carriers of goods, as pointing out such acts as they were not at liberty to exempt themselves from liability for, even by an express contract in terms covering them. That they could not so exempt themselves was decided upon grounds of public policy—evidently for the reason that such acts were evidence of fraud, or wilful injury; and that a carrier of goods was in so absolute and unwatched control of the goods, that it would not answer to allow him to rebut such evidence. And it is of course the law that no one can, by contract, shield himself from liability to his own fraud, or for his own wilful act.

Holding this to be the true reason of the rule, and its right interpretation, and granting that it applies to individual carriers of persons, does it apply to corporations which carry persons? Fraud and wilful misfeasance include a will, a motive; and a corporation as such, can have no motive, no will; though its agents may have both. Still it would hardly do to hold the property of corporators liable for the wilful or criminal act of a person employed by the corporation. Such acts cannot be said to be done in the course of his employment. Were a switchman wilfully to misplace a switch, so that a train of cars was thrown off, and many passengers killed, the man would be guilty of homicide; but the railroad company could not be held responsible for the damages, any more than could the owner of a carriage and horses, should his driver wilfully run them among a crowd of persons, trampling and crushing all before him.

As to the construction of the contract; it would seem from what has been said, that the term "gross negligence," as used in the law, has a technical meaning, which is not properly applicable to those acts of servants of a corporation for which the corporation is responsible; though as between their acts which are slightly negligent, and those which are very negligent, there is no different rule of responsibility. It is the fact of negligence (mere negligence) and not its degree, which incurs the liability.

This being so, and taking the terms of this contract, "the company shall not be liable under any circumstances, whether of negligence of their agents or otherwise, for any injury, &c., of the passenger using this ticket;" against what liability does it contract? We are not to give it a construction that would make it illegal, unless that be the only fair construction; and its plain purport provides against "circumstances of negligence," the words "or otherwise" being too vague to be held to bear an illegal meaning. It is, then, a contract not to be liable for the mere negligence of the agents of the company. I am aware that the judge at the circuit has found that the act of the agents, in this case, was one of "gross negligence." But in so finding he has gone beyond the stipulation as to the facts; which is that the injuries were occasioned by means of the negligence of the agents; the stipulation covering the same ground as the contract, and the complaint making no other allegation. And the case must be considered as if the word "gross" were omitted in the finding, as it is in the evidence (or stipulation), had the plaintiff wished it in his case, he should have said so, and put it there.

Upon the reasoning above and upon any legal principle—whether founded upon public policy or otherwise—there seems to be nothing illegal in such a contract. It cannot, reasonably, be said that because five or ten persons on a train that carries two hundred, have such passes, there is the less inducement to care on the part of the company, or its agents; or that a feeling of indifference to human life would be thereby caused. The quantum of interest, the ratio of motive is too utterly insignificant when compared with the vast liability not protected by any contract, and binding the company and its agents to every measure of caution. That agents will be careless; that no considerations are sufficient to induce constant vigilance; we have frequent and terrible proofs. But the holding of such contracts illegal would not even tend to alter the fact.

Independently of, or rather in accordance with, these views upon principle, the case of Wells & Tucker against the Steam Navigation Company (4 Seld., 375) seems an authority of the same general tendency. Although it was there held that the words "at the risk of the owner," did not cover the proved acts of the agents of the defendant; and although the case uses the term "gross negligence" in a sense different from the one above given to it, still the case holds that those defendants did not, (not that they could not) protect themselves from liability in the case proved. And (at p. 381,) Judge Gardiner said, "Although the law will not suffer a man to claim immunity by contract against his own fraud, I know no reason why this may not be done in reference to fraud or felony committed by those in his employment." It is by no means necessary to go so far now, but *a fortiori*, he may protect himself by contract against the negligence in any degree of his agents.

The judgment of the Supreme Court should be affirmed.

New York Canals.

The State of New York may be justly proud of its canals. They were conceived by a master mind, they have answered our most sanguine expectations, and their effect has been not only to enrich the territory through which they pass, but the great Western world beyond, once a wilderness, but now by consequence the very garden of the United States. We give the following interesting statement from Auditor Benton, in relation to the trade and tonnage of these canals, and agree with him that the facts should be "widely disseminated." The following table commences with the year 1847, known as the famine year, and it shows a gradual increase in tonnage from 1857, and a falling off in tolls until 1860, accounted for by Mr. Benton, in the alteration of the rates of tolls.

The total tonnage of all the property first cleared on all the canals of the State, ascending and descending, its value and the amount of tolls collected for the years named were as follows:

	Tons.	Value.	Tolls.
1847	2,869,810	$151,563,428	$3,635,381
1857	3,344,061	136,997,018	2,045,641
1858	3,665,192	128,568,844	2,110,754
1859	3,781,684	132,160,758	1,723,945
1860	4,650,214	170,849,198	3,009,597
1861	4,507,635	130,115,893	3,908,785
1862	5,598,785	203,234,331	5,188,943

The year 1847, is taken to contrast and compare with the years succeeding after a lapse of ten years and show the reader a gradual increase in tonnage from 1857 to the close of last year, with a large falling off in tolls until 1860. These contrasts can only be accounted for in one way—the alterations that have been made in the rates of toll by reduction. It will be apparent that they have been large, else we should not have found ourselves losing revenue upon an increasing traffic. It is not unimportant to observe that while the canal tonnage of 1862 exceeds that of 1847 by 2,908,975 tons, the increase in tolls is only $1,553,560, whereas the rates of 1847 on the tonnage of 1862 would have produced over seven millions and a quarter of revenue.

The value and importance of our canal traffic to the commercial interests of the State is most strikingly exhibited by showing the tide water deliveries from the Western States and Canada, and from our own State.

The figures below show the total tons and aggregate value of the property delivered at tide water from the Erie and Champlain canals during the years named:

	Tons delivered.	Value.
1847	1,744,283	$72,092,414
1857	1,617,187	51,190,018
1858	1,985,142	61,536,061
1859	2,121,672	58,175,312
1860	2,854,877	78,798,617
1861	2,980,144	81,332,759
1862	3,402,709	111,176,568

The tide water deliveries by canal, at the Hudson river during the seven months' navigation of 1862, exceed by 338,000 tons the whole aggregate tonnage through and way, east and west of the New York Central Railroad, and the Erie Railway, for the twelve months ending the 30th of September, 1862.

The statements of the tons and value of property left in New York by boats that run directly to New York without breaking bulk at West Troy or Albany, show that in

	The tons left were.	Value.
1860	1,094,042	$40,301,033
1861	1,531,529	50,841,965
1862	1,609,051	61,570,328

The reshipment to New York and other seaboard ports from West Troy and Albany of very large quantities of the annual tide water deliveries from the canals is shown by the active shipping business carried on from those places during the seasons of navigation.

Another interesting fact is exhibited in the enormous quantities of flour and wheat, (reduced to flour) coming to tide water from inexhaustible granaries of the West. It is as follows:

	Bbls. from Western States.	Bbls. from this State.	Bbls. arriv'g at tide water.
1847	3,989,232	791,106	4,780,338
1857	2,227,092	.....	1,988,226
1858	3,778,069	.....	3,566,921
1859	2,210,620	.....	1,925,402
1860	4,344,387	737,321	5,081,708
1861	6,712,233	747,822	7,457,225
1862	7,516,397	843,685	8,360,082

We must bear in mind that in 1847 there were not any deliveries of vegetable food from the Western States by the present lines of the New York and Erie and New York Central Railroads, at their eastern terminations, or if any, the quantity must have been very small, for the New York and Erie was not then completed, and the lines of road composing the present New York Central road had not laid down their heavy rails, and were not prepared to carry much freight. In 1856 these two roads, as appears from the railroad reports, brought to their eastern, or tide water terminations through in the aggregate 290,435 tons of vegetable food; assuming that this was all flour, the tonnage would be equivalent to 2,689,212 bbls. These railway deliveries have been steadily increasing, and for the year ending 30th of September last they probably had reached if they did not exceed 5,300,000 barrels. This would make up an aggregate of 13,660,082 barrels brought to an eastern market.

The domestic export from the port of New York of wheat and flour reduced to flour, for the year ending June 30, 1861, was equal to 6,930,652 barrels, and the export of these articles from the whole Union for the above period was equal to 10,575,367 barrels. These facts show the importance of the canals to the trade of the country.

The receipts at tide water in 1857, 1858, 1859, being less than those from the Western States, is proof according to Mr. Benton, that none of the surplus products of this State came by canal in those years, or if they did, that their place was supplied from the Western States.

We thus perceive that more than eight millions of barrels came to tide water of flour alone. In what part of the world can we find any such results from any internal navigation.

Liabilities and Resources of the Union.

The expenditures of England and France in the year 1862 in the following table are actual payments made of moneys levied and collected during the year, amounting to a tax upon the people of $12.00 in the former, and $11.29 in the latter upon every individual in the respective countries, while the expenditure of the United States embraces the debt contracted during the year as well as the taxes levied and disbursed—the taxes or revenue raised in the year amounting to no more than $51,935,720, or $1.62 to each person of the total population of the Union, and $2.32 if charged upon the population of the loyal States.

The expenditure of Great Britain in loans and taxes for the year 1814, amounted to 122 millions of pounds, which with a population of 18½ millions gives a per capita expenditure of $32.27, and an actual levy and collection within the year of £70,926,215, or $18.80 per capita.

The annexed table shows a comparative statement of the expenditure of France for the year 1862, of Great Britain and Ireland for the year ending March 31, 1862, and of the United States for the year ending June 30th, 1862, with their respective burdens upon the people per capita.

To ascertain the value and rate of increase of the nation's property and of the yearly products of industry from which the accumulation arises, requires an investigation extended over the whole period of our history. This is a question of first rate importance, in the calculation of our ability to put down the rebellion, and our resources to meet the colossal expenditures of the war. We have full confidence in the restoration of the Union, founded upon the patriotism of the people, the value of our nationality, and our ability to pay. The total products of the year 1849 exceeded those of 1839, in the market values of the time, about 88½ per cent., and about 38¾ per cent. per capita. The official valuation in 1860 renders it at two and one quarter (128 per cent. increase) times greater than in 1850. The value of real estate of ten States of the Union increased between the years 1798 and 1813—123 per cent. which is equal to a decennial increase of 68 per cent. The population of the United States from 1850 to 1860 increased 35.52 per cent. The total valuation of real and personal estate increased 128.79 per cent. The valuation per capita 68.8 per cent.

At this rate the wealth of the nation would double itself in a fraction less than eight and a half years—and per capita in eleven and one third years nearly. According to a calculation

n a work of respectable authority 14 6-10th years may be taken as the time required in Great Britain and Ireland to double their aggregate wealth, and 20 4-10th years the period in which it would double per capita.

It is not difficult to believe that if England doubled her wealth in 14 6-10th years, prior to 1838, the United States may well have doubled hers in 8 4-10th years beginning with 1850. We built 21,000 miles of railway in addition to those in use in 1850. Our exports of domestic produce exceeded those of the preceding 10 years 1,202 millions being 82 millions more than double; and at the same time the advance in the value of lands new and old throughout the Union must be added to this, showing an increase of 35 per cent. With these facts before us, we can have but little difficulty in accepting the results to which our data lead us. Thus we feel assured of our relative ability to meet the debt of the future by a comparison of the history of our own past and the like experiences of other nations.

The increase of our national debt is not greater than the increase of our ability to pay it. Unlike all other nations our obligations are given on the basis of commercial transactions to be paid in full within the stipulated time. The United States debt increased in fifteen months ending 29th of May, 1862, $431,000,000, or $345,000, in one year. The debt of Great Britain increased from 1812 to 1813—$397,984,000. The Union had a capital of national wealth in 1860, at least seven and one half times greater than in 1810. The loyal States held five-sevenths of it, and are able to bear proportionately greater burden of expenditure than in the years from 1816 to 1835, when they contributed largely beyond their equal share to the discharge of 127 millions of debt in 19 years. The burden in the former period apportioned equally among the people was $14.81 to each individual. If the present debt be charged upon the loyal States the share per capita is $21.21. Apportioned amongst the total population it is $14.83, the same to each individual as in the former period.

In looking over the history of the past, we point with pride to the period when our government purchased its bonds at a premium of over 20 per cent., and we look forward to the time when the rebellion will have been crushed, the Union restored, and the gigantic debt increasing upon us fully paid off.—*Hallett's Financial Circular.*

Finances of Buffalo.

EXTRACTS FROM THE MESSAGE OF THE MAYOR.

The transactions of the city in regard to the Funded Debt, during the past year, may briefly be recited as follows:—June 2, 1862, fifteen bonds of $1,000 each were issued, in pursuance of a resolution of the Common Council, adopted May 19th, payable in twenty years, for the purpose of paying certain bonds issued June 1, 1852 on account of the Funded Debt, which fell due June 1, 1862. November 15, 1862, twenty-two bonds of $1,000 each were issued by resolution of the Council, for the purpose of paying and cancelling certain bonds issued October 20, 1852, known as the Ship Canal Bonds, upon which there was past due the sum of $11,000, and certain other bonds of the city issued June 1, 1854, to pay the indebtedness of the Old City, upon which there was past due the sum of $11,000. These bonds, amounting to $37,000, all issued for the purpose of providing for old indebtedness, and drawing interest at the rate of seven per cent, per annum, were taken at par by the Trustees of the Grosvenor Library Fund.

On the 15th of December, 1862, six bonds of $1,000 each were issued, pursuant to a resolution of the Council payable in twenty years, for the purpose of reimbursing the Contingent Fund of 1861, for advances made on account of the Fund for the Defence of the Federal Union. On the 1st of January, 1863, thirty-two bonds of $1,000 each were issued, bearing semi-annual interest at seven per cent., payable in the city of New York, for the purpose, also, of reimbursing the Contingent Fund for advances made to the Fund for the Defence of the Federal Union. These bonds are payable as follows:

$10,000	payable in 1866
10,000	" " 1868
12,000	" " 1869

And were sold at a premium of $1,540. It will be seen that all the increase made to the Federal Debt during the past year is $38,000, all of which is on account of the appropriations for the relief of the families in the Union army.

The following is a statement of the amount of funded debt as it existed on first day of January in each year since 1853:

1854	$507,563 00
1855	607,563 00
1856	575,063 00
1857	550,750 00
1858	612,143 75
1859	585,600 00
1860	579,000 00
1861	537,000 00
1862	510,000 00
1863	548,000 00

The disbursements of the city on account of the Fund for the Defence of the Federal Union, up to Jan. 1, 1863, as appears by the Comptroller's books, is $28,002 80. During the year, the Common Council resolved to borrow a further sum of $50,000 from the Contingent Fund of the city for the relief of the families of residents of the city who should volunteer in the service of the army of the United States after July 2d, 1862.

The following statement, furnished by the Comptroller, shows the present condition of the Tax Loan Fund:

		Paid.	Bal. due.
B'ds of July 1, 1859.	$60,000	$45,000	$15,000
" " 1860.	60,000		60,000
" " 1861.	86,000	17,000	69,000
" " 1862.	77,368 88	7,000	77,368 88
Total amount due			$221,368 88

In my last message, I called the attention of the Council to a deficiency in the General Fund of 1859. It appears from the report of the Comptroller that the following deficiencies exist:

Deficiency in General Fund of 1859, for losses in failing to collect personal taxes	$34,123 75
Deficiency in General Fund of 1860, for over estimate of resources	5,050 76
Deficiency in General Fund of 1861, on account of over estimate of resources	10,661 97
Total	$49,836 48

The General Fund Tax and the annual expenditures for the past nine years have been as follows:

	General Fund Tax.	Expenditures.
1854	$322,155 00	$313,660 68
1855	275,580 00	317,834 43
1856	310,000 00	336,791 20
1857	297,825 00	456,507 47
1858	293,777 25	375,411 18
1859	239,419 90	312,594 13
1860	255,073 60	302,443 18
1861	224,901 08	283,644 49
1862	270,335 28	

Coal Tonnage of the North Pennsylvania Railroad.

In the official year ending November 30, 1862, the through and way coal tonnage of the North Pennsylvania Railroad was as follows:

	Tons. cwt.
Through coal delivered in Phila.	86,211 16
Way coal delivered north of Phila.	17,852 08
Total coal tonnage for 1862	104,064 04

Coal Tonnage of the Pennsylvania Railroad.

During the year ending January 31, 1862, the quantity of coal carried on the Pennsylvania Railroad, on freight, was 835,146 tons.
Carried for the company's own use 121,640 tons.

Total tons moved during the year 956,786 tons.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Feb. 13, 1863, was as follows:

Passengers	$14,937 44
Freight and live stock	51,825 43
Mails and sundries	1,298 32
Total	$68,061 19
Corresponding week of 1862	55,389 75
Increase	$12,671 44

The earnings of the Chicago and Alton Railroad for the 2d week of Feb., 1863, were:

	1863.	1862.
Passengers	$10,581 95	$7,706 19
Freight	15,119 37	12,784 07
Sundries	974 33	947 83
Total	$26,675 65	$21,438 09
Increase	$5,237 56	
Total since Jan. 1	$150,991 98	$120,417 45

In consequence of a change in the contract with the Joliet road, their proportion is included for both years.

The earnings of the Galena and Chicago Union Railroad for the 2d week of February, 1863, were $31,078 74
Same week, 1862 27,740 66
Increase $3,338 08

The earnings of the Cleveland and Toledo Railroad for the 2d week of February, 1863, were $24,272 00
Same week, 1862 34,439 00
Increase $10,167 00

The earnings of the Chicago and Rock Island Railroad for the 2d week of February, 1863, were $22,106 00
Same week, 1862 21,175 00
Increase $10,931 00

The earnings of the Illinois Central Railroad for the 2d week of Feb'ry, 1863, were $64,000 00
Do., 1862 35,000 00
Increase $29,000 00

The earnings of the Michigan Central Railroad for the 2d week of Feb., 1863, were $60,888 70
Same week, 1862 42,584 49
Increase $18,304 21

The earnings of the Toledo and Wabash Railroad Company for the 2d week of February, 1863, were $24,240 84
Same week, 1862 11,983 42
Increase $12,257 42

The earnings of the Chicago and Northwestern Railway for the 2d week of February, 1863, were $16,273 67
Do., 1862 10,472 23
Increase $5,801 44

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week of Feb., 1863, were $18,595 88
Same week, 1862 16,021 50
Increase $2,574 38
